Flower Market Reports

(Continued from page 711)

Business during the past week was not as good as expected. With the thermometer below 30 degrees it was expected that things would begin to boom, but such was not the case. The Pure Food Show called for a considerable amount of cut flowers and plants and a number of large weddings added to the week's work. The Bane-Roosevelt and the Easterday weddings consumed over a thousand chrysanthemums and a large number of American Beauties and other stock. These latter are coming in fine shape and meet with a ready demand. There are lots of chrysanthemums on the market but they are moving at low figures. Roses are fairly plentiful and are of good quality. Lilies are in small demand and not many are being shipped into the city which means that few are lost through being unsalable. Orchids are a little more plentiful and selling better. In the case of carnations the demand equals the supply and the stock is improving daily, while greens are hanging fire. Sweet peas are starting to come in but in limited quantities. The amount of Hudson River violets is small in quantity but good and the S. S. Pennock-Meehan Co. are showing some exceptionally fine stock. Lily of the valley is moving well.

OBITUARY.

John J. Murphy.

John J. Murphy, employed by the South Park Floral Co., New Castle, Ind., died at his home on Oct. 28.

Andrew Thurston.

Andrew Thurston, father of the manager of the Boston Flower Exchange, died at his home in Dorchester, Mass., on Nov. 4, aged 71 years. Two sons and four daughters survive him.

Henry Angermuende.

Henry Angermuende, employed for many years by J. M. Thorburn & Co., died on Nov. 10. He began in their employ as head porter and finally had charge of their tree-seed department, in which capacity he proved very efficient. He was a German, of very good education, absolutely reliable and one whose demise will be much regretted.

Elijah Huftelen.

On Oct. 26, Elijah Huftelen died at his home near LeRoy, N. Y., after a short illness. He was born near LeRoy in 1838 and was engaged in growing stock for the florist trade. He made a specialty of lilies and both imported and exported bulbs and plants. Two sisters and one brother survive him. George C. Richmond succeeds him in business.

John R. Haldeman.

John R. Haldemann, organizer of the Southwest Horticultural Society, and an authority in Missouri on orchard subjects, died in Springfield, Mo., aged 81 years. Mr. Haldeman was born in Hamilton County, O., but much of his life was spent in Bloomington, Ill. He was a close friend of Abraham Lincoln, and an inventor of some note. An orchard sprayer which he first perfected is widely used.

Stephen Taplin.

Stephen Taplin, retired florist and nurseryman, died at his home in Detroit, Mich., on Oct. 9. He was born in Overton, Hampshire, England, about 1833 and came to this country when about 35 years of age. He had been a resident of Detroit for many years, having greenhouses at 962 West Fort street and a nursery of five acres in another section of the city. He is survived by a widow, one daughter and two sons.

Peter T. Devoy.

On November 6 Peter T. Devoy died at his home, 40 Worrall avenue, Poughkeepsie, N. Y. Mr. Devoy was a florist well known throughout the state. He was born on the Morse place on the South road, Poughkeepsie, where his father was employed for a number of years. His father established the firm of Thos. Devoy & Sons, which Thomas carried on after his father's death. He is survived by a widow, one daughter and two sis-

FOR SALE

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 215-217 Havemeyer St., Brooklyn, N. Y.

ters. Mr. Devoy was a member of the S. A. F., and Dutchess Horticultural Society.

G. H. Pieser.

The death of Gabriel H. Pieser, which has been hourly expected for many weeks, came to end his suffering November 14th, at 3 A. M. For twenty years he had been engaged in the wholesale commission business in Chicago with his brother, E. E. Pieser, whose career as a florist doubles in point of years that of his own, and the failing health of both has been a source of deep regret to their associates in business.

Gabriel H. Pieser was born in Chicago 57 years ago last May and has made this city his constant home. He was president of the firm of Kennel Bros. for many years till forced by ill health to give it up to his brother and was last seen at the old place of business about September 1st, since which time he has constantly failed.

Mr. Pieser leaves a wife, a son, G. H. Pieser, Jr., a mother, two brothers, E. E. and E. E. Pieser, and two sisters, Mrs. J. J. Mitchell and Mrs. H. J. Metz.

The funeral took place Thursday, at 10 A. M., from the residence, 4447 Indiana avenue, and interment was in the family lot at the Jewish cemetery

LORD & BURNHAM COMPANY'S
NEW PHILADELPHIA
MANAGER.

On Nov. 10, 1911, D. T. Connor, who has been associated with Lord & Burnham Company's Philadelphia office for the past few years, resigned his position.

As we announced in these columns a month or so ago, Mr. Montague C. Wright, who for the past seven years has been associated with Lord & Burnham Company's New York office, was at that time made manager of the Philadelphia office and southern territory. Mr. Wright, as an old Philadelphia boy, was for several years in the employ of Frederick H. O'Neill, who was then sales agent in that section for Hitchings & Company's greenhouses. Mr. Wright is a

MONTAGUE C. WRIGHT

man of broad greenhouse experience, having handled some of the largest contracts of the firm in both the commercial and private field. Having started in the business by doing the practical sides of the work, he has the advantage of a thorough understanding of its every detail. In planning and designing various lay-outs he has been particularly successful.

Associated with Mr. Wright will be Mr. Woodward, who, in his recent position as manager of the pipe frame construction department at the Company's Riverton factory, has had exceptional opportunities for acquiring experience in both the manufacturing and selling phases of the greenhouse business. With such a combination of sales ability the Company's friends in the Philadelphia section and the great south will certainly be well taken care of.

Sharon, Pa.—Peter Olsen, formerly with the Sea Cliff Nurseries, Sea Cliff, N. Y., has leased the Idlewild Greenhouses.

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Each	Dos.	100
10	20 in.	\$1.45	\$10.00	\$130.00

GREENHOUSE GLASS

OUR PRICES WILL PROVE THIS.

CHICAGO, ILL.

Selecting ventilating apparatus for greenhouses is a serious proposition. To be able to make an intelligent selection, it requires a careful study and a thorough understanding of the different types.

Investigation is all we ask for on your part. It is simply an opportunity to explain and demonstrate the merits of our construction.

THIS is the M. A. S. Hewett range at Ringwood, N. J. Some of the houses were built on the old foundations so the general arrangement and layout was simply duplication.

It's one of those private ranges with a thorough business look about it.

Just straight away practical growing houses—"no fuss or feathers."

Perhaps that's the kind you want.

If you don't, we can plan you one that is as ornamental as you wish. Better have them curved eave. We have got ours down to a fine point now.

There's no better house built—and seldom as good. Better write us. Have you the catalog—the 104 pager? Want it?

ELIZABETH, N. J.

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 335 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis Bostoniensis and Piersoni, 6-in. pots.....\$0.50 each

Nephrolepis Elegantissima, Piersoni, Bostoniensis, and Harrisii, heavy 8-in. plants.....\$1.00 to 1.50 each

Nephrolepis Elegantissima, Bostoniensis, and Harrisii, heavy 10-in. plants 2.50 each

CHAS. H. TOTTY, MADISON, N. J.

THE LATEST SILVER MEDAL ROSE

The new Sargent rose, originated by Jackson Dawson, now offered for the first time for fall 1912 delivery

This seedling combines the good qualities of R. Wichuraiana, R. Crimson Rambler and R. Baroness Rothschild which have been used in its evolution. The flowers are single, about three inches across, pale rose in color and produced in greatest profusion in pyramidal clusters all along the strong branches, blooming from the middle of May till end of June. The foliage is a beautiful glossy green and remains in good condition till late fall.

As this stock is limited book your orders early. \$1.50 each

Physostegia

Physostegia, syn. Dracocephalum, or—as the common name of this hardy herbaceous plant genus reads—False Dragon-Head, is one of our best tall-growing midsummer perennials. Of erect slender growth, attaining a height of from 1½ to 4 feet, it is an ideal border plant, also well adapted for the wild flower garden. The foliage, of extraordinary substantiality, on thrifty plants shows a dark vivid green. Best known in gardens both here and abroad is the original form *Physostegia virginica* with its white flowering descendant, *P. virginiana alba*. Both flower during July and August, producing attractive terminal spikes of thickly set blossoms of rosy-lavendar or pure white. Their value as effective material for filling vases is increased by their wonderful lasting quality. The flowers in the vase shown on our illustration had been cut nearly a week before the picture was taken and remained fresh in appearance for several days thereafter. In formal gardens and on the mixed borders on lawns and in parks physostegias should be planted rather closely so as from the very start to form a thick mass of stalks. The roots of this perennial have to some extent a rambling habit of growth and for this reason physostegias can be very easily propagated by divisions. Of more recent introductions I mention *Physostegia alba grandiflora* representing a decided improvement over the common white form, and a low growing variety listed as *nana compacta* and said to be freely branching. The fact that the number of tall midsummer flower-

PHYSOSTEGIA VIRGINICA

ing species of hardy perennials is limited places physostegias in rank with the aconitums, helianthus and philoxes. They should by all means receive due consideration in all cases where herbaceous plantations of some extent are planned for they help to give the total aspect variety when it is needed. According to my observation an open sunny exposure is preferable in the North while south of New York I have found physostegias thrive equally well in partly shady positions. Care must be taken that the plants receive sufficient water during prolonged hot and dry weather.

Northeast Harbor,
Maine. *Richard Rothe*

New Chinese Plants in England

It has occurred to the writer that a few remarks concerning the Chinese plants introduced by Mr. Wilson and their behavior in English gardens may be of interest to American readers as all the plants of this collection were received from the Arnold Arboretum, Boston, Mass., through the generosity of Professor C. S. Sargent, Director of that famous institution.

To illustrate what has been achieved with these plants and the high estimation in which they are held in this country we might refer our readers to the two groups which have been exhibited before the Royal Horticultural Society in two successive years, and on each occasion the highest award of the Society, namely a gold medal, was given. It would be impossible here to speak of the merits of each variety in such a rich and varied collection but it is most gratifying to find that nearly the whole of them will stand the severe winter of 1910 without the slightest protection in the open, and I think there is every reason to believe that the large majority will prove absolutely hardy both here and the United States if proper attention is given their younger stages.

Many of the plants of this collection were transplanted in their early stages of growth and have now made fine specimens. Some of them might be made of *Ailanthus glandulosa*, a new *Paulownia*, *Cedrela sinensis*, *Eucommia neriifolia* a new hardy rubber tree, several of the new *Clerodas*, *Fuchsia*, *Exochorda Giral-*

di—a magnificent species—*Viburnum rhytidophyllum*—a remarkable broad-leaved evergreen—and *V. cylindricum*, *Cotoneaster*, both evergreen and deciduous being very promising, *Lonicera tragophylla*—a handsome climbing plant—and *L. Maackii*, a fine bush specimen. Many of the *Rubi*, of which there is a great variety, are very handsome and form magnificent specimens. Many of the climbers are also splendid decorative garden plants especially *Clematis montana rubens* and *Wilsoni*, the *Vitis*, *Actinidas*, *Schizandras*, *Aristolochias* and *Cocculus*. *Hydrangeas* are numerous but *H. Sargentii* is the most striking of all with remarkable foliage. The collection is particularly rich in beautiful new flowering shrubs and also in those whose foliage colors brightly in the fall. The *Rubi* and others are striking objects in the winter because of the beauty of their stems. As the whole of this collection has been raised from seed the merit cannot hardly be bestowed upon the collector, F. H. Wilson, for the care he has bestowed in collecting material and for the careful manner in which the plants have been cultivated and shipped to this country. The collection is a very small one but it is a most valuable one and it really seems as if it had appeared in the world.

Politics versus Horticulture

The result of the recent annual election of the Massachusetts Horticultural Society has created a sensation. For the past ten years a quiescent state has prevailed between the former warring factions of the Society, which has been followed by a greatly improved financial condition and phenomenal progress in the horticultural work, not only of the Society, but of the community. Peace and progress have prevailed in horticultural Boston for a decade, and the wanton act which has ruthlessly precipitated the Society into its former chaotic wrangle is greatly to be regretted. Had there been any principle or important issue at stake, there might be some excuse, but there was neither.

Personal ambitions may have been accountable for the unusual appearance at the polls of half a hundred or more members who are not accustomed to take any interest in the society's affairs. That a horticulturist of such standing and value to the Society as Mr. Peter Fisher should have failed of re-election as trustee when he really had the largest support of the regular voluntary voters is a blow at the vital interests of horticulture that is deplored and strongly resented. The end is not yet.

What have the exhibitions taught?

The exhibition season is now on the wane. What have we learned from the experiences of this year's shows? What deductions can be drawn that will be valuable for future guidance so that the direct usefulness of these events shall be enhanced and that the best results may be attained. Our readers' answers to this query would probably be as diverse as their own individuality. Should there be any who have learned nothing, then so far as they are concerned the exhibitions have to that extent failed in their mission. Exhibitors—whether successful in prize winning or otherwise—managers and promoters, judges, visitors whether professional or of the general public—for each and every one the experience of each year should impart its lesson—knowledge not before possessed—and for the future, purposes and aspirations of which the stimulating motive is a desire for advancement. Now is the right time, while the memory is fresh, the critical spirit still active and people are yet in the mood to listen or to read, to tell your friends frankly and without prejudice, where and how in your opinion improvement may be made. The subject is surely a prolific one.

What is "arrangement?"

While penning the foregoing we recall a quite lively discussion, to which we recently had the pleasure of listening, between some observant and progressive-spirited gentlemen as to the justice of the judges' decisions in making their awards to exhibits "arranged for effect" on a certain occasion. A fair unanimity was expressed as to the number of points variously credited as per the scale by which the judges had been governed, excepting as to the item of "arrangement" which in the case under discussion was, of course, a weighty factor. On the judges' figures on this point the debaters split and the basis of their contention was their several interpretations of the word "arrangement." Now, one great aim in all rules of competition and judging should be to make everything so clear that the possibility of misunderstanding on the part of exhibitors, judges or public should be reduced to a minimum and here seems to be a place where there is room for improvement. To a man of a certain temperament, color harmony will be of paramount importance and no group of plants or flowers, however well placed otherwise, will gain his commendation if it so be that his color sense is shocked. To another it may be mainly a question of form—precise balance or rambling irregularity? To an other the compliance with certain rules as to the natural habits of plants—as, for instance, the placing of an epiphytal species on the ground level and a terrestrial species in an elevated position in an orchid group, would be faulty and inadmissible arrangement in the estimate of the last named—and so on. In view of these facts and the dissatisfactions which have developed at times why not drop this ambiguous word "arrangement" from our scales of points and adopt subdivisions which will tend to eliminate these sources of trouble. Scales of points are a great advance over the old impressionist method of judging, but that they are not yet perfect will, we think be generally admitted.

Seasonable Notes on Culture of Florists' Stock

ALLAMANDAS

It is time now to discontinue all syringing of these plants, and admit more air, which will be essential at this stage for the ripening of the wood. Be careful not to give too much water at the roots even if the plants do flag considerably. Just enough of water should be given to keep the shoots from shrivelling. Let this ripening process be done gradually, allowing the soil to get a little drier after each time, before water is given again. The foliage will after a while turn yellow and fall off. During this restful treatment allamandas should not be exposed to a lower temperature than 60 degrees at night as they are tropical plants. For the ensuing six or eight weeks they can be kept under these conditions and by holding some of the plants back and starting them late they can be made very useful during the summer months.

ASTHEE JAPONICA

These plants which are now arriving should be promptly unpacked and heeled in a frame, giving them a covering of straw or long manure to keep the ground in a condition that will facilitate their removal when needed. No forcing of spiraeas should be attempted until after the holidays. They can be forced into flower in 8 or 9 weeks with a good deal of heat, but it is better to allow them 10 to 12 weeks and you will have better plants with finer bloom when not hurried with too much heat. Start with a temperature of 45 degrees at night and you can keep on increasing the temperature until it has reached 60 degrees. For potting you can use 5, 6 or 7-inch pots or whatever size that will hold the roots comfortably. Before potting give the clumps a dipping in a tub of water so the ball will be soaked thoroughly as ordinary watering will not easily penetrate the thick mass of roots.

COVERING HERBACEOUS BORDER, ETC.

For a protective covering of your herbaceous border there is nothing better than dry forest leaves, loosely scattered through and over the hardy plants and some coarse manure spread over the leaves to prevent their being blown away. This covering need not be done until the ground has frozen to a depth of several inches. All the beds holding outdoor bulbous plants such as lilies, Holland bulbs, etc., will need a good surface covering of litter or manure spread evenly over the beds. All evergreen shrubs other than conifers that are for the embellishment of public and private grounds can be carried through the winter in good shape by a covering of straw, hay, or tree leaves of ample thickness to keep hard frost away from their roots. Rhododendrons that are planted in a favored position such as under wide spreading trees well sheltered from high winds by thickets of shrubbery will not need much protection, but those that are planted in an exposed position should be screened or have a partial protection with some light loose material against the unwelcome rays of the winter sun.

CYCLAMEN

Plants that are intended for flowering at Christmas should have the earliest flowers showing color now. Every additional flower carried by these plants will tend to make them more salable, so give them a location as

near the glass as possible. To keep the foliage in good shape, which is a desirable attribute of every plant, they should be syringed often so they will have plenty of room to develop. Pot the plants in a symmetrical form. Those that are well advanced can be kept in a temperature of 50 degrees, but those that are rather slow to flower should be given 55 degrees with full light so as to send them along, but do not exceed this heat, which would make them draw up and become weak. Now that we have cool weather they will not need any more shading, except during a short warm spell when a little cheesecloth will break the direct rays of the sun. They like a free circulation of air at all times. Fumigate on the first sign of green fly or thrips. Plants that you are holding back for spring flowering can be kept in a house with a minimum temperature of 40 degrees at night. When the young seedlings have made a growth of two or three leaves, they can be transplanted into flats. Use a light compost of one-half of loam, one-half leaf-mold, with the addition of some sand. Keep these little seedlings in a house that stands 60 degrees at night as they like a warmer place than the old plants. So that they will not draw and spindle they should be kept on a shelf near the glass.

LILIUM SPECIOSUM

When the bulbs arrive pot them up into 6-inch pots or what is still better use 8 or 9-inch pots, using three bulbs to the former and five to the latter. Use a porous loam that is liberally enriched with old manure. No forcing will be needed; it will be more of a problem to retard, so keep them out in a deep frame or pit as long as possible. When they have made two or three inches of growth place them in the coolest house you have where they can have abundant ventilation. Water will have to be administered with discretion when grown in this cool temperature until the days become longer and the sun stronger. Keep your temperature anywhere from 38 to 40 degrees and this will hold them back until late.

OUTDOOR ROSES

Beds of outdoor roses are better for having a liberal coating of long manure around the base of the plant, forming a cone about a foot high, and then dry leaves strewn thickly among them after the ground is somewhat frozen. Tender climbers relied upon for next year should have all the new shoots carefully bent down and buried with or without salt-hay, as earth is the cleanest and altogether the most reliable material for covering these plants during the winter. Even beds of the more tender sorts of everblooming roses can be safely carried through the winter under a cover of fresh soil. The strongest growths should be weighted down with something to hold them, and then loose soil shoveled in between and up the plants to the depth of 8 to 10 inches. After this has had a few hard frosts give them a coating of sand or leaves about a foot deep.

John J. M. Farrell

Mr. Farrell will be on the following evenings for a course of lectures on the following subjects: *Stagnation, Manure, and the Treatment of Plants, Pot Plants, Trees and Shrubs.*

G. H. Parsons lectures on Fruit and Vegetable Culture in Glass Houses next week. In next week's issue he will give the following subjects: *Stagnation, Manure, and the Treatment of Plants, Pot Plants, Trees and Shrubs.*

THE EXHIBITIONS

FRENCH CHRYSANTHEMUM SOCIETY.

On October 26th, the above named Society held its 16th Annual Show and Congress at Biarritz, France. The show was practically organized by M. Rodrigues, President of the Gascony Golf Club, with the assistance of the Bayonne Horticultural Society. Our heartiest thanks as well as those of all the visitors are due to that gentleman for his genial and sympathetic reception. The festivities were of the most hospitable character and lasted during four days.

The show was international in character. M. Martinet and M. Blot, both of Paris, were the Presidents of the Jury. The Vice-Presidents were Señor Alfred de la Pena of San Sebastian who represented Spain and Mr. Harman Payne who did the same for England. The Secretary General of the Jury was M. Philippe Rivoire of the French Chrysanthemum Society.

The judging being over the Jury repaired to the Grand Hotel fronting the sea and there in a lovely saloon with every pleasant surrounding were entertained to a sumptuous lunch. M. Martinet presided. M. Rodrigues offered a cordial welcome. Other speakers were M. Rivoire and Mr. Harman Payne. The party then returned to the Casino for the opening ceremony, at which the orchestra out of compliment to the foreign visitors played the English and Spanish national anthems and likewise the Marseillaise.

The entrance to the Casino is through a gateway in an ornamental railing which encloses a neat little garden. Then the visitor finds himself at the entrance door and passing through the vestibule gets a splendid view of the show from the top of the grand staircase consisting of a double flight of steps.

The first grand prize of honor was awarded to Vilmorin Andrieux & Co. for two fine collections of plants in pots and a border on one side of the room. They were both edged with low dwarf pots of pompons in front in two lines. The border contained some prettily trained plants, pyramids, etc.

The next important lot came from Messrs. Gelos Freres and Mme. Begue who staged a beautifully decorated side hall with the table decorations. We certainly never saw the like. From the centre chandelier there were festoons of vine leaves having electric lamps, and these festoons were distributed round the four corners of the hall. Great attention was paid to the table cloths, lamp shades and glass ware on the tables. Everything, even to the flowers, were of the same shade. There was a large centre table decorated with white roses and around it thirteen circular tables in which each had its special feature of other flowers in life or the valley, roses, ageratum, carnations, orchids, etc. The window of this hall was decorated with cut flowers and cut chrysanthemums on pedestals at intervals. The second grand prix d'honneur was awarded for this truly grand display.

The third chief prize was awarded to M. Rodrigues who staged a most meritorious group. We noted among

them some very fine blooms. He was also the exhibitor of several other groups of dahlias, roses, etc., which contributed materially to the beauty and success of the exhibition. Another excellent exhibit was by M. Bonnet.

Just off the main corridor in a side passage we saw a collection of trained chrysanthemums in all sorts of quaint forms, a practice much in vogue with French growers just now. Other exhibits came from M. A. Roumagnac, who had a fine lot of cut blooms also a tall stand of roses. Some good cut blooms came from M. Pieudrot (gard. to Comte F. de Bearn).

Going casually around the show we should say that big exhibition blooms were not so numerous as would be seen at an English show. But this was no defect for the happy way in which every exhibit was arranged more than compensated for what would have been mere lumpiness. As is usual in France there were no show boards and no tables. Briefly we may say without dealing with individual exhibits that the best flowers from the English point of view were Bryant's Beauty, Lt. Col. Ducroisit, Australie, Maprovince, Alfonso XIII., Mrs. C. H. Totty, Rayonnant, Sapho, Miss Dalton, Mr. R. F. Felton, Lady Hopetoun, Ferd. de Bievre, Paul Randet, Aut. Marmontel, Nathalie Bourseul and a few others.

Quite a number of exhibitors entered in the classes for new seedlings. The prizes awarded were: Prix d'honneur to the Calvat Establishment (M. Remy, director); prix d'honneur to Alfred Chabrier; medals and honorable mention to Messrs. Dolbois, Prioux, Galinier, Brondel, Heraud, Andol, Lacroix, Lafitte and Raillon.

Floral art entries were well done. They nearly all came from the florist firm of Gelos Freres of Biarritz. Several of their exhibits were really choice. There were several interesting collections in the miscellaneous classes. M. A. Roumagnac showed *Nephrolepis* in variety; M. Larsus staged *Begonia Rex* and *B. pictavis*. There was also a good lot of carnations staged by Labaste Brothers.

Exhibitors of dahlias made a rich contribution to the show. We must refer to the large and varied collection of Messrs. Labaste Freres, mostly cactus varieties. M. Rodrigues had a long collection arranged on the ground level of cut blooms that practically carpeted the floor.

Fruit and vegetables were shown in moderate quantity.

C. HARMAN PAYNE.

S. W. Strickland, gardener for Miss Caroline Hazard, Oakwood greenhouses, was awarded the first prize in the professional class for the collection of chrysanthemums at the annual chrysanthemum show of the Silent Circle of King's Daughters, held at Peace Dale, R. I., Nov. 9. The second award was made to Arthur Dixon, gardener for Howard G. Hazard, proprietor of the Hilly House greenhouses. A fine showing was made in all classes. The exhibition of plants and cut flowers was in charge of Miss Florence Northup and Charles Yost. The judges of the professional classes were Mrs. W. G. Gould, Mrs. Arthur Dixon and Miss Florence Northup.

ELBERON HORTICULTURAL SOCIETY.

Editor HORTICULTURE:

Attention having been called to the report on the Third Annual Chrysanthemum Exhibition of the Elberon Horticultural Society held at the Casino, Asbury Park, N. J., Nov. 7th and 8th, 1911, which appears in your issue of Nov. 11th, and covers the subject up to the opening of the Exhibition at 7 o'clock P. M., Nov. 7th, it is surmised that supplemental comment may be of interest.

The exhibition was opened by a short address by the Mayor at the conclusion of which checks were presented to the winners of the Asbury Park Special prizes, \$100.00 1st, \$50.00 2nd and \$25.00 3rd, the excellent judging from which there was no dissent enabling the Society to do this.

To the mild criticism of the closed classes there can be no serious objection, but the schedule was prepared early in the season for the customary local show and we have found the closed classes to be a sensible arrangement based on a fairly good judgment of human nature. Our connection with the Municipal Bureau of Asbury Park, and the addition of the fifty bloom class was not arranged until a very short time previous to the exhibition. But a young and vigorous society having attained one success and feeling the throb of virility, have concluded to make larger and more attractive classes, all of which will be open.

As a matter of course, outsiders won in the open classes. It is to be hoped that your correspondent does not think us capable of enticing exhibitors to our show by offers of liberal prizes only to speed our parting guests with empty purses. And your correspondent should know that his hope for our success has been realized, for from that scattered population of a dead city upward of four thousand to be precise, 4,074 people helped to make the Casino one bright oasis, attendance the first day being 1,128, and the second day 2,946.

The Society feels elated because of an impression that they have contributed to the accomplishment of one of the purposes generally set forth in the preamble of horticultural organizations, even though it is a modest beginning.

Very truly,

BENJAMIN WYCKOFF, Sec.

THE MILWAUKEE SHOW.

This exhibition, which has been widely advertised as something which would be exceptional in quality and lay-out, opened in the Auditorium on the evening of November 15, a summer-land picture in a very wintry environment. The planning and arrangement was under the management of a committee composed of H. V. Hunkel, chairman; C. C. Pollworth, J. G. Heitman, W. C. Zimmerman, A. Leidiger, C. Dallwig, A. F. Kellner and N. Zweifel, and they are deserving of much credit for the excellent scheme which they carried out with taste and fine finish. Pergolas, arbors, fountains and novel lighting effects were among the attractions and the throngs of visitors were well pleased with it

all. The first day was devoted to chrysanthemums especially, the second to carnations and the third roses. There was quite a strong representation of Chicago people among the exhibitors and prize winners. The banquet table decoration competition brought out eight fine displays which are described as follows, for the opening day:

Currie Bros. Company's exhibit in this class was a table laid for eight with decorations of Killarney rose buds in white china baskets and corsage bouquets and boutonnières to correspond. James M. Fox & Son, table in color scheme of yellow and white, laid for twelve, with candelabra set in vases containing small yellow flowers. Natural fruit centerpiece, Edelson-Leidiger Company, dinner table set for ten, centerpiece of cluny lace, ferns and asters, cut glass candlesticks. W. C. Zimmerman, reception table with centerpiece of pink ribbon, pink roses and ferns; candelabra of silver with pink roses. M. A. McKenny & Co., centerpiece of tea roses, lilies of the valley, ferns and bouvardia, with corsage bouquets to correspond. A. M. Deitmann & Son, table set for after-theatre luncheon, with centerpiece of white carnations and ferns, the only oblong table shown. E. Welke Company, centerpiece of cluny lace and pink roses and sprays of a small white flower, three small white earthenware vases, representing gates, with the posts serving as vases for pink rosebuds. Walter M. Maas & Co. used pink Killarney roses effectively with a touch of white pompon chrysanthemums.

It was stipulated that the table decorations should be changed three times during the five days of the show. No competitive awards were to be made, but a liberal gratuity was promised for each table complying with the conditions.

CINCINNATI FLOWER SHOW.

This show was reported up to time of our going to press last week. We have now the following additional notes:

On Wednesday the rose awards included Packman Bros. 1st in all the 100-bloom classes, My Maryland winning in the "any other color" class, South Park Floral Co. and P. J. Olinger each won one 2nd. In the 25-bloom classes, Packman Bros. won all the 1sts also, Olinger one 2nd, and So. Park Floral Co. one 2nd. E. G. Hill Co. won the silver cup for 25 roses variety not yet in commerce with 8 roses.

On Thursday, table decorations with flowers. Throve Shop 2nd, and P. J. Kyrk 2nd. On Friday, buds, bouquets with Hardesty & Co. 1st and Kyrk 1st handle bouquets, Hardesty 1st, Kyrk 2nd and The only 3d, passed up the list of awards.

On Saturday all prize winners were auctioned off to the public. Milton, Alexander, Lion & Co.'s representative, proved a clever auctioneer. Win. Murphy's work as superintendent was highly complimented on all sides.

On Thursday evening the local club entertained with a luncheon and smoker. Pres. G. S. Adams welcomed the guests, and Chas. H. Hartman acted as toastmaster. Among those who responded in toasts were R. Vincent, Jr., H. E. Phillips, Geo. F. Gause, R. Witherspoon, Geo. Richmond, G. W. French, Irwin Bartholomew, Otto Koenig, I. W. Page, L. M. W. Swarth, I. Rosnosky, W. W. Coles, Henry Schwarz, G. C. Venable.

CLUBS AND SOCIETIES

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of this Society was held on the 21st inst. at Horticultural Hall, Philadelphia. Routine matters in connection with the recent flower show took up most of the time. These were of no interest to the general trade and need not be commented on here. The nomination of officers also took place, and resulted as follows:

President—C. B. Newbold.
Vice-Presidents—Randal Morgan, Dr. J. Cheston Morris, Henry F. Mitchell, Robt. Craig, J. Otto Thilow.

Treasurer—S. W. Keith, F. J. Mitchell.

Secretary—David Rust.
Professor of Botany—Stewardson Brown.

Professor of Horticultural Chemistry—Dr. John Marshall.

Professor of Entomology—Dr. Henry Skinner.

Professor of Biology—Dr. Ida A. Keller.

Executive Council—Robt. C. Lippincott, John W. Pepper, Edw. A. Schmidt, J. Otto Thilow, James Boyd, Wm. Kleinheinz, Dr. Robt. Huey, John H. Dodds, John McCleary, Wm. Robertson, Xavier E. E. Schmidt, S. W. Keith, Dr. J. Chester Morris, Joseph Hurley.

TARRYTOWN HORTICULTURAL SOCIETY.

The regular meeting of the Tarrytown Horticultural Society was held on Friday evening, Nov. 17th. President Brunger occupied the chair and there was a good attendance. Two honorary members were elected and two applications for membership were received. The competition in roses for the prize offered by John Brunger was keen and a number of fine vases were shown, the prize being awarded to John Elliot—who won with a vase of My Maryland rose. A cultural certificate was awarded to Edward Thretheway for a vase of pink chrysanthemums. J. W. Smith was accorded a rising vote of thanks for the capable manner in which he had performed his duties as manager of the fall show. Messrs Scott, Brewer and Jamieson acted as judges.

MASSACHUSETTS HORTICULTURAL SOCIETY.

At the annual meeting of this society on Saturday, November 18, an unusual attendance was secured, the purpose being to insure the election of certain candidates for the board of trustees. Officers were elected as follows: Charles W. Parker, president; Walter Hunnewell, vice-president; Richard M. Saltonstall, treasurer; Thomas Allen, Harry F. Hall, Thomas Roland, Charles S. Savage (for three years), trustees; Wilfred Wheeler, delegate to State Board of Agriculture; Robert Cameron, Kenneth Thompson, Walter G. Kendall, C. Minot Weld and Frank Wheeler, nominating committee. The secretary and treasurer will be appointed later.

The sum of \$5000 was appropriated for prizes and gratuities for the year 1912.

FLORISTS' AND GARDENERS' CLUB OF RHODE ISLAND.

F. A. Appleton of Providence was elected president at the annual meeting held in Swart Lodge Hall, last Monday evening. President Robert Johnson presided over the meeting which was a banquet with entertainment and very well attended. Reports of an encouraging nature were submitted by the officers and various committees showing that the club is in a flourishing and satisfactory condition. The committee on co-operation with the Rhode Island Horticultural Society in connection with flower exhibitions in its report said that it had discharged its duties at the fall show held three weeks ago with good success. As a result of the harmony and co-operation it was reported that the outlook for even greater success for next season was especially bright. The election of officers for the ensuing year was as follows: President, E. A. Appleton; vice-president, Cornelius Hartstra; secretary, W. E. Chappell; treasurer, James Hocky; trustees, H. C. Neubrand, Cornelius S. Hartstra and James Dillon; librarian, Henry C. Bout. The matter of holding a banquet, as has been the practice in the past, was approved, and a committee consisting of President E. A. Appleton, Alexander Macrae and Michael Sweeney were chosen to carry out the arrangements and report thereon together with the date at the next meeting. S. A. G.

ARE YOU WITH US?

Members and Friends of the Sweet Pea Society of America:

Plans have been made to hold our annual meeting and exhibition jointly with the Massachusetts Horticultural Society on July 13th and 14th next. As president of this society it is my desire that it should be the finest exhibition of its kind ever held. Features are already assured which have never before been attempted. If you have a piece of land available where you could grow some sweet peas for this show you would be helping a good cause at slight expense. A committee is now at work on a preliminary schedule which should be ready for distribution about Dec. 1st so that those interested may have ample time to study the features for which they wish to compete. There will be special prizes for Seedsmen, Gardeners, Commercial Growers, Retailers, Amateurs, School Children and School Gardens.

In behalf of the Sweet Pea Society I would like to have you all enthusiastic in your vicinity. If you could get the cottagers and schools and your local paper interested it would mean increased business for you in time to come. We have already received the support and co-operation of the Massachusetts Horticultural Society, the florists' and gardeners' clubs of Boston, the gardeners of Lenox, Bar Harbor, the North Shore and other places. There is no doubt as to the outcome of this effort and very little done now means a much greater success. Trusting you will act in this matter favorably, I am,

Respectfully yours,
WILLIAM SIM, President

INTERNATIONAL CHRYSANTHEMUM CONGRESS AT BIARRITZ.

On the afternoon of the opening day the Jury and Congressistes were officially received in one of the salons of the Grand Hotel Biarritz. M. Rodrigues, the genial President of the Show, the Mayor and others warmly welcomed the visitors. On the following morning the first sitting was held. M. Rodrigues proposed that M. Viger, Senator and President of the French Chrysanthemum Society, should take the chair. The Bureau of the Congress was then constituted, the following gentlemen being invited to a seat on the platform: Messrs. Rivoire, Rosain, Dubreuil, Chanbrier, Rodrigues and Harman Payne. Among the audience which was numerous we noticed a good many of the well known French chrysanthemum men.

The proceedings commenced by M. Blot being called upon to read a paper on the subject of a pocket edition of the *Repertoire des Couleurs*. A handy pocket edition would be a valuable work for florists and its utility was fully discussed. The next paper was by M. Decault on the most appropriate time for "taking the bud." The third paper was read by D. Chiffot, who dealt with the insect pests and diseases that attack the chrysanthemums. M. Crepin, alluding to the heat of the past summer, stated that all his plants grown in pots out in the open were spoiled, the buds being quite abortive, those grown under shelter being better. Mr. Harman Payne stated that in America, although the chrysanthemum was a hardy plant, it was grown in greenhouses and in benches and that the English grower, Mr. Wells, had partly adopted the practice and was satisfied with his results. Mr. Payne thought this method might prove advantageous to French growers, especially those who lived in the south. D. Chiffot read several letters from growers complaining of the effect of the dry summer and great heat on their plants. There were two papers read on the subject of "Manures for Chrysanthemums."

Medals were voted to various members for past services and it was resolved that the town of Nantes should be selected for the Congress of 1912.

The same evening a banquet was held at 8.30 P. M. M. Viger presided. A large company of distinguished local and other visitors attended the gathering which took place at the Grand Hotel. The Mayor of Biarritz, M. Martinet, M. Rodrigues, M. Rivoire, Mr. Harman Payne and others were called upon to speak.

On Saturday, October 28th, about 80 of the Congressistes assembled at the station to go to Hendaye, a little seaside place on the Spanish frontier. The party were rowed across the Bidassoa in boats to visit the old Spanish town of Fuenterrabía, returning the same way to Hendaye. Here at the newly erected Hotel Eskualduna the party were entertained at luncheon by Mr. Martinet. Train was then taken for San Sebastian where the sights were seen, including a visit to the King of Spain's Palace of Miramar and its gardens. Our friends and colleagues being mostly light-hearted sons of the sunny South, beguiled the journey with singing their mountain

songs in patois, old and young, men and women, joining in most heartily.

Sunday was the last day of these festive proceedings. M. Rodrigues presided at the morning session and after the distribution of the prizes we went off to Bayonne and spent the day with M. Alfred Chanbrier of Bayonne, who is a well known French raiser of new chrysanthemums.

C. HARMAN PAYNE.

A NEW RASPBERRY.

from Bulletin No. 57 of Foreign Plant Introductions, U. S. Dept. Agriculture.

In connection with Plant Introductions, Nos. 29976-29978 in this Bulletin

Rubus Sp. Chinese Raspberry

we give the above photograph of a new and interesting strain of Chinese raspberry, Plant Introduction, No. 23346, which was fruited out last season in California. Unlike introductions many years ago from India, which were disseminated widely through the country under the name of strawberry-raspberry, this strain has berries of a very pleasant flavor suited for preserving. Its greatest probable value, however, lies in its early ripening. At Chico, Cal., fruits were ripe while the standard varieties were just in bloom. Similar results were obtained in Maryland with this variety. The fruits have no bloom, are unusually large, and are very attractive. From photograph by Dr. Walter Van Fleet, Chico, Cal., April 14, 1910.

NEWS NOTES.

Concord, N. H.—A new heating plant has been installed in the greenhouses of G. J. Benedict, 25 South street.

Flushing, N. Y.—The A. L. Thorne greenhouse establishment here has been purchased by M. F. Loughman, who will rehabilitate the range tearing down a part and building new with the view of going largely into rose growing—including American Beauties—for the wholesale market.

CLUB AND SOCIETY NOTES.

The landscape gardening class in the Gardeners' and Florists' Club of Boston is very successful and well patronized this season, so that two instructors are required.

At the next regular meeting of the Buffalo Florists' Club a rare treat will be in store for the members. President McClure has managed to arrange for a debate, and together with other entertainment, a pleasant evening is assured.

The North Shore Horticultural Society, Manchester, Mass., has elected the following officers for the ensuing year: President, Herbert Shaw; clerk, James Salter; treasurer, John Jeffrey; executive committee, F. F. Brasch, A. E. Persons, J. Clark, J. Chapman, E. Wetterlow. The financial condition of the society is good. The society is desirous of having a building of its own.

The annual banquet of the Utica (N. Y.) Florists' Club was a very enjoyable affair. About 75 guests participated. An orchestra composed of members of the club rendered excellent music. J. C. Spencer officiated as toastmaster, and Dr. A. C. Beal of Cornell delivered an instructive address on the work that is being done at the Experiment Station in the interests of floriculture.

Rochester Florists' Association, at their meeting on November 13th, adopted a plan of having a display of flowers and papers read at each meeting of the winter on some topic of particular interest to florists. President George B. Hart presided. Arnold George is chairman of the committee on entertainment. He submitted the following programme of papers: December, "The Chrysanthemum," C. B. Ogsten; January, "Perennials," J. M. Keller; February, "Annuals," George Arnold; March, "Roses," Lawrence Cotter, of Jamestown; April, "Pruning," John Dunbar, assistant superintendent of parks.

Charles S. Zoller, who first brought the autichrone plate to this country from France, displayed more than a hundred views of flowers and trees, mostly in Rochester and vicinity, the photographs for which were taken by the Lumiere process of color photography. Some of the difficult subjects which had been taken were orchids at the Kimball conservatory, which were produced in their most delicate shades; bonfire on Cobb's hill; the rainbow at Niagara Falls, and the gold fish in the water at Seneca park.

A NOTED ENGLISH CHRYSANTHEMUM GROWER.

At the Paris Chrysanthemum Show which opened on November 3rd, Thomas Stevenson scored an unusual series of successes. He entered in five classes. Apart from the blooms themselves the taste displayed in their arrangement was of a high order of merit. The jury awarded him a work of art, three large gold medals and a large silver gilt medal. It is seldom that English growers exhibit in France, but the lot put up by this very well known and capable grower aroused great interest among the French visitors, and was indeed in every sense of the word an object lesson.

C. HARMAN PAYNE.

Boddington's Forcing Gladiolus

GLADIOLUS PEACH BLOSSOM.

GLADIOLUS, Colvillei and Nanus (type)

Plant some of these among your carnations, they will come in handy at any time.

	100	1000
Blushing Bride. Flowers are large, pure white with delicate pink spot. Useful for early forcing.....	\$0.75	\$5.00
Peach Blossom. The most beautiful of all the Colvillei type of Gladiolus; the color is a lovely soft pink, on the order of the Killarney rose.....	1.00	8.00
The Bride (Colvillei alba). This lovely white miniature Gladiolus makes a useful cut flower for early spring use; will stand forcing.....	.75	6.00

Gladiolus Gandavensis Hybrids

Many florists plant these in boxes, or among their carnations, in the winter. They are excellent for decorative purposes and realize good prices, either wholesale or retail. Gladiolus are a good catch-crop and take up but little room. The following are the best for this purpose:

	100	1000
America. The flowers, which are of immense size, are of the most beautiful flesh-pink color.....	\$3.25	\$30.00
Augusta. The florists' best white Gladiolus:		
First size bulbs, 1 1/4 inches up.....	2.00	18.00
Bulbs, 1 1/2 to 1 3/4 inches.....	1.75	16.00
Shakespeare. White and rose.....	4.75	45.00
May. Pure white; flaked rosy crimson; the best forcer; selected bulbs.....	1.75	15.00
Brenchleyensis (true). Piery scarlet; top roots.....	1.75	15.00
Selected bulbs.....	1.25	12.00
First size.....	1.00	9.00
Boddington's White and Light. Extra-selected bulbs, 1 3/4 inches and up.....	1.50	14.00
American Hybrids. A mixture of the choicest varieties of Gladiolus.....	1.00	9.00

SPIRAEA, or ASTILBE

	Doz.	100	1000
Astilboides floribunda	\$1.00	\$6.75	\$65.00
Compacta multiflora	1.00	7.00	65.00
Gladstone. Enormous spikes of pure white flowers.....	1.25	9.00	\$7.00
Queen of Holland. One of the finest, grand florist's variety... ..	1.25	8.50	80.00
Japonica75	5.75	55.00

SPANISH IRIS (IRIS HISPANICA)

The true value of this Iris appears to have been overlooked in this country. The great diversity of color and its being equally adapted for gentle forcing and massing in beds make it one of the most useful bulbs to plant.

	100	1000
Alexander von Humbolt. Dark blue... ..	\$0.50	\$3.50
Belle Chinoise. Pure yellow.....	.50	3.50
Blanche Superbe. Pure white.....	.50	3.50
Blanche Fleur. White with pale center.....	.50	3.50
British Queen. Large white; very fine.....	.50	3.50
Cajanas. Beautiful deep golden yellow.....	.50	3.50
Chrysolora. Pale yellow.....	.50	3.50
Darling. Blue; very fine; early.....	.50	3.50
Mixed, all colors35	3.00

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St. NEW YORK CITY

NEWS NOTES.

Brookville, Mass.—P. O. Burnham has sold his greenhouse to Freeman Wagner.

Dover, N. J.—Henry Payne writes us that the report that he is building a greenhouse is not correct.

Fort Morgan, Colo.—F. W. Weidman, proprietor of the Fort Morgan Floral Co., has sold his business and gone to Texas.

Hatcher Station, Ga.—The Chattahoochee Floral Co. is building a 40 x 50 packing house on a lot they have just purchased.

Deerfield, Ill.—Eighty acres of land

near here has been purchased by Fred C. Clavey, nurseryman, for an extension of his business.

Port Chester, N. Y.—Property at Grace Church and Sands streets has been purchased by John Smith, who will erect three greenhouses and office on it. Three houses in Darien will be moved here. His store will be continued at Liberty square.

Buffalo, N. Y.—Mrs. R. M. Johnson (nee Rebstock) has sold out the store at 614 Main street to Mrs. Cretian, who will conduct the business under the firm name of R. M. Rebstock Co. Miss Adams who has long been connected with Mrs. Johnson, will remain

with the new firm. The trade wishes every success to the new company.

W. H. Eiss, formerly with the Wm. F. Kasting Co., who is now president of the Latchford Refining Co., of Toronto, Ont., was a recent visitor. Mr. Eiss has gained wonderfully in health, and always has some good fishing and hunting stories in stock.

Charles Guenther, the Hamburg florist, was very much disappointed to learn that there would be no fall flower show. However, this did not stop him from growing Golden Wedding chrysanthemums, the finest that have ever been seen in this city, and his eight feet, 1000 perfect and the blooms grand. E. C. B.

THE BUYING SEASON

for **Florists' Holiday Material and Standard Winter Indispensable Goods** is now at its height. We have been, are now, and expect to continue

WORKING OVERTIME

Fall trade this season is far beyond any previous years and the quality and variety of the stock in our warerooms and coming in from abroad fully warrants it.

It would take pages innumerable to tell you all we have that you should stock up on. Our catalogue tells all this in detail with splendid half-tone illustrations. **Send for it and see.** Don't wait until the last minute to order.

HELP US AND WE WILL HELP YOU

Washington and Baltimore Ladies.

Mrs. George H. Cooke last week entertained a delegation of the Ladies' Auxiliary of Baltimore. The ladies were met at the railroad station by an equal number of Washington ladies and by train were escorted to the New Ebbitt House, where a luncheon had been prepared. Following this a sight-seeing trip was taken. The matinee was next on the program, upon the completion of which the ladies were ready for dinner. The New Ebbitt was again visited, and then a trip was made to the Arcade where a bowling contest between the Baltimore and Washington teams took place. The battle for supremacy was a spirited one, but due to the fact that only ladies were admitted to the alleys, the outcome is unknown. Assisting Mrs. Cooke were Mrs. Nudoromanski, Mrs. Elmer C. Mayberry, Mrs. C. Schaffer and Mrs. Simonds. The Baltimore guests were Mrs.

Boone, Mrs. Bauer, Mrs. Klein, Mrs. Perry and Mrs. Quick.
CLARENCE L. LINZ.

NEPHTHYTIS PICTURATA.

A striking ornamental stove plant; foliage dark green and silvery white. Cultured by Dr. ...

CLEMATIS MONTANA VAR. RUBENS.

The widely-distributed Clematis montana is known as a very variable plant. In the variety rubens, which forms the subject of our cover page illustration in this issue, we have undoubtedly not only the finest of all the forms of C. montana, but really the most strikingly beautiful of all known clematises. It is hardier than the type and distinct in every way. The foliage is dark with an occasional light gray band down the upper surface of the leaf and reddish beneath. The flowers are bright rose, borne in clusters in the axils of the leaves on the old wood. The color is unique in the genus. This is one of the richest of the gems discovered by E. H. Wilson in the mountains of China.

NEWS NOTES.

Augusta, Me.—The capital stock of the Southern Nut Nursery Co. has been reduced from \$300,000 to \$200,000.

Richmond, Cal.—A flower and nursery business has been organized by Adolph Winters to be known as the Adolph Winters Co. He has discontinued his business at Fourth street and McDonald avenue.

Libertyville, Ill.—Schumann & Kohout, who recently purchased the greenhouses of the Chicago Rose Co., state that next spring the whole place will be planted to White Killarney, Killarney, Richmond and some My Maryland roses and standard varieties of carnations. The Brides and Maids now in the houses will be discarded and two or three new roses put on trial.

Jamestown, N. Y.—Fire destroyed the boiler house of the Lakeview Rose Gardens, Lawrence Cotter, manager, on November 8. The next two days the greenhouses were without heat, but as the weather was mild the apparatus was repaired in time to save the crop.

N. F. McCARTHY & CO.

84 Hawley Street, Boston

ST. LOUIS NOTES.

Grimm & Gorly had a flower show last week, having bought all the plants of the late flower show which attracted a great many people to their Washington avenue store.

Mrs. M. Fleshman will open the flower store in the Planters' Hotel on Monday, November 21. This is the old stand of the Riessen Floral Co., who used it as a branch store until a few years ago.

The new stores opened in the West End recently—H. Young & Son, Sanders' Nursery and C. Young & Sons—say that business has been good with them since their opening. All make attractive displays.

"Billy" Smith, who was badly hurt by an automobile which ran into his buggy recently, is out again and none the worse from the smash-up, but the week's confinement at home was not to his liking as he missed seeing all his friends during the flower show week.

Secretary Beneke of the Florist Club says that the officers of the club are at work to make the last meeting in the year, December 12th, an interesting one and that the trustees have something in store for the members that will make the meeting an interesting one with the usual good smoke during the session.

The annual Chrysanthemum Show of the Missouri Botanical Garden did not take place as advertised. The exhibition was all ready in a large tent for the opening on Monday, November 13, when a big rain and wind storm came along on Saturday night which wrecked the tent and plants, and the big drop in the weather well-nigh froze all the plants. The man-

agement say that the entire 500 varieties are a total loss. The public were much disappointed in not being able to view this annual free exhibition.

PHILADELPHIA NOTES.

Arthur Zirkman, of M. Rice & Co., is spending a few days in the house between trips and Robt. Shock of the same house has again taken to the road.

An illustrated lecture will be given in Horticultural Hall, Dec. 7th, at 3.30 P. M. by Thomas H. Mawson, lecturer at the University of Liverpool, England:—"Gardens which were builded and gardens which were planted;" for the benefit of the Pennsylvania School of Horticulture for Women. Tickets \$1.00 each may be had of Mrs. J. Willis Martin, 1721 Locust St.

Visitors: Edmund J. Welch, Welch Bros., Boston, Mass.; Charles Loechner, N. Y. City; J. A. Brown, Coatesville, Pa.; Arthur J. Deal, W. W. Johnson & Son, Boston, England; W. F. Fancourt, Doylestown, Pa.; Wm. J. Halliday, Baltimore, Md.; John S. Ratcliffe, Richmond, Va.

WASHINGTON NOTES.

F. H. Kramer has been elected a member of the board of directors of the Provident Savings Bank.

R. J. Irwin, of New York, called on the local trade last week. Mr. Irwin reports business to be very good with him.

Mayberry & Hoover have just completed the repainting of the front of their store at 1339 Fourteenth street, N. W., and other improvements to the interior in preparation for the season's business.

Edward Bowers of the local branch of the S. S. Pennock-Meehan Co., is receiving the congratulations of his many friends. The cause of all the happiness in this case is the young lady who last week became the bride of Mr. Bowers.

Edward Mangum will continue as head gardener and in charge of the greenhouses of the Gallaudet College. Heretofore, Mr. Mangum had charge also of the large farm connected with the college but this latter will be looked after by Harley D. Drake.

The Department of Agriculture has opened five co-operating seed-testing stations in connection with the local laboratory, in California, Oregon, Louisiana, Indiana and Missouri. Arrangements have been made to have seed samples tested for purity and for germination. The department will make not more than five tests for any one individual or organization in any one month; this in order to give all a chance of availing themselves of the service.

Miss Marie Gude, daughter of Mr. and Mrs. Adolphus Gude, of Good Hope Road, Anacostia, D. C., last week became the bride of Mr. Charles Burton DeShields of this city. The ceremony was performed in the New York Avenue Presbyterian Church, and the florists of Washington turned out en masse. The church was beautifully decorated with pink chrysanthemums, smilax, palms, ferns and autumn leaves. The balconies were covered with smilax and twig baskets containing chrysanthemums. At the entrance to every pew was a standard of white chrysanthemums and autumn leaves and the chancel was banked with these and palms and ferns. Miss Esther Gude, a sister of the bride, was one

of the bridesmaids; Adolphus, Jr., a brother, one of the ushers; and little Miss Louise Gude, a cousin of the bride, proved a very charming flower girl.
C. L. LINZ.

PERSONAL.

Julius Roehrs, Sr., of Rutherford, N. J., is on the sick list.

Miss Claire Murphy, of Cincinnati, who was recently operated upon for appendicitis, is reported as convalescing nicely.

Edward P. Aylward, florist, was married on November 12th to Miss Margaret Lynch of Woburn, Mass. They will make their home in Woburn.

Henri Beaulieu of Woodhaven, N. Y., who is now in Paris, writes us concerning the scarcity of seeds in Europe. Under date of Nov. 11, he writes that there had been no frost up to that date and annuals were blooming profusely in the gardens. Seed crops, however, he says, are demoralized and prices fluctuate from day to day. He expresses the hope that American growers will in the near future raise their own seeds.

Boston visitors: C. B. Knickman, representing McHutchison & Co., New York; Geo. Strange, representing S. S. Skidelsky & Co., Philadelphia.

NEWS NOTES.

Valley City, N. D.—R. W. Moore is now in partnership with his brother, Charles E. Moore, proprietor of the Valley City Greenhouses.

Freeport, Ill.—A large water tank collapsed on November 6th at the greenhouses of John Brauscher, Jr., doing damage estimated at about \$2,500.

Brookline, Mass.—James J. McElroy of Dover, N. H., formerly gardener for Thomas W. Lawson at Dreamworld, will resume his business of florist and gardener here.

Seed Trade

Pea and Bean Percentages.

The growers of peas and beans are sending out their final estimates of deliveries on the 1911 crop. They certainly are most disappointing—not only on peas, but beans; the latter item has fallen down very greatly during the past five or six weeks, heavy damage having been done the crop by too much and long continued rains in the district where these beans are grown. We understand that the bean crop of New York state is in pretty fair shape and that very fair deliveries will be made by those who are growing their beans there; but the percentage, as compared to the total, is not very large, consequently there appears to be a strong tone to bean prices, and the probabilities are that notwithstanding considerable quantities carried from last year, there will be an active demand for all the desirable seed in the country. Percentages on beans have fallen from 25 to 50 per cent below what was thought probable in September; but while this is considerable of a loss to the growers, it will not prove an unmixed evil to the seedsmen, who, as stated, are carrying in most cases more or less beans from last year.

Carrots, Mangels and Garden Beets.

Conditions affecting carrots are even worse than we feared until within the last few weeks, as some of the larger jobbers will not deliver anything whatever on orders booked for the different varieties of carrot seed this year. About the same condition rules with reference to mangels, and several of the more fancy varieties of garden beets. It is rather surprising to see the word "failure" opposite the names of such a large number of varieties. Never has the oldest seedsmen in the business seen a season like this. Let us hope none will see its like again, although the great scarcity of roots, raised this year, indicates that seed of these varieties will be very high and scarce in 1912.

Strenuous Outlook for 1912.

We are informed that the leading Canadian grower of peas and beans

has decided to sell a considerable portion of their seed stock and accept no contracts for the 1912 crop. In view of our recent experience, we hesitate to name the concern, for fear they may experience a change of heart and call us to account. However, we believe the information to be authentic and it simply means the withdrawal of a good many thousands of bushels of high-grade seed stocks from an already insufficient supply. It will be well to warn all interested parties not to delay placing their orders for the 1912 crop, as the tardy ones are likely to be left, as they were a year ago in a few instances, although the conditions are much more serious this year.

From such information as we can get after a pretty thorough investigation it would seem that prices should be a secondary consideration with seedsmen. The main question is to get your order booked with a responsible concern and this applies especially to peas and beans. Any price named now will probably look low next fall.

Destructive Temperatures in Colorado, Kansas and Oklahoma.

Editor HORTICULTURE:

Dear Sir:—We have just received advice from Rocky Ford, Colo., stating they had another severe snow storm and the thermometer dropped to 16 degrees below zero on the 11th inst.

The most of our crops have been harvested, but there are a few still in the pits which were covered and protected. We are afraid, however, that the severe cold may affect the germination of some of the cucumber crops in that vicinity, also in the vicinity of Ordway, and that it will also affect the germinating vitality of the late crops of watermelon in Kansas and Oklahoma and the crops of pumpkin and squash in Nebraska that had not been seeded prior to the cold weather and which may make considerable difference in the percentages of the deliveries for some of the varieties of vine seeds. Yours truly,

WESTERN SEED & IRRIGATION CO.

Per Wm. Emerson, Manager.

INCORPORATED.

Cincinnati, Ohio—American Horticulturist Co., to publish a horticultural journal, capital stock \$25,000. Incorporators, E. M. Shurburne, E. D. Salisbury, W. E. Roby.

San Antonio, Texas—The Monarch Plantation Co., capital stock \$10,000. To do a general seed and nursery business. Incorporators, E. R. Smart, M. B. Graham and Wm. L. Corey.

NEWS NOTES.

Cleveland, Ohio—F. C. Pinyoun & Son, manufacturers of portable garages, is branching out into the manufacture of portable greenhouses.

Westminster, Vt.—The Connecticut Valley Orchard Co., recently incorporated, state that their capital stock of \$10,000 will later be increased to \$100,000 and that they will do a business in fruit, live stock, fertilizers and real estate. They now have fifty acres of land, but will eventually have five hundred more. Greenhouses will be built later. George A. Dascomb is president and E. G. Tuthill, superintendent.

CHICAGO NOTES.

The report of the Chicago Fire Commission has indirectly brought to light the plans to tear down some of the down-town buildings in the early spring. Among those named in the newspapers is the Atlas Block, the stronghold of the wholesale florists, not less than ten having quarters there. The matter may be tided over as it was two years ago, however, though that corner, Randolph street and Wabash avenue, has long been regarded as too valuable for a six-story building and the event cannot be far in the future at any rate. An effort to bring about concerted action among the wholesale florists last spring, that should assure them a suitable building that would be a permanent home was attempted, but did not succeed.

One of the changes of the week is that of the acceptance of a place in the Chicago Flower Growers' Association by Chas. Erne, one of the best and most favorably known men in the wholesale trade.

The salesmen for the E. H. Hunt Co. are in and leave again at once for another trip. They report business as brisk and a good outlook for the holiday season.

Personal.

Edward Hauswirth has entered the employ of Harry Rowe.

Mrs. L. H. Winterson, who has been very ill, has partially recovered and been brought home from the hospital.

Miss Gertrude Wallace of the Chicago Flower Growers' Association office force is recovering from a severe illness.

Ira Zalinger, from California, has come to Chicago to join his brother, Ben, in the florist business. So far they are filling orders from the home at 4922 Vincennes avenue, but expect to open a store in the near future.

Visitors: Among the florists who have attended the flower shows in the Middle West and stopped in Chicago the past week are: John Breitmeyer, son of Fred Breitmeyer, Mt. Clemens, Mich.; Herman Klagge, Mt. Clemens,

Mich.; Chas. H. Totty, Madison, N. J.; Wm. Duckham, Madison, N. J.; R. Vincent, Jr., Whitmarsh, Md.

Flower Market Reports

BOSTON After four weeks in the wilderness the Boston cut flower trade is still unsettled and forlorn, although Thanksgiving Day is only one week away. The wholesale marts are crowded with stock, and the local demand is so light that much material is held over from day to day unsold. Chrysanthemums are in as heavy supply as they were last week. Roses are abundant, but quality has advanced, and there is a disposition to stand for higher prices. The novelties are holding their own and are really the salvation of the rose market. Carnations are in full supply and light demand. Orchids are slow to move locally but the shipping trade is helping them as it also is the rose market. Violets are one bright spot in the situation; they are, like Johnnie Walker, "going strong" this week. Paper white narcissi are in quite plentifully, but for what purpose nobody knows. Already they are among the laggards and are teaching their own lesson to the indiscreet grower who imagines that the earlier he can hustle them into bloom the more famous he will be. But how about his pocket book? There are quite a few callas in but with lilies so abundant as they are the calla has to be patient.

The past week began in **BUFFALO** wintry style, and the temperature fell forty degrees, while on the Saturday previous, the ideal Indian Summer day, the thermometer had read sixty-two. The cold weather has caused stock to shorten in supply, especially roses and carnations, but chrysanthemums continued plentiful. There was a good quantity of Bonaffon, Maud Dean, Dr. Enguehard and others. The choice quality moved at satisfactory prices. There were quite a number of bunches and sprays, also pompons in varied colors. Lilies, violets, lily of the valley and peas are plentiful, but Beauty and Richmond roses are scarce. Smilax and greens are in good supply and quite active. Considering the bad weather last Saturday a fairly good clean-up was made.

A marked shortage in the supply of American Beauty roses is a feature of the market conditions at this time. Fancy stock has been billed out as high as \$6.00 per dozen during the past week and the shortage prevails down to the lowest grades caused by all the growers in this vicinity having their stock off crop at the same time. Chrysanthemums are shortening in supply, especially in fancy white. It has been an unusual season in several respects and the chrysanthemum crop has varied accordingly, some of the largest growers being practically through cutting now. Violets, both home-grown and from the East have met with fair sales since the colder weather, and lily of the valley has brought a higher price for fancy than is often quoted. A limited supply of paper white narcissi is in to give variety to stock, and rather more lilies than needed to supply the demand are now on the counters. Carnations of large size and long stems fill all the florists' wants in that direction, while sweet peas are each week becoming more in evidence. Daisies are to be had and are usually on short stems.

GARDENIAS

With a very much better quality and a more liberal supply we are able to take care of our Gardenia customers in a way that will satisfy them, thus insuring to us future orders. Contracts made from now till after the holidays. Write us for information.

All kinds of roses are plentiful in the best grades, but mediums are packed up quickly for funeral work.

Indications point to very good business between now and Thanksgiving. During the last few weeks, while the aggregate volume transacted was very large, still there has been no general clearing up of everything. The rose market finds pink and red running short of the de-

mand, white more than sufficient and American Beauties selling up easily each day. Many more short and medium stemmed ones could be used to advantage if they were available. In chrysanthemums there are offered excellent varieties as Major Bonaffon, Bird, Chadwick, Dr. Enguehard and Eaton. The carnation supply is increasing and the quality is very good. Practically all offerings in

Shipments, any quantity, Whole-
sale Market Rates.

The Man Who Has Tried It IS THE MAN WHO KNOWS

We don't need to explain to him the advantage of a Central Florists' Plant Supply House in these busy days, when selected flowering and foliage stock is assembled for inspection and selection, saving time and expense of railroad trips to visit widely separated growers. *That's where we win.* Packing and shipping facilities unsurpassed. Of blooming plants we have for this week CYCLAMEN of best quality ever seen for Thanksgiving; Ericas; Lorraine Begonias; Camellias. In foliage plants All Palms, etc.; Ivies and Holly Ferns; Table Ferns; Aspidistras; Phoenix Roebeleni (elegant little specimens); Araucarias; Buxus Pyramids; Scotti Ferns; Dracaenas; Oranges.

WOODROW & MARKETOS, Wholesale Plantsmen and Florists

Flower Market Reports.

(Continued from page 741)

this line are selling quickly. Lilies move quickly but at only fair prices. Violets, both doubles and singles are good property. Callas have begun to arrive and before long will prove a very welcome addition to the stock on hand. The market in lily of the valley and orchids is easy. New bronze galax are now on hand.

A heavy supply of all grades of flowers made it comparatively easy for retailers to supply their demand. These latter patronized well enough to keep the supply on a safe level, and have made firm prices possible. The football game at Ann Arbor demanded everything in large yellow chrysanthemums in sight. Besides this, young women of the Ann Arbor Y. W. C. A. sold from large boxes standing on the sidewalks which were apparently shipped from Chicago.

Since our last weekly report there has been a very fluctuating and generally disappointing market. Football games and horse shows had been looked forward to as favoring a spirited demand on certain flowers and justifying a better schedule of wholesale prices and a confident upward movement was generated which at first seemed to present a hopeful outlook but it sagged in the middle and now with a spell of bright sunshine the augmented product is doing its share towards the decline. American Beauty specials climbed to the fifty-cent level for a few days, but have now receded, under the pressure of a freer supply, to forty cents as a maximum. Violets were distinctly disappointing. In a very small percentage of high-grade flowers they

MISCELLANEOUS

	Last Half of Week ending Nov. 18 1911	First Half of Week beginning Nov. 20 1911
Cattleyas.....	1.00 to 60.00	25.00 to 75.00
Dendrobium formosum.....	30.00 to 40.00	30.00 to 40.00
Phalaenopsis.....	20.00 to 25.00	20.00 to 25.00
Lilies, Longiflorum.....	4.00 to 5.00	3.00 to 5.00
Lily of the Valley.....	1.00 to 2.00	1.00 to 2.00
Narcis, Paper White.....	1.00 to 2.00	1.00 to 1.50
Chrysanthemums.....	4.00 to 20.00	4.00 to 20.00
Violets.....	.40 to 1.00	.40 to .75
Mignonette.....
Gardenias.....	12.00 to 35.00	12.00 to 35.00
Adiantum.....	.50 to .75	.50 to .75
Smilax.....	6.00 to 8.00	6.00 to 8.00
Asparagus Plumosus, strigis..... to 35.00 to 35.00
" " & Spreng. (100 bchs).....	10.00 to 30.00	10.00 to 20.00

reached the dollar mark, but seventy-five cents was the prevailing maximum, and the demand falling away below the supply, the street fakirs' services were accepted, with the usual result when the combination of violet surplus and street fakirs is presented. All other roses have settled back, more or less, in sympathy. Chrysanthemums vary greatly in results, some bright spots being noted here and there, but the general tone is very drabby. Lilies are again overstocked. Orchids are seen in increasing variety as the season advances, white phalaenopses, Dendrobium formosum and similar things meeting with a fair sale, while cattleyas run all the way from twenty-five to sixty according to size and finish, with an occasional seventy-five cent maximum on something particularly fine. Gardenias are considered low at present selling figures. Carnations are waiting for the chrysanthemums to make their adieu before they make much ado for themselves.

A typical week. PHILADELPHIA Things going along on an even keel—very much as they have done in previous years at same time.

Of course the standard as to quality is higher. The lad with twenty-five or fifty thousand feet of glass finds it harder and harder to make ends meet in competition with fellows who can work economies with half a million, a million, or two million feet. How the little fellows can work out and show a profit goodness only knows. We are very much afraid they don't, and we are very sorry for it. When James Watt invented the steam engine he had no idea that the same would in short order bring the world's nations closer together—as it has done. When Benjamin Franklin flew his kite in Philadelphia in front of Dooner's Hotel he had no idea that he was going to make a "World Republic." Yet he and James Watt have about done that. The demand last week was

Obituary

John Caldwell.

John Caldwell, an employe of the Ross Bros' Seed Co., died on Oct. 30, aged 56 years.

James Hart.

James Hart, son of M. A. Hart, well known in the New York wholesale flower district, died on Saturday, November 18, of consumption.

John D. Crawford.

John D. Crawford, for many years a florist in Brooklyn, N. Y., died at his home at Roslyn, L. I., N. Y., on Nov. 2, aged 69 years. He was born at Saratoga Springs and up to ten years ago kept a florist's store at 372 Court street, Brooklyn.

John Jules Fonta.

John Jules Fonta, of New Orleans, La., was buried on Nov. 11, his funeral being largely attended. Mr. Fonta came to America from Rogat, France, going to New Orleans in 1869. After a successful career as a florist he became manager of the Morgan Whitney estate, later becoming superintendent of Audubon Park, which position he held till 1909. He leaves a wife, one brother and two sisters.

Elizabeth P. Foster.

A most estimable lady, well known in the inner life of the florists' business, passed away, November 13, 1911, and has left a fragrant record of a well spent and noble life in our annals. Mrs. Foster died at Westerly, R. I., on the above date. One daughter is the wife of Samuel S. Pennock of Philadelphia, another is married to H. N. Willits of Lansdowne, Pa., both well known in florists' circles. Her only son, Wm. H. Foster, of the Riverside Greenhouses, Westerly, R. I., and two other daughters survive. Mrs. Foster was born September 27th, 1849, and came of good old Quaker stock. She was a member of the Society of Friends, and was a credit to it.

Reuben T. Woodward.

Reuben T. Woodward, a man of wide experience as landscape gardener and horticulturist, died Nov. 15, in Boston, Mass., aged eighty-seven years. He was born in Boston and secured his first knowledge of gardening while attending the Massachusetts Agricultural College at Amherst, Mass. After the death of his father he entered the employ of his brother-in-law who had charge of one of the largest nurseries in the city. In 1881 he began business in South Reading as landscape gardener, later moving to Melrose then to Haverhill. He enlisted in the army in 1861, being

wounded at Newbern, N. C., and honorably discharged. In 1875 he became assistant superintendent of Golden Gate Park and later engaged in business in Los Angeles, Oakland, Pasadena and other places. He returned to Boston in 1899.

Frank P. Baum.

It was with sad regret we learned of the death of our brother florist, Frank P. Baum, of Buffalo, N. Y., who died suddenly while on a business trip to Salamanca, N. Y., aged fifty-seven years. Mr. Baum was born in Looneyville, N. Y., and came to Buffalo forty years ago, where he has been engaged in the florist business for twenty-five years, conducting a retail stand at the Washington Market, and having eight thousand feet of glass at 50 Kingsley street, where a good portion of the plants and cut flowers are grown for the retail and wholesale market. Mr. Baum was well known to the trade, and had a large circle of friends and business associates, also being a member of several fraternal organizations. He leaves a widow, Mrs. Elizabeth, also a son, Frank, and daughter, Mrs. B. E. Slee.

The country has lost a sincere lover of our profession, and an enthusiast in his chosen field. Our heartfelt sympathy goes out to his bereaved widow and children in this hour of their sorrow. Words are of little aid in these days, but to the fatherless and widow, it may be a ray of pleasure to be assured that through the length and breadth of this adopted country, the name of Frank P. Baum commanded only respect and affection. E. C. B.

William H. Moon.

William H. Moon, senior member and founder of the William H. Moon Co., Nurserymen, Morrisville, Pa., dropped dead on West State street, Trenton, N. J., on Nov. 18th while on his way to consult his physician in that city. Funeral services were held on the 22nd inst., from his home in Morrisville. Interment at Fallsington—where the family for several generations have their last resting place. A brother, James Moon, and two sons, Henry T. and J. Edward, were associated with him in the business which was one of the largest nursery concerns in the country. Being a chartered corporation the business continues under the same title. Two daughters of Wm. H. Moon also survive. Mrs. Moon died last summer.

Mr. Moon was 62 years of age and had been an active and influential force both in business and civics for many years. He was a son of the late Mahlon H. Moon, one of the pioneer nurserymen of this locality, and a brother of the late Samuel C. Moon, who succeeded Mahlon H. Moon. The Moon family were ardent members of

HENRY A. DREER, 714 Chestnut St., PHILADELPHIA, PA.

the Society of Friends—that sturdy stock that did so much in early days to put the destinies of Pennsylvania on a sound footing. To this day—notwithstanding the immense influx of strange peoples—the Quaker influence is fundamental and far-reaching, notwithstanding the fact that they have been buried millions deep in numbers by succeeding waves; which shows clearly that quality, and not quantity, is what counts, after all. William H. Moon belonged to the quality stock, and was a powerful influence for the higher ideals of life and conduct—an example to the pushing trampling multitude, and a staunch upholder of right and truth against all odds.

THE REX COMPANY, Harrisburg, Pa.

Flower Market Reports

(Continued from page 743)

mostly on Beauties, orchids, violets and lily of the valley. All these staples cleaned up well. Of course the chrysanthemum held the center of the stage. It was a pretty good week, all things considered. In view of the centrifugal tendencies of the times a la James Watt and B. Franklin—we would suggest a close study of Adam Smith, John Stuart Mill, Ricardeau and the British budget of 1910. By so doing those with small places will find out just how those with big places have such a bulge on them, and how they can so arrange it that the little fellow will get his share according to his deserving. Those well-posted think that the Army and Navy game here on the 25th will cause a big demand for blue and yellow. Which means—Bonnaffon and Violets. They are all hedging accordingly. Other things will go also. Good luck to all of you. Vale.

The market was over-stocked all during the last week. There was so much stock in that it was impossible to dispose of one half of it and a great many carnations, roses and small chrysanthemums were dumped. Chrysanthemums have seen their best days but there are still many coming in of the fancy varieties—some fine Chadwick, Golden Wedding and Eaton. The fancy stock in these sold clean up. Large fancy Bonnaffons sell better than any just now. Violets have been very scarce as predicted early in the season and the few that come in now have advance orders. Roses are more plentiful than ever and the sale on them is not strong. Lily of the valley and lilies sold well all week but not clean up.

The Pure Food WASHINGTON Show which terminated on Saturday night last called for the supply of quite a large quantity of chrysanthemums and roses, Richmonds being most in demand. This with the Saturday football games which made the sale of yellow and white chrysanthemums heavy, and the large number of weddings, caused quite a little flurry in the local market. There is a large quantity of chrysanthemums coming in and due to this they move well only at moderate figures. Carnations are very good, and this holds true also with the Hudson River violets. Both are moving well. There is, however, quite a quantity of poorer stock (carnations). Lily of the valley, thanks to the weddings, is going pretty good, and the same is true with smilax, adiantum and asparagus. Sweet peas have greatly improved in quality and are having a ready sale. Roses better and in good demand. Cattleya not up to the standard lately. There is plenty of small stuff to be had but the best is lacking in quantity. Lilies are moving but fairly well. It is expected that the days preceding Thanksgiving Day will bring forth large sales of cut flowers, especially chrysanthemums for the decoration of window displays. This latter is due to the many editorials in other trades papers showing the value of flowers when used to set off various kinds of merchandise. High class jewelry stores and optical establishments will prove among the larger consumers.

**This is the U-Bar.
The Bar That
Makes U-Bar
Greenhouses the
Famous Green-
houses they Are.**

This is the U-Bar. The Bar That Makes U-Bar Greenhouses the Famous Greenhouses they Are. a choice U-Bar palm house of classic design, which is connected to the residence conservatory by a loggia that is glass enclosed in winter. The palm house leads directly into the greenhouses themselves. A very unusual grouping you see—one that, because of its close association with the residence, demanded a construction combining both simplicity and ornamentalness. The U-Bar is, strictly that kind. That's why it won out. And that's the sequel. The catalog shows numerous views of the entire layout. Send for it.

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 335 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis Bostoniensis and Piersoni, 6-in. pots.....\$0.50 each

Nephrolepis Elegantissima, Piersoni, Bostoniensis, and Harrisii, heavy 8-in. plants.....\$1.00 to 1.50 each

Nephrolepis Elegantissima, Bostoniensis, and Harrisii, heavy 10-in. plants 2.50 each

CARNATION "WODENETHE"

A Carnation by any other name "might smell as sweet," but it is a fact that very few of them do. The fragrance of "WODENETHE," is delightful. It has every other desirable quality also, size, perfect form, purity in color and the calyx positively does not split.

Come and see it growing; then you will also see

BROOKLYN

ONE of the finest, freest blooming Carnations I have ever handled and a "bread and butter Carnation" in every sense of the word.

Prices on these two Carnations, \$12.00 per hundred;
\$100.00 per thousand

Seasonable Notes on Culture of Florists' Stock

AZALEAS FOR CHRISTMAS

If these plants do not show color by this date they should be kept in a temperature of 70 degrees at night and sprayed with lukewarm water two or three times a day which will help to push them along. Also give them the sunniest bench you have. Azaleas that are showing the first flowers open can be placed in a lower temperature of about 60 degrees. It should be borne in mind that for the last ten days before Christmas, it would be a great advantage to the keeping qualities of the flowers if they were given a house where the temperature runs from 50 to 55 degrees at night, with a rise of ten degrees during the day and a good amount of fresh air circulating by proper ventilation. Give attention to watering of the plants as neglect of this causes an unevenness in the opening of the flowers and is a direct injury to the plant. There is very little difficulty in having such varieties as *Deutsche Perle*, *Hexe*, *Mme. Petrick* or *Verveaneana*, in flower for the holidays.

CARE OF CHRISTMAS GREENS

To keep all greens such as boxwood, holly, bouquet green, leucothoe, galax, ferns, etc., in a nice fresh condition try a deep coldframe. Give it proper banking around on all sides with leaves or hay of sufficient depth to make it practically frostproof. See that the sash are in good shape and fit tightly. These can be covered with hay or straw which will keep out the light. A dark, moist place that is just kept above the freezing point is the ideal location.

HOLIDAY SUGGESTIONS

Look over your stock of supplies now to see if anything is wanting such as heavy wrapping material, tissue and waxed paper, waterproof crepe paper in white, red and green, sheet moss, ribbons and waterproof chiffon, cut flower boxes, fern dishes, etc. Attend to your plant requirements early. The average florist cannot grow all his own and now is the time to buy. Take a look through the columns of *Horticulture* and you will find there firms advertising anything you may want. A week or ten days before Christmas go over your plants and see that foliage and pots get a good cleaning, especially such plants as palms, aspidistras, pandanus, ficus, dracaenas, and other *Wright* plants, as the least bit of dust shows on the leaves and detracts a good deal from their beauty. It will be time well spent to give each plant a perfect cleaning which will show to full advantage all the markings and shades which go to make foliage plants beautiful and of course every pot should be scrupulously clean.

PELLAEONIDAE

These plants that have had a rest will soon be starting to show new growth. When they have made a growth of about an inch knock them out of their pots and shake the old soil well out. If there are any long and strag-

gling roots these can be shortened back. When potting give them a compost of turfy loam three parts, well decayed cow manure one part, and add enough of sand to make the soil porous, for they like a compost that allows the water to pass freely through it. Keep them rather close for a week or two and root action will soon begin to start. Give a light syringing twice a day until they have broken into new growth. When they have taken hold of the soil give them a bench near the glass in a very light and airy house as they will make a stouter and more thrifty growth where there is a good circulation of air. From now until the spring give them a temperature of about 45 degrees at night.

POINSETTIAS

Your pans of poinsettias as they become fairly well developed should be reduced 5 to 8 degrees at night which will put them in a better condition to withstand the many vicissitudes they are liable to meet during the holidays or before Christmas. Where your pans are well filled with roots a little weak manure water once or twice a week will be of great advantage in giving the bracts a fine color as well as increasing their size. Give as much air during the middle of all fine days as possible without causing any cold or arid draughts. The atmosphere should be kept somewhat drier now as this will tend to harden up both foliage and bracts. Plants that are in a bed or bench are better, if the bracts are well developed, for a lower temperature, say anywhere from 55 to 58 degrees at night will do. When cutting poinsettias dip the ends in boiling water long enough to stop bleeding and then tie the bracts around with some soft tissue paper and place in a vase that holds a good depth of water. They will keep better and longer if placed in a temperature of about 45 degrees.

PRIMULAS FOR CHRISTMAS, 1912

To have strong and well flowered plants a year hence secure some seed now and sow as soon as you can get to it. Large shallow pans are the best to sow the seed in. Fill these pans, after there is good drainage given, with a light compost of sifted loam and leaf mold in equal parts, to which some sand should be added. After the pans have been filled to within about half an inch of the top, press the soil even, and give a good watering with a fine rose, and let them stand until the next day when the soil will be in a nice condition to receive the seed. When sowing the seed be sure not to sow too thickly. Press the seed in over the smooth surface of the soil and cover very lightly with very finely sifted compost, and again press the surface smooth. Place a piece of glass over the pans as it helps to keep the moisture better, and shade from the sun until the young seedlings begin to appear, when they should be placed well up to the glass in a house where the temperature runs from 40 to 50 degrees. They will make the plants for late fall and early winter flowering. Of *Primula sinensis*, *Coronet*, *Center Rose*, *Crimson King*, and *Colossal* are good, and for *Primula obconica*, *Kermesina* is the best.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: *Care of Young Begonias*; *Decorative Christmas Anthuriums*; *Stocking Plants*; *Dendrobium*; *Properly Grown Carnations*; *Protecting Pansies*, etc.

Some good news The communication from the Chairman of the Tariff and Legislative Committee of the Society of American Florists, which appears on another page of this issue, should be very welcome news to the flower shipping trade and, this being Thanksgiving week, thankful emotions are surely in order. It is nice to contemplate the fact that this, as Mr. Esler states, has been a victory of peace. We sincerely hope it may be as permanent and far-reaching as it is encouraging.

Instruction on right lines

Our New England readers should not overlook the notes in this issue on what the Massachusetts Agricultural College, through its Department of Floriculture,

is planning to do for the floral interests. Prof. E. A. White who has charge of this work has given good assurance in the past of his sincerity and wisdom and his practical policy in the line of horticultural work will go a long way towards eliminating the prejudice heretofore harbored by many as to the value of the education acquired in the State Colleges. Prof. White has selected his co-workers from the successful men who have accomplished things not by theory but by hard labor and application. We bespeak for his effort the approval and cordial support of the floricultural interests of New England.

**Aster
Amethyst**

The Garden for Nov. 4, illustrates a new aster under this name which is described as follows:

"A deep-colored seedling from the now well-known highly popular A. Climax. It is of somewhat dwarfer habit than that variety, with large deep blue colored flower-heads."

It might be well for the hardy aster specialists to look into the nomenclature a little. We know that quite a number of years ago the late George Hollis of So. Weymouth, Mass., who raised a great number of very fine aster seedlings, exhibited one before the Massachusetts Horticultural Society under the name of Amethyst. It was a large handsome flower of the *Novae Angliae* type and well-named as to color which was true amethyst. It is very probable that this plant is well-distributed among New England gardens under the name given it by Mr. Hollis. Some botanical works mention an obscure species, *A. amethystinus*, as being found in eastern Massachusetts. The hardy asters are rapidly gaining in appreciation and popularity. It is to be regretted that the botanists have the species so badly mixed and the duplication of varietal names will further add to the confusion.

**Time to
get together**

Every retail seedsman will probably agree with us that a better harmony and mutual understanding is something greatly to be desired among the retail seed trade. Prices on many things have been so much at variance that the man quoting the higher figures has been accused of overcharging and the one who happened to be the lowest has had to face the suspicion that he was carrying inferior stock. The conditions which have been in part responsible for this unprofitable confusion have, for the time being, been to a considerable extent eliminated. In other words, Nature, in imposing a period of famine, has done for the seed trade what it has been unable to do for itself and the situation now existing is far from being an unqualified calamity if the trade will only take advantage of the opportunity to agree upon some general basis for establishing fair living prices henceforth and eliminating cut-throat policies. We know of an instance where one prominent house has gone so far as to submit to a rival house portions of their vegetable seed catalogue proofs and if the spirit thus shown could be more generally cultivated we believe the trade would benefit, while the public would not suffer in the least. We do not suggest a trust or any arbitrary compacts but merely the promotion of a better understanding and agreement as to the basis of values. The seedsman is at the disadvantage of having almost his entire year's business crowded into a few weeks and where other industries can turn their money over and over again in the course of a year he must be content with doing it but once. A retail seed trade organization, patterned possibly on the lines of the Wholesale Seedsman's League, would be a wise move in the present crisis.

Fruit and Vegetables Under Glass

STRAWBERRIES

With December coming in activities in the fruit department brighten up considerably. It is the commencement of another season with its hidden future and the first crops are got under way. A first batch of strawberries can be brought in and placed on a shelf or bench near the glass, in any house having a temperature of 40 to 45 at night. Remove any dead foliage, see that the drainage is clear, and clean the pots; there's nothing like cleanliness right from the start. When the pots dry out sufficiently go through them with the rammer, firming them down where frosts and rains have loosened the balls. An application of weak soot water, after being in the house a week or two, will help to sweeten the soil and also drive out any worms which may have found their way into the pot while the plant was growing. Syringe the plants over twice daily in all favorable weather.

MELONS

To have ripe melons through April sow the seeds at once using well drained three-inch pots, placing a single seed in each. These will be ready for planting out before Christmas and with the season advancing with them, will soon develop into strong plants. The first three months of the year are the worst for finishing melons off. They can be grown the whole year round, but are a very expensive luxury in these three months; the percentage of "finished" fruits will be at its lowest. From now on, however, success can be assured and sowings can be made at regular intervals. Hero of Lockinge is second to none for this early work. "His Eminence" with its strong constitution is a sure setter and finishes its fruit well. Superlative is a good Green Flesh.

PEACHES AND NECTARINES IN POTS

These will now respond to treatment. To do them justice a house must be devoted to them, which avoids shifting and consequent bruising of the fruits later on. They can also be grown in vineries when the young canes do not occupy all the wires, thus giving the trees underneath sufficient light. As soon as dry enough after housing make the balls firm which may have been loosened since potting, by rain or frost. Give a night temperature of 40 to 45 and keep a good humid atmosphere. Syringe the trees over twice daily and see that the water used for both watering and syringing is tepid. Varieties which will be found suitable for this early work are Duke of York, Alexander and Hale's Early peaches; Cardinal and Earl Rivers nectarines. Pot

trees started now should have ripe fruit about the middle of April. Houses containing planted out trees can also be started similarly. The trees in pots will have the advantage of ripening two weeks earlier than the planted out ones of similar variety. Should the border be at all on the dry side give a watering at the time of starting.

POT VINES

Pot vines started now will have ripe fruit the first week in May. As Horticulture illustrated three weeks ago, good crops can be produced from a twelve-inch pot and for the amount of space occupied these are very profitable. Black Hamburgh is the most serviceable variety for this early work. Later on such varieties as Madresfield Court, Foster's Seedling and Muscat of Alexandria can be successfully grown. Bottom heat is advisable for vines being started now and is best supplied in hot-bed form, thus serving a dual purpose of bottom heat and maturing later on, when the growing roots will also ramble through this and will pick up so much food. Make up hotbed material of equal parts stable manure and leaves, well mixed together. The pots should be stood on a bench sufficiently deep to allow of their being plunged to the rim making the material quite firm around them. Bend the canes down to secure an even break and syringe two or three times daily with tepid water until growth commences. Keep a night temperature of 40 to 45 advancing 10 to 15 degrees through the day with sun heat. Vines planted out can also be started now providing that suitable varieties are in the house.

VEGETABLES

Continue to sow more beans as the older ones wear out. The old soil should be replenished with a dressing of manure or replaced with new. The advantage of sowing the quickest maturing varieties will now be very forcibly demonstrated. Black Valentine is second to none in this respect and is always a good cropper. Spinach will grow very slowly from now on. Only the large leaves should be gathered. New Zealand variety will be found the greatest yielder and quickest grower. Cultivate the soil between the rows at regular intervals. A little stimulant in the form of liquid cow manure will help them. Parsley, too, will be similar to spinach. Work in a sprinkling of wood ashes when cultivating.

For Some Good Things in Reading Matter and in Trade Advertising

ROBERT CRAIG'S REMINISCENCES

We take pleasure in presenting herewith a few interesting extracts from the talk given by Robert Craig, Philadelphia, at the Michell Saturday lecture on November 25. In connection with this lecture there was an exhibit of the new scarlet carnation St. Nicholas.

The subject of my talk this afternoon is "Progress in Floriculture." This subject I did not select myself and, as I have not had time to collect statistics and facts covering any wide territory, I think if I relate some of the facts that have come under my own observation the past half century, it may prove to be of some interest to my hearers, particularly to the younger ones.

At that time, that is, about fifty years ago, there were only about a dozen firms in Philadelphia, the principal ones were Dryburgh, Sherwood, Dick, Buist, MacKenzie, Ritchie, Ferguson, Karl Muller and Robert Scott. It was interesting to hear John Dick tell of his early struggles to establish himself in business. He was, as a young man, a private gardener, in charge of the greenhouses of Dr. Pepper on Arch St., near Tenth, and had saved a little money which he invested, in partnership with Jas. Ritchie, at Third & Berks Sts., under the firm name of Ritchie & Dick. In about two years the firm dissolved, Ritchie retaining the old place and Dick locating at 52nd St. and Darby Road. Some of his friends tried to dissuade him from starting, using the argument that Dryburgh and Sherwood who had already embarked in business, could supply all the demands and that there really was no chance for another, but he succeeded.

As early as I can recollect anything in connection with the business, there were always timid souls, inclined to take a pessimistic view of the future.

I was quite early in life engaged practically in the business, working in the greenhouses and grounds for my father who had a small place on Irish Track Lane below Federal St. Irish Track Lane started at Broad and South Sts. and ran diagonally to about 19th St. and Back Road in that section of the city known as the Neck; it terminated at about what is Snyder Ave. today; it was a track or wagon road cut through the woods by the Irish Societies in Revolutionary times and has now entirely disappeared. West Philadelphia at that time was also undeveloped and was very sparsely populated.

It is interesting to recall the character of the greenhouse structure of this time; it was very crude and cheap, the houses glazed mostly with 6x8 glass and heated by very cheap furnaces connected with brick and terra cotta flues, with the result that the houses were too hot at the end nearest the furnaces and liable to freeze on cold nights at the end nearest the chimney. At this time, and for many years after, the work of the plant grower had to do mostly with plants used for bedding out in spring; the great business which now exists in producing and selling plants

for home adornment in winter and porch decoration in summer was not known, and the preparation of fine blooming plants for Easter and Christmas had scarcely made a beginning. These two seasons are now the most profitable to the plant grower and to the retailer, and much of the work of the year is done with these two periods in view. Then the plants were sold in the market houses and quite a market was established on Market street pavement on the site of the present public building.

In the branch devoted to the production of palms, ferns and market decorative foliage plants, I will cite only a few facts which help to illuminate and illustrate the advances in this direction. A half a century ago the only plant of *Pandanus Veitchii* in this country was in possession of Robert Buist. It had been imported from London and was sold to the United States Botanic Garden at Washington for \$25. Now this plant is grown in the vicinity of Philadelphia alone by the hundred thousand annually, and a good plant in a 4-inch pot can be bought for 50 cents. Many other plants, then scarce and high-priced, are grown in as large proportion. The same increase in quantity grown and the same tendency to popular prices is noticeable in the palm family and in the fern family. *Kentias*, for instance, then very rare, are grown now by the acre and the production of other palms and other foliage plants has increased a hundred fold. The increase in the quantity of ferns grown is even more remarkable. No florist fifty years ago had more than 100 or 200 ferns on hand at any one time and these mostly small specimens in three or four-inch pots; the whole city could hardly supply 500 little and big. Now they are grown by the million in the vicinity of Philadelphia alone and well grown too. As a matter of fact one firm, which, although its greenhouses are located on the Jersey side of the Delaware, I call a Philadelphia firm because its principal office is in this city, grows ferns literally by the million. It is safe to say that, taking all the departments of this one firm into consideration,—the greenhouse, herbaceous, vegetable plant and aquatic sections—the output has increased a thousand fold and the quality of the plants produced almost incomparably better. Many other firms have also made great advances.

In the line of cut flowers, especially in winter, the advance is even more marvellous than is the increase in the plant business. Take for instance carnations which are now grown in winter in this country finer than anywhere else in the world and in greater quantities. Visitors from England and Germany, which nations were embarked in carnation culture centuries before Americans, are lost in admiration when they see our wonderful carnations. Forty years ago we had only half a dozen inferior varieties; *De-graw* (white) and *LaPurite* (pink) were the two best and the methods of culture were just as inferior as the varieties. They were planted outdoors

brought into the houses until October and sometimes not even until November; they were put into houses not at all adapted for producing cut flowers in winter even if they had been otherwise correctly treated. The houses were glazed mostly with 6x8 glass and were built with too much wood work, making them dark and damp; they were badly heated, too, with the result that few flowers were had before spring and those of so inferior a character that they would be absolutely without money value today. They were cut without stems and sent to the retailer in all colors mixed. The brightest imagination of those days could not conceive of the fine blooms that are produced so freely today. The advanced growers of carnations in England and Germany today look to us continually for new varieties; the demand there is steady and increasing for all new varieties that are sent out by introducers of established reputation, of whom we have several in this country who are making the improvement of the winter-flowering carnation largely their life work.

In roses, too, especially for cut flowers in winter, the advance in production, both in quantity and quality has been most astonishing. I can recall the time when there were only two houses in Philadelphia, and these small and poorly constructed, devoted to the culture of roses for cut flowers in winter; precious few they got before March and April, the houses being too dark to produce flowers in winter. One of these houses was on Andrew Dryburgh's place at 19th and Race streets and the other at Robert Buist's, 67th street and Elmwood avenue. In Dryburgh's house was a number of old varieties; *La Pactole* I recall as being prominent. In Buist's house were *Bon Silene*, *Safrano*, *La Pactole* and *Duchess de Brabant*; none of the flowers produced in either houses would have any market value today. It is hard to realize that these are the facts when we consider the immense quantities now grown, the number and fine character of the houses built for their culture, the almost perfect nature of the heating apparatus and the large capital invested in this branch of Floriculture. Truly, rose growing has increased more than a thousand fold in the past half century. When we look back at the cheap and unsuitable structure used so short a time ago and then contemplate such rose houses as have recently been erected by modern growers and the fine quality of the stock produced therein, we cannot adequately express our astonishment. Contrary to many preconceived notions these large houses seem to be comparatively easily heated, and to produce under good management extra fine flowers. I look upon these very large wide houses as one of the miracles of these latter days. There are many of them now in various parts of the country, and their number is constantly increasing.

In thinking over how scarce roses were forty years ago, I recall a trip made by Thos. Cartledge and John Westcott to New York in search of roses for the Assembly Ball; they were well posted and knew where to

TWO NEW CHRYSANTHEMUMS

MRS. A. M. HENSHAW

Mrs. A. M. Henshaw, a snow white flower, gracefully incurved petals. A rather tall grower but should hold its own with any other white on the exhibition tables. A promising variety, named after one of New York's popular wholesale florists.

C. H. Totty says of Mrs. Gilbert Drabble, "My best introduction for 1912"; so surely it is well worthy of the Cover Position in HORTICULTURE. It is described as a splendid flower of the purest possible white; the petals arranged in a whorled form different in type from any white we have. The foliage is right up to the flower and the stem "stiff as an iron rod." Our readers will make no mistake in buying these three novelties.

WILLIAM KLEINHEINZ

This is another of Mr. Totty's 1912 pets. In writing about it he says: "There is nothing small about the original owner of the name and I thought it only in keeping to name a big 'mum' after him." This is a crimson with bronze reverse and will make a flower as large as the redoubtable Woodmason, with the color infinitely better.

go but returned with only twenty-nine roses after being absent for two days. In the retail business the same crudeness existed. I recollect when there were no retail flower shops on the ground floor in Philadelphia; Hanft Bros. had a basement on Chestnut street between Broad and 13th streets, and James Ritchie had a cellar on the northwest corner of Eighth and Sansom streets. The first shop on the level of the street was open in a one-story structure on 12th street below Market by Pennock Bros.

Orchids were scarcely known commercially; now they are grown by the hundred thousand for the Philadelphia market, some men making their culture a specialty to the exclusion of all other lines of work. Instead of a few plants being imported occasionally from Europe by amateurs there is a steady annual supply coming in from South America and other countries which are the native habitat of these gorgeous and elegant flowers.

The growth of the wholesale commission business in Philadelphia also shows in a marked way the increase in the business; the immense warehouses

needed to hold the stock coming in daily, at times literally in car loads, is certainly impressive. The question arises how is a market now found for the great quantity now produced. One answer is that the prices have become so low that people in moderate circumstances can now afford to indulge in what was at one time an extravagant and almost impossible luxury; and it is a fact that a large supply often creates a large demand. This fact was well illustrated by Peter Barr, the great specialist in narcissus, who visited Philadelphia a few years ago. He said that in the early history of his business when his stock consisted only of a few hundred he sold them by the dozen, but as his business grew and he finally planted fifty thousand rare bulbs on the banks bordering his place he received several orders from wealthy patrons for fifty thousand just such bulbs; the supply created the demand.

There will be many times, no doubt, when there will be "gluts" in the market and the business temporarily unprofitable as is always the case when there is an over-supply of perishable

merchandise. As a matter of fact, the business never has been one of large profits and probably never will be. Men do not rapidly become millionaires in the florist business as they may do in the wine and liquor and tobacco business. E. G. Hill, who is well-known to most of you told me of his attending a banquet of wine growers and merchants in France. More than fifty sat down to the table and each one was worth more than a million dollars; no one has ever heard of a florists' banquet of which the participants were so financially situated. If flowers should ever become as popular and as eagerly sought after as tobacco then we might all grow rapidly rich. But we have our compensations, if we cannot make money fast we know our products tend to the elevation, refinement and happiness of mankind.

Mount Sterling, Ky.—Graser & Humphreys have given up the greenhouses 45 West Main street to John Corbett, from whom they leased them. Mr. Corbett has remodeled the place and will conduct a general florist's business.

PARIS AUTUMN SHOW

This great annual show was held November 3rd. to 12th, at the Cours-la-Reine as usual in a huge temporary building constructed for the purpose. The site is a superb one close to the Champs Elysees, along side the Seine, in an open position easy of access and consequently the visitors are legion. The first Sunday afternoon, if fine is a sight, for 30,000 to 35,000 well-dressed, genteel people are crammed into the show and locomotion becomes a difficult matter. Once within the charmed circle the visitor finds himself treading his way along an immense promenade consisting of several parallel paths and along them are the usual exhibits of trained fruit trees, the pride of the French gardener. There are also at intervals nice ornamental hardy shrubs, conifers, etc., in great variety from many of the leading nurserymen of France. In and around this promenade and the show building are the Horticultural Industries, an enormous display, quite a show of itself; greenhouses, summer-houses, frames, garden pottery, statues, vases, fencing, boilers, pumps, garden-tools and accessories, apparatus, etc.

The great feature of the Autumn Show is the fruit. Apples, pears and grapes are staged in vast quantities and the individual exhibits are of enormous extent—far surpassing anything we see elsewhere. The taste displayed by these French fruit exhibitors is essentially their own and the fruit looks all the better for the dainty arrangements mostly adopted. Many exhibits are in splendid glass cases; some are in pretty baskets tied up with colored ribbons and the pears especially are superb. Passing into the great show hall, as we may call it, the visitor goes under a pergola formed of vine branches. Right and left are festoons of vine foliage and under these a series of glass cases containing an immense variety of grapes of all kinds and shapes. In fact nearly all the exhibitors adopted the glass case method of staging, in most instances in very attractive style. One exhibitor alone had a 60 ft. run of handsome glass cases containing a choice assortment of handsome grapes, peaches and pears.

Flowers other than chrysanthemums were freely shown. Almost the first exhibit on entering the show was that by M. Geo. Boucher who put up a group of Clematis. We noted: Xerxes, Ville de Paris, Venosa, Mme. Grange, Gypsy Queen, Mme. Van Houtte, Ville de Lyon, M. Hope and others among the most attractive. There were many dahlia exhibitors, but by far the most important lot was that from Messrs. Cayeux and Leclere. Two large double-faced sloping banks of cactus and decorative dahlias in pyramids was an effective group.

Carnations came from several exhibitors; Messrs. Stuart Low & Co. had a neat little collection staged in good form.

In M. Nonin's big display we noted carnations on one flank. Tuberous begonias, brilliantly displayed on sloping

banks halfway across the show, the colors divided in "vandyked" divisions were well shown in accordance with the invariable practice by the two leading exhibitors Messrs Vallerand and Billard.

Many other flower exhibits were staged. We noticed a pretty lot of lilies from Leon Fonteneau. The Maison Ferard put up a little square bed of cyclamen. There was a nice collection of Hydrangea Hortensis from M. Aug. Nonin; he had varieties Radiant, Vieux Chateau, Mme. Emill Mouillere, Bouquet Rose, etc., in fine heads or bloom.

The chrysanthemum classes were well filled and in the plant section some good entries were made. Vil-morin Andrieux & Co., staged a huge collection of handsomely trained plants in all forms. This was by far the most imposing lot of pot plants in the show and made a grand effect. Aug. Nonin's novelties were numerous, several being certificated. The exhibitors in this section were very numerous, including names of world-wide repute but space forbids these details.

The best cut-bloom exhibit was sent by an Englishman, Thomas Stevenson who put up a lovely exhibit of the finest show sorts. He carried off important prizes in all the classes entered. Paul Labbe had some nice blooms of choice varieties and staged in French style. Other cut blooms were sent by Ch. Gervais, Louis Leclere and Henri Crepin, the latter putting his flowers up in good style and enlivened with Salvia splendens, palms, musa and an edging of achyranthes. The Crepin Challenge Cup value 1000 francs was won by Zimmerman & Sons with a neat little lot of cut blooms. Paul Feron, Morin and Merigen were among others who had noteworthy collections in this section.

The side room allotted to stove plants and orchids did not contain a very large display. Edward V. Low of Vale Bridge, Haywards Heath, showed a collection of Cypridium.

Messrs. Maron et fils showed in their group: Cattleya Sigurd, Laelio-Cattleya Bright Star, Cattleya Fabia Alba.

Floral art was well sustained. Geo. Truffaut staged vases of roses on a turf lawn in the most effective style. Ed. Debie, a well known Parisian florist, had some good designs in many examples. The Lachaume firm also sent traditional exhibits. H. Pillon sent a basket of white lilac and arranged a little bamboo arbor, decorated with plants of chrysanthemums.

Only those who know the Paris Autumn Show can form an idea of the way in which vegetables are staged there and the immense variety of the kinds produced. Vil-morin Andrieux & Co., took the premier place. They had an enormous border 60 ft. long by 7 ft. in width containing a grand display of everything in season. The establishment "A la Pensee," also staged a long border of excellent vegetables with the addition of cactus dahlias. A large group of vegetables and saladings was sent by the Ecole d' Horti-

culture St. Nicolas. M. Compoin, in a glass case 35 ft. in length, demonstrated the art of Asparagus culture—quite an instructive object lesson.

Horticultural literature had a section devoted to it as also did the fine arts. A picture gallery was attached to the show in which were exhibited many interesting works of art in oil and water colors.

As soon as the prizes had been awarded—and here we may observe they consist of grand prizes of honor given by the president, M. Fallieres, by the minister of agriculture, of public instruction and other donors, guests and jury are trooped off to the Restaurant Ledoyen in the Champs Elysees. Our American friends who know Paris will understand what it means to lunch chez Ledoyen. It is a feast fit for epicures, let alone a set of hungry jurymen. M. Viger presided, surrounded by the officers of the society and some of the notables of Paris. Among the horticulturists we noticed Abel Chatenay, Albert Truffaut, George Truffaut, Philippe de Vil-morin, Jules Vacherot, H. Martinet, Lucien Chaure, Ch. Arranger, Blot, D. Bois, Gibault, Crepin, but there—we must stop. Two hundred guests filled the dining saloon and if we omit some there can be no wonder.

At length the champagne arrives and speeches begin. M. Chatenay reads out a list of the premier awards of which the following are the most important: First grand prize of honor to Nombrot-Bruneau for his fruit and fruit trees; second grand prize of honor to M. Pinon for trained plants of chrysanthemums; other prizes of honor to Coedonier & Sons for grapes, Salomon & Sons for grapes, Debie for floral decoration, Calvat for new seedling chrysanthemums, and so on. Complimentary speeches were made by the representative of the minister of agriculture, by the president of the Paris municipal council, by M. Viger, by M. Deloncle, Deputy for the Seine, by M. Lepine chief of the police, and by Harman Payne for the visitors.

C. HARMAN PAYNE.

SHORT COURSE IN FLORICULTURE, MASSACHUSETTS AGRICULTURAL COLLEGE.

The short course in floriculture will be given as usual beginning the 2nd of January and closing on March 8th. The lecture course given in the morning will cover general subjects of interest and value to the commercial florist. The afternoon will be spent in practical work in the greenhouse range. In addition to the lectures given on distinctly floricultural subjects, lectures in soil fertility, botany and entomology will be required and other lectures on field crops, fruit growing, market gardening or landscape gardening may be taken. On Saturdays an observation trip will be taken to some of the commercial greenhouses in the vicinity of Amherst and one trip will be arranged to the commercial places in the eastern part of the state. The practical men who have co-operated so gener-

Boddington's Forcing Gladiolus

GLADIOLUS PEACH BLOSSOM.

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St. NEW YORK CITY

GLADIOLUS, Colvillei and Nanus (type)

Plant some of these among your carnations; they will come in handy at any time.

	100	1000
Blushing Bride. Flowers are large, pure white with delicate pink spot. Useful for early forcing.	\$0.75	\$5.00
Peach Blossom. The most beautiful of all the Colvillei type of Gladiolus; the color is a lovely soft pink, on the order of the Killarney rose.	1.00	8.00
The Bride (Colvillei alba). This lovely white miniature Gladiolus makes a useful cut-flower for early spring use; will stand forcing.	.75	6.00

Gladiolus Gandavensis Hybrids

Many florists plant these in boxes, or among their carnations, in the winter. They are excellent for decorative purposes and realize good prices, either wholesale or retail. Gladiolus are a good catch-crop and take up but little room. The following are the best for this purpose:

	100	1000
America. The flowers, which are of immense size, are of the most beautiful flesh-pink color.	\$3.25	\$30.00
Augusta. The florists' best white Gladiolus:		
First size bulbs, 1 3/4 inches up.	2.00	18.00
Bulbs, 1 1/2 to 1 3/4 inches.	1.75	16.00
Shakespeare. White and rose.	4.75	45.00
May. Pure white, flaked rosy crimson; the best forcer; selected bulbs.	1.75	15.00
Brenchleyensis (true). Flery scarlet; top roots.	1.75	15.00
Selected bulbs.	1.25	12.00
First size.	1.00	9.00
Boddington's White and Light. Extra-selected bulbs, 1 3/4 inches and up.	1.50	14.00
American Hybrids. A mixture of the choicest varieties of Gladiolus.	1.00	9.00

SPIRAEA, or ASTILBE

	Doz.	100	1000
Astilboides floribunda.	\$1.00	\$6.75	\$65.00
Compacta multiflora.	1.00	7.00	65.00
Gladstone. Enormous spikes of pure white flowers.	1.25	9.00	87.00
Queen of Holland. One of the finest, grand florist's variety.	1.25	8.50	80.00
Japonica.	.75	5.75	55.00

SPANISH IRIS (IRIS HISPANICA)

The true value of this Iris appears to have been overlooked in this country. The great diversity of color and its being equally adapted for gentle forcing and massing in beds make it one of the most useful bulbs to plant.

	100	1000
Alexander von Humbolt. Dark blue.	\$0.50	\$3.50
Belle Chinoise. Pure yellow.	.50	3.50
Blanche Superbe. Pure white.	.50	3.50
Blanche Fleur. White with pale center.	.50	3.50
British Queen. Large white; very fine.	.50	3.50
Cajanas. Beautiful deep golden yellow.	.50	3.50
Chrysolora. Pale yellow.	.50	3.50
Darling. Blue; very fine; early.	.50	3.50
Mixed, all colors.	.35	3.00

ously in making the course a success during the past few years will again give lectures on their special topics. It is expected that this special lecture course will include talks by W. R. Cobb, Lord & Burnham Company, "Greenhouse Construction," January 5th; R. O. King, King Construction Company, "Greenhouse Construction," January 12th; C. F. Boyle, Thomas Galvin, Inc., "The Retail Trade," January 15th; F. J. Elder, Lord & Burnham Company, "Greenhouse Heating," January 19th; Wm. Sim, Cliftondale, "Violets and Sweet Peas," January 22nd; C. H. Totty, Madison, N. J., "Chrysanthemums," January 26th; W. H. Elliott, Brighton, "Rose Cul-

ture," February 5th; Eber Holmes, Montrose, "Rose Culture," February 9th; M. A. Patten, Tewksbury, "Carnation Culture," February 16th. It is expected this year that a general conference of florists will be held during Farmers' Week which is scheduled from March 11th to March 15th inclusive. At that time it is hoped to have a large delegation of florists present and to have a series of lectures by men of wide reputation. A flower exhibition will be held in connection with this meeting. The expenses for this course will include the registration fee of \$5; furnished rooms in private families may be obtained at a cost of from \$1 to \$3

a week. Board at the dining hall is \$4 a week and it may be obtained in private families for from \$4 to \$5. In addition to these expenses some allowance should be made for expenses on the observation trips. Any additional information may be obtained from Dr. William D. Hurd, Director of Extension Work, Amherst, Mass., or from Professor E. A. White of the Department of Floriculture. Decatur, Ill.—Hail and wind did considerable damage to the greenhouses of N. Bommersbach, 318 N. Water street; Daut Bros., 112 E. Prairie street, and the Harrold Nurseries on Nov. 11.

BOSTON NOTES.

Jackson Dawson is on the sick list this week.

Bennie Schneider, of H. Robinson & Co., lost his wife by death on Monday, Nov. 26.

H. M. Robinson & Co. have built a display case in the Co-operative Flower Market.

J. A. Pettigrew has gone on a two weeks' recreation trip, one week of which has been spent in a visit to his son, Dr. Pettigrew, in Youngstown, Ohio.

Hartford & McDonough, 70 Pemberton Sq., have quite a force making up greens for Christmas trade. This new firm reports business very satisfactory.

A new crimson chrysanthemum, Harvard, from E. D. Smith & Co., more of a Harvard color than Shrimpton, was before the Boston committee of the Chrysanthemum Society of America Nov. 18.

The Beacon Florist, 2 Beacon St., has moved to 7 Beacon St. into Houghton & Dutton's store. Their display refrigerator stands directly in front of one of the entrances. Better light and more trade in the new location, it is said.

Notice the advertisement by Thomas J. Grey Co. of the new and greatly improved Jerusalem Cherry, *Solanum Capsicastrum Melvini*. In this novelty the fruit is not hidden by the leaves but stands erect away from the foliage and crowded towards the tips of the branches. It makes an ideal holiday plant.

The florists' supply department of Welch Bros. has just undergone a thorough renovating and is an exposition in itself of what is newest and best in a practical way for the regular stock in hand of the up-to-date florist. It occupies the entire basement floor of the building at 226 Devonshire street, is brilliantly lighted and well worth a visit. There is nothing worth having that one cannot find there in the line of florists' requisites.

CINCINNATI NOTES.

Bowling, Monday, December 4th, at Finke's alleys.

Geo. Klotter's barn burned early Monday morning. He lost some fine cattle in the conflagration.

P. Weiland, who has a range of glass at New Castle, Ind., opens a wholesale house at 114 Third avenue East in this city on December 1st.

Wm. Murphy opens an "annex" on Third street this week, to facilitate the handling of Christmas greens.

Visitor—Martin Reukauf, representing H. Bayersdorfer & Co., Phila., Pa.

R. Glendenning, writing in The Gardeners' Chronicle, says that *Opuntia Missouriensis* should succeed in Britain if covered with a sheet of glass in the winter, "as it is sometimes subjected to a few degrees of frost growing wild." *Opuntia Missouriensis* is hardy as far north as Massachusetts where zero temperatures and sometimes even lower occur.

PERSONAL.

William Wickham has charge of the Oakwood cemetery, Adrian, Mich.

Vernon A. Sherwood has resumed his position at the greenhouses of Mrs. J. L. Gardner, Brookline, Mass.

Augustus Zirngiebel, formerly of Needham, Mass., is now in the employ of W. A. Manda, as traveling salesman.

Henry I. Tucker, formerly of Hopkinsville, Ky., is now in charge of the sales department of the Pleasant View Greenhouse, Madisonville, Ky.

Herbert L. Betts, for the past two years gardener for J. J. Glessner, Rocks Estate, Littleton, N. H., sailed on the Franconia last week for a visit to his old home in Falmouth, England.

George Shields, foreman for A. Leuthy, Roslindale, Mass., is now convalescing nicely after a long siege of pneumonia, during which his life was despaired of, he having suffered a relapse.

All will be glad to know that James Bell is out of the hospital and home with his family at Crawford, N. J. Though weak after all his trials and troubles he hopes soon to be among the many friends who sympathized with him.

The many friends of that sterling gardener, William Anderson, South Lancaster, Mass., will be sorry to learn that owing to trouble with his nostrils he has had to undergo an operation in a private hospital in Boston on Monday last. He expects to be over the worst of it in a week and to meet the boys at the New York gathering.

Boston visitors—D. Cameron, representing Sander & Son, St. Albans, Eng. Mr. Cameron will sail for home on Dec. 16; Ernest Chamberlain, New Bedford, Mass.

Philadelphia visitors—J. W. Scalian, Chester, Pa.; W. C. Langbridge, representing Jerome B. Rice & Co., Cambridge, N. Y.; Joseph N. King, Norristown, Pa.; Horace Rimby, Collegville, Pa.

DONLAN.

CHICAGO NOTES.

The D. D. Johnson Co. expect to have matters in shape so that an announcement may be made by the New Year and the Evergreen Brand Fertilizer will be manufactured in larger quantities than ever before.

Poehlmann Bros. are about to move from the corner of Wabash avenue and Randolph street, to 72 E. Randolph street, second floor, where they will have three times their present floor space.

John Kidwell, president of The Chicago Flower Growers' Association, is very optimistic on the outlook for the winter. He says business at the new place is fully up to what he had anticipated.

The E. H. Hunt Co. has made arrangements for the exclusive handling of the baskets and novelties of one of the largest manufacturers in Germany. They will have a full line of samples here by January 1st.

Jas. G. Hancock, who presides over the office for Frank Oechslein, is serving as juror this week. A trip to the Oechslein greenhouses always pays, but especially now while the holiday stock of plants is daily getting to be in that state of perfection rarely equalled by any other grower. Mr. Oechslein grows plants only and his is Chicago's show place in that line.

Visitors: Jos Labo, Joliet, Ill.; Mrs. A. Guillaume and son, La Crosse, Wis.; Mr. Kreimer of the Duluth Floral Co., Duluth, Minn.

BALTIMORE NOTES.

Geo. F. Lurssen has opened a branch floral store on Baltimore street.

John Cook, Baltimore's great rose grower, will soon go to Miami, Florida, where he usually spends his winters.

Indications point to the greatest horticultural show the state has ever had, next week. All available space in the big Armory has been taken.

Capt. Emerson, proprietor of Baltimore's greatest hotel, just opened, has purchased "Brooklandwood," a large estate in Green Spring valley. Chas. L. Seybold, formerly superintendent of Carroll Park, is engaged to do some landscape work on the place, and has already commenced. Immense green houses will be erected where raising vegetables in winter will be one of the specialties. Palms and other decorative plants will also have especial attention.

ST. LOUIS NOTES.

Chester Beyer of Beyer Bros. is again laid up with a lame foot and is confined to his room at his residence on South Grand avenue.

Wm. Young had a narrow escape from being killed last week in an elevator in an office building, but luckily he came out with only a few scratches about the head.

Visitors the last week were Martin Reukauf of H. Bayersdorfer & Co., Phila.; J. J. Karins of Dreer's, Phila.; J. P. McFarrom, Litchfield, Ill.; Wm. P. Craig of Robt. Craig Co., Phila.; Fred Lempke of Barnard & Co., Chicago. All report good business trips.

DREER'S SPECIAL VALUES IN PHOENIX ROEBELENI

Our stock of this beautiful, graceful, **hardy** Palm is in prime condition and of good value.

PHOENIX ROEBELENI. Specimens

6 in. pots, 1½ ft. high, 2 ft. spread	\$2.00 each
8 in. tubs, 20 to 22 in. high, 24 in. spread .	3.00 each
8 in. tubs, 2 ft. high, 2½ ft. spread heavy .	5.00 each
12 in. tubs, 2½ ft. high, 3 ft. spread heavy .	12.50 each
14 in. tubs, 3 ft. high, 4½ ft. spread heavy .	35.00 each
15 in. tubs, 3 ft. high, 6 ft. spread heavy . .	50.00 each

A nice lot of young plants in 2¼ inch pots for growing on. \$1.50 per dozen; \$12 per 100; \$110 per 1000.

For a complete line of Seasonable **Decorative** Stock see our Special Circular of October 12th. If you did not receive a copy write us and we will send you one.

Are you interested in Dahlias, either as a cut-flower proposition or for cataloging? If so send for our Special Wholesale Catalogue of Dahlias quoting special prices on field roots for early orders.

HENRY A. DREER, Inc., 714 Chestnut Street, Philadelphia, Pa.

The above is intended for the trade only.

NEWS NOTES.

Ilion, N. Y.—Fire destroyed the greenhouses of Gordon Bros., florists, Gordon place, on Nov. 21. Loss about \$2,000.

Bloomsburg, Pa.—A water tank with a capacity of 20,000 gallons has been installed at the Fifth street greenhouses of J. L. Dillon.

Lyons, N. Y.—Herbert M. Whiting of Geneva has filed a certificate to do a nursery business in Wayne county as the Whiting Nursery Company.

Rome, N. Y.—The plant recently occupied by Kipp & Edwards is again occupied by E. J. Byam, the owner. He has engaged Joseph Watkins as grower.

Brookline, Mass.—F. E. Palmer has purchased twenty-five acres of land near town and will eventually move his greenhouses there. He is starting a nursery to supply his landscape department.

Painesville, O.—The Painesville Garden & Greenhouse Co., recently incorporated, is a new firm that will take up mainly the forcing of vegetables. They expect to be ready for business by the fall of 1912. At present they have four greenhouses that cover about three-fifths of an acre of land and they cultivate five acres. A. E. McKee is president; S. T. Potts, vice-president; E. H. Hawley, secretary, and Ed. Wirtzman, treasurer.

"JARDINAGE."

Here is another new candidate for public favor and those of our readers who are interested in French horticulture will find in it a most artistic and well gotten up publication. The new journal is a monthly one and the sub-

scription is 6 francs for readers outside France. The text and illustrations are really done in very nice style, the articles are by well known French writers, viz: Messrs. Geo. Truffaut, E. de Gas, Jules Vacherot, Ph: de Vilmorin, Geo. Bellair, etc.

The office of the new journal is 90 bis Avenue de Paris, Versailles. The editorial department is under the care of our old friend George Truffaut, to whom we wish all success in his new undertaking.

CLUBS AND SOCIETIES

AMERICAN ROSE SOCIETY.

Detroit Exhibition.

Detroit flower people are wide awake in giving full local notice to their 300,000 people that the American Rose Society will arrive in the city January 10, 11 and 12, 1912. The premium list is out and any additions as specials will be placed therein as fast as they come, because for years past these specials have been given even up to the very last days. Twenty-four persons have subscribed to the guarantee fund; Chicago people will do their best and this means a great deal.

A public show of this kind in which roses, carnations and local treasures will combine to fill the large crystal palace, known as the Wayne Pavilion, is certain to be so attractive in a city of homes and gardens like Detroit that the place will be well filled. Wallace R. Pierson has been on a missionary tour of good will from East to West.

Do you know that the American Rose Society has only granted two gold medals—the last one was voted to M. H. Walsh and this medal of pure gold was duly forwarded to him. And herein lies a bit of affection. When the name of the rose for which the medal was given was asked, Mr. Walsh remembered his wife and named what is said to be the finest white rose, Mrs. M. H. Walsh.

The Executive Committee will meet shortly to go over all details pertaining to the coming annual meeting; several committees will have reports to make.

BENJAMIN HAMMOND, Secy.
Fishkill-on-Hudson, N. Y.
Nov. 27, 1911.

DETROIT SHOW PREPARATIONS.

Mr. Dilger, manager of the coming show of the Rose and Carnation Society, keeps the various committees hustling and stirs up something new every day. He brought out one point which ought to be looked into by the S. A. F. It seems that almost everything like horses, cattle, machinery, etc., etc., can be brought into the U. S. free of duty if for exhibition purposes. Not so with the product of the florist. On all flowers and plants an ad valorem duty of 25 per cent must be paid, even if cut flowers are to be thrown away or given to charity after an exhibition. It seems that proper steps taken by the legislative committee of the S. A. F. ought to be successful in having the florists' product placed on the same basis as the farmers' product. Mr. Dilger also desires it to be known that small spaces—say 200 square feet—may be rented by plant growers for displays during this convention, as also spaces for banners. There being but very few opportunities of this kind, it will be necessary to make application for such space to Mr. Dilger, 36 Broadway, at an early date.

FRANK DANZER.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Better Flower Deliveries Secured.

The following supplementary report of the Tariff and Legislative Committee has been forwarded to Sec'y Dornier of the S. A. F., by Chairman John G. Esler of that committee:

The Tariff and Legislative Committee of the S. A. F. and O. H., are able to announce that in the controversy with the United States Express Co., which has been going on during the past six months, over the inefficient delivery of cut flowers, the company has acceded to the representations of the committee, and has established a satisfactory and efficient delivery, without an appeal to the Interstate Commerce Commission.

The chairman desires to state that if the florists of the country could only understand the effectiveness of concrete action, over individual effort, in dealing with corporations, every producer of, and dealer in, floral products, would become a member of the S. A. F. and O. H. forthwith.

JOHN G. ESLER,
Chairman.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

The Gardeners' and Florists' Club of Baltimore held an interesting meeting Monday night. Several new members were added to the list. F. C. Bauer gave a detailed talk of a trip he recently made in Europe. He talked mainly on things of especial interest to florists. Philip B. Welsh was elected a delegate to the Farmers' League, which will meet here during the annual exhibition of the State Horticultural Society. Next March will be the 25th anniversary of the club. The president was authorized to appoint a committee to arrange an appropriate programme to celebrate the occasion.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Report of Examining Committee.

Exhibited by Elmer D. Smith & Co., Adrian, Mich., at Boston, Nov. 20th. Variety, "Harvard"; crimson Jap. Scored 87 points commercial scale and 84 points exhibition scale.

The variety exhibited under number at New York, Nov. 1st, by A. C. Van Gaasbeck, Orange, N. J., has been named Helen Van Gaasbeck. The Pompon variety of Hartje & Elder, Indianapolis, Ind., has been named Fairy Queen.

CHAS. W. JOHNSON, Sec.

Notes.

The Minnesota State Horticultural Society will hold its 45th annual meeting in Minneapolis, on Dec. 5-8, 1911. A big fruit show is promised. "Meet us at the great horticultural feast."

The New York Gardeners' Society's Reunion Dinner and Entertainment will be held in the afternoon and evening of Dec. 21st, in Thum's Casino rooms and bowling alleys, 1241 Broadway. This will be a great and jolly

gathering of the principal gardeners and those engaged in horticulture within a radius of one hundred miles of New York city. A large and representative committee has been appointed to cover the several sections, with Joseph Manda, W. E. Marshall and J. Ivera Donlan to act as central committee in the city.

WASHINGTON NOTES.

H. L. Lausher, with Z. D. Blackstone, has just returned from a short trip through Maryland and Virginia.

Otto Bauer of the Washington Florists' Co. has been selected as one of the judges of the exhibits of flowers during Maryland Week at Baltimore, December 4 to 9.

Gude Bros. exhibited a fine selection of chrysanthemums and American Beauty roses at the Maryland-Virginia Apple Show held in the Masonic Temple during the week.

J. Henry Small has been named as a member of the executive committee of the Washington Board of Trade, and he and William F. Gude are also members of the Sleman Memorial Committee.

A very interesting meeting may be expected on Tuesday, December 5, when the Florists' Club of Washington will again get together. A number of important matters will be brought up for discussion and a large attendance is expected.

Michael J. McCabe, who operates a stand in the Center Market, has opened a branch in the Riggs Market. His son, Harry, will be in charge of the latter place. The opening was marked with a fine showing of Killarney and Richmond roses.

Shipments of fertilizer to points on the Potomac River are running very heavy and on each trip of the steamers from Alexandria to the lower Potomac points many hundreds of bags are carried. Alexandria fertilizer plants are getting their share of the business, the rest coming from Baltimore and other points. It is believed these heavy shipments will continue for a long time to come.

Walter Gordon has severed his connection with the Washington Florists Co. and has entered the employ of James A. Phillips, 2926 Fourteenth Street, N. W. The Washington Florists Co. have also lost from their employ Miss Mattie Williams, who, for a long time, was their bookkeeper and saleslady. She is receiving the congratulations of her friends on her marriage to Mr. Richard Garrett. After an extended honeymoon the couple will reside in Wilmington, N. C., where the groom is located.

The Washington Florists Co., have a prize-winning window trim this week which is very suggestive of the season. In the centre, suspended from the ceiling, is a gigantic horn of plenty from which seems to come tumbling in an artistic manner, a number of pumpkins, ears of corn and large yellow and white chrysanthemums, suitably set off with greens. On either side of this small rustic baskets of Killarneys and other roses are placed, as is also a large rustic box of orchids. Surrounding the flowers are bunches of corn stalks and more pumpkins and the whole is arched over with twigs and autumn leaves.

CLARENCE L. LINZ.

Educational Trains

now bring the facts from the Experiment Station direct to the Farmer.

The Experiment Station men are anxious to discuss the questions of most value to the people along the routes. Ask them to bring along an exhibit of fertilizer materials and to tell you how to get the most plant-food for your money.

Recently one train gave demonstrations of actual fertilizer mixing. Soon many will do so. Take your fertilizer dealer to these trains. Ask him to sell **Potash Salts** and brands containing six to ten per cent. Potash.

We shall be glad to send you, free, pamphlets prepared by the best practical authorities on fertilizers for various crops and soils. Write today, mentioning crops and soils that you wish to improve.

Seed Trade

American vs. English Grown Sweet Peas.

The following interesting communication has been sent to the trade press of Great Britain by George W. Kerr. I can cordially endorse same as it thoroughly agrees with knowledge gained from my own training in Europe and my subsequent experience in America extending over a period of 28 years. Any Britisher who doubts the superiority of American-grown seed either in strain or vitality should consult what that experienced Englishman, Edwin Lonsdale, has to say of the extraordinary results in size and perfection of bloom attained in that favored spot—the Lompoc Valley in California, with the sweet pea. I saw some of the Hemus samples at Fordhook trial grounds last summer. They were nothing to brag of. Very much mixed and not true to description. I believe Lompoc Valley is the sweet pea "paradise."

GEORGE C. WATSON.

Gentlemen:

A few days ago I received a very daintily gotten up Sweet Pea Catalog from England and, being a great admirer of our Queen of Annuals and always thirsting for further knowledge pertaining thereto, I immediately proceeded to consume its contents and, having done so, feel it my duty to unburden myself on some remarks contained therein.

The introduction contains some rather sweeping assertions, some of these apparently being directed against the stocks of other Sweet Pea specialists and, before the first to hold my attention was the following statement: "The public are then sold seed grown in the soft climate of California, which seed is not, I maintain, best calculated to stand the trying vagaries of the English climate."

I would not say that Californian grown Sweet Pea seed was better than our English seed, but I have seen very little of the latter for some time, for, judging by the many English varieties we try each year, the germinating quality are "way down," though I must not say that the seed received from the growers are all that could be desired, approaching the "don'ts" of home grown seed.

Last season I handled first seven novelties from the firm who sent me the catalog referred to above. The packets contained in all 1910 seeds, 286 of which germinated. Twenty three of the varieties were true to description, though most of

these were practically synonymous with or inferior to existing sorts, the only difference being the name; eight were so mixed that it was impossible to tell what was intended for the variety; thirteen were entirely Grandifloras, although sold as Spencer; of three varieties no seeds germinated. The seed was carefully planted in pots during February and given cool greenhouse treatment. California seed planted on same date and under similar conditions germinated 95 per cent. And yet this grower has the audacity to criticize American-grown seed, apparently forgetting that it were better to "consider the beam that is in thine own eye" ere attempting to remove the mote from thy brother's eye.

It is clear that the writer of the assertions in question has no earthly idea of the seed-growing conditions of California, or such a statement would never have been made; for, as a matter of fact, the conditions there are ideal for the production of perfect seed, and as the temperature is equable, neither too hot nor too cold, the resulting crops are unsurpassed, having the highest germinating qualities and being full of vigor. The seed is planted during February, the temperature at that time and during the earlier stages of growth ranging from 40 to 50 deg. Fahr., while during the summer and ripening period it seldom goes above 75 to 80 deg. Fahr. As a rule there are no rains after April, but during July and August heavy fogs come in from the sea each night, thus supplying all the moisture required for the growth of the plant and also preventing the pods from bursting and ripening prematurely. As regards the soil, it is questionable if it has its equal in the world, the depth of virgin (2) soil in some localities being hard to determine and as no artificial fertilizer of any description is used, the Sweet Pea in California develops a natural growth, never being forced by stimulants, the result being that disease is practically unknown.

In introduction, paragraph No. 4, the grower further says: "An untrue stock always again produces rogues, even when the seed is saved only from flowers true to type." Is this new Sweet Pea gospel, or bluff to catch the penny of the gullible public?

Paragraph No. 8 hits your National Sweet Pea Society rather heavily. I was always under the impression that that body, which contains several personal friends of mine, was doing good and thoroughly impartial work.

Trusting you will find a letter for the above in an early issue of your paper. I am, Yours truly,

G. W. KERR

Dorchester, Pa., Nov. 1, 1911.
Excerpt from Sweet Pea List of William J. Unwin, Histon, Cambs., England, Autumn, 1911.

As several of the very best Sweet Peas cannot be saved successfully in this country, I have during the last two seasons been experimenting in California. I found the seed first-class, is really germinating

HENRY F. MICHELL CO. 518 MARKET STREET, PHILA., PA.

powers, and it produced splendid plants. Previous to this season Mr. F. Cooper, formerly of Histon, managed my stocks, but as I was growing a much larger quantity this year my expert foreman, Mr. G. H. Burt, went out to take charge. He arrived in April before the plants were in bloom and stayed until all the seed was harvested. Under the care of Mr. Burt my customers may rest assured that stocks will be true to name. Every pod of seed is gathered by hand, in the same way as is done at home. Mr. Burt writes: "I wish I could send you a bunch of each variety, as the blooms are grand and we have no disease on any variety."

Growing my own seeds in California has been a great expense, but I found it was the only course to take, so as to offer good, plump seed of these poor seeders at a reasonable rate.

Maine Seed Improvement Association.

The Maine Seed Improvement Association held its annual session at Waterville on Tuesday, Wednesday and Thursday, Nov. 21-23. Addresses on The Best Type of Field Corn for Maine Farmers, by Dr. G. M. Twitchell of Auburn; Prof. M. E. Barnes of Cornell University, on Developing Disease Resistant Strains of Plants, and by Dr. Raymond Pearl on Potato Improvement, were among the most interesting parts of the program. An immense amount of business was transacted. Among the resolutions adopted was the following:

Resolved, That in the opinion of the association, the most urgent need at the present time for the improvement of the crops of Maine is to obtain exact scientific knowledge as to what varieties or strain of seed of our common crops are best suited to the local conditions of soil and climate in different parts of the state. To this end the association would recommend the carrying out as soon as possible of accurate scientific and widely distributed variety tests of the best strain of seed now to be obtained in any part of the world. As a beginning of the work the association would endorse the cooperative variety tests of oats now being conducted by the Maine Agricultural Experiment Station, and desires to record its willingness to cooperate in these tests, and would urge the extension of such tests to other crops as early a date as may be feasible.

Resolved, That the executive committee is hereby instructed to consider carefully the question of premiums and methods of offering premiums at the future annual meetings in such other exhibits as the association may desire to it, with a view of obtaining a fair, whereby exhibits of the best varieties of seed may be placed upon the grounds of the association.

Notes.

Chicago, Ill.—About Feb. 1 the W. W. Barnard Co. will move to 231 to 235 West Madison street.

A leading New Zealand firm informs an American consular officer that it

would like to arrange connections in the United States for the import and export of grass seeds. This firm's address may be obtained on application to the Bureau of Manufactures, Washington, D. C., referring to the file number, 7641.

Little Rock, Ark.—A new wholesale and retail seed business is about to open here, to be known as the Bain-McLees Seed Co. The company is composed of R. M. Bain, formerly manager of the Modern Gin and Compress Co., and David McLees, formerly of the Charles Leifer Seed Co. A location has not yet been decided upon.

Louisville, Ky.—The Hall Seed Co., whose incorporation was reported in HORTICULTURE Nov. 18, is the incorporation of the retail department of the Southern Seed Co., as a matter of convenience, so as to enable them to give W. P. Hall, who has been manager of that department ever since it was organized, an interest in the business. A small amount of stock has been sold to W. P. Bunton, formerly manager of the implement department of Wood, Stubbs & Co., seedsmen of Louisville. Physically there has been no change whatever in the business, Edwin C. Foltz retaining the controlling interest the same as in the Southern Seed Co.

Flower Market Reports

BOSTON

The Harvard-Yale football game Saturday, Nov. 25, helped trade very materially last week. Intensity and Strimpton, chrysanthemums and Harry Fenn, carnation, being especially in demand. This episode, with the prospect of Thanksgiving Day, the great New England festival, sufficed to set the florist trade into action and prices began to move upwards. The shipping trade, as usual, came in to help the upward trend of the market and up to Tuesday evening the conditions were quite favorable but on Wednesday the inevitable reaction set in and prices sagged, due in a great measure to local apathy and the discontinuance of the shipping business. The market is well supplied with everything and on roses, carnations and violets the overstock has broken the price in half.

BUFFALO

Business brightened up considerably and was good throughout the week. There was enough stock to supply the demand, but a slight shortage on the short grade of roses, especially Killarney and Richmond. The demand fell on carnations which were not over plentiful. Some very choice Pink Delight, Perfection and Beacon are had and they have had a good sale. Chrysanthemums continue good, also lily of the valley, the latter selling well. Narcissus, Roman hyacinths and stevia are added to the list. Floral work was in demand and helped to consume a good portion of the surplus.

CHICAGO

Plenty of chrysanthemums for Thanksgiving is the outlook at this writing, Monday, the 27th, but there is no accumulation of stock and orders are coming in steadily leaving the final outcome uncertain. Roses are shortening in supply and prices on fancy stock are apt to be in favor of the grower while Beauties, as reported last week, are off crop generally. Carnations have been short in supply all the late fall and with the approach of the holidays are in greater demand than ever, even though the complaints of sleepy stock are quite frequent. The warm weather is supposed to be the cause of this trouble. Sweet peas are coming in rather slowly and demand for good stock is brisk. Violets are selling well and prices advanced this week. In lilies the supply and demand are about equal. All kinds of green help out the stock.

CINCINNATI

While the market will not be very long on stock for Thanksgiving, early reports from the growers indicate that they will have enough to go around. A general holding back by many starting last week brightened up the market. All the junk that had accumulated in the ice boxes has been cleaned up, and now practically all offerings are A1 in quality. The shipping demand continues strong. The late varieties of chrysanthemums are now in and soon, outside of a few very late varieties, they will be a thing of the past. The White and Yellow Chadwick, White and Major Bonaffon are the favorites now. A heavy cut of Diana is arriving each day. All roses clean up quickly and

(Continued from page 770)

For the Christmas Trade

BOXWOOD SPRAYS

Exceptionally fine stock, dark glossy green, no surplus wood. The choicest lot we've ever received. We are the introducers of and the headquarters for this valuable green. For Christmas there is nothing that makes a choicer or more beautiful wreath than Boxwood with a little coloring of Bronze Mahonia. Boxwood, 50 lb. crates, \$7.50.

BRONZE MAHONIA

\$1.50 per 100; \$12.50 per 1,000.

LYCOPodium

Splendid quality, full and green, not dried out on account of being gathered too long. Deliveries any time. At present we quote it at \$9.50 per 100 pounds; future quotations on application.

LYCOPodium WREATHING

\$10.00 per 100 yards.

BRONZE GALAX

For immediate delivery, cold storage stock, \$15.00 per case. New crop likely ready about December 10th; probable price, \$7.50 per case.

GREEN GALAX

New crop. \$7.50 per case.

LEUCOTHOE

Green and bronze, \$1.00 per 100; \$9.00 per 1,000. Bronze ready about December 10th.

CUT POINSETTIAS

Some especially well grown stock. The large heads are beautiful specimens, deep velvety red. Per 100, \$25.00 and \$30.00. A few of the very large ones, \$40.00 per 100.

HOLLY WREATHS

Of the very best holly, made full with plenty of berries. \$15.00 per 100. Extra large, \$20.00 and \$25.00 per 100.

PLUMOSUS

Contracts made for the season on strings or bunches, very choice stock.

MAGNOLIA LEAVES

Green and Bronze; per basket, \$2.25.

RIBBONS and SUPPLIES

Many new patterns in exclusive Christmas ribbons. Write us for prices on these and on supplies.

Flower Market Reports.

(Continued from page 773)

are on the short side. Beauties are conspicuous for their scarcity. The supply of red, too, is not over-large. Carnations sell very well and more might probably be used. The colored varieties are not as plentiful as white ones. Longiflorum lilies are good property. The same is true of New York double and single violets, Lily of the valley and orchids sell up from day to day. Narcissi are now included in the offerings. The green goods market is ample. Considerable bronze galax, boxwood, ferns and leucothoe are being shipped.

The old saying, "Praise

DETROIT not the day before the sun has set," may be

aptly applied to last week's business conditions, which, while beginning very promising, found the tables of the wholesalers loaded down with fine stock Saturday night. This week, with Thanksgiving, will turn the tables to a more satisfactory condition for all concerned. We all feel the great scarcity of debutantes, which were unusually many last year, and the few there are will all have their coming-out parties around the holidays.

A busy week was

NEW YORK forecasted for the Thanksgiving time

and the outlook was promising but various influences had to be reckoned with and the outcome is not exactly to the liking of the grower and growers' agents in the wholesale markets. In truth the supply of flowers in the local markets is over-liberal and it is not easy to control prices. Some things, as the regal cattleya, hold their own, regardless of market fluctuations. Violets got a refreshing filip from the football excitement. But, taking the market as a whole, the situation is not over-encouraging to the man who has to pay the coal bill or the agent who has to stand for the store expenses. Still, "the smoke goes up the chimney just the same" and we hope that everyone interested will come out on the safe side of the ledger on the Thanksgiving proposition.

Saturday was

PHILADELPHIA the big day of last week. In

addition to fine weather (which lets the street men out and makes business good any fine Saturday) there was on this occasion the Army and Navy game, which always calls for lots of flowers. Immense quantities of yellow chrysanthemums were held

back especially for that event and notwithstanding the great demand there was more than enough to go around and prices, while fair, were not much above normal. For three months now the chrysanthemum has been with us and there never have been so many as this year. As a natural consequence returns have not averaged as good as in previous years—good judges say 25 to 35 per cent less. Among the varieties still in evidence and in splendid form are Bon-naffon, Chadwick, Dean, Eaton and Nonin. Violets were also in great demand for the game. There was any amount of them, both from nearby and distant points. All were pretty well cleaned up—except the late arrivals. The quality is now fully up to the cold weather standard and gives excellent satisfaction to customers. All roses are selling well, and quality generally is all that can be desired. The "double pink" Killarney is a favorite. It was a little off color for a while but has pretty nearly got back to its best form again. Prince de Bulgarie is also in grand form, the specials bringing as high as fifteen and twenty, which is remarkable for a rose of this character. Carnations also are in fine form. Splendid flowers of Enchantress, Beacon, Pink Delight and Gloriosa are to be had in quantity. Orchids scarce. Gardenias improving. Paper whites made their appearance last week.

The market was greatly

ST. LOUIS ly relieved last week. The glut of the previous week had disappeared and some day-out stock became real scarce. Today, Monday, Nov. 27, very little is coming in and the market was cleaned up early. This will be the case during all this week as the retailers are expected to buy heavily for Thanksgiving week. Roses have been quite plentiful and only the best have sold well and cheap. Carnations sell well with hardly enough to go around some

days. Stock that has been selling at 2 and 3 cents is now up to 4 and 5 cents, with extra fancy at 6 cents. Chrysanthemums are on the down grade but quite a few fancy ones are still coming in. Violets are in great demand. Lily of the valley, Roman hyacinths, paper whites and lilies—plenty of these are expected this week. Good Smilax, adiantum and asparagus are in demand.

The football game between the Army and Navy elevens

caused a small flurry in the local market and a number of small weddings and the usual funerals made up the week's work. With the weather continuing warm and stormless, business in all lines is very slow and this, of course, affects the sales of flowers. The days of the big supply of chrysanthemums in this market are about over and many of the local growers completed their cutting this week. Roses were in fine shape for the Thanksgiving trade, especially locally grown American Beauties which were never in better form, foliage or color. Carnations were fair but the supply did not equal the demand for good stock and even the inferior qualities were slim as to quantity. There were a few sweet peas to be had but they were not so much in demand. Gardenias produced locally were good as to quality but not enough of them were offered. There seemed to be an unusually heavy demand for single violets but the largest growers were not able to begin to make them bloom to make any kind of a showing in numbers. The few thousands that came in were all sold before they were picked. Hudson River violets were never better than at present, they are plentiful, and the supply and the demand are equal. In the market this week could be seen the first of the pure white narcissus, Gloire de Lorraine begonias and stevia. Some very fine azaleas are also among the newcomers.

SITUATIONS WANTED

SITUATION WANTED in Massachusetts by an all around florist of over 25 years experience. Rose growing a specialty. Capable to take full charge. Now in charge of large rose growing establishment. Reasonable wages and permanent position desired. Married; no children. Address N. H., care HORTICULTURE.

FOR SALE

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick A and B qualities. Market dropped. Now is the time to buy and save money. Parselsky Bros., Inc., 215-217 Havemeyer St., Brooklyn, N. Y.

came to Washington. For the past thirty years he has been the landscape gardener at the Naval Observatory but lately owing to rheumatism and heart failure, he was unable to perform any work. He has been residing at the home of his daughter, Mrs. Benjamin Thomas, and it was the latter who found him with his clothing aflame a few moments after he had fired the fatal shot. He is survived by one son and three daughters. During his long residence in the capital, Mr. Lambkin had many friends and his passing away is deeply regretted.

PUBLICATION RECEIVED.

No. 26 of Volume 7 of the Bulletin of the New York Botanical Garden has been issued under date of October 12, 1911. It is devoted to a biologic and taxonomic study of the genus *Gymnosporangium*, by Frank Dunn Kern. This valuable addition to the scientific knowledge of the numerous "rusts" which infest orchards, forests and gardens comprises nearly 100 pages, with 68 figures and plates.

Feverfew all sold. Discontinue ad.
Adolph E. E. Koch,
Nov. 25, '11. Nobscot, Mass.

Obituary

Mrs. John Odgers.

Mrs. John Odgers, florist, at Maquoketa, Ia., died on Nov. 7, of heart failure.

Frank Kleinhans.

On November 18, Frank Kleinhans, of Kleinhans Bros., florists, St. Louis, Mich., died at his home after an illness of three weeks. His brother David will continue the business.

John Siebenthaler.

A well known Ohio nurseryman, John Siebenthaler, died on Nov. 16, at Dayton, Ohio, aged 57 years. He had for years been a member of the Montgomery County Horticultural Society. Four sons and one daughter survive him.

M. Edouard Andre.

The death is recorded of M. Andre, who was editor, from 1860 to 1882, of the "Revue Horticole." M. Andre died on October 25 at La Croix, Blere (Indre-et-Loire), aged seventy-one years, after a long illness. He was the introducer of many useful and ornamental plants, was a skillful landscape designer and a man of high scientific attainments.

William H. Murdock.

William H. Murdock, for many years a florist in Cambridge, Mass., died on Sunday Nov. 26, at the Cambridge Relief Hospital, where he had been since the previous Tuesday. On that day he collapsed while at work in his garden, suffering from a slight shock.

Mr. Murdock was born in Cambridge in 1837 and retired from business about 10 years ago. He served in the Common Council in 1888 and 1889. He leaves a son, Harris H. Murdock, of New York, and two daughters, Miss Florence, a student at Mt. Holyoke College, and Miss Dorothy of Cambridge.

John H. Lambkin.

Despondent because his many infirmities threatened to render him helpless, John H. Lambkin, eighty-one years of age, after making preparations for his burial, fired a shot into his right side, dying shortly afterward. Mr. Lambkin was a native of Bremen, Germany, coming to this country at the age of thirteen. When the civil war broke out he enlisted in the Union Army, serving under General Sherman and, later at Gettysburg, under General Bull. At the close of the war he

writes HORTICULTURE that in addi-
tion to the two greenhouses he is
building, as reported in our Nov. 18
issue, he will erect four more of the
same size next spring. Lettuce will
be grown in one house. A small nur-
sery will also be conducted in connec-
tion with a general floral business.
He, in company with M. R. Clippinger,
is doing business as the Clippinger
Floral Co.

FIRE RECORD.

Humboldt, Ia.—A dwelling on the
grounds of the Humboldt Nursery Co.
was destroyed by fire on Nov. 15; loss
about \$2,500; insurance \$1,000.

Sharon, Pa.—Fire destroyed the
boiler house at the greenhouses of
John Murchie, North Irvine avenue,
on Nov. 9. Loss about \$1,300; no in-
surance.

Carthage, Ill.—The greenhouses of
S. T. Stone, florist, North Main street,
have been purchased by Prof. Robert
C. Crum, principal of the Raton, N. M.
high school. They have been moved
to his property on West Locust street,
where he will conduct the business.

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Each	Dos.	100
10	20 in.	\$1.45	\$18.00	\$180.00
20	18 in.	1.30	14.00	115.00
30	16 in.	1.00	11.25	92.00
40	14 in.	.85	7.00	56.00
50	12 in.	.45	5.00	40.00
60	10 in.	.38	4.00	32.00
70	8 in.	.30	3.50	28.00

Manufactured for us exclusively. The best tub ever introduced. The neatest, lightest
and cheapest. Painted green, with electric welded hoops. The four largest sizes have
drop handles.

HENRY A. DREER, Seeds, Plants, Bulbs and Supplies, 714 Chestnut Street, Philadelphia, Pa.

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 335 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

THE LATEST SIL

**The new Sargent rose originated by Jackson Dawson
now offered for the first time for fall 1912 delivery**

This seedling combines the good qualities of R. Wichuraiana R. Crimson Rambler and R. Baron Rothschild which have been used in its evolution. The flowers are single, about three inches across, pale rose in color and produced in greatest profusion in pyramidal clusters all along the stem and branches, blooming from the middle of May till end of June. The foliage is a beautiful glossy green and remains in good condition till late fall.

As this stock is limited book your orders early. \$1.50 each

Two Useful Tenants of the Herbaceous Border

PYRETHRUM ROSEUM, THE PINK MARGUERITE.

The real charm of daisies, using the name in the broad, popular meaning applied to flowers of botanically entirely different plant species, is their characteristic simplicity. Through ages civilized mankind has loved the modest beauty of all those plain single flowers commonly called daisies. At the approach of each spring we greet the small blossoms of the wild *Bellis perennis* on the sunny meadow with gladdening eyes. It is our first daisy, true to its name. Horticultural pursuits soon bring about the acquaintance with *Chrysanthemum frutescens*, the Paris daisy, or Marguerite and its more pretentious semi-double and double offspring of recent date. We, too, learn to appreciate the merits of *Chrysanthemum maximum*, known as the Shasta daisy, and its numerous more or less distinct varieties claiming recognition as such. What I have mentioned of cultivated types so far, however, appears chiefly conspicuous by the immaculate glistening white of wonderful regular rows of petals. The desire to produce flowers of the same classic form in various clear distinct color-shades has led many of us to try to solve the apparently vexatious task of growing the brilliant hued Cape daisy, *Gerbera Jamesoni* and its various new hybrids. The repeated failures in this direction are very apt to induce the North to a higher valuation of the hardy *Pyrethrum roseum*, frequently called the pink daisy, or the pink Marguerite. Of perfect form, the color scale of its numerous garden hybrids reaching

Photo by courtesy of Mt. Desert Nurseries.

PYRETHRUM HYBRIDUM ROSEUM

ficiently drained and an open sunny exposure. South of Boston it appears at its best during May and June, while farther north the flowering season extends well into the month of July. Under normal conditions plants attain a height of from 2 to 3 feet. The old stalks removed in time causes the plants to lightly bloom again in the fall. *Pyrethrum roseum* can be easily raised from seed which, however, only to a certain percentage comes true to color. For special color scheme arrangements it is therefore more advisable to buy previously assorted plants.

In modern garden planting with its tendency for higher values in artistic floral effects *Pyrethrum roseum* and its new single and double hybrids represent a material which no landscape gardener or garden owner at present can afford to overlook.

MONARDA DIDYMA.

There is no scarcity of perennials which, as strong stately specimens, show to their best advantage when placed singly; be it as nucleus of mixed herbaceous borders, or on conspicuous places as forerunners of shrub plantations, or as solitary ornaments on the small sheets of lawn of city house front or back yards. As a few instances I mention *Gunnera scabra*, *Yucca filamentosa*, *Funkia subcordata grandiflora* and nearly all the peonies. Again there is a large number which should be planted from the very start in sufficient number and close enough for a good and early mass effect. In the latter class we must count the monardas. Scattered singly here and there they are apt to be lost to vision; associated together in clumps of liberal size however, they become at once interesting, impressive, and while in bloom, decidedly handsome. As natives of our hemisphere monardas belong to our hardiest flowering herbaceous plants in northern States. Their characteristic erect, at the top, branching growth, the aromatic foliage and the blossoms forming dense heads or whorls surrounded by bracts, make an ideal material for border planting.

Extensive popularity has developed quite a number of common names such as Horse-Mint, Bee-Balm, Oswego

MONARDA DIDYMA.

from pure white to almost dark crimson makes the flowers a splendid material for vases, table decoration and even for fancy design work.

Pyrethrum roseum is the perennial par excellence for choice outdoor effects. As a native of the Caucasus mountains it is under proper winter cover perfectly hardy as far north as Canada. The requirements for a thrifty growth are a rich, rather light garden soil, suf-

Tea, Bergamot and others of merely local bearing. Widely distributed, we find at present perhaps only the original *Monarda didyma* with bright scarlet flowers. The heads and bracts of the recently introduced variety—Cambridge Scarlet—are of darker shade, while "rosea" was rose-colored and "splendens" conspicuously bright crimson-hued heads. All mentioned species prefer a sunny exposure, light soil and apparently do best in moderately moist and low locations. For dry grounds the wild bergamot, *Monarda fistulosa*, can be safely

recommended. This species appears in two colors—rosy purple and white. Both varieties are, too, well adapted for the wild flower garden.

Monardas propagate very easily by root division. Cut flowers possess splendid lasting qualities and for that reason represent valuable material for indoor decoration.

Richard Rothe

Northeast Harbor, Maine.

Gladiolus Notes

The season past, has been a pretty severe one for gladioli, especially for developing seed. Although I put in the usual amount of work in crossing, I gathered the record small crop of seed. The bulbs turned out much better than I expected, considering the long extended drouth, but I worked the hoe and cultivator double time, conserving all the moisture possible in this way.

The blooming period was not at all satisfactory this year. Many of the new sorts I bought for trial did not bloom. In some cases the bulbs sent me were evidently old worn out bulbs that probably never will bloom. I don't understand why so many growers send out this kind of stock. I have been trying for three years without success to obtain young stock of *Gladiolus Sans*. Pareil, probably the most beautiful salmon pink *gandavensis* in existence. From about 150 large bulbs of this variety I managed to get something like sixty bulb-lets but with the most careful culture I only got eight puny little cormels. The old bulbs of many choice varieties will not produce vigorous bulb-lets.

As a rule, the longer a bulb is grown from divisions, the more flattened it becomes, so that when we get the round or conical-shaped bulbs we are apt to think that we have some strong young bulbs. This is not always to be depended upon for a great many of my oldest bulbs that I have been growing for seeding three and four years, were as round as virgin bulbs when I dug them this fall. On the other hand, the variety Mrs. Frank Pendleton is invariably flat the second year from bulb-lets, if over seven-eighths of an inch in diameter.

The two best new white sorts I have tried this year are Isabel (M. Crawford) and White Queen (Geo. Popple Jr.). The latter sort is a solid white and the one healthy bulb out of six I bought produced a strong healthy plant and a splendid spike of pure white flowers equal to any of the solid white varieties I have seen and better than any I have tested.

But what is the matter with all of the so-called pure white varieties? It appears that all of them require ideal conditions to grow them healthy and make them produce good spikes of flowers. The new French white Reine a la Anjou (Reine Blanche) is the one exception. This variety has proved strong and vigorous in all sections.

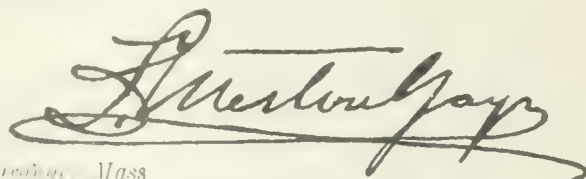

On my way to the Baltimore convention I stopped at Flowerfield, L. I. to look over the vast fields of gladioli of John Lewis Childs. The visit well repaid me for the time spent, and I shall always remember with genuine pleasure the interesting and instructive chat with Leonard Joerg, as we walked through the magnificent fields of young gladioli. It is not only the justly celebrated Clarks, but also novelties and varieties of all sections and from all parts of the world. Side by side with the healthy Aline, Blanche and Alaska are all of the new pure whites of Europe and America and not one of them showed a healthy and vigorous plant

or a good spike of flowers. A few of the varieties that especially took my fancy I will describe: Cardinal—a splendid scarlet of good size very clear and rich color. Dorothy Burnham—a grand flowered variety of a bright rosy pink color with a large pure white throat. Helen—fine white striped with crimson. Prescott—white tinged with pink, dark throat. Splendor—large flower, soft pink or rose with a large magenta stain. Scribe—the Childs cousin of the old but still popular Eugene Scribe but to my eye much better. Gallieni—a large splendid red from Europe and the following superb sorts that I will not take up your time in describing—Alec Wallace, Rubesfeur, Pres. McKinley, Gertrude, Barclay, Silver Sheen and Japnick.

Among the fine varieties from Europe that bloomed with me this season were Soliel d'Or a good yellow from A. Gravereau, France; Mons. A. Brougmart, a fine pink, large white blotch; Madame de Vilmorin, very large pale flesh pink, striped rosy carmine; Melusine, soft lilac with a white band and straw colored blotch on lower petals, and Cordelia a fine Lemoinei of a very fresh pink with two carmine blotches on a white ground.

At Rochester last year I saw Niagara, and at Baltimore I saw Mr. Banning's other beauty, Panama, but not until I had seen these two beautiful varieties in bloom in my own garden, did I appreciate these magnificent gladioli, and I want to say the same of Kunderdi Glory. Those who have only seen these varieties at Baltimore and Rochester, have not seen them at their best.

Mr. Montague Chamberlain is growing some wonderfully beautiful varieties and has been capturing valuable prizes with them this summer. There are four varieties that are well deserving of mention:—Rajah, a deep, almost solid red; Mrs. M. Chamberlain and Mrs. L. Merton Gage, two most beautiful white sorts, and Improved 1900, similar to the old 1900 but more brilliant if possible and perfectly healthy and vigorous.

L. Merton Gage
Crawford, Mass

The Rose

We are indebted to H. A. Dyer for the handsome rose portrait which is the central feature of our title page this week. The rose is pre-eminently a Christmas favorite and each year sees the quality of the product of our rose growers advanced beyond their previous record. The present season is notable in that respect. The rose, as a florists' flower is far, very far, from standing still now, however it may have appeared to lag in the past.

Culture of Phalaenopsis

While looking through the pages of *Horticulture* recently I noticed that *Phalaenopsis* were included in the list of cut flowers on which prices are quoted. This would indicate that they have become an important factor amongst choice cut flowers in the market of the larger cities at least and therefore a few general remarks on their cultivation might not be out of place at this time.

Phalaenopsis is generally considered hard to grow, and this is true to a certain extent, but if certain little details are strictly attended to no serious trouble should be experienced in their cultivation even by the beginner. I have in my care over four hundred of these lovely orchids which were purchased in November, 1904, at the St. Louis Exposition, where they formed part of the Philippine Exhibit. The plants were at that time all growing on sticks of wood just as they were imported from the Philippine Islands. They arrived here on a cold November morning and it was due to mere luck and quick action that all of them were not frozen; they came in well ventilated boxes without any packing around them and the thermometer stood at 26 degrees! Some five or six plants were frozen, however, but most of the rest are alive today and giving a good crop of flowers every winter and some flower all the year around so we are never entirely without bloom.

At present there are over a thousand expanded flowers of the white *Phalaenopsis Aphrodite* (or *A. amabilis*, as it is generally but wrongly called) and they make a glorious display. *Ph. Schilleriana* with its great panicles of rose-colored flowers comes in bloom from four to six weeks later. With it flowers *Ph. Stuartiana*, another beautiful variety.

To grow *Phalaenopsis* successfully a suitable house must be provided in the first place. They require at all times a fairly high temperature and therefore the house should have ample heating facilities. One should be able to keep the temperature at 58 degrees to 60 degrees at night in severe cold weather, without unduly forcing the boiler. In milder weather 65 degrees at night will not be any too warm and the nearer one can keep the house to that point the better.

Newly imported plants should be put in pots or baskets as soon as possible, using live sphagnum moss or osmunda fibre or both as a rooting medium. Any roots the plants may have should be carefully spread over the surface of the potting material and the plant securely tied to sticks or the wires of the pots or baskets

so all the new roots, which will soon form, have taken good hold of the compost. The receptacles are filled with coals or charcoal nearly to the rim, keeping it two or at the center; spread a thin layer of the compost over the coals and then put the plants in position and water same. They are then hung up, keeping them a foot or so from the glass. The house should be dampened down once or twice a day and the plants syringed every bright day. They must be shaded from the direct rays of the sun at all times, using more or less shade according to the time of year. Very little shade will be required from the middle of October until the first or middle of February; ground glass or any other kind of shade of equal density will do during this time. After that the amount of shading should be gradually increased until about the first of June. During June, July and August the plants should be shaded quite heavily. Some movable shades, like canvas or laths, which can be rolled up or down at will, should be used in addition to a light coat of white lead and naphtha. This will enable one to gradually get the plants used to the sun again by letting them down a little later and pulling them up a little earlier each day until they can be dispensed with for the rest of the season; on all cloudy days they are left rolled up, thus assuring the maximum amount of light at all times. And

BENCH OF PHALAENOPSIS

light, as we all know, is the most important factor in producing good and plenty flowers. Where too much shade is used nice green leaves and few flowers will be the result, and, besides this, the plants will be more the subject to disease.

During the hot, damp days of summer, when no fire is needed to keep the house warm, great care must be taken to avoid a stagnant atmosphere. A little air must be left on day and night to prevent the atmosphere from being overcharged with moisture, otherwise trouble will soon follow.

The plants will start to decay, beginning sometimes in the heart of the plant but more often at some point of one or more of the leaves. As soon as this disease makes its appearance it is a sure sign that the house has been kept too warm and damp and insufficiently ventilated. A sharp lookout must be kept for this disease whenever fireheat is dispensed with. It will appear on the leaves in the shape of little transparent blotches but if cut away at once, taking part of the sound healthy leaf with it, the plant can usually be saved. Should the rot begin in the heart it is very difficult to save the plant.

ther progress, but by carefully cutting out all the diseased part and dusting or dressing the injured part with sulphur or lime most plants can be saved. Should the disease have gone too far before being noticed it will be best to cut off all the diseased leaves down to the root, treat the wound with sulphur and then hang the plant up out of the way of the hose. Do not water until the plant starts to grow again. In some instances it may be well to remove some of the potting material for the time being. It is astonishing how quickly this disease will spread; from a little spot the size of a pin head it will in a few days spread over and kill the whole plant if left alone, therefore one can not be too careful in this matter.

Plants of *Phalaenopsis* are quite expensive and it pays to take good care of them. If properly treated they will grow better and bigger from year to year, and as they get larger they will also produce larger sprays of flowers

The use of tepid rain water for watering is generally advised and no doubt is very good where it can be carried out, but here they get along on pure cold well water very nicely, never having tasted any rain water since they left the Philippine Islands. During the growing season I take them down whenever I can spare the time and dip them in very weak manure water. This does them lots of good and I only regret that I can not do it oftener owing to lack of time. It is quite a job for one man to take down some 500 plants and dip, besides doing all the other regular work.

All during the growing season (which commences when the plants begin to make new leaves and ends when the last leaf is made up) the plants must have plenty of moisture at the root, giving them a good soaking as soon as they show signs of getting dry. After that the amount of water given should be grad-

PHALAENOPSIS RIMESABADANA

and it is the flowers we are after. This can not be said of cattleyas and most of the other commercial orchids. Under ordinary treatment they grow a little smaller every year, produce less flowers. It is just the very opposite with *Phalaenopsis*, here—the older the better.

Keep insects pests down by the free use of the hose and some good insecticide. Do not smoke with tobacco stems while the plants are in bloom, as it will quickly put the flowers to sleep. Private gardeners who have plenty of time and help can sponge the leaves occasionally with tepid water and take the plants down several times a week and dip those that are dry in tepid rain water of the same temperature as the house; this will be beneficial to the plants no doubt; but the average commercial florist can't afford to do it. My plants have been sponged once in the seven years they are here and then only because I had a dose of red spider on them which I could not get rid of otherwise. Since that time I use the hose freely and they have been clean ever since.

ually reduced until the flowers have developed. After these have been cut the plants should be allowed to dry out thoroughly each time before water is again applied.

While the plants are in bloom the atmosphere of the house should be kept quite dry to prevent spotting of the flowers. If any should flower out of season, remove them to dryer quarters. Keep the temperature as near as possible to the following mark: Growing season, night 65 degrees to 70 degrees, day 75 degrees to 95 degrees or more, providing the plants are sufficiently shaded. Resting season 65 degrees at night, 70 degrees to 75 degrees during the day. Above all things look out for that fatal rot or it will quickly do them up and make it an unprofitable investment. If all goes right there is no better orchid in the market today.

Seasonable Notes on Culture of Florists' Stock

CARE OF YOUNG LORRAINE BEGONIAS

Plants that were propagated from leaf cuttings in October should be sufficiently rooted now or in a couple of weeks to go into 2 or 2½-inch pots. These plants like a light sandy mixture so give them a compost of about four parts good loam, two parts leaf mold and one part well-rotted manure, with enough sand to make the whole light as they will not stand anything approaching a stagnant moisture at the roots. After they are potted give them a place in a house where the temperature stands anywhere from 60 to 65 degrees at night and as close to the glass as possible, giving some shade on all days when the sun is powerful. They will want a somewhat close and moderately humid atmosphere and a nice gentle sprinkling on good days. Fresh air must never be entirely excluded in good weather, for while they like a moist atmosphere they will not stand a muggy one. Ventilation will have to be properly managed from this out, so as to meet the many excessive changes in temperature that come with this time of the year. Watering should be done with care giving just enough to keep the soil damp but not saturated for it is better to keep rather on the dry side than to over-water.

CHRYSANTHEMUMS FOR STOCK

It is now time to select stock for bench and pot culture, for decorative purposes and exhibition next year. In deciding how many and of what varieties are needed it is well to bear in mind that while some make cuttings abundantly and root freely other varieties are just the opposite. Having made your selection, place the required number of plants in boxes of 4 or 5 inches of soil, packing the roots close together and firming the soil well around them, afterwards giving them a good watering. Keep this stock in as cool a house as you have and if pinched for room place them in a deep cold-frame where they can be kept just above freezing. Be sure to have all your varieties labeled with new labels.

BOUVARDIAS

Plants that were selected early in October and dried off in a cool house can by this time be started into growth. Cut all the immature wood back to well-ripened wood and give them a good soaking of water so the ball becomes well moistened. Give them a house where the temperature runs from 60 to 65 degrees at night, with a rise during the day of 10 to 15 degrees. Keep the plants moist by syringing them overhead two or three times a day. In a short time they will break away freely from every joint producing a heavy growth that will make a fine batch of cuttings. These cuttings can be taken close to the base of the mature wood and placed in a warm propagating frame where the temperature of the sand is from 70 to 75 degrees. Keep them moist and close and in a short time they will have formed nice roots. When potting these cuttings into small pots use a mixture of sifted loam three parts, leaf-mold two parts, and a little rotten cow manure with some sand. Keep them rather close and shaded until they have made a few new roots when they should be given a place on some bench where they will have plenty of light and a temperature of from 60 to 65 at night. *Bouvardia Humboldtii* is a popular favorite.

DENDROBIUMS

All dendrobiums that have flowered during the spring and summer such as *Dendrobium Devonianum*, *D. densiflorum*, *D. nobile* and its varieties, *D. suavisimum*, *D. thyrsiflorum*, *D. Wardianum* and also many hybrids, now that their growth is maturing should have water gradually withheld so as to bring about that resting period which is essential to the successful flowering of these fine orchids. It is very important to give them a house where they will get more sunshine with less moisture in the atmosphere. To obtain this, ventilation should be admitted at all times when the outside conditions will permit. Temperature has to go hand in hand with the above condition so as to give them a decided period of rest; anywhere from 50 to 55 will be sufficient. When in this temperature give only enough of moisture at the roots to prevent shriveling, but they will be better for a spraying overhead on all bright days. When the flower nodes appear they should be given a warmer and moister house.

PROPAGATING CARNATIONS

Those who have three or four houses of carnations to provide stock for should start now and put in a batch of cuttings. A propagating house is the best, but where you have not this at command any bench that is situated where no strong draughts will strike it will answer the purpose. Remember you cannot take too much pains in having everything around the cutting bench in a clean state. Give the sides and bottom a good coat of hot whitewash to kill any fungus germs and then cover the bottom for about an inch or so with some coarse material for drainage. On top of this place about three inches of clean sharp sand of a medium grade of coarseness and pack it all over so as to be firm. Keep the sand from 60 to 65 degrees of heat, while the atmosphere of the house should range from 48 to 50 degrees to ensure a good strike. Where the sun strikes the bench shade with some muslin, which can be removed in the evening and on cloudy days. Plants that have been grown from July in the house should by this time give an abundance of nice cuttings from side growth which will make fine material for propagation without sacrificing your bloom.

PROTECTING PANSIES, ETC.

Pansies, daisies, myosotis, pinks, hollyhocks, violas, etc., that are in frames and have been exposed until the ground becomes pretty well tightened up with sharp frosts, can have a light covering of some perfectly dry leaves and then the sashes should be put on. During all mild days through the winter give ventilation so as to keep the ground in a frozen state. It is a good plan to cover the sashes with mats or any other non-conducting material to keep the solar heat from reaching them until the time when you wish to start and grow them on.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Care of Calceolarias from Now On; Potting Early Narcissi; Fuchsias; Gloxinias for Spring Flowering; Increasing Fern Stock; Lilies Intended for Easter.

Fruit and Vegetables Under Glass

There is an old adage which says, "There are always two ways to do a job, viz., the right and the wrong." This same rule applies to making a vine border; years of study have taught us a great deal relative to this. In olden days the houses were built and the soil which happened to be there was used to plant the vines in. In some instances no doubt this answered and for a time

Sketch showing end view of vine border, with space left for more soil to be added later.

fairly good crops were produced, but no one could forecast how a crop would finish or how long the vines would last. In those days, as old garden books have it, dead animals were buried in the borders to furnish the vines with food. Up-to-date methods differ vastly from all this and we see vines producing a uniform crop year after year of finely finished and delicious fruit.

To commence making a border means to provide for it when accepting the plans for a new house, in the form of excavating the soil to a depth of four feet, having the sidewalks go down below this. A concrete floor should be laid on the bottom having a fall to the center, where a drain should carry away the water into a sewer. This is the first great step. Some may wonder what makes it necessary to have a floor beneath the roots. (1) This keeps the roots under absolute control and you know exactly how much soil the roots are growing in. (2) You are assured of good drainage which carries so many good points with it. Penning the foregoing reminds me of some renovating I was working on some years ago. We had torn an old border down in the endeavor to trace a strong root of a Muscat-Hamburg; after much work we ran it to the wall where it had gone underneath the foundations—the border having no concrete bottom—and must have been growing under a near-by road. The health of the vine was not satisfactory and in a "death or glory" effort we were told to cut it off which we did and we got the first mentioned result as the vine never recovered from this amputation. This goes to show the necessity of perfect control. Coming to the drainage—four-inch land draining pipes should be placed at intervals of about six feet running with the grade to the drain. Broken bricks should now be thrown loosely over the whole bottom to a depth of from nine inches to a foot, using a few smaller ones for the top. Place a good sod grass downwards over all the broken brick and it is ready to receive the soil. Here I would say it is not advisable to make up the whole border at once; better make it three to four feet wide and add more soil as the roots need more room. Chop down the loam—already stacked—and to every ten loads of soil add one bag of large bones (2 inch), one of half-inch bone, and two bags of charcoal and mix well together. This mixture is given for a soil of

medium texture. Heavy soil might need more opening material, while light soil would want less charcoal. Just firm the border as the soil is brought in but do not make it real hard. When planting vines from pots, shake the roots out and spread them evenly over the surface not more than three inches deep. This gives more feeding surface and encourages surface roots from the commencement. Providing the soil is stacked in time and protected from frost and rain this work can be done any time during the winter months.

PRUNING PEACH TREES

Peaches growing in pots are easily pruned. Keep the center of the tree open to admit air and light, leave all new wood possible and balance the tree by reducing any shoots of great length. Trees growing on a trellis are somewhat different. If properly disbudded there will be very little wood to cut away. Any old wood which can be replaced by new should be discarded. Take enough wood out so that the tree is not crowded when tied in again. A space in the center is best left open, as young growths will always fill in this especially if the trees are disbudded on the top side. Always endeavor to furnish the bottoms with as much growing wood as possible.

FIG HOUSES

All fig trees will now be resting and pruning and winter cleaning and renovation of borders can be proceeded with as time allows. Prune similar to a peach tree, leaving as much young wood as possible. When the tree is tied in again each shoot should have a space of at least six inches as its massive foliage requires plenty of room and light to develop. When washing the young wood great care must be exercised, so that the small fruit which form the first crop are not rubbed off. As with other trees the cleanliness of a fig must determine the nature of the winter wash. A fig requires plenty of water while growing and thrives best in a good retentive soil. Do not allow the trees to become dust dry while dormant. Figs are very rapid growers and do best where the trees can have plenty of trellis room without having to prune them too much each year. The house can be dropped to 28 degrees—more frost is liable to injure the young growths.

PEAS

This delicious vegetable can be grown successfully under glass and from now on seeds can be sown which will furnish a supply of green peas long before they are obtainable outside. With the turn of the year and an increase of sun growth will be better and crops will come in quicker. A pea likes a good rich, moderately heavy soil and should be given a deep bench. Raised benches are preferable to solid at this time of year. They dry out quicker, the soil is warmer and the roots get more air. The small growing varieties recommend themselves for side benches with a limited head room; taller ones can be employed more profitably if head room permits. Give a liberal supply of water during the whole growing period. A night temperature of 55 to 60 with the usual advances by day will suit them. Such varieties as Nott's Excelsior, Harbinger, Little Marvel and American Wonder will be found satisfactory on side benches while Gradus has stood the test as one of the most reliable of the taller growing peas.

George H. Benson

New Winter-Flowering Shrubs

Although we already have a considerable number of shrubs which are capable of being utilized for winter-flowering purposes it is important that any new additions should receive careful attention and the varieties mentioned below are capable of proving of great value to the florist and those who have to provide flowering plants during the dull months of the year. Variety is a matter of paramount importance. The varieties I mention are all more or less new introductions from China but some have already abundantly proved their worth as winter-flowering plants.

Jasminum primulinum is undoubtedly one of the finest greenhouse plants in existence. For the florist it is a plant of great value and for all forms of decorative work has a great future before it. In its native habitat this jasmine creates a wonderful display and in this country it can be grown very successfully in the open either as a bush or wall shrub where it is not subjected to more than fifteen degrees of frost and cold winds are not likely to prove a disadvantage.

Propagation is very simple from cuttings taken, if possible, with a heel attached and inserted in a sandy compost. These can be taken at any time when growth is active. As soon as well rooted they should be potted off singly into small pots and the most suitable size for flowering them in for decorative purposes will be three and five-inch, using a compost of loam, decayed leaf-mold and sand. During the summer months the plants can be grown outside, bringing them in about the end of October when the growths will be in good condition for flowering.

Two other great additions to our winter-flowering plants are *Buddleia officinalis* and *B. asiatica*, both of which come from the East, where they are well-known and highly appreciated. Their cultural requirements are the same as advised for *Jasminum* but five or six-inch pots will be the best size to flower them in and after placing in a warm greenhouse they will respond well to liberal feeding and flower more freely if pot-bound. The foliage of *B. officinalis* adds much to its attractiveness, both this and the stems being covered with dense white hairs. The flowers are produced in narrow racemes at the end of the main stems and also from the numerous side branches. These are lilac in color with an orange eye and very sweetly scented. The same remarks apply to *B. asiatica* with one important difference—the flowers are pure white and also deliciously fragrant. Both of these make attractive plants for pot culture and their value for cut flower work is enhanced by the great length of time they remain in good condition.

Deutzias have always been among the most popular of shrubs for forcing and among the new Chinese introductions we have some most welcome additions. *D. Wilsonii*, a large pure white flower, is the finest of all, with gracefully arching stems along which the flowers are produced with great freedom. *D. discolor major* has been used for forcing quite largely, though not common here yet. This also has white flowers and the long arching sprays are particularly valuable for cut work. Other new species from China include some with rose-colored flowers and these when plentiful are sure to be much appreciated. In growing *Deutzias* for winter-flowering it should be remembered that the principal factors are a restricted rooting area, well ripened wood and very gentle forcing.

Arthur. E. Thatcher

Loropetalum chinense

Medium-sized shrubs that can be made to flower during the dull winter months are of great value for decorative work. The difficulty is that the trade are addicted to working on similar lines and so few are willing and courageous enough to break fresh ground. The system in vogue produces keen and legitimate competition but it so limits the variety of the output that there is a decided sameness everywhere in florists' windows and markets.

The subject of this note is not a new plant: on the contrary, it is quite an old plant but it is seldom seen and by no means appreciated at its proper worth. It is not hardy and will only bear with impunity a few degrees of frost. For forcing it should be grown in pots and after flowering given a short rest, then pruned lightly, repotted and grown on in moderate heat. About mid-June plunge outside. A fair amount of sun, restricted root-room, plenty of water and feed are the essentials. House the plants before the early frosts set in and keep well up near the light. By regulating the temperature the plant can be had in flower continuously from Christmas to March.

Though closely allied to the witch-hazel this plant with its long strap-shaped pure white petals superficially resembles the Chinese fringe-tree (*Chionanthus retusus*). Every short and tiny twig terminates in a cluster of snow-white flowers. So profusely are these flowers borne that they almost hide the small, neat foliage. The flowers last well, and the plant withstands a fair amount of rough treatment and is well adapted for conservatory and general decorative work.

Loropetalum chinense is native of rocky places in eastern and central China, between sea-level and 2,500 feet altitude, where it forms a twiggy, much-branched, sub-evergreen bush 2 to 5 feet tall. It was introduced to cultivation by the late Charles Maries, about 1860.

Our seventh
anniversary

For the seventh time HORTICULTURE presents its annual holiday number, fully conscious of its many shortcomings, yet not without a certain amount of pride which we feel is pardonable and which we believe our readers will be ready to excuse after they have looked through its pages. When "the Boston paper" entered the already well-occupied field of horticultural journalism seven years ago, it was with a full realization on the part of its promoters of the long uphill task ahead and the many obstructions and hindrances that it must expect to find blocking its path. But we thought we could discern in the dim outlook a path which, courageously and patiently followed, would eventually lead to success and an honorable position in the estimation of those whose interests we sought to advance.

On a
secure footing

And so the uphill climb was begun. Convinced that an imitation or duplication of the style and methods of existing journals would be almost suicidal, it was determined from the outset that HORTICULTURE would be *different* and would, at least, aim to be a better exponent, if possible, of the spirit and purpose of American horticulture than its contemporaries. How far this aim has been achieved we leave to each one of our readers to decide for himself, but there's encouragement, at least, in the fact that the obstacles which loomed ahead and which even some of our best friends regarded as almost insurmountable were one after the other overcome—and today after seven years of "hammering away," HORTICULTURE finds itself secure in its footing and nobody disposed to openly question its permanency or its usefulness.

Where
credit belongs

What has been accomplished thus far towards gaining the confidence and practical support of the horticultural industries of our country is not all apparent on the surface, but in our periodical special numbers, of which the present issue is a good example, it crops out in unmistakable quality as anyone who turns to its well-filled advertising pages or carefully selected reading articles will realize. All this has been made possible, not through any especial ability on our own part but primarily because of the generous and indulgent attitude of the trade extended unflinchingly from the beginning. It is only right that we should make this acknowledgment here and, as far as lies in our power, see to it that the liberality and enterprise of the advertising firms whose patronage make this special issue possible is well rewarded in direct increased business returns. And those of our readers who can see their way clear to turn in some good trade to the houses herein represented will, in doing so, confer upon this paper a lasting, far-reaching and deeply-appreciated favor which, we doubt not, will prove to have also been equally advantageous to themselves.

BRITISH HORTICULTURE

November Chrysanthemums.

The National Chrysanthemum Society's November show at the Crystal Palace attracted many meritorious entries and numerous appreciative visitors. The immense glass house was brilliant with the mass of blooms. The trade section was particularly strong. In a central position a bold group of chrysanthemums was arranged by H. H. Jones, Ltd., of Lewisham. The society awarded a large gold medal. A similar award was made to Norman Davis, of Framfield, Sussex, who has introduced a number of popular varieties. Amongst the novelties shown by Mr. Davis was Charles Dickens, a fine single of a golden yellow tint. This received a first-class certificate. In a class for twelve bunches of dis-budded chrysanthemums as grown for market there were many creditable displays, showing the high standard the commercial growers have reached. A splash of bright color was added by the new zonal pelargoniums exhibited by W. H. Page, of Tangley Nurseries, Hampton. The classes for table decorations were well filled, and furnished an artistic addition to the show. The baskets of autumn foliage and fruit with the tasteful blending of the tints and splendid finish were noticeable features.

Some New Additions.

There appears to be no limit to the raising of novelties. The list of varieties is getting perplexing and a weeding out process is evidently needed to keep this within reasonable limits. At the show above referred to a big batch of novelties came up for the floral committee's consideration. In thirteen instances awards were made; in a number of other cases the committee expressed the wish to see them again. Those receiving awards were as follows: Yellow Caprice, a sport from Caprice du Printemps; Heston Bronze, light bronze Japanese; Celia, bright yellow single; Mrs. Percy E. Wiseman, incurved, primrose tint; Mrs. John Peed, bright yellow single; White Beauty, white large-flowered single; Caterham Bronze, bronzy terra-cotta; R. G. Burge, white large-flowered single; Charles Dickens, golden yellow single; Mrs. Andrew Walker, a chestnut sport from Freda Bedford, a decorative market kind; Dorothy Dann, terra-cotta single; Miss Margaret Walker, a bronze single; Shoreham Old Gold, a single of the tint its name indicates.

National Hardy Plant Society.

At the annual meeting of this Society at Birmingham, the following officers were elected: Chairman, A. J. Macself; Vice Chairmen: Messrs. R. Pinches, MacWatt, and W. H. Payne, respectively representing South Scotland, North Scotland, and Ireland; Treasurer, J. S. Brunton; Secretary, Frank Bouskell. Arrangements are being made for the Society's first annual show to be held next year at the Royal Horticultural Hall, London.

A Criticism of French Gardening.

Sometime ago the London daily Press gave the French system of intensive culture a big boom. Under the picturesque title of "Golden Soil" some alluring word pictures were given of the money-making potentialities of this method of production. In recent times a more level-headed view of the system has been put forward by practical men, giving a less rosy estimate of the financial side. At a recent meeting of the Bournemouth Gardeners' Association a lecture was given by Mr. E. Harris, raising the important question: "Will the French intensive culture system become popular in England?" The lecturer adopted a negative attitude. He pointed out the different conditions which obtained in France, where there was a greater demand for early salads.

The French growers for generations had become accustomed to this system, the father being succeeded by the son in the work. Another important factor was that in France a plentiful supply of straw was available, whilst coal was not so abundant. In England they had plenty of coal, consequently the English grower was able to go in largely for raising grapes and the more expensive kinds of fruit with the aid of hot water pipes. In the course of the discussion, the general opinion expressed by the members was that the French system would never be extensively adopted in England for commercial purposes, but as supplementary to our usual method of forcing, principally in private gardens.

Chrysanthemum Matters.

The members of the Scottish Horticultural Association have been voting on the twelve best early chrysanthemums. The following were placed first: Goacher's Crimson, White Maid, Lillie, Polly, Nina Blick, Abercorn Beauty, Lesley, Elstob Yellow, Hector, Carrie, Diana, and Horace Martin. At a recent show of the Royal Horticultural Society in London the under-mentioned new chrysanthemums received awards of merit. W. Wells and Co., Ltd., showed Mrs. Andrew Walker and Golden King. The former is a large bloom of a reddish mahogany tint. Golden King is an attractive Japanese incurved bloom of a rich yellow, similar to W. H. Lanchester improved. Messrs. Wells and James Veitch and Sons, both showed Golden Cap, a good yellow sport from the well-known Caprice du Printemps. Snowflake is a pure white single from the market nurseries of P. Ladis, of Swanley, Kent. Another single seen was Percy Arnold, of a pinkish color, exhibited by W. G. Riden, of Englefield Green, Egham, Surrey.

W. H. Adsett,

Obituary

F. A. Miller.

F. A. Miller, seedsman, of Fruitvale, Cal., died suddenly on November 18. He had been engaged in the tree and shrub seed business for forty years or more, his business covering the United States and foreign countries.

Wellington Hughes.

Wellington Hughes, proprietor of the Hillsdale City Greenhouses, Hillsdale Mich., died on November 18, aged 79 years. He was born in Utica, N. Y., and settled in Hillsdale in 1848, following the vocation of florist for forty years. He is survived by a widow and two children.

Robert Snodgrass Tabb.

On November 26 Robert Snodgrass Tabb, for many years bookkeeper for Nanz & Neuner, florists, died at his home, 1112 South Floyd street, Louisville, Ky. He was born in Berkeley county, West Virginia, but resided in Louisville for forty years, being in the employ of Nanz & Neuner during that time.

Robert Bottomley, Jr.

Robert Bottomley, Jr., died on Nov. 23, at Saranac Lake, N. Y., where he went for his health on June 1st, aged 31 years. Up to the time he left for Saranac Lake he was head gardener for Mr. Chas. E. Diefenthaler, New Canaan, Conn., a position which he had filled for four years. His father, Robert Bottomley, who is superintendent of Brush Ridge Farm, New Canaan, Conn., was with him for a few days before his death and brought his body to New York, where he was buried in Woodlawn Cemetery. Robert Bottomley, Sr., will be remembered by many who participated in the Asheville Convention of the S. A. F. with grateful appreciation of the courtesies extended by him, assisted by his son, at Biltmore, N. C., where he was superintendent at that time, and the sympathy of all will go out to him now in his hour of bereavement.

Barnabas Eldredge.

Barnabas Eldredge of Belvidere, Ill., was better known as the president of the National Sewing Machine Co. than as a florist, but here in Chicago he was known also as a successful florist, who in his weekly visits here, made many friends.

On the afternoon of November 28th, Mr. Eldredge was found in his room at the Great Northern Hotel in a dying condition and passed away of heart failure, to which he was subject, and to which he had nearly succumbed ten days before. Barnabas Eldredge was born June 19, 1843, in Munson, O., where his boyhood was spent upon a farm and where he learned to love nature so much that his success in a great factory was followed by a venture in the greenhouse business later in life. Many of the trade sent floral offerings from Chicago, and the funeral from the late home was very largely attended. Mr. Eldredge is survived by his wife, and his remains were placed in a mausoleum beside those of his only son, Franklin P., who died one year ago.

DESTROYING INSECTS UNDER GLASS

BY W. F. MASSEY.

Those of us who have worked under glass a good part of our lives know the bother and worry of tobacco fumigation for the aphides and the stale odor of everything in the house resulting therefrom. Then, after all, it is but a temporary check and we have to go through the same thing another week. I suppose that we will always continue to use tobacco in some form for the aphides, but there are so many other pests in the greenhouses that are not affected by the tobacco smoke that it is important to have something to destroy these as well as the aphides.

By careful syringing we can keep reasonably free from red spider on many things, but there are crops under glass, like tomatoes, which do not like overhead spraying, and if the underfoot moisture is not well maintained, these may get infested with the mites.

Then it is well known to florists that there are many ferns that object to water on their fronds and which also are damaged by tobacco smoke, and it has been a matter of discussion whether, in fumigating with tobacco, we should syringe first or after fumigating. I have heard gardeners insist that plants would be damaged if not syringed before fumigating. The fact is that it makes little difference whether they are wet or dry, for some plants will not be damaged by smoke under either conditions, while other plants will suffer somewhat, whether sprayed or not.

Then there are insects that infest the frames and tobacco fumigation is a different matter in a frame, and while tobacco fumes are a specific against aphides, the red spider does not mind them and the white fly is unharmed, and the sow bugs that infest the orchids are not hurt. What is needed is a deadly fumigation that penetrates every place and is destructive to every form of animal life in the house while not injurious to the plants. No fumigating material has been discovered which meets these requirements as well as the cyanogen or hydro-cyanic acid gas, formed by the combination of sulphuric acid with cyanide of potassium. When sulphuric acid is added to cyanide of potassium, or rather when the cyanide is placed in the sulphuric acid, there is a complete decomposition and the cyanogen is set free, while the sulphuric acid unites with the potash and falls in a powder, forming the sulphate of potash which every cultivator knows is valuable as a fertilizer in the soil.

Some have claimed advantages for sodium cyanide for use with sulphuric acid for fumigating purposes. But I can see no advantage in its use, but many disadvantages. The cyanogen liberated from a given quantity of potassium cyanide can be produced at a lower cost than a similar amount from sodium cyanide.

It is true that it is claimed that it

takes 132 kilograms of potassium cyanide to generate the same volume of gas as is contained in 100 kilograms of sodium cyanide. I say "contained" in it, because the difficulty comes in making a complete decomposition in the acid. Sodium sulphate rapidly forms on the mass and hardens and encloses a portion of the sodium cyanide so that the sulphuric acid will not act upon it.

When potassium cyanide is added to sulphuric acid, the sulphate of potassium that is formed falls in a powder and the decomposition of the cyanide is complete, the cyanogen escapes into the air to accomplish its deadly work, and all that is left is of value to the cultivator, while if the sodium cyanide is used, the resulting sodium sulphate is absolutely useless to vegetation. In the one case the operator saves a valuable by-product and in the other he gets less gas and a by-product worthless for farm or garden purposes.

To the vegetable grower under glass it seems to me that this cyanogen fumigation is especially valuable. It is hard to rid a crop of lettuce even of aphides with tobacco smoke without spoiling the quality of the lettuce, and when once the green caterpillars infest the lettuce, there is no way in which they can be at once effectually destroyed better than by a good fumigation. The fumigation of a frame is even easier than that of a greenhouse, since the operator is already outside and only has to raise a sash, drop the cyanide and close the sash, while any one who has tried to fill a cold frame with tobacco smoke knows how hard it is to do it.

Some plants with rough or hairy leaves are sometimes injured by the fumigation. I have seen a statement in a bulletin from one of the Experiment Stations that this gas will not destroy mature insects, nor scale. If this was true, there would be little use in the fumigation of dormant nursery stock. The fact is that dormant trees and leafless plants can stand a longer fumigation than plants in a growing state. Fumigation in tight quarters is certainly the most penetrating remedy and misses less than spraying.

For fumigation of nursery stock the house where the work is done should be made as nearly gas-tight as possible. For each 100 cubic feet of space there will be needed one ounce of potassium cyanide, one and a quarter fluid ounces of sulphuric acid and three ounces of water. Place the water and sulphuric acid in a deep stone crock, or wide-mouth open jar. Break the potassium cyanide into pieces the size of a marble and pour them into the crock and shut the door as quickly as possible. If the fumes are left on the trees an hour, every insect and even the San Jose scale will be destroyed.

The fumigation of hot houses needs more care. For each 100 cubic feet of space in the house use half an ounce of potassium cyanide, six-tenths of an ounce of sulphuric acid and one and a half fluid ounces of water. Select a moderately mild night and use the acid and cyanide soon after sundown and

open the house and air it out by nine or ten o'clock.

The following is recommended for the white fly and lettuce aphids: For each 1000 feet cubic space use one-fourth ounce of the potassium cyanide, three-tenths of an ounce of sulphuric acid and three-quarters of an ounce of water. Make the gas soon after sunset and leave the house closed all night. In airing out the house after fumigation, open all doors from the outside and let the air pass through for some time, before entering to open the ventilators.

In large greenhouses it is best to have a row of jars with operators to run each way and drop cyanide as they pass the jars toward the doors, placing a jar for each 1000 cubic feet of space in the house. Where houses are built on the ridge and furrow plan and open to each other, about the only way will be to have a jar in each section, about midway, and a man to drop the cyanide and hasten to the door in each house.

By having the cyanide in little cheesecloth bags attached to a cord running through a staple overhead, a man can stand some distance away and drop the cyanide and get out and close the door in a long house.

PINES.

About 48 per cent. of the total lumber output of the United States in 1908 was pine, showing how important to the lumber industry of the country the 37 species of pine grown in the United States area.

No one species grows in all the states, yet, with perhaps one exception, no State is without one or more. Some occupy large regions in considerable abundance, while others are so scarce that few persons ever see and recognize them. Yet no species of pine is so scarce that it is not made in some way to serve man's need.

Four important timber trees of the southeastern United States are usually grouped as one in the lumber markets and are sold under the common name of yellow pine. They are the long-leaf pine, short-leaf pine, loblolly pine, and Cuban pine. While in appearance the woods of these four trees are so nearly alike that it is sometimes difficult to distinguish one from the other, still in some particulars, there is considerable difference.

Although the long leaf pine, white pine, western yellow pine, western white pine, and the loblolly produce most of the pine lumber manufactured in the United States, the U. S. Department of Agriculture in Forest Service Bulletin No. 99, considers each species separately, giving in detail, its physical properties, the supply, its early uses, manufacture and products; and in the case of the more important species, specifies the more important uses to which it is put. The places which some species occupy are very humble, and they can never rise much in the scale of usefulness, yet each one is entitled to its own individuality.

FOUR MORE CHRYSANTHEMUM NOVELTIES.

RAMAPO

This is an American variety, a seedling of Col. Appleton, and is of the same color. The foliage much resembles the parent in the way it comes right up to the flower and the stem is perfectly stiff. Colonel Appleton is about done. So many of the flowers come misshapen now that many of the commercial growers are throwing it out. Ramapo should fill its shoes worthily.

MRS. RORT. D. FOOTE

A claret crimson, very effective in color and having perfect stem and foliage. Every petal naturally reflexes, which gives the flower a bold, striking appearance. This variety should make its own way without any pushing.

ANNIE L. ANGUS

A pure white of enormous size that will be a valuable variety for collections of 24 or 36 in the short vase classes. The stem is a little weak and that is the only criticism one can make on this sort.

SUNSHINE

A deep golden yellow, flower very large and spreading, though not very deep. The color is almost the same as R. F. Felton, but flower is much larger. Sunshine should brighten up many a greenhouse next fall in early November.

All of the foregoing are being introduced by C. H. Totty.

MODERN TOMATO CULTURE

While on the subject of pests, another matter which needs the greatest attention is the growing of tomatoes, and the sale of those which are simply masses of blight, and if the sanitary authorities took one-quarter of the trouble to control the sale of diseased and blighted tomatoes that they do to see that ice creams are pure, a great deal of illness would be saved. Quite ninety per cent. of the tomatoes sold in Boston and other markets, would in England be condemned by the market inspectors, as unfit for human food. Starting from where they have come off the stem, they are mostly cracked, and each crack is full of the fungus from the diseases known as black stripe and black spot, while the whole fruit is often covered with yellow patches, which under the skin extends almost like a blister, and is known as spodium, another poisonous disease. Besides this one finds tomatoes exposed for sale which are soft and flabby to the hand—this is known as sleep disease, and the fruit should be destroyed, not eaten. The whole method of growing tomatoes in America is incorrect and should be undertaken in a scientific manner which would be vastly more profitable to the grower than it is at present. In the first place, no tomato-house should be more than eight feet high at the eaves, and from fifteen to seventeen feet at the ridge. The sides and ends should be glass. The ventilators should be at the side as well as the roof, the roof ventilators being alternately right and left throughout the length of the house. If it is found impossible to renew the soil in the house each year, the soil should be thoroughly watered with a strong solution of caustic soda and water, and the inside structure of the house should be thoroughly syringed with the same solution, and thoroughly scrubbed with soft soap and hot water. The house should then be left for a fortnight until it is time to prick in the seedling plants, but before doing this it is imperative that the soil in the house should be thoroughly well watered with hose pipe, so as to wash down deep into the soil the caustic soda with which it had been watered a fortnight previously. As regards the management of the seed; no advantage is gained, in fact it is very dangerous to grow from one's own seed, or to grow two years running the same variety.

The variety selected should be one that produces fruit which weighs from five to six tomatoes to the pound. The seed should be planted in seed pans or trays, the soil having been previously sterilized at a heat of about 250 degrees, which will kill all living parasites and destroy any eggs that might hatch out. This gives the seed a chance from the first, each seed should be planted by hand, an inch apart, and not sown broadcast, like mustard and cress. This method enables the gardener, when the time of transplanting comes, to lift each plant without disturbing the root. If the grower has not absolutely new thumb pots to

plant in, fresh from the kiln, he should string his thumb pots on wire, in lots of one hundred and put them for ten minutes into boiling caustic water, the crocks for the bottoms being similarly treated. If this is not done, no good results can be obtained. Only sterilized soil should be used in transplanting from seed boxes to thumb pots and if some wood charcoal, say 25 per cent. can be mixed with the soil, it will enormously repay the grower. Seedlings treated in this way are absolutely free from club root, eelworm and thrip.

When the seedlings are from four to five inches high they should be taken to a house which has been prepared as above and planted in double rows, each plant being fifteen inches apart in the rows, and the second row should be twelve inches from the first, the plants in the two rows being alternate. The interval between the double row and the next should be from one yard to one and one-fourth yards. This will give the plants plenty of air, and will leave sufficient space for the grower to move about freely without damaging the plants when gathering. If it is desirable to use bamboo stakes to which to train the plants, they should be put in the same day as the seedlings; if, however, it is decided to use string, this can be done as the plant requires support. There is only one method of growing tomatoes successfully, and that is on a single lead or stem. They should be side-shooted from the very beginning and no side shoot should be left on the ground, when it has been taken off. The gardeners should wear aprons with pockets, into which to put them, or else carry baskets, but to leave them on the ground is fatal as it sets up blight and disease. Top air should be given on every available occasion, and no watering should ever be done after nine o'clock in the morning. Should the plants flag from excessive heat the roof and sides should be sprayed on the outside with thin lime wash, and all possible doors and ventilators should be opened. Unless the weather is extremely cold, top air should be given in moderation at night. As soon as any plant reaches six feet in height it should be stopped by nipping out the centre top. In tying up tomato plants care should be taken to have the raffia tight around the support, so that it cannot slip, and then a loop round the stem with plenty of play, so as to allow room for the stem to swell. If the bottom trusses are too thickly fruited, it is advisable to thin the fruit to six on a truss.

All trusses should be held up with raffia, or their own weight may make them snap off at the shoulder. They should never be tied to the growing stem, but to the support. The best method of feeding tomato plants is as follows: Boil in a copper, or cooker, cow dung with a mixture of soot and a small quantity of permanganate of potash, say one pound to 100 gallons of cow dung; dilute this mixture with water as you use it, in the proportion of one gallon of mixture to ten of water, and water the plants, only at

the root, twice a week. In watering plants in a greenhouse, never water the foliage under any conditions. If any signs of blight, such as yellow spodium, black stripe or rotting stems, is noticed, or a plant sickening from some unaccountable cause, which is sleepy disease, the only thing to do is to carefully remove the plant as soon as it is noticed and to burn it, as the chances against its recovery are very small, and these diseases spread from plant to plant very rapidly; the place from which the plant has been taken should have the soil dug out and taken right away to the sterilizer and fresh soil and a fresh plant should be brought into the house to take the place of the plant which has been removed. After the six bottom trusses on each plant have been gathered, one side shoot on each plant should be allowed to grow and not be removed, and by the time it has reached four feet all the trusses on the main lead should have ripened and been taken off. The old stem should then be cut down to the point from which the new lead starts and the new stem tied into place. When the new lead has from four to five trusses set it is time to take out the top, which will make it throw out larger fruit. It is an unwise plan to defoliate in the first and second leads until the fruit is set; then the foliage should be reduced one-half, and as the fruit ripens the leaves should be reduced to two leaves on each leaf shoot. If during the growing the roots of the plants show above the ground, fresh soil should be brought into the house to cover them and they should be banked up. No fallen fruit should ever be allowed to remain on the ground, but should be taken away and burned, and no weeds should ever be allowed in a tomato house. If only growers would take the precautions mentioned above, we should see none of the diseased fruit that we see at the present time. As regards the cost of this method, it has been proved over and over again that this is the only way to make tomatoes pay. Take, for instance, a house which will hold 4000 plants, planted as above. This house will require two men and four boys (say) to look after it, and they could produce from each plant ten trusses, each weighing from one to two pounds. Their duties would be, first, each morning to water, then to gather all ripe fruit and take them to the grading-house, where they will be sorted by women, or boys under supervision; their next duty would be to thoroughly go through every row and carefully side-shoot each plant. This work should all be completed by mid-day, and then these men and boys would be available for other work about the nursery. By this method of intense cultivation each plant should produce twenty pounds of really good, sound fruit, so that a house with 4000 plants should produce 80,000 pounds (or forty tons) of tomatoes. This should be a very paying industry and well worth the attention of market-growers. G. A. Jackson Burton, in *Boston Transcript*.

U. S. DEPARTMENT OF AGRICULTURE.

SYNOPSIS OF THE SECRETARY'S REPORT.

The Fifteenth Annual Report of the Secretary of Agriculture, made public this week, begins with a series of short paragraphs of much national importance. A few of them are reprinted below:

Brief Comments.

Would it be asking too much of our universities to have them educate more plant pathologists and road engineers?

Every country in the world that has diseased plants that can not be sold at home can ship them to us. This results in great loss. The chestnut disease here is an illustration.

After years of experimentation we find we can grow Egyptian cotton in Southern California and bulbs in the State of Washington.

The finest dates from the Sahara Desert succeed in our Southwest.

No seed is sent out from this department without being tested for germination condition.

The schools want more of our publications than we have to give them.

The day is not far distant when we will cease to import potash.

A serious pest in the South is the crayfish; carbon bisulphid is a sure remedy.

We are sending explorers to the ends of the earth for new plants—and getting them.

The phosphates are abundant in our country for all possible uses. Florida, Kentucky, Tennessee, and Idaho may be mentioned as depositories.

If good roads from the producer to the consumer were general, the benefits to both would be considerable.

When a foreign insect invades, our scientists seek its enemy where it came from. The natural enemy of the boll weevil was an ant that could not endure our winters, but the native ant is getting busy.

The experiment stations of the several states are doing better work each succeeding year, the scientists are maturing, and the people are appreciating.

Our systems of renting land are faulty and result in soil robbing; where the renter can not provide domestic animals, the owner should arrange to furnish them, so that rotation of crops may be had, and hay and grains may be fed on the farm.

Irrigation will bring maximum crops while the land is new and full of plant food; but where the crops are sold year by year irrigation will not of itself assure good results.

Alaska will some day provide farmers in lower latitudes with grain seeds superior to what they can grow at home.

The corn crop is moving northward by seed selection.

Save all the liquid fertilizers on the farm, in cisterns, to be applied where crops are to grow; this will recover the greatest farm waste of our times.

There is great promise in the fact that whole classes of graduates of agricultural colleges go back to the farms, having learned how to make them profitable.

Our foresters are learning by experience how to reforest 30,000 acres in a year: 10 times as much must be planted annually to cover all the bare acres in a generation. It will be done.

The potato crop of 282,000,000 bushels is about 90 per cent of the average production, but the farm price has increased to such an extent that the total value of the crop is the highest of record and amounts to \$213,000,000.

Forest Pathology.

On account of their important relation to reforestation, damping off and other diseases of forest-tree seedlings have received special attention. The results of the past season's work have confirmed the previous reports of absolute success in controlling the serious "blight" of coniferous seedlings by slight and perfectly practicable changes in the management of water supply and shade. For two seasons past the use of sulphuric acid in preventing the damping-off of coniferous seedlings in the Forest Service nursery at Halsey, Nebr., has been successful. If these results are confirmed by work in other localities and other years, damping-off so far as coniferous seedlings are concerned, will cease to be an uncontrollable factor in reforestation. The use of sulphuric acid as a soil fungicide originated in this department, as reported in previous publications.

It is unfortunate that at this time, when interest in reforestation is at its height, we should knowingly import a destructive European nursery disease. Yet this appears to be the case. The white-pine blister rust, referred to in previous reports, is unquestionably still being imported. All importations that could be located have been inspected and all visibly diseased trees destroyed, but there are no means of locating all importations. The importation of white-pine seedlings should be flatly prohibited, as the damage which this disease can do, and probably will do, if once established in America, is out of all proportion to the value of all white-pine seedlings ever imported or ever likely to be.

Diseases of Fruits.

Apple spraying experiments and demonstrations were conducted in several widely separated districts, and it was again shown that lime-sulphur properly diluted is a more satisfactory fungicide for certain apple diseases than Bordeaux mixture. However, owing to the severe weather conditions of the season, the combination of lime-sulphur and arsenate of lead caused considerable burning of the fruit in a few orchards, but this trouble was not so serious as to discourage the use of this spray.

The grape anthracnose is very destructive to both fruit and vine. Certain varieties in some localities are attacked every year by this disease. The department has demonstrated the past season that this malady can be satisfactorily controlled by proper spraying of the vines while in a dormant condition. Further confirmation of previous results in the control of black-rot of the grape has also been

obtained. Very promising results have been secured in controlling the anthracnose of the cranberry, which has been found to be a prevalent cause of loss in some cranberry districts. Considerable progress has also been made in the study and control of other small-fruit diseases.

Seed-Testing Laboratories.

On account of the provision for seed testing made by State laws in North Carolina and Nebraska, co-operation with these states has been discontinued, and two new laboratories are being opened in connection with the agricultural experiment stations in California and Louisiana, the laboratories in Missouri, Oregon and Indiana being continued.

Hairy-vetch seed, which has this year for the first time been collected for examination for adulterants, was frequently found to contain seed of cultivated varieties of spring vetch, the latter generally being useless for fall sowing on account of winterkilling. An examination of the hairy-vetch seed-growing section of northern Germany and northwestern Russia shows that on account of the difference in time of ripening it is impossible to harvest seed of cultivated forms of spring vetch and hairy vetch together, the former being used as an adulterant. The *Vicia villosa* seed originating in the Baltic Provinces occurs as a volunteer in winter rye and is separated as cleanings from the rye.

Congressional Seed Distribution.

Seeds and plants were distributed upon congressional order as in former years. Between six and seven hundred tons of vegetables and flower seeds, put up in approximately 60,000,000 packets, were distributed the past season. Of this quantity about 10 per cent was flower seed and 90 per cent vegetable seed. Approximately one-third of the total quantity was procured from surplus stocks, and the remainder was grown under contract for the department during the current season. In every case seed was secured on competitive bids, and no seed was accepted for distribution unless it was found after repeated tests to be of satisfactory purity and vitality. Every lot of seed is tested for germination two or more times before and after shipment, and a sample of each lot is grown on the trial grounds of the department under the direct supervision of expert horticulturists to determine its truthness to type. Many thousand pounds of vegetable and flower seeds which do not meet the requirements of the department are rejected every year and returned to the seedsmen by whom they were shipped. Where seeds are contracted to be grown for the department the fields are inspected at the proper season by specialists, who see that the plants are uniformly true to type and that a proper system of roguing out variations and mixtures is followed. This system has resulted in steady improvement in the quality of seeds distributed by the department, as shown by the results obtained on the trial grounds and by hundreds of

reports from all sections of the country.

The work of packeting, assembling and mailing the vegetable and flower seeds was done under contract at a cost of \$1.10⁰⁰ per thousand packets, which included delivery of the packeted seed in mail sacks direct to the Union Station. A new contract has been entered into for putting up and mailing the seeds for the coming distribution at a saving over the former contract of 1 cent per thousand packets.

Home Grown Dutch Bulbs.

The propagation of Dutch bulbs in the Puget Sound region in connection with the congressional distribution is progressing favorably. Trial sets of narcissus and tulip bulbs propagated near Bellingham, Wash., were planted at Washington, D. C., with sets of bulbs of the same varieties imported from Holland, and the Bellingham bulbs produced better blossoms 10 days earlier than the imported bulbs. The early blooming period of American-grown bulbs is of importance to all professional florists, because of the saving in time and fuel where bulbs are forced for market.

Need for Trained Plant Pathologists.

The growing need for trained plant pathologists to take up numerous problems which are now being presented to this department for solution is extremely urgent. While the universities and colleges appear to be doing what they can, it happens usually in our work that men fresh from college do not have the requisite outlook or the necessary training to obtain practical results in this field. Usually we have to give them several years of additional training in order to make them most serviceable to the advancement of agriculture in these lines. Every year requests come to us from the experiment stations and similar institutions in the United States to name persons well qualified for appointment to positions involving plant pathological research in these various institutions, and, unfortunately, in a very considerable number of cases we have to say that, glad as we would be to recommend persons, there are none in sight with the necessary training. This lack of a sufficient number of trained pathologists works to the serious disadvantage of agriculture in this country. The department would be glad to have in training an additional number of young men for such positions.

Work on the Gipsy Moth and the Brown-Tail Moth.

The general conditions in that portion of the country originally invaded by the gipsy moth, that is to say, eastern Massachusetts, have been better during the past year than for many previous years. This has been due in part to weather conditions, to the prevalence of the wilt disease, to the gradual increase of parasites imported from abroad, and to the cumulative effect of the excellent work done along roadsides by the Bureau of Entomology, in certain forests by the State of Massachusetts, and in the different towns under municipal and state control. The conditions in New Hampshire, however, are much worse than in Massachusetts. Many towns in the

southeastern part of the state are seriously infested, and the insect occurs in 125 towns in all. In several of the northern towns the pest has apparently been exterminated. In Maine there has been a further spread, and a new colony has been found in Rhode Island. The brown-tail moth has established itself in the northeastern part of Connecticut.

The increase and spread of the imported parasites and natural enemies of both the gipsy moth and the brown-tail moth has been gratifying, and several species have been brought in during the past year in large numbers which the Bureau of Entomology had not previously been able to secure. During the summer an imported Japanese egg parasite, which had previously been thought to have died out, was recovered in considerable numbers. An appreciable effect upon the numbers of the gipsy moth as the result of parasitic work is beginning to be noticed.

New studies have been begun of the feeding habits of the newly hatched caterpillars of the gipsy moth, and already it seems that it will probably be possible to control the gipsy moth in forested areas by a certain variation in forest management dependent upon the feeding habits of the young caterpillars. This means that the forests of New England, and later other portions of the country, are not doomed, and that a good stand of timber can be maintained even should the pest increase beyond the ultimate control of the parasites, and this in itself is most unlikely.

A SOIL TESTING OUTFIT PRO- NOUNCED WORTHLESS.

Editor HORTICULTURE:

The Foote Farm Laboratories of Fredericktown, Ohio, are putting out what they call the "Foote Soil Testing Outfit." They are widely advertising this outfit and offering it to individual farmers for \$10. They also include in the outfit a copy of my book, "The Story of the Soil," supposedly as an added inducement to the purchaser. I wish to say that I knew nothing of the Foote Farm Laboratories until we began to receive inquiries from their advertisement. We at once ordered an outfit, including all instructions, and have thoroughly investigated the outfit and the methods by which the Foote Farm Laboratories claim any farmer can analyze his soil,—the following quotation being a sample of their advertising:

"The Foote Soil Testing Outfit is a complete, practical farm equipment with which you can readily tell what plant food each one of your fields needs and what they already have. It tells you just what food elements are in your soil and what is lacking."

A thorough investigation of this outfit clearly reveals the fact that it is absolutely worthless. The so-called directions for testing soil not only give no valuable information, but they are absurd and senseless. The farmer who pays \$10 for the outfit and attempts to use it will have thrown away both his time and money. I make this statement because my name is being used in a way to mislead.

CYRIL G. HOPKINS.

Dept. of Agronomy and Chemistry,
University of Illinois.

M. A. C. DEMONSTRATION OR- CHARDS.

The returns for 1911 from the Demonstration Orchards established by the Massachusetts Agricultural College are beginning to come in to Alvah J. Norman, who has the supervision of these Demonstration Orchards. He reports that he is very much pleased with the results of the work for such a dry season. The returns are very interesting in that they show the possibilities in the way of net returns from land planted to orchards in Massachusetts.

The prevailing idea is that the man who plants an orchard is throwing away the use of his land for ten or fifteen years, before the trees come into bearing. How very incorrect this idea is has been well shown from the returns made by C. W. Maynard, of Enfield, Massachusetts, who was the first to make returns for 1911.

The College planted an orchard of about 450 trees on Mr. Maynard's place in May. The cost of preparing the land, planting the trees and caring for the orchard was, of course, borne by Mr. Maynard. The trees used were, in most cases, one-year old, of the varieties Baldwin, McIntosh, Wealthy, Williams Early and Oldenburg. The entire expense to which Mr. Maynard was placed, for preparing the land, about four and one-half acres, planting the trees, caring for the trees, planting associated crops and caring for the same, including cost of seed, fertilizer and harvesting, all labor items being charged at prevailing prices, totaled \$118.35. The returns from the associated crops were as follows: Red kidney beans, \$112; sweet corn, \$56.82; turnips, \$12, and the berries from a small patch of raspberries, which were already in one corner of the orchard, sold for \$26.01; giving a total income of \$206.83, which leaves a net profit of \$88.48 or approximately \$20 per acre, which is not a very small net return per acre for New England soil when the whole of the land is devoted to one crop.

The year has been a very hard one on the orchard and associated crops. The orchard was planted a little late, delaying the planting of the associated crops, which caused them to be slightly injured by the early frost. The orchard is planted on rather light land which, together with late planting and extreme drouth, did not lead those in charge to expect much growth the first year. Mr. Norman stated when the trees were planted that he would be satisfied if half of the trees would live in case of a dry season. The dry season certainly came but only 10 per cent of the trees failed to come through the season, while some of the trees sent out several strong branches, some of which measured 40 inches. The average length of the new branches is nearly 25 inches. The average diameter of the trees is about five-eighths of an inch.

Next spring new trees will be planted in place of the dead ones and those which seem stunted. In another year the trees will be large enough to make the orchard a very pretty sight. It is expected that apples will be picked from the trees the fourth season. Mr. Maynard will be glad to show the orchard to any who wish to see what orchards can be made to do in that section.

DEVELOPING AND IMPROVING THE DAHLIA

The following interesting letter from Alex MacLellan has been held back in our office until Mr. Betscher should have opportunity to further explain his views on the dahlia question as given in a previous issue of HORTICULTURE. Mr. Betscher's latest communication is now appended. As both the gentlemen are influenced, as we believe, solely by a desire to promote the common good we are pleased to give space to their letters in full and our columns are open to any one who may have pertinent views on the question to which they would like to give publicity.

Editor HORTICULTURE:

Dear Sir—It was with considerable interest that I read your editorial on page 658, issue of Nov. 11, on the Dahlia, also the communication of your correspondent, C. Betscher, on page 663, and it is to the latter's insinuations that dealers are dishonest that I wish to take exception, for as a rule, it will be found that dealers are honest, if for no other reason that it does not pay to be otherwise. And as an honest man, why does not your correspondent give the name of the good-for-nothing dahlia of which he has 1,250 plants, so that the trade may be warned.

The dahlia is as we all know, true to its name "Variable," and a variety which may do nothing one season may be excellent the next and vice versa. There are varieties, however, that can almost be depended on to give good results every season.

And in breeding and selecting from this most variable yet beautiful and useful family of plants, let us keep the words of your editorial before us and "Develop it in the qualities of more compact and less rampant growth, (i. e. for garden ornamentation) earlier and more abundant blooming and more upright flowers on taller and stiffer stalks."

Societies are not dead to these issues but are doing a good work; and the growers can be depended upon to grow only varieties that are constant and thus profitable.

These are the views of

Yours truly,

ALEXANDER MACLELLAN.
Newport, R. I.

Editor HORTICULTURE:

Regarding Mr. MacLellan's dahlia symphony, I maintain that when we send out sorts that do not bloom reasonably early and freely over a wide area we disappoint and discourage the buyer. He drops dahlias and we are all losers in consequence. When one buys ten "newest and best" dahlias at 50 cents per, richly described, beautifully illustrated, grows them two seasons without getting a crop and then inquiring of five growers at widely distant points, finds each has had a common experience, have we not a good and sufficient reason to "insin-

uate?" We think so. We should thoroughly test every new sort (the old as well) in different localities and if it is a failure or near failure in each place it should be dropped, or where a sort is purely a local sort it should be so noted. I find the sorts that do well in Ohio, are a success with all of my correspondents; again, those that are without value here are the same at other places with very few exceptions.

Let us take Arabella, Sylvia, Countess of Lonsdale, as the basis of the highest type, how many dahlias can compare with them? If we had a plant like Orange King, freedom of Sylvia, earliness of Arabella, richness of Rene Cayeaux, size of Douzon or Lonsdale, stems and tuber of Queen Victoria, all in one, we would have a grand ideal. Calmly surveying my work for the past four years, I am forced to the conclusion that our dahlia breeders are not breeding right nor are they bringing together right unions. I say this because I have been able to breed gladioli quite to the quest sought.

I can see a great future in store for better early free-blooming dahlias. Anyway, let us all follow up higher ideals until we achieve them, but let the spirit of "why" enter into every avenue, lane and path of our common interests—grower, dealer and planter alike. Let it be broad building. If the growers do not put the dahlia far in the forefront and compel people to want them for their merit alone, our clientele cannot; they are at our mercy. Unfortunately, dealers and jobbers demand stock at prices so low that quality is bound to suffer.

Each grower must measure from his own experience. The person growing for a small area can easily select a list for his limits, but let him grow for broad acres and diversity of interests and perforce his views must be different. Think it over, brother, and see if I am not right. The societies, too, in every field of horticulture, all ought to do more and better work.

C. BETSCHER.

Canal Dover, O.

THE EARLY BULB FORCER.

To the Editor of HORTICULTURE:

Dear Sir, Please allow me a few lines in your paper to give an explanation to a back-hand slap at the growers of early paper white narcissus which appeared in your last issue, as I was the first to offer such for sale this season. I have a house used for boarding plants in September. It was emptied a little earlier than usual. That explains the insouciance of the flower, and my pocketbook seems to fare as well as the average florist.

Respectfully yours,

WILLIAM PATTERSON

Wollaston, Mass., Nov. 28, 1911.

Glad, indeed, are we that Mr. Patterson's early crop of paper whites showed a profit. It was because of the repeated instances which came to our knowledge of loss to the grower which led us to discourage, as far as we could, the haste shown by so many forcers to rush their crop before the market was in a receptive mood. As in Mr. Patterson's case local condi-

tions may warrant the risk taken but our opinion has not yet been altered as to the average unprofitable outcome of spring bulb flowers forced in chrysanthemum time. Should like to hear from others who have tried it. It is an important subject.

NEW BOOK BY WILHELM MILLER.

In "What England Can Teach Us About Gardening," Dr. Miller has placed the American horticulturists under no small obligation. Dr. Miller spent some considerable time among the English gardens studying and forming his conclusions, which he has now given to the world, as to why English gardens are the most beautiful in existence and what may be learned from them which is applicable to American conditions.

The author expresses his convictions without reserve "from the shoulder." He has much to say and he says it so forcefully that its lines fairly teem with suggestiveness and one might truly say that there is not a chapter or, indeed, scarcely a page in the book which does not offer food for thought and comment far exceeding the space at our disposal for the introduction to our readers of this volume of nearly 400 pages.

Among the truest sentiments expounded are that every country should, in garden making, use chiefly its own native trees, shrubs, and vines and other permanent material and let the style of gardening grow naturally out of necessity, the soil and the new conditions. He adds "When we stop imitating and do this, America will soon find herself." Dr. Miller is a garden lover if there ever was one. We may not wholly agree with some of his methods and deductions in making comparisons between the worst features of American gardens and the best features of the English, and we may find ourselves questioning whether some of the English examples illustrated are really worthy of the praise bestowed, but there can be no question of the author's sincerity or of the splendid inspiration that will be drawn from this practical monument to his enthusiasm and indomitable industry. To help toward making America one great garden as England is; to teach by contrasting the noblest ideals that England furnishes with less noble ideals which now prevail in America; to show how we waste millions of dollars on material we should never buy and on effects we can never imitate; to help lay the foundations of an American style of gardening, and to give the garden lover literature more practical and helpful than mere sentimentality and fine writing—these are among the avowed purposes of the author and we think his book measures up well to its text. Truly a great work by a great man.

There are 112 photographic plates and eight plates in color. "What England Can Teach Us About Gardening" is published by Doubleday, Page & Co., Garden City, N. Y. The price is \$4 net (postage 35 cents).

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The next regular meeting of the New York Florists' Club will be held on Monday, Dec. 11, at 7:30 P. M. Election of officers for 1912 will be the important business of the meeting. The following are in nomination: For President, Jos. A. Manda, John B. Nugent, Jr., and I. S. Hendrickson.

Vice-President, John A. Rassbach and Philip Einsmann.

Secretary, John Young and W. G. Badgley.

Treasurer, Wm. C. Rickards, Jr., W. H. Siebrecht, Jr., and C. W. Scott.

For trustees, three to be elected to serve two years: Philip F. Kessler, Wm. Duckham, John Donaldson, Robt. G. Wilson, F. A. Bolles and Harry Turner.

Consideration of the following important communication will be in order. The subject is not only of great importance to the New York Florists' Club, but to every florists' club in the State.

ORGANIZATION OF NEW YORK'S FLORICULTURAL INTERESTS.

New York stands first among all the states of the Union on the basis of the importance of her floricultural investments. Notwithstanding this, she has failed for the past two years to interest the legislators at Albany sufficiently to secure an appropriation for the express purpose of promoting the floricultural industry.

The florists of Illinois, by united effort, have secured appropriations aggregating \$80,000, which have been employed or are to be used for buildings, equipment, and to assist investigations in behalf of commercial floriculture. These appropriations have been secured by concerted, well organized effort.

In New York the fruit interests are thoroughly organized and secure continuous aid from the state. The various farming industries are also recognized by legislative assistance, especially designed to promote their particular features. New York has a considerable number of live, hustling florists' clubs. These are in the main doing splendid work in maintaining local interest and spreading information regarding floricultural practice. There is, however, little or no co-operation between these clubs.

Has the time arrived for a federation of interests? May we not effect a state organization to take charge of questions of state-wide significance? Such a state organization would in no way supplant the function of local clubs or societies, but would be expected to act more effectively on all legislative questions and problems affecting the whole state. The opportunities for expanding floricultural interests are great.

Can the florists of the Empire State do more to bring before the public the desirability of expending greater effort in beautifying home grounds with flowers and plants?

Is there opportunity for co-operation with civic improvement organizations and the great school gardening movement?

Are the florists of New York State interested in promoting the next national flower show to be held in New York City in 1913?

Are the florists of the state interested in the establishment of a floricultural hall at the State Fair?

Are the florists of the Empire State ready and willing to throw their influence with a movement to secure an appropriation for the erection and equipment of a range of glass at the State College of Agriculture, to be devoted exclusively to the solving of problems in commercial floriculture?

These are some of the problems which might be effectively assisted by a state organization.

Is this a subject in which your club is interested, and if so, might it not be well to use it as a text for a discussion at one of your early meetings?

The Department of Horticulture of the New York State College of Agriculture stands ready to assist in every way in its power any movement of this kind. If

thought wise, a meeting, at which your club should be represented by delegate or delegates, can be called at the New York State College of Agriculture at any time agreed upon by a majority of the clubs of the state. This meeting could readily pass upon constitution and by laws and effect an organization, and the florists of the Empire State would then be able to present a united front on all questions affecting interests in common. These are suggestions. We shall be glad to correspond with clubs or individuals interested in a movement of this kind. May we not hear from you before very long?

Yours for the advancement of floriculture,

JOHN CRAIG,

Professor of Floriculture.

A. C. BEAL,

Assistant Professor of Floriculture.

New York State College of Agriculture, Ithaca, N. Y.

Prof. Craig will be present on this occasion and will address the meeting.

FLORISTS' CLUB OF PHILADELPHIA.

December 5th was historical night. David Rust read a historical narrative of the foundation and subsequent career of this club (the first of its kind in America) and his story was listened to with engrossed interest by young and old alike. The essayist treated his subject with fine judgment as to the essential points, and received an ovation at the conclusion. We hope to have a synopsis of this able essay in time for our next issue. Robert Craig followed with a witty and reminiscent speech in his own inimitable style which delighted the large audience immensely. He wound up by giving an earnest and serious word to the younger members to support our new president, J. Otto Thilow in his progressive policies for the onward march of the club so that the future may have equally glorious records of achievements and prove equally full of "ginger" to the record of what they had just been listening to of the past 27 years. John Westcott made a feeling address on the same lines. Adolph Farenwald was the humorist of the occasion with his amusing "kicks," and kept the house laughing uproariously—mixed with some words of wisdom. Senator Heacock and Robert Kift also made witty and interesting remarks.

Apink chrysanthemum was exhibited by Augustus Diedrich, Wissinoming—a very late-flowering and meritorious sort. He wanted a name but no one ventured. A good report was had from the various new committees and they all seem to be now well established and in working order. We look for efficient work from them from now on. Among visitors from a distance present were H. L. Holmes, Harrisburg, and Antoine Leuthy, Boston.

MARYLAND STATE HORTICULTURAL SOCIETY.

The big Maryland Week Exposition at the Fifth Regiment Armory, under the auspices of this Society, is on this week. Tuesday was the opening night and under the efficient management of Prof. T. B. Symonds, everything was in good order for the inspection of the public. Business sessions of the various agricultural and horticultural bodies are scheduled for every day of the week until Friday night, when the event closes with a visit of southern governors and a banquet for 350 guests at the Hotel Belvedere.

ILLINOIS STATE HORTICULTURAL SOCIETY.

The 56th annual convention of the Illinois State Horticultural Society will be held in Champaign-Urbana, Illinois, December 11 to 16. There will be three sessions daily. The first two days the general plan for the morning and afternoon sessions is a lecture or talk, followed by questions on the topic. The evening programs will consist of lectures illustrated by the stereopticon. The last three days of the convention will include the business sessions of the society, as well as many addresses and papers by men prominent in horticulture in this and other States. Throughout the entire convention, the various topics will be handled by men who are recognized as experts in their respective lines.

Anyone interested in horticulture in any way is invited to attend the convention, and participate in the discussions. There are no fees, dues, or other charges imposed upon those attending.

For further information address W. B. Lloyd, Secretary, Kinmundy, Illinois.

Fruit or vegetables for exhibition may be sent care of George Winter, Superintendent Fruit Exhibit, Agricultural Building, Urbana, Illinois. Express charges must be prepaid.

Arrangements have been made for special lectures on the make and management of gasoline engines. These will be given in the Exhibition Hall, Farm Mechanics Building, at 4 o'clock P. M. Tuesday, Wednesday, Thursday and Friday. Every indication points to a large and varied display of spraying outfits and other orchard equipment.

WESTERN DAHLIA AND GLADIOLUS ASSOCIATION.

E. S. Thompson of Benton Harbor, Mich., has favored us with the following invitation and prospectus of the Bulb Show to be given this month in Chicago.

Growers of the Dahlia and Gladiolus in the middle west, especially in the states of Ohio, Indiana, Illinois, Iowa, Minnesota, Wisconsin and Michigan, and contiguous territory, do not want to miss the Bulb Show held under the auspices of the Western Dahlia and Gladiolus Association, in Chicago, December 15th and 16th, 1911.

Through the courtesy of the A. L. Randall Co. the association has been given, free of charge all the room needed for display of stock. So come everyone interested and see what kind of stocks are and can be raised in the west. Everybody invited. All members of the trade and the amateur florists would do well to take a few hours off and come to the show for general information as to varieties, etc. Those who grow but a few Dahlias or Gladiolus for their own trade are cordially invited to come. A few hours spent in getting acquainted with the newer varieties may be of value when you come to select from the seedsmen's catalogue what you may need.

Exhibits should be sent, all express charges prepaid, to the A. L. Randall

Co., 66 Randolph street, owner's care, if you intend to come personally and look after the unpacking and placing. Or they may be placed in care of the Secretary who will be on the ground the forenoon of the 14th to look after any that may be so ordered.

Proper tags will be placed on every exhibit, with the owner's number, description, etc. Come and bring the best you have, if you are growing, and attend the evening meeting at the Sherman House, if possible.

Program of meeting at the Sherman House, 7.30 P. M., Dec. 15:

The Dahlia and Its Future, W. K. Fletcher, Des Moines, Iowa. The Gladiolus and its Future, A. M. Kunderd, Goshen, Indiana. Hybridizing and Culture, H. W. Koerner, Milwaukee, Wisconsin. The Association and its Membership, E. T. Barnes, Spencer, Indiana. American Bulbs, E. S. Thompson, Benton Harbor, Michigan.

Short discussions will follow each paper, and all are invited to take part.

NORTH SHORE HORTICULTURAL SOCIETY.

At the regular meeting of the North Shore Horticultural Society, Manchester, Mass., on Dec. 1, the speaker was Wm. Sim, of Cliftondale—subject, "Sweet Peas." Mr. Sim read a paper on this topic, going into the origin and history of the development of sweet peas and especially the winter-flowering sweet peas, also touching on culture—in fact, covered the subject as only an expert grower can. The speaker also took the opportunity to speak a word promoting the coming National Sweet Pea Society Show at Boston next summer, an event in which such places as Bar Harbor, Lenox and Newport are becoming interested. A discussion followed which brought out some valuable cultural points. Among the visitors were A. A. Pembroke and Frank Dolansky of Lynn.

R. A. MITCHELL.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Reports of Examining Committee.

Chicago, Nov. 18—Exhibited by Peter Schilt, Evanston, Ill., Gracia Muller, Single Yellow, scored 88 points; Mrs. Kenneth Barnhart, Single Pink, scored 90 points.

Chicago, Nov. 25—Exhibited by Fred Pautke, Grosse Pointe Farms, Mich., Helen Newberry, White Pompon, scored 90 points.

Cincinnati, Nov. 25—Exhibited by Fred Pautke, Grosse Pointe Farms, Mich., Helen Newberry, White Pompon, scored 91 points.

New York, Nov. 28—Exhibited by Fred Pautke, Grosse Pointe Farms, Mich., Helen Newberry, White Pompon, scored 88 points.

Chicago, Nov. 25—Exhibited by Tong & Weeks, Ashtabula, Ohio, H. Tong, reflexed Jap, Yellow, scored 77 points.

Cincinnati, Nov. 25—Exhibited by Tong & Weeks, Ashtabula, Ohio, H. Tong, reflexed Jap, Yellow, scored 82 points.

Chicago, Nov. 25—Exhibited by Baur & Steinkamp, Indianapolis, Ind., No. 25-06, Lemon Yellow, Jap, scored 85 points.

CHAS. W. JOHNSON, Secy.

SOCIETY OF AMERICAN FLORISTS

Department of Registration.

Public notice is hereby given that E. H. DeWitt, of Wooster, Ohio, offers for registration the Geraniums described below. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Descriptions.

GENERAL WAYNE.—Seedling of S. A. Nutt crossed with Jean Oberle; large, semi-double flowers borne in large trusses; color rich carmine; foliage small; habit and foliage like Jean Oberle.

AVIATOR RODGERS.—Seedling of Mme. L. Bisquit; large clusters of semi-double flowers; color bright salmon; bushy habit.

DAYBREAK.—Seedling of L'Aube crossed with Jean Oberle; double florets; small foliage; color darker pink than Oberle.

AVIATOR ATWOOD.—Seedling of S. A. Nutt crossed with Jean Viand; semi-double florets; large trusses; medium sized foliage; growth like Jean Viand.

Public notice is hereby given that The Conard & Jones Company, of West Grove, Pa., offer for registration the Cannas described below. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Descriptions.

CONOWINGO.—The color of this flower is an intense fiery scarlet. Its foliage is an unusually beautiful plum color at the base, shading to rich olive green at the tip. The stately flowers are freely produced and stand well above the foliage, thus showing themselves off to good advantage. Height 4 to 5 feet.

SPLENDOR.—The most impressive quality in this Canna is the firm, well spread out formation of the flowers, which are an intense scarlet color and very large. It makes two or three bloom heads on each stalk, insuring flowers practically all the time, as new blooms are constantly appearing before the older flowers fade. "Splendour" is a fitting name to such a magnificent Canna. Green foliage. Height 3 to 3½ feet.

WABASH.—The bronze-leaved "Rosea Gigantea." Flower is unusually large, petals broad and borne in great abundance well above the magnificent foliage of deep purple brown, striped bronze green. Height, 4 feet.

BEACON.—Because of its abundance of bloom this Canna is notably effective. The moderate sized flowers are borne in great impressive heads of rich cardinal red. When seen in a row or bed the flowers show a mass of bloom that for color effect we think is unparalleled.

KATE F. DEEMER.—The grand flowers open a rich, oriole yellow which gradually gives place to turkey red in the center and throat of the flower in striking contrast with the rest of the blossom which turns almost white. The rich yellow buds on red-

dish brown stems combine with the yellow and white flowers, surmounting rich green foliage, to make a fascinating combination that always looks fresh and attractive. Height 3 to 4 feet.

H. B. DORNER, Secretary.

November 30, 1911.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The Club will hold a field day at Framingham, Mass., on Saturday, December 16. Members and friends will please take special Boston and Worcester electric at Park square, Boston, at 12 o'clock sharp. Ladies will be welcome on this outing. The establishments of Messrs. W. R. Nicholson, S. J. Goddard and J. T. Butterworth will be visited, and the field day should prove interesting for all who attend.

The next regular Club meeting will be held at Horticultural Hall, on Tuesday evening, December 19, at 8 o'clock. This being the annual meeting for the election of officers a large attendance is desired. There will be two short practical talks given while ballots are being counted, and some fine exhibits are promised.

W. N. CRAIG, Sec.

YONKERS HORTICULTURAL SOCIETY.

On Friday, Dec. 1st, a well attended meeting of this society was held and many interesting matters discussed. The committee on spring show reported progress and the executive, on the financial result of the past fall show reported a deficit, which it was voted to pay from the society funds. In the carnation competition R. Cochrane was awarded first, for splendid blooms of Enchantress, White Enchantress and Dorothy Gordon. Messrs. Macdonald and Kinney were awarded cultural certificates; Messrs. Mooney, Nichols and Miller, acting as judges. Julius Roehrs Co., of Rutherford, N. J., exhibited Begonia "La Patrie" and a certificate of merit was awarded, its handsome glossy foliage being much admired.

H. M. B.

NOTES.

The St. Louis Retail Florists' Association will hold its regular monthly meeting next Monday night at 8 o'clock, in the Knights of Columbus Hall.

The West Virginia Horticultural Society, in session at Kersey, W. Va., elected the following officers for the ensuing year: President H. L. Smith, of Martinsburg; vice-president, A. D. Page, of Lost Creek; treasurer, H. H. Hoffman, of Keyser, and secretary, A. L. Dacy, Morgantown.

Denver, Colorado, is to have a flower show, November 11th to 16th, 1912, under the auspices of The Colorado Florists' Club. A guarantee fund of \$5000 has already been subscribed by the florists alone. We are asked to give this early information so that all the growers of the country may know that the premium list will include a special open class for the largest chrysanthemum plant in the show, without restriction as to variety, and in this class the first prize will be \$100; second \$75 and third \$50. These liberal premiums ought to bring out a lot of entries. J. A. Valentine is chairman of the committee.

FORCING POTGROWN LILACS, CRAB APPLES, HYDRANGEAS, ETC.

After arrival, pot your plants, water root balls if too dry, and store in a cool place until wanted. For earliest forcing, expose pots for one week to freezing, if no early frosts; place into cold storage room for about two weeks, then take into greenhouse, giving an even temperature of 33-35 degrees F. Water first freely, then water as needed, not too much, cut syringe the wood three times daily, not more. When the buds commence to show about an inch, stop syringing, water more freely and increase temperature to 80-85 degrees F. Keep the house atmosphere a moist one. Shortly before flowering keep the plants 5-10 degrees cooler, that flowers may open slower, and trusses grow larger. When ready keep plants in a cool vault or cellar for 36-48 hours in about 48-50 degrees temperature, to harden the flowers for better keeping. Do the same with the cut lilac, placing stems in cool water. When forcing small quantities at a time, it is advised to separate from rest of house with canvas, and to shade with canvas. For later forcing give less heat, down to 62-65 degrees; the flowers will then need about 6-7 weeks to develop, but they will turn out finer trusses. For latest forcing grow in a sunny but airy cool house. Marie Legray is put at once into full light; Charles X and the double flowering kinds should be shaded a little at the start; shading draws the trusses longer. Do not crowd your plants. To obtain best size trusses disbud to two flower buds to the branch. For early forcing cut back the leaf bud branches to one or two, as you cannot figure on foliage with the early flower.

With the long transit to the States, it will hardly do to risk earlier forcing than from January 15th forward, though when treated as above, plants should flower within three weeks. Etherizing plants for 12-24 hours, or giving the wood a 90-100 degrees hot water bath, is said to hasten the flowering.

Pot Grown Crab Apple (*Malus Scheideckeri*)—Treatment is similar to forcing lilacs, not too requiring less heat, about 65-75 degrees F. The buds should come into flower in about three weeks. Harden the plant before exposing for sale by storing for about 36 hours in a cool cellar or vault of about 50 degrees Fahrenheit.

Pot grown Snowballs, Thorn, *Prunus triloba*, *Wistaria*, *Citrus Laburnum*, and other some flowering plants, can be treated in about the same way; they will acclimatize readily with flowering in the winter months, and prove a valuable acquisition to the window display, likewise for Easter sales.

Hortensia (*Hydrangea*)—Increased flower production, like "Avalanche" and "Dentelle" white, "La Lorraine" and "Mme. E. Mouilliere" pinkish, force much readier than the old Otaksa kinds. They are also more compact in growth, and promise to prove good hardy outdoor sorts, flowering from the young wood. The ordinary forcing process is well enough known; but to get extra early results give the wood a hot water bath of 90-95 degrees F. for 12 to 18 hours, and then start forcing. Plants thus treated and started by the French

grower on October 19 were ready for the market by the end of December.

The foregoing useful forcing notes are being sent broadcast to florists throughout the United States by August Rofker & Sons, New York.

CRAIG SPECIALTIES FOR CHRISTMAS.

Antoine Leuthy, the distinguished Boston horticulturist, landed in the City of Brotherly Love this morning, and the writer had the pleasure of his company in reviewing the splendid display of up-to-date stock which the Craig Company have on view this year. This company has a great reputation to maintain, but we saw no falling off in general excellence this year. House after house of poinsettias in all sizes; house after house of Lorraine; beautiful vistas of cyclamen; fine lots of azaleas; many housefuls of various colored dracaenas, including the favorites, Massangeana, Godsefiana and Lord Wolseley, as well as the old standbys—terminalis and fragrans; and a grand display of well colored *Pandanus Veitchii*. *Ficus pandurata* still cuts a large figure here, although it is now grown in quantity in every large horticultural center and therefore one might suppose the demand for it from its original starting place would have fallen off. There is a bewildering array of ferns and for quantity and variety and finish one must be hard to please who could not get every want satisfied here. The collection includes the favorite basket variety, Amerpohli; the compact crested Schoelzeli; the dark upright growing *Todaoides*; the Improved Elegantisima and *Elegantissima compacta*; the two Harris forms of Boston; and *Giatrix*. Nordmann firs, araucarias, boxwoods trained, berried aucubas, etc., are seen in plentiful assortment and lend a fine Christmas touch to the general display. Bright colored foliage plant combinations in 8 and 10 inch tubs, composed of dracaenas, crotons, pandanus, achyranthes, ferns, etc., beautifully arranged, and very showy, run in price from \$3.00 to \$6.00 and have met with such ready sale among leaders, like Battles of Philadelphia, Dards of New York and others, that the first two hundred and fifty tubs made up were sold inside of ten days and have had to be duplicated twice since.

G. C. WATSON.

COLLEGE POINT PLANTS.

We took our usual pre-Christmas trip through the plant houses of Anton Schultheis at College Point, N. Y., a few days ago. Schultheis is known as a good grower, but we think he has outclassed himself this year, especially on cyclamen, cineras, oranges, ardisias and Jerusalem cherries. The cyclamen are remarkably fine for so early in the season and the cineras are up to the highest standard, while the fruited plants are well-nigh perfect. In Lorraine begonias there is a fine display and they are selling rapidly. Azaleas are seen in the usual abundance, some new and very vivid colors not familiar as Christmas varieties being in evidence. There is no end of poinsettias, dracaenas, palms and ferns and a whole forest of handsome boxwoods. A little later on there will be some elegant lilacs, judging from the stock of this specialty waiting to be started along.

A GARDENERS' REUNION.

Sixteen years ago The New York Gardener's Society was organized for the purpose of forming a medium of closer acquaintance between private gardeners, to protect and further their interests and to advance Horticulture in general. It at once became a recognized harbinger of knowledge and friendship. Every member, (and they consisted of the principal gardeners and men allied with Horticulture within a radius of a hundred miles of New York City), went to work enthusiastically to promote a keener interest in gardening, a better appreciation of nature's beauties.

Their work resulted in the organizing of numerous local Horticultural Societies which on several occasions assisted the parent society in the giving of several historical floral exhibitions. Among those may be noted a grand three-day show in the Waldorf-Astoria, resulting in the giving to charity of over one thousand dollars; the free shows and distribution of flowers, plants and seeds to thousands of poor children at the New York City Hall and at The Newsboys' Home; a carnation show in the rooms of The New York Press Club and many monthly exhibitions at the Central Opera House and Mott Memorial Hall. A National Society of Gardeners was organized and many things accomplished, which during several years added much to inspire interest in horticultural history.

Through the death of many leading members and through others having to submit to the ups and downs of a gardener's life, the existence of this historical society was submerged into that of its children. For many years "The Old Guard" of all those struggles and successes, have expressed many wishes for a reunion of all the remaining members and their new brothers in the profession. To meet this long-hoped-for pleasure a committee was appointed to make the necessary arrangements, with the result that on Thursday, Dec. 21st, 1911, a prize bowling tournament will commence at 4 P. M., followed with a dinner at 7:30 P. M., accompanied with an appropriate program of entertainment, when a great afternoon and night of jollification, a renewal of old friendships and aspirations is assured.

The splendid bowling alleys and banquet room comprising the entire fourth floor of Thum's, 1241 Broadway, between 30th and 31st Sts., New York City, have been secured for the event and we invite you to participate and make the occasion a memorable one. Tickets including everything may be procured from the committee. Price \$3.00 each. Application for same to be in by Dec. 15th.

Signed by the committee:—J. I. Donlan, Secy., 133 W. 28th St.; W. E. Marshall, Treas., 146 W. 23rd St.; Jos. A. Manda, Orange, N. J.

Tickets may also be procured from district members of committee as follows:—Alex. McKenzie, Glen Cove, L. I.; Peter Duff, Orange, N. J.; N. Butterbach, Oceanic, N. J.; John Shore, Harrison, N. Y.; Jas. Stewart, Mamaroneck, N. Y.; J. M. Hunter, Englewood, N. J.; John Everitt, Glen Cove, L. I.; Wm. Scott, Elmsford, N. Y.; David Miller, Tuxedo Park, N. Y.; J. J. McNicol, Cedarhurst, L. I.; F. E. Witney, Fishkill-on-Hudson, N. Y.; W. C. Russell, Millbrook, N. Y.

ORDER AT ONCE FOR CHRISTMAS

IT IS IMPORTANT TO ORDER AT ONCE, WHILE OUR STOCK IS COMPLETE.

CRAIG SPECIALTIES

Are known all over the country and are in greater demand each year. Having increased our glass area over 50,000 square feet, we are in a position to meet our fast increasing business. Our stock for the Holidays is superior in quality to any we have ever grown, notwithstanding the high standard we have maintained for years. You are cordially invited to call and inspect our stock, which includes the following, in the sizes herein listed.

25,000 Poinsettias—20,000 Begonia Gloire de Lorraine and Begonia Glory of Cincinnati

POINSETTIAS.

We grow none of the pluk variety, all our stock being of the selected, bright red sort, the bracts are unusually large in all the sizes.

5 in. pots, heavy	\$50 per 100
7 in. pans, 3 plants with ferns	\$15 per doz.
8 in. pans, 3 plants with ferns	\$18 per doz.
9 in. pans, 3 plants with ferns	\$24 per doz.

DOUBLE POINSETTIAS.

This is a great improvement over the single variety, the bracts being double and much larger.

3 in. pots, heavy	\$20 per 100
4 in. pots, heavy	25 per 100
7 in. pots, 3 plants with ferns	\$1.50 each
8 in. pots, 3 plants with ferns	2.00 each

BEGONIA GLOIRE DE LORRAINE.

The largest and finest stock of this beautiful Christmas plant in the country. The plants have been grown cool and are sure to give satisfaction.

5 in. pots, heavy	\$9 per doz.
8 in. pots	\$24 and \$30 per doz.

BEGONIA LONSDALE.

We have a large stock of this light sport at the same prices as quoted above.

BEGONIA GLORY OF CINCINNATI.

5 in. pots	\$9 per doz.
6 in. pots	\$1.25 each
7 in. pots	\$1.50 each
8 in. pots	\$2 and \$2.50 each

AZALEAS.

5 1/2 in. pots	
6 in. pots	\$12, \$15 and \$18 per doz.
7 in. pots	
Larger plants	\$2, \$2.50 and \$3 each
Small "Madame Petrick" for basket work	\$7.50 per doz.

BERRIED AUCUBAS.

Well berried and well colored.
7-in. 8-in. 9-in. and 10-in. pots,
\$15, \$18, \$24, \$30, \$36, \$48 and \$60 per doz.

DRACAENA MASSANGIANA.

The variety with the golden stripe down the center of the leaf. This handsome plant is the best of all Dracaenas for the house. We have an exceptionally large stock, well colored, and of the very highest quality.

6-in. pots	\$18 per doz.
7 in. pots	\$24 per doz.
8-in. pots	\$2.50 and \$3 each
9-in. pots	\$3.50, \$4 and \$5 each
14-in. tubs	\$7.50 and \$10 each

DRACAENA FRAGRANS.

(Ready Now.)

6-in. pots	\$6 and \$9 per doz.
8 in. tubs	\$18 per doz.

DRACAENA LORD WOLSELEY.

One of the very best varieties for Christmas, being bright red in color.

3 in. pots, heavy	\$35 per 100
4 in. pots, heavy	\$50 per 100
5 in. pots, heavy	\$9 per doz.

DRACAENA TERMINALIS.

Exceptionally well colored.

3 in. pots	\$20 per 100
3 in. pots, extra strong	\$30 per 100
4 in. pots, strong	\$50 per 100
4 in. pots, extra strong	\$65 per 100
5 in. pots, extra strong	\$75 per 100
6 in. pots, extra strong	\$12, 15 and \$18 per doz.
6 in. pots, made up with ferns	\$15 and \$18 per doz.

DRACAENA GODSETTIANA.

Fine for baskets.

3 in. pots	\$20 per 100
------------	--------------

DRACAENA MANDAIANA (New).

Large leaves, well colored.

3 in. pots	\$35 per 100
4 in. pots	\$50 per 100

PANDANUS VEITCHII.

Well colored.

2 1/2 in. and 3 in. pots	\$30 per 100
4 in. pots	\$6 per doz., \$45 per 100
5 in. pots	\$9 per doz., \$70 per 100
6 in. pots	\$12 per doz., \$90 per 100
7 in. pots	\$15 and \$18 per doz.
8 in. pots	\$24 and \$30 per doz.

PHOENIX ROBEURII.

5 in. pots	\$7.50 per doz.
6 in. pots	\$12 per doz.
8 in. tubs, specimen	\$7.50, \$1, \$5 and \$6 each

ARACARIA ENCLISA.

5 in. pots, 4 and 5 tiers	\$9 per doz., \$70 per 100
---------------------------	----------------------------

FICUS PANDURATA.

6 in. pots, 2 foot tall	\$2 each
6 in. pots, 2 1/2 foot tall	\$2.50 each
7 in. pots, 3 foot tall	\$3 each
8 in. pots, 4 foot tall	\$4 each
10 in. and 11 in. tubs, 5 to 11 foot tall	\$5, \$6, \$7.50 and \$10 each

The large plants are unusually fine. Branch plants, exceptionally fine.

\$2.50, \$3, \$3.50, \$4, \$5, \$6 and \$7.50 each	
--	--

ABIES NORDMANIANA.

7 in. 8 in. and 10 in. each	
1 in. tubs very large	\$2.50 each

BOXWOOD.

Just arrived

Rush Form	75c each
Ball Shape	\$1.50 each
Heavy Rush Form	\$1.50 and \$2 each
Pyramid	\$2.25, \$3, \$3.50, \$4 and \$5 each
Pyramid Squared, very handsome, in fancy tubs	\$10 each

ARECA LUTESCENS.

6 in. pots, 3 plants, 24 in. to 28 in. tall	\$9 and \$12 per doz.
---	-----------------------

NEPHROLEPIS AMERIOHILL.

Philadelphia Lace Fern.

4 in. pots, very heavy, for baskets	\$30 per 100
8 in. pans	\$12 per doz.

NEPHROLEPIS SCHOLZELI.

2 1/2 in. pots	\$6 per 100, \$50 per 1000
4 in. pots	\$20 per 100
6 in. 3 pans, heavy	\$6 and \$8 per doz.
8 in. 3 pans, heavy	\$12 and \$15 per doz.
10 in. 3 pans, heavy	\$18 and \$24 per doz.

NEPHROLEPIS TODEAOIDES.

London Fern.

2 1/2 in. pots	\$5 per 100, \$45 per 1000
4 in. pots	\$20 per 100
11 in. tubs	\$24 and \$30 per doz.

NEPHROLEPIS ELEGANTISSIMA IMPROVED.

4 in. pots, strong plants	\$20 per 100
6 in. pots, strong plants	\$6 and \$9 per doz.
11 in. tubs, strong plants	\$2 and \$2.50 each

NEPHROLEPIS ELEGANTISSIMA COMPACTA.

2 1/2 in. pots	\$6 per 100, \$50 per 1000
4 in. pots	\$20 per 100
6 in. pots	\$6 and \$9 per doz.
8 in. pans	\$12 and \$15 per doz.

NEPHROLEPIS SCOTTII.

Our stock is in superb condition.

2 1/2 in. pots	\$5 per 100, \$45 per 1000
4 in. pots	\$20 per 100
6 in. pots	\$6 per doz., \$45 per 100
6 in. pots, heavy	\$9 per doz., \$70 per 100
8 in. pans	\$12 per doz.
10 in. pans	\$18 per doz.
11 in. tubs, heavy	\$2 and \$2.50 each

NEPHROLEPIS BOSTONIENSIS HARRISII.

2 1/2 in. pots	\$8 per 100, \$75 per 1000
4 in. pots	\$20 per 100
8 in. pots	\$12 per doz.
11 in. buckets	\$2.50, \$3, \$3.50 and \$4 each

NEPHROLEPIS WM. K. HARRIS.

A type of Boston more dwarf than Harrisii, but with the same wavy appearance of the fronds. An ideal variety in all sizes.

2 1/2 in. pots	\$8 per 100, \$75 per 1000
4 in. pots	\$20 per 100

NEPHROLEPIS GIATRASH (New).

Sport of Nephrolepis Bostoniensis. This variety is beautiful in a small plant and will prove a valuable addition as a small fern for pans, etc.

3 in. pots	\$12 per doz.
------------	---------------

ADIANTUM HYBRIDUM.

The best variety for either pot plants or for cut fronds.

3 in. pots	\$10 per 100
4 in. pots, very heavy	\$20 per 100
6 in. pots	\$6 per doz., \$45 per 100
10 in. and 11 in. tubs	\$12, \$15 and \$18 per doz.

ASPARAGUS PLUMOSUS NANUS.

2 1/2 in. pots	\$4 per 100, \$35 per 1000
4 in. pots	\$7 per 100, \$65 per 1000

SPECIAL COMBINATIONS FOR CHRISTMAS.

The special combinations are made up with Crotons, Pandanus Veitchii, Dracaenas, Ferns, etc., and make handsome plants.

11 in. tubs, \$3.00, \$3.50, \$4.00, \$5.00 and \$6.00 each

Post Card

FROM AUGUST RÖLKER & SONS, NEW YORK

To the Editor of

HORTICULTURE:

Accept our best wishes to your Seventh Anniversary; continued Success be YOURS!-

Please tell your Readers that, to celebrate the event, we have

SEVEN GOOD MONEY MAKING PROPOSITIONS for a live Florist, which will be mailed to those sufficiently interested to address

Yours very truly and sincerely,

AUGUST RÖLKER & SONS,

31 Barclay Street, or

P.O. Box 752, NEW YORK.

FLORISTS' CLUB OF WASHINGTON.

The December meeting of the Florists' Club of Washington, held on Tuesday evening last, proved to be one of the most interesting of the season. It being the last meeting of the year, the members did not seem to be inclined to go very deeply into business, rather looking forward to the chats to be had with one another after the adjournment. After the usual routine business, the membership committee reported favorably on the application of E. J. Reynolds, who was duly elected to membership. He is one of the new arrivals in the city, having but recently come here from the Pacific Coast.

Considerable discussion greeted the motion made looking to the appointment of a committee to see that some sort of entertainment be provided for each meeting night, those present being unanimously of the opinion that something should happen every month. The committee, Messrs. Hammer, Bauer, and Oehmler, have already gotten together and have planned a series of lectures and ladies' nights. Immediately following adjournment, the members proceeded to the grotto where a buffet luncheon was awaiting them.

The meeting was well attended and President Mayberry states that he is in hopes the meetings of the coming year will be as successful.

CLARENCE L. LINZ.

NEWS NOTES.

Salem, Mass.—H. T. Conant will move into his new greenhouse quarters on the Father Mathew estate next week.

Sterling, Ill.—The Sterling Floral Co., 1711 E. 3rd street, and J. Swartley & Sons, 1702 E. 5th street, lost considerable glass by a recent hail storm.

Knoxville, Tenn.—Charles W. Crouch has finished three greenhouses, each 25 x 125 feet and a plant house 30 x 100 feet and has another house 25 x 125 feet started. He has forty-five houses with an area of 150,000 square feet of glass and cultivates fifty-five acres of land, fifteen of which are in flowers.

A JOY FOR EACH IN CHRISTMAS ATTIRE HOLIDAY! HOLIDAY! HOLIDAY!

Everything looks like a holiday in
Godfrey Aschmann's greenhouses

Leader in *Araucaria Excelsa*, 5½-6-in. pots, 3-4-5 years old, 3-4-5-6 tiers, 16-18-20-25-30-in. in height, 50c., 60c., 75c. to \$1.00.

Araucaria robusta compacta, 3-4 years old, best of stock.

Araucaria glauca, perfect jewels, nothing better in the world, \$1.00, \$1.25, \$1.50, \$2.00. Remember the only headquarters for *Araucarias*.

Next we have four houses jammed full of the **Choicest Ferns**, such as *Nephrolepis Bostoniensis*, *Whitman*, *Scholzei*, *Scottii* and *Glastratii* in 5, 5½, 6 and 7 inch sizes, at 25c., 35c., 40c. and 50c. Seven inch pots almost as big as a bushel basket, only 75c. to \$1.00.

Wilsoni Ferns, 6-inch pans, 3 plants in a pan, very strong and bushy, 25c. per pan. A big assortment of **Dish Ferns** from 2½-in. pots, big, bushy stock, \$5.00 per 100.

Rubber Plants, *ficus elastica*, large, 6-inch, 25-30 inches high, 40c.-50c.; 5½ inch, 25c.-35c. Large, 7 inch, 30 inches high, all staked up, 75c. to \$1.00. Our rubbers never were so nice as this year.

Kentia Forsteriana, 6-inch pots, 25-30-35-40 inches, 75c., \$1.00, \$1.25, \$1.50, \$2.00.

Kentia Belmoreana, 5½-inch pots, 20-25 inches high. A bargain seldom offered. Only 50c.; 6-7 inch pots, large plants, \$1.50 to \$2.00. Combination plants made up, big stock, 6-inch pots, 60c., 75c., \$1.00. A bargain!

Latanica Borbonica, choice, fine palms, 7-inch pots, 8 leaves, 30-inches high, 75c. to \$1.00. **Combination Latania** made up, 6-inch pots, 25 inches high, 50c.

Chinese Primroses, 4-inches, \$1.00; 5¼-inches, \$2.50 per dozen.

Cocos Weddelliana, 3-inch pots, 15c., 18c., 20c.; 4-inch, 25c.

Areca Lutescens, 4-inch, 18-20 inches high, 15c., 20c., 25c.; 5¼-inch, 30c.

Asparagus plumosus nanus, 2½-inch, \$3.00 per 100; 3-inch, \$5.00 per 100; 4-inch, large, bushy, only \$10.00 per 100.

Asparagus Sprengeri, large, 4-inch, 10c.

Begonia Gloire de Lorraine, in bloom, 5, 5½, 6-inch pots, 35c., 40c., 50c., 60c., 75c., \$1.00; 3-inch, 12c., 15c.

Begonia Glory of Cincinnati, 5, 5½, 6-inch, 60c., 75c., \$1.00, \$1.50; 4-inch, 30c., 35c., 40c.

Our well known improved **Begonia Erfordi** is in everybody's memory who ever bought it before. A beautiful Christmas bloomer, full flowers, now in high colors of pink variegated, red and bright red. Large 4-inch, 20c.; 5½-inch, 25c., 30c., 35c.

Azaleas in bloom and bud for Xmas. Large plants of **Deutsche Perle**, pure double white, 6-7 inch pots, \$1.25, \$1.50, \$2.00.

Vervaeckiana, \$1.00, \$1.25, \$1.50, \$2.00.

Simon Mardner, 75c., \$1.00, \$1.25, \$1.50, \$2.00

Mme. Petrick, pink, 75c., \$1.00, \$1.25, \$1.50.

CASH WITH ORDER, PLEASE. ALL PLANTS MUST TRAVEL AT PURCHASER'S RISK ONLY. PLEASE MENTION IF IN OR OUT OF POTS.

GODFREY ASCHMANN

Wholesale Grower and
Importer of Potted Plants

1012 W. Ontario St., PHILADELPHIA, PA.

The prices quoted on these pages are wholesale and positively for the trade only. Parties buying not to sell again are not entitled to them.

Holiday Plants for the Florist

Our stock has never been so extensive in quantity and perfect in quality as what we have to offer to the trade this season. It is cool grown and well hardened off. You can stock up now on this superb material at prices no higher than you would be called upon to pay for plants less carefully grown and inferior generally.

LORRAINE BEGONIAS

These are among our leaders. We can supply in a wide assortment of sizes all the way from \$6.00 a dozen to \$30.00 a dozen. These are splendidly flowered and exceptional value. Carefully packed by experienced shippers they will travel long distances in good order.

ARDISIAS

The finest ever offered. Full berried and well colored. Ardisias are the ideal Christmas plant and their sale is increasing enormously every year. We can supply you at \$3.00 and \$6.00 per dozen and up. Order early and secure what you want before the stock is depleted.

DRACÆNA TERMINALIS

Bright colored and perfect in foliage. Have no equals for holiday basket and jardiniere filling. \$6.00 and \$9.00 a dozen and upwards.

Poinsettias, all sizes of pots and pans, **Cyclamens**, **Camellias**, **Azaleas**, **Oranges**, **Crotons**, **Pandanus**, **Araucarias**, **Kentias**, **Cocos Weddeliana**, **Phoenix Roebelini**, **Ficus**. **Ferns** in large variety, Specimens and Small Stock for Dishes. All these and lots more which you are invited to come and inspect. If you can't come, send for complete illustrated catalogue and price list.

ORCHIDS

All the leading popular varieties in moderate priced, established plants, and all worthy novelties. Our range of Orchid houses is the largest on the American continent. Write for Orchid catalogue. It's a beauty.

Ornamental Conifers, Boxwoods and Bays. Largest stock in the country of Standard and Pyramidal Bays.

A WORD TO THE Retail Florist Trade of America

In the following pages you will see the Holiday Offerings of the Leading Wholesale Dealers in Cut Flowers. These firms are in business to supply you. They look for no other outlet. They are worthy of the support which they ask for in these announcements. The stock they offer is the best ever placed before the holiday buyers. You will need it all. Read what they have to say, and then get busy with them as to prices and quantity.

It is Early
But Not a Day Too Early
To Place Your Orders

"Prize That Which Is

1800 years ago there lived a great philosopher, Marcus Aurelius Antoninus. at a'l? Whatever is in any way beautiful hath its source of beauty in itself and *which is best in the universe.*" Now, if this wise ancient were living today to change a word of the lines I have quoted, would he? When he talked about Cattleya, the peerless Phalaenopsis or the glorious Oncidium? And it is the over all that he "prizes that which is best."

It Is Now Many Years Since I Began to Urge

this fact on the florists of America and you see I am still "keeping everlastingly at it." Directly or indirectly the precedence and prosperity of many of the most noted florists in the country are due to the handling of McManus' Orchids. You can't put the fact too strongly, that the florist who gives Orchids and Gardenias a secondary place today, will never, never "get there." Distance need be no bar to the shipment of these fine goods. I have shipped them successfully across the Continent.

Telephone
759 Madison Square

JAMES M

CATTLEYA HEADQUARTERS

Best In The Universe"

ing his sayings we find this: "Doth perfect beauty stand in need of praise complete in itself; praise forms no part of it." Again, he says: "*Prize that* had something to say about the flower business at its best he wouldn't have perfect beauty, isn't it easy to imagine that he had in mind the regal every time of the florist who outdistances all his rivals and holds his lead

My Daily Receipts of Choice Orchids are the Largest

received by any house in the country. And they all find a good sale — North, South, East, West. Are YOU on our shipping list? If not, write and let us see what we can do for you. It will pay you and it will pay me. At the Holiday season the list of fancy stock offered includes Cattleyas, Brasso-Cattleyas, Oncidiums, Phalaenopses, Laelias, Cypripediums, Vandas, Calanthes, Odontoglossums, Dendrobium formosum, Zygopetalums and many other orchids not obtainable elsewhere, Gardenias, Lily of the Valley, Roses, Carnations, Yellow and White Daisies, Sweet Peas, Asparagus, Farleyense Ferns, etc.

DOUBLE WHITE KILLARNEY

SOME VALUABLE NEW ROSES For 1912

Flower lovers all over the country are tired of having to buy just two or three kinds of roses and are wanting and demanding something different, even if they do have to pay more for them.

The rose growers who realize this and are awake to the fact that novelties are going to be very much more in demand all the time are making no mistake in going into the newer meritorious introductions.

We have never had a larger or better variety to offer than our list for 1912.

DOUBLE WHITE KILLARNEY

The Budlong Strain—1912

With its stronger, more vigorous growth, larger and heavier flowers, double the petalage and purer white, is a tremendous improvement over White Killarney, and is sure to be a money-maker not only for winter forcing but for summer growing. We

recommend it as being the very best commercial white rose today. As a summer rose, it is such an improvement over Kaiserin that some of the larger growers are going to discard Kaiserin for Double White Killarney.

KILLARNEY QUEEN

The Budlong Strain—1912

Is about three shades darker than Pink Killarney, and during dark and cloudy weather the color does not fade, but remains a bright, deep, rich pink. It is of very much more vigorous growth than Killarney, even a stronger grower than Double White Killarney. Flowers are about twice as large as Pink Killarney, about the same petalage and borne on tremendously heavy, long stems, larger and heavier foliage. Many consider this rose in the American Beauty class, its habit, growth and size are so vigorous and far ahead of Pink Killarney.

DOUBLE WHITE KILLARNEY and KILLARNEY QUEEN

Grafted\$30.00 per 100; \$70.00 per 250; \$250.00 per 1,000; \$600.00 per 2,500; \$1,100.00 per 5,000
Own Root..... 25.00 per 100; 60.00 per 250; 200.00 per 1,000. Deliveries during March.

SUNBURST

Another fine yellow, a 1912 introduction, of golden orange, shading into golden yellow, extremely brilliant in effect, a long pointed bud of good size, the largest of the yellow; borne on long stiff stems. March deliveries.

Grafted\$35.00 per 100; \$300.00 per 1,000
Own Root..... 30.00 per 100; 250.00 per 1,000

FLOWER GROWERS EVERYWHERE

Your attention is called to the newest and best equipped wholesale establishment in New York. With 20 years' experience in the Cut Flower Commission Trade and access to the best buying trade in the country, I have fitted this place up with unexcelled facilities for receiving, storing and disposing of your products. With this largely increased equipment, I have room for and can handle to advantage a much heavier supply than I have hitherto been receiving. Call and inspect, or write and make appointment to consider my proposition to handle your product for the coming season. Best market values for good stock and prompt remittances assured.

Chicago Flower Growers' Association Dissolved!

So it was falsely reported by the Chicago papers. But we are in the business to stay and no dissolution thought of.

This **Association** has become a factor both in the Chicago market and in the shipping business. We are forging ahead by strides and bounds. We organized on a bed rock basis, for our stock is grown by our own stockholders which insures permanency.

POEHLMANN BROS. COMPANY

33-35-37 Randolph Street, CHICAGO

When in doubt where to buy your Christmas Flowers TURN TO POEHLMANN'S

We undoubtedly have the best the market affords. Prices according to quality. Specialties,—Beauties, Teas, Carnations, Valley, Lilies and Orchids. Like all others we are not infallible but as a rule we have what you ask for.

Backed up by the growing stock in our greenhouses we are in a strong position to provide for your wants.

Weekly price lists of cut flowers will be mailed to those desiring same. Have your name added to our mailing list.

Watch for our Advertisements !

Sometimes we have specials which are good value.

POEHLMANN BROS. CO.

CHICAGO NOTES.

Outlook for Christmas Stock.

Unusual conditions have marked the year just closing and the weather reports have several times broken all previous records. Notwithstanding this, houses are filled with as fine a grade of flowers as the closing month of the year is wont to find. Much building has been done since the last holiday season, the low price of glass and the ever hopeful disposition of the florist being an irresistible combination. Much of the usual speculation on the Christmas stock centers on the American Beauty now, which has been decidedly off crop with most of the largest growers for a few weeks. Red carnations are expected to come to the front and produce all that are needed no matter how largely the plants are out-numbered by the white varieties for the public demands red. Richmond roses seem likely to fulfill all reasonable demands if the weather is bright. As usual the only bulbous stock to be depended upon in quantity is paper whites and Roman hyacinths. Chrysanthemums are not expected to hold out much longer and few will be left for the holidays. As ever the plant men will have a large share of the Christmas dollars turned their way.

The Geo. Wittbold Co.

A visit to The Geo. Wittbold Co.'s Edgebrook plant was made last week and everything found in fine condition. In addition to their extensive nursery business this firm specializes in plants for florists' use as well as cut flowers for their two retail stores and the market. Some of their most attractive offerings for the holi-

days are ferns for dishes, *Dracaena fragrans*, *Massangeana* and *terminalis*, *clivatum* and a full line of palms and other decorative stock. Azaleas are selling rapidly. There are poinsettias fully eight feet tall, crowned with immense brilliant bracts, and the Christmas bulb stock will include some choice red tulips.

Poehlmann Bros. Co.

The Poehlmann Bros. Co. have now six orchid houses filled with plants. American Beauty houses are apparently going to be just in their prime for a big Christmas cut. 60,000 carnation plants are grown in excess of last year's stock and foreman Guy W. French counts Scarlet Glow as his most profitable red, a bench of which has bloomed continuously for two years. Mr. French says he does not feed his carnations till the days begin to lengthen and always picks close, with wide-awake stock as a result. Poehlmann Bros. Co. added thirteen 250 ft. houses this year and their carnation range is the largest in the world.

Chicago Carnation Company.

The Chicago Carnation Co. always welcomes visitors to Joliet, and a ticket is provided for anyone wishing to take the trip from Chicago. Twenty-one varieties of carnations are being grown for cut flowers this year. During its fourteen years' existence the new varieties introduced by the Chicago Carnation Co. have in several instances proved valuable permanent acquisitions to the carnation world. Washington, introduced last year, has given almost universal satisfaction, being of a richer color than Lawson and out-blooming that variety. It is

worthy of note that Washington was the only variety sent out last year that was exhibited in 100 lots at the recent fall shows and received first prize. A brilliant red seedling, The Herald, will be put upon the market next year. It has received a certificate wherever shown and took first prize at St. Louis. The firm is also testing twelve thousand seedlings.

Frank Oechslin.

Frank Oechslin's plant, to which he has added an entire new range of Foley construction and with Kroeschell heating the past summer, is now one of the finest places devoted wholly to growing potted plants for the wholesale trade. Among his Christmas stock special notice was taken of *Begonia* *Gloria* of Cincinnati and *Lonsdale* which are as fine a lot of plants as one would wish to see. Three houses of cyclamen and two of poinsettias are in prime condition. Between two and three thousand azaleas will also soon be ready and with *Primula obconica*, *erica*, *hyacinths* and *tulips* an excellent variety for the holiday season is assured.

A False Report.

A false report was printed in the Chicago papers recently stating that The Chicago Flower Growers Association had dissolved. No explanation can be given for the error unless it was a mistake in the copying from the records. On the date given the Association had added one name to the list of directors, and the files at Springfield had evidently been reached by careless reporters.

Telephones—Main 2617-2618. Fort Hill 25290

ALL ORDERS FILLED PROMPTLY, PROPERLY AND TO YOUR SATISFACTION

for dispatch in filling orders which will be hard to beat. A telegram was received for a boiler in the morning and the same evening the boiler left for G. Butler & Son, Santa Cruz, Cal.

The Foley Mfg. Co. count this as the best year the firm has ever known. October sales broke all previous records extending over almost twenty-five years. From a comparatively small beginning this company has grown to huge proportions, occupying a large factory of its own. Everything that goes into greenhouse construction is there furnished.

Personal.

Mrs. Fred Sperry and little son are spending the winter in Titusville, Fla.

Gilbert & Haffe of Glen Ellyn were unfortunate in having their two new greenhouses blown down in the recent storm.

Frank Schramm of Arlington Heights is still confined to the house by a lingering illness, but nevertheless is sending some of the finest Klondyke pompon chrysanthemums to the Chicago market seen here this year.

Visitors—Mr. Pike, St. Charles, Ill.; Mr. Beyer, South Bend, Ind.; F. M. Smith, Cleveland, O.

Personal

F. M. Smith of Cleveland, O., has gone to California to spend the winter there.

Robert Spiers has resigned his position at Interlaken and will take charge of the greenhouses of Fred G. Crane at Dalton, Mass.

St. Louis visitors: Sprinkle-proof Segleman, representing Wertheimer Bros. of New York and Fred. Lempke of W. H. Barnard Co., Chicago.

At the annual election in Newport, R. I., on Dec. 5, James McLeish, the well-known fruit grower, was elected an alderman. He is worthy and well qualified and our hearty congratulations are extended.

W. J. Zartmann, superintendent of the Brooklyn, N. Y., park system, is a director of the recently incorporated Fairfield Landscape and Nurseries Company of New York City. The company is capitalized for \$20,000.

Council Bluffs, Iowa—A slight fire occurred at the Wilcox Greenhouses on East Pierce street, November 28.

A FINE WHOLESALE HOUSE FOR ST. LOUIS.

Charles A. Kuehn sprang a big surprise on the local trade when he announced that he would this week move into his own building which has been in course of erection for the past few months at 1312 Pine street. The new building is of three story and basement and is fitted out with all the latest improvements, such as wireless 'phones, cold storage, elevators, new office fixtures and new tables. The first floor will be used for the cut flower department, the second for supplies and the third for the wire factory. No one had ever dreamed that this new building was being specially built for a wholesale florist place. It will be the best and largest wholesale house of its kind in the country and that is saying a whole lot.

Florists' Refrigerators

Write us for catalogue and Prices, stating size you require, and for what kind of cut flowers you wish to use the refrigerator; also state whether you want it for display or only for storage.

THE Florist Supply House of America

1129 Arch Street, - - - PHILADELPHIA, PA.

News Notes

New Albany, Ind.—Anders Rasmussen, 1108 Vincennes street, is building a combination store, office and garage.

Roswell, N. M.—A branch nursery at Fifth and Main streets has been established by the Roswell Nursery Co.

Wyncote, Pa.—Ninety-one acres of land have been purchased by the Joseph Heacock Co., adjoining their farm at Roelofs Station.

Fitchburg, Mass.—George Leland, florist, of Keene, N. H., has purchased six acres of land on Rindge road and will erect a range of carnation houses.

Woodbine, Iowa—The business of the Woodbine Floral Co. is now owned by George Young. A. D. Curtis, the former manager, will continue with Mr. Young.

Canon City, Colo.—Acker Bros., who are building a greenhouse at Lincoln Park, are a new firm and they intend to grow vegetables principally. The firm is composed of W. H., E. B., and C. R. Acker.

Calla, Ohio—W. P. Mellot, who has just finished a 35 x 110 ft. vegetable house, has also built a 15 x 100 ft. tool shed and installed an irrigating system in the new house. He also intends to build a 35 x 110 cucumber house. He now has seven houses with an area of about 25,000 square feet.

Columbus, Ohio—The greenhouse to

be erected by the Ohio State University is to be a temporary structure, two of the old houses being torn down and part of the material used. They expect to have a new building devoted exclusively to horticulture and forestry and at that time will erect a range of ten or twelve up-to-date houses.

Stroudsburg, Pa.—The Sylvania Floral Co. is the name under which the business of J. Howard Stone is now conducted. The new firm is composed of J. Howard Stone, H. D. Stone, J. C. Wood and Samuel Stone. J. C. Wood and Mrs. Wood will have charge of the store at 505 Main street and J. H. Stone will superintend the greenhouses at 383 Scott street.

Flower Market Reports

BOSTON After the fine record of Thanksgiving week this market has quieted down considerably and there is only a moderate demand. The principal activity around the wholesale marts is in the line of inquiries for prices and inspecting of holiday supplies. The receipts of all sorts of flowers are ample and in the majority of cases quality is excellent. This is particularly true of roses, carnations and violets. The roses of recent introduction are making by far the best showing in popularity, especially Radiance, Taft and Hillingdon. White roses have been too plentiful for the demand but the exit of the chrysanthemum will, in a measure, remedy this disparity. Carnations are of exceptional quality. Sweet peas move slowly. Of bulbous stock there is an abundance at moderate prices.

Chrysanthemums were the feature of the market Thanksgiving week, and there were enough to supply all. Bonnaftons were the heaviest in yellow, and being of medium size sold well, though there was little or no advance in price. Golden Wedding, Mrs. Jerome Jones and White Maud Dean were good, and shared in the demand. White carnations were seen in quantities, but the colored varieties sold best, especially Beacon and Winsor. Beauties were good and Richmonds were in better demand than other teas. There was plenty of other stock, such as violets, lily of the valley, mignonette, narcissus, sweet peas, Roman hyacinths, and all shared in the demand. The trade is thankful for the extra business which the holiday brought for the whole week, and the wholesaler is thankful that the market is back again to normal conditions.

CHICAGO The history of the market the past week is the history of Thanksgiving sales, for all the life of the trade centered in that day. Stock, which promised to be abundant enough for all reasonable demands, was held back, and prices quoted were higher than could hold. As a result every one had twice as much stock as he had planned for and prices on some things, noticeably carnations, were cut in two on Wednesday. Those who did not sell out then had so much on hand for the last of the week that prices went still lower. Those who had sold out clean on Wednesday counted themselves fortunate. Paper whites are not moving very fast, attributed to the presence

of good white chrysanthemums still in the market. Roman hyacinths are in about the same condition. Callas are coming in and take well this week. There are still a great many chrysanthemums and prices are holding up well. Roses are plentiful, Beauties scarce. Violets more than equal the demand some days and clear up well others. Sweet peas are rapidly gaining in length of stem, and are of splendid color. Plenty of excellent stervia is offered, and all kinds of green in first-class quality is to be had.

Prices now are such CINCINNATI as will delight the grower when he sees his return sheets, but the amount of offerings is not such as gladden the buyers, for the market is light on almost everything. The chrysanthemums are going out quickly and the other stock is not increasing in quantity as rapidly. As a consequence, the buyers must do some tall hustling to get their wants filled. Poinsettias are coming in nicely and promise to be factors in a very short time. The quantity of paper white narcissi is increasing. Roses and carnations, too, are increasing in numbers and also quality, but not as fast as the market demands. Among the others some very good Richmond are included. The supply of Beauties is more adequate than it was. Lilies find a good request. The same is true of both N. Y. double and single violets. In chrysanthemums practically only the largest and the small medium sizes are offered. Other intermediate grades are rendered conspicuous by their absence.

Stevia is beginning to sell fairly well. The green goods market shows a heavy call from out of town for ferns and leucothoe.

In view of the precarious business conditions of the past weeks which for reasons stated previously, did not come up to the standard set one year ago, Thanksgiving week was a great

(Continued on page 832)

IF YOU NEED CHRISTMAS PLANTS

We don't need to explain to you the advantage of a Central Florists' Plant Supply House in these busy days, where selected flowering and foliage stock is assembled for inspection and selection, saving time and expense of railroad trips to visit widely separated growers. *That's where we both win.* Packing and shipping facilities unsurpassed.

Of blooming and fruiting plants we have **Cyclamen** of best quality ever seen in December; **Ericas**, **Lorraine Begonias**, **Camellias**, **Oranges**, **Jerusalem Cherries**, **Ardiasias**. In foliage plants **All Palms**, etc.; **Ivies** and **Holly Ferns**, **Table Ferns**, **Aspidistras**, **Phoenix Roebeleni** (elegant little specimens), **Araucarias**, **Buxus Pyramids**, **Scotti Ferns**, **Dracaenas**.

Flower Market Reports.

(Continued from page 831)

surprise. All report Thanksgiving business a good percentage ahead of last year and we hope this may also come true with Christmas three weeks hence. The principal call was for chrysanthemums and this was enhanced by the high price of long stemmed roses in the wholesale market. At present chrysanthemums are practically gone but other flowers are coming in in very good quality and plenty of them.

The market closed **NEW YORK** very strong last week, after the Thanksgiving Day-onslaught, the prices prevailing for the holiday being well maintained. Monday opened with a heavy snowfall, which, aided and abetted by a disastrous fire at the U. S. Express Co.'s stables in Jersey City, so crippled and delayed flower deliveries that much embarrassment and scurrying was inflicted on the wholesale district, and prices kept where they left off on Saturday. Chrysanthemums made an almost complete exit with the Thanksgiving Day cut, and an unwonted emptiness is noticeable everywhere. The result will doubtless be a good boost for the carnation, which is already selling at figures rarely touched at this season and seldom exceeded at any season. The quality is noticeably good. Roses are not too plentiful and probably will not be until the holiday crop shows up. Normal values are well maintained, and lower prices are not looked for in the near future. Of lily of the valley there is a fair supply, but much of it is of indifferent quality. Roman hyacinths abundant, paper white narcissi less so. Violets are uncertain and fluctuating and prices sag. Giganteum lilies are in quite heavy receipts—sometimes so much so that values are maintained only with much difficulty. Speciosum rubrum lilies are a much-prized feature of the market and bring good prices. In the orchid line there is a fair supply of cattleyas but oncidiums and other "spray" orchids are in insufficient quantity for the demand. An atmosphere of confident activity is gradually pervading the wholesale district, and the feeling is more optimistic than it has been for many moons. The retailers are not disposed to be jubilant though, and the "surplus-speculators" are far from happy over the situation.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS

	Last Half of Week ending Dec. 2 1911	First Half of Week beginning Dec. 4 1911
Cattleyas00 to 75.00	15.00 to 75.00

" " & Spren. (top bch.)	15.00 to 25.00	15.00 to 25.00

PHILADELPHIA

Thanksgiving week came fully up to the highest expectations here. Trading was brisk all along the line. There was plenty of stuff but not too much. No gluts. No sacrifices. A satisfactory market, such as we seldom see. In roses the medium grades were in rather best demand, the fancies and specials being a little harder to move. Carnations cleaned right up. Good chrysanthemums also sold well—and some of the fancies, like Chadwicks brought top-notch figures. Violets and lily of the valley were in brisk demand. Orchids are not so plentiful but enough of them to go around. About the only draggy item was the lily, of which there were liberal shipments but very little call. All other flowers are going well at the usual standard figures. Good crops in sight for Christmas trade. The prophets are figuring on rather moderate prices for the great festival.

ST. LOUIS

The market was in fine condition the past week and, especially on Wednesday and Thursday it was crowded up with extra fine stock in everything seasonable and the wholesalers had plenty of orders on hand for both local and shipping to consume nearly all of it. The local retailers all had a splendid business for Thanksgiving Day. Prices were not so high considering the quality of the stock. The cut being so heavy last week much is expected for the early part of this week and prices will remain about as they were last week—some fine Beauties are coming in but not any too many. Smaller roses are more plentiful in all grades. Violets sold fine although many more were needed

than expected. Chrysanthemums are on the down grade and only few are coming in now.

WASHINGTON

The Thanksgiving Day period proved to be very successful with the trade in this city, and sales for the entire week were very satisfactory. Prices were good; nobody was trying to give their stock away and there was a healthy demand for everything. Roses and chrysanthemums were, of course, the top-notchers as regards quantities disposed of. Roses are coming in good, and are cleaning up to advantage. Carnations of A1 quality are scarce, the best grades bringing about \$4.00, but there are so few of them that the demand exceeds the supply. Lily of the valley and narcissus are in better demand this week than last, but double violets are moving slower than would be expected. These latter were quoted during the holiday time at \$1.25 to \$1.50, but there was no extra demand for them. The demand for orchids was quite good. On Sunday last the ice boxes looked pretty well cleaned out, and it is expected that this month of December will prove to be a record breaker and the year finish up in fine style.

PHILADELPHIA NOTES.

AN ANTIQUE SEED CATALOGUE.

We have on this page a photograph reproduction of what we believe to be one of the oldest American seed catalogues in existence. The original is in the possession of W. A. Manda, who has given us permission to copy it, believing that the seedsmen of the present day will be interested in its contents. Judging from the catalogues now issued, the seed trade has been "going some" in the past hundred years.

Boddington's Quality Flower Seeds for Florists

SELECTED SEEDS, SUCCESSFULLY SOWN, SECURE SURE, SAFE AND SERVICEABLE SATISFACTION.

Remember you may deduct 5 per cent. if cash accompanies order.

AGERATUM

We are headquarters for Sweet Peas of every description. Our Wholesale Catalogue of Quality Seeds and Bulbs is ready to hand. It contains 32 pages of Seeds and Bulbs you need. Write for it today—a postcard will fetch it.

ARTHUR T. BODDINGTON, Seedsman, 342 W. 14th STREET
NEW YORK CITY

Seed Trade

Corn Damage.

It seems that the crop troubles of 1911 are not yet ended for the seed grower or seedsman. We have several times reported damage to late varieties of sweet corn, but the extent of this damage we could not ascertain, and, in fact, do not really know the extent of it at this time. It is known, however, to be very serious, estimates varying from twenty-five to fifty per cent. From the latest information we have, it seems that the damage has not been confined to sweet corn, but that a large percentage of the field corn, grown in Ohio, has suffered from what is known as "ear rot." This has been so serious that the papers of the state, and particularly those devoted to the agricultural interests, have given it a good deal of attention, and some have said that it was a national calamity. While probably it is not serious enough to be thus characterized, it means a considerable loss to the farmers of the state. Some of the Ohio papers have predicted dollar field corn as a result of the trouble referred to.

We reported some time ago that conditions affecting the corn crop of Connecticut were generally favorable, and the latest reports we have do not change this information. It must be remembered, however, that the Connecticut crop is but a small factor of the total, and it is further rumored that most of the Connecticut dealers are nearly or quite sold up and not in shape to accept much more business on this year's crop. In their eagerness to do business, they started prices at too low a figure and could not understand why they received so many orders for corn from the west. It finally dawned on them why, but it was then too late to be of any material benefit, as most of them had already sold about all available surplus not required for their own immediate trade. At this time it really looks as if prices would rule considerably higher for good, sound seed of strong germination than seemed probable a month or two ago. Many of the large wholesale seed houses are selling corn very cautiously, and in rather limited quantities only, being fearful that the damage may prove even more serious than now seems probable.

Pea and Bean Contract Prices.

Contracting prices for peas and beans of the 1912 crop have been issued by most of the growers, and are certainly at a much higher level than ever before in the history of the trade. At least, this may be said of peas, if not of beans. There seems to be considerable difference in prices on beans, one or two growers advancing their prices twenty-five to fifty cents per bushel over last year, while the majority have made only very slight advances. Why there should be this difference has been explained by one of the large growing concerns, which is in effect that at the prices ruling the past year the cost was such that they were barely able to break even, while should the crop be a very light one, they would most certainly be losers. It has seemed that for several years, bean prices have not kept pace with the advance in peas, and probably there is not justification for as large advances. But how growers can con-

TRUE IRISH SHAMROCK

Sown now will be in excellent condition for St. Patrick's Day. Only fresh seed will germinate. Fresh crop seeds now ready.

FRENCH VEGETABLE SEEDS

Lettuce, Imported Big Boston; Forcing Lettuce (black seeded); Radish, Scarlet Globe, White Tipped Scarlet Turnip; Beet Crosby; Cabbage, Early Flat and Savor; Celery, Self-Blanching and Green; Beet Spinach, Endive, etc., the same varieties as the market gardeners of Paris use.

BEAULIEU, Woodhaven, N. Y.

tinue to produce beans at the prices of five and ten years ago is quite surprising, and it looks much as if they were selling beans at low figures to attract business in other lines, as certainly they cannot make a reasonable profit on their investment in beans.

Brokers' Pea Offers.

Judging by offers of pea seed by western brokers, it would seem on the face of it that there is more in the

NEWBURGH, N. Y.

BURPEE'S BLUE LIST FOR 1912

¶ The most complete Catalog of Seeds for Florists and Market Gardeners will be ready for distribution, January First.

¶ Burpee's Blue List is the title we have used for many years past for our Wholesale Price List for Florists and Market Gardeners. It is a book of 148 pages and contains all information necessary for either professional Florists or Market Gardeners to aid them in selecting varieties best adapted for their purpose.

¶ As is well known we have for years maintained at FORD-HOOK FARMS the largest trial grounds in America and our work there is now supplemented by trials of special varieties at our SUNNYBROOK FARM in southern New Jersey and our FLORADALE FARM in California.

¶ If you are a customer of ours and entitled to Wholesale prices a copy of **Burpee's Blue List** for 1912 will be sent you as soon as published—but if you have never tried **Burpee's Seeds** and are seeking **Quality Seeds** you should write to-day requesting a copy of this most complete seed catalog for Florists and Market Gardeners.

(Continued from page 835)

country than is generally believed, but a careful inspection of one or two offers reveals the fact that in the main the same lots are being offered over and over again. The plan of these brokers is to issue a circular bearing a certain date and quoting various lots by number. Failing to effect sales a new circular is issued offering the same lots under new numbers. It is a clever scheme, but we think possible buyers are "catching on."

An Assignment.

We have just been informed that the Nott Seed Company of Troy has made an assignment and is winding up its affairs. We have not learned what its obligations are, nor what percentage it will pay on its indebtedness. We had occasion to refer to this concern not long ago, stating that it had moved into new and much superior quarters, and the president of the company, Mr. P. K. Nott, stated that the concern was in better financial shape than at any time since its organization. As its business was almost exclusively retail and not very extensive, its failure is not likely to cause much stir. In fact, comparatively few know of the fact. Mr. Nott, we understand, is open for a position with anyone desiring a first-class man to take charge of extensive trial grounds, as he is reported to be a high-class hybridizer and plant breeder. Letters addressed to Troy, New York, will reach him.

Proposals for Government Supplies.

No. 363. Vegetable and flower seeds. —The United States Department of Agriculture desires quotations for furnishing standard varieties of vegetable and flower seed from surplus stocks or under growing contract for the 1912-13 congressional seed distribution. Approximately 1,200,000 pounds of vegetable and 50,000 pounds of flower seed will be required. Bids will be opened by the Board of Awards at 2 P. M., January 9, 1912. Copies of specifications can be obtained from the Office of Seed Distribution, Bureau of Plant Industry, Department of Agriculture, Washington, D. C.

W. & T. SMITH COMPANY, Geneva, N. Y.

Notes.

Albert McCullough, Cincinnati, has returned from his hunting trip to Florida.

Mitchell, S. D.—An office building 50 x 70 is being built by the Dakota Improved Seed Co. A warehouse 70 x 120 is in prospect for next year.

In the retirement of Thomas J. Grey, a well-known and popular member of the seed trade of Boston will be missed. Mr. Grey has withdrawn from active connection with the company which bears his name although he still retains his interest in the corporation. His home address is 19 Jefferson ave., Chelsea. We hope he will enjoy to the fullest extent his well earned rest.

The announcement is made under date of December 1, 1911, that Henry Nungesser has resigned as president of Henry Nungesser & Co., Hoboken, N. J., and New York City, and has disposed of his interest in the firm. Mr. Nungesser bespeaks for the company the same generous support extended by the trade in the past. The firm was established in 1874 and incorporated in 1899.

Why HORTICULTURE has
stood the test as a profitable
Advertising medium for the trade.

Because It is read by the
men of standing
and influence in the Horticultural field,
every one of whom is a prospective buyer.

Why HORTICULTURE is so
widely read.

Because Its contents are
distinctly represen-
tative of American Horticulture and are
thus indispensable to the Florist, Nursery-
man, Seedsman and Gardener.

An Admirer of HORTICUL-
TURE in the Central West writes; "It
has won on its merits. It is our most prized
weekly visitor."

And Now How HORTI-
CULTURE has
You See managed to
elbow its way
in between its older rivals and why the
best trade advertisers find it an indispen-
sable auxiliary.

It's No That the men who read
Secret HORTICULTURE
are the sort of men that
advertisers like to talk
to and if you have anything to advertise
you can't afford to get along without them

In writing to Advertisers kindly mention Horticulture

ARTSTONE FLOWER VASE

AND

PEDESTAL

Artstone Vases are made of the best crystal granite and cement, do not, like iron, become so hot in midsummer as to burn the plants. Artstone is indestructible from exposure, while iron soon rusts, and marble gradually discolors and decays. Flowers, like gems, require appropriate settings. The artistic beauty of these creations attracts admiration and lends a touch of quiet elegance to the surroundings. They serve to enhance the beauty of the Lawn or Porch wonderfully. Popular also for Cemetery decoration. Bird baths and also sun dials made to order.

Vase stands 18 inches high with inside depth of 8½ inches. Outside diameter 16 inches; inside diameter 12 inches. Pedestal is 15½ inches high and 12 inches square.

Get This Loose Leaf Book Now— We Send it Free

FROM these pages shown you won't think it's only a book, but it's more than that —a lot more. It's a 1-1-1 list. Supply Book of loose-leaf folders.

The first half is devoted to greenhouse building. Not just leafless paper and folders, but pages of useful information such as you're wanted this and time again.

There are 96 pages in the book now, but it's more up to date and we are going to add at least another 66 before it's completed, made more it works like this. We send you the book free, and then every once in a while, at intervals, we will mail you additions of pages, all ready for putting right in the book. All you have to do is simply turn back a couple of fasteners and in the pages go.

Every time we get out a new thing, or something you will promptly find up some pages about it and mail them to you.

You can see that such a book will be very handy to you, because it can always be kept right up to date.

Send for a copy right now while it's in your mind. Don't put it off till tomorrow, to-day or the day after tomorrow you may need it badly.

The Importance of This Reason Book

It's being so, then naturally enough you will buy a greenhouse, and the same way.

Suppose for instance you want to know thoroughly about the U-Bar Greenhouse, and have been wondering if there are any houses in your vicinity you could see, wouldn't a booklet giving you the names of all U-Bar owners and the character and extent of the greenhouse they own be of interest and assistance to you?

Let us suppose still further that you want to confirm your decision to buy a U-Bar house by seeing who some of the others are who have moved at the same decision and built, wouldn't a booklet grouping all names in a ready got-it table way be just the thing you want?

That's why we have just such a booklet.

It's called "Reasons."

The Reasons themselves are told in 96 words, right at the start, the rest is given, not to amuse and interesting arrangement of the locations and owners of U-Bar houses built in the last few years. Send for this Booklet. With it we will mail you out a sample section of the U-Bar itself, so you can see exactly what the U-Bar is.

BEFORE talking about the Reasons Booklet itself, let us first ask you a question or two.

When you buy anything of importance involving the expenditure of several hundred or thousands of dollars, do you rely entirely on your own individual information and go right out and buy it? Of course you don't.

In making your final decision, are you not strongly influenced by the opinion of some one who has already bought and is satisfied? Doesn't the fact that this or that person, company or institution of prominence has put their stamp of approval on it, by putting their money into it, carry a good deal of weight with you?

Beyond All Doubt Here is the House That Stops All Argument About Durability, Safety and Lightness

A COMPLETE iron frame, completely supported with the required number of columns to take from the ridge and eaves the tremendous strain of roof weight, and wind and snow pressure.

The greenhouse engineers who designed it, first made sure it was strong enough, **then** they made it light enough.

It is the Sectional Iron Frame Construction, which is not the cheapest house you can build, but it costs what is necessary to make it, **safe and sure.**

We have several other photos of this house we would like to have you see. If interested, write and let us know.

CYCLAMEN—Finest ever offered, \$9.00 doz. to \$3.00 each.

ERICA MELANTHERA—All sizes from 6 in. to 9 in. pots, \$2.00 to \$5.00 each.

ORANGES—Well fruited in 8 in. half pots, \$9.00 and \$12.00 a doz.

POINSETTIAS—Single stem, \$3.00 to \$6.00 a doz.; 4 in. a 6 in. pan, \$12.00 a doz.; 5 in. 7 in. pan, \$15.00 and \$18.00 a doz.; 6 in. 8 in. pan, \$18.00 a doz.; 7, 8, 10 and 12 in. a pan, \$2.00 to \$4.00 each.

JERUSALEM CHERRIES—Very heavily fruited, extra fine, \$9.00 and \$12.00 a doz.

DRACAENA TERMINALIS—\$9.00 to \$15.00 a doz.; Fragrans, \$6.00 to \$12.00 a doz.

CROTONS—From 3 in. at \$2.00 a doz. up to 6 in. at \$1.50 each.

PANDANUS VEITCHII—\$6.00 to \$12.00 a doz.

PHOENIX ROEBELENI—3 1/2 in. pots, \$2.00 and \$3.00 a doz.; 7 in. pots, \$1.50 to \$2.00 each.

ARAUCARIA EXCELSA—50c. to \$2.50 each; Glauca, \$2.00 to \$3.00; Robusta, \$1.50 to \$3.00.

FICUS ELASTICA—6 in. pots, \$9.00 a doz.

KENTIA BELMORANA and FORSTERIANA—Single plants, \$1.50 to \$10.00 each; combination, \$3.00 to \$14.00 each.

FERNS—Boston, 6 1/2 to 9 in. pots, 50c. to \$3.00 each; Scotti, 6 in. to 12 in., \$1.00 to \$5.00 each; Schoelzeli, 1 1/2 in. tubs, \$5.00 and \$6.00 each.

BURPEE'S ANNUAL FOR 1912

"The Leading American Seed Catalog"

Is now ready for mailing. The first edition of more than four hundred thousand copies will soon be distributed. As usual it is sent unsolicited only to "Customers of Record." We shall be pleased, however, to mail a copy immediately upon application (a postal card will do) to every one who appreciates **QUALITY IN SEEDS**.

¶ This **SILENT SALESMAN** (and we employ no "talking" salesmen to solicit orders) tells the plain truth about **The Best Seeds That Can Be Grown**. It is a bright book of 178 pages and shows, besides colored plates of Burpee-Specialties, hundreds of the choicest vegetables and most beautiful flowers, illustrated from photographs. It is almost indispensable to all who garden either for pleasure or profit.

¶ The "**HOUSE OF BURPEE**" is known the world over not only as **EXPERTS IN SWEET PEAS** but also as **SEED SPECIALISTS**. No other American firm has ever introduced so many novelties of sterling value,—and no other growers supply seeds annually direct to so many planters. It might be to your interest to read **THE BURPEE ANNUAL**. It will cost you only one cent for a post-card to send us your address—and you are under no obligation to buy. We never annoy applicants with "follow up" letters!

Shall we mail you a copy?

If so, kindly **WRITE TO-DAY**.

Burpee's Blue List for 1912

¶ The most complete catalog published for **MARKET GARDENERS, TRUCKERS and FLORISTS**. For the planter who "knows" it contains complete lists of all that is best in vegetables and flowers, while the grower who is uncertain as to the best varieties suited for his purpose may be guided by the bull's-eye • placed after what is known to be best. In addition full descriptions are given of many new and most valuable varieties.

¶ **BURPEE'S BLUE LIST FOR 1912** contains 146 pages with hundreds of half-tone and engraved illustrations. Within the pages of this catalog we have condensed an experience of thirty-five years both in handling and the actual growing of seeds.

¶ If you garden for profit (that is, sell your products in the market) you are entitled to a copy of this complete and easily understood catalog, but if you are a private planter please do not ask for it, as we must protect the Market Gardener, Trucker and Florist.

Fruits and Vegetables Under Glass

NEW JERSEY ORANGES

The accompanying pictures give only a faint idea of the magnificence and beauty of an orange house at this time of year, the ever-green foliage contrasting so well with the golden fruit as it hangs in great clusters. The pictures were taken two weeks

ago in the orangerie at Duke's Park. This house measuring 25 by 75 feet might be rightly termed the California of New Jersey. The older trees are planted out in borders and the intervening spaces taken up with trees in square tubs—one of which we illustrate—which are easily transferred to wherever needed for house decorations. The cluster—and there are many such through the house—is growing on one of the trees planted out. Owing to the quantity of fruit which keeps the branches low, it has been difficult to show the whole crop of one tree in a small picture. For a private place which is seeking novelty and a picturesque house there is nothing to beat an orangerie. The moderate temperature makes it an ideal spot at all times of the year.

The fragrance of the flowers needs no commendation and as soon as these pass over there is the crop of wee small oranges to develop into the golden harvest of the late fall and winter, which makes a pleasing feast for the eyes as well as the mouth, right over Christmas.

POSITION OF FRUIT HOUSES AND THEIR VENTILATORS

The position and construction of fruit houses plays no small part in the quality of results obtained from the trees. During recent years a great change has been made in constructing a peach house. Now, we find trees growing on a trellis stretched across the house instead of in the old way of running on an overhead trellis a short distance from the glass. This method is a vast improvement on its predecessor, inasmuch as more fruit can be gathered from a house, the trees are more easily kept clean,—being more accessible with the hose,—the borders feel the heat of the sun and the air can pass in and around the trees more freely. It will be readily seen that a house such as the foregoing must run from east to west, with the trellis across it at right angles. For an early house a lean-to has much to recommend it;

in the first place it is sheltered from the north wind, secondly it gets all the sun possible during the first months of the year—an essential point. Trees planted the reverse way are shading each other a little until the sun gets high. Similar houses will suit figs. Vineries can be built on either course, but if from east to west a lean-to or $\frac{3}{4}$ span is only possible.

A far more imposing house is the even-span roof. Nothing looks better to the eye than a good crop of grapes hanging in a span-roof house where you can walk along underneath them. It is essential that this range run from north to south, giving both sides an even amount of sun. Ventilation will be on both sides, top and bottom and, during the trying spring months with warm sunshine and cold winds, the advantages of having the air just where you want it will be demonstrated.

No fruit house should be built without bottom ventilation. Some plant houses do not require side air, but

with fruit houses there is a vast difference. In the first place all fruit needs as much fresh air as it can get during the hot weather; when late crops are swelling, with no side air burning and scalding will be easier; after the fruit is finished and the houses need to be kept as cool as possible you cannot bring a house down to outside temperature without side air. Again, early houses which you are desirous of starting as soon as possible do not catch the first light frosts, consequently the trees are kept growing longer, and lastly very late houses—vineries to have fruit hanging at Christmas—are unduly heated up with the spring sun before they are wanted to start and you cannot keep the vines dormant as long as would be possible with

side air. All this goes to show the advantage of houses having side-air over those minus it. I do not wish to say it is impossible to grow fruit in houses without side air, but I do say it is impractical to build houses expressly for growing fruit without it.

MAKING A PEACH BORDER

Making a peach border differs little from making a vine border. The root confinement is of equal importance, as a peach tree if left to itself will make a quantity of strong worthless wood year after year. It is seldom we find flower buds on this strong wood; on the contrary it is on the weaker wood where the flower buds are located. The position of the house and trellis must

determine if the border should be made up at once; in a lean-to house a portion can be made each year, but with cross trellises, no provision for this can be made. Proceed as with a vine border until it comes to mixing the soil. A peach does not require nearly so rich a soil as the vine, but it must be porous. To every fifteen loads of loam add one of broken bricks (these should be broken into pieces about as large as your fist) and four or five bags of choarcoal. No stimulants will be needed. Mix the soil thoroughly and when making it up press it firm.

MELONS

Melons sown December 1st will soon be ready to plant out and the bed should be prepared for them. Half-decayed loam, with a good percentage of mortar rubble or old plaster broken up small and mixed in with it will be found to suit them all right. A mistake is often made in giving melons too much soil to grow in. A

surprisingly small quantity is all they require. With this small quantity canker and stem-rot seem to be less prevalent than where they have so much to ramble in. A bed 5 by 16 inches is quite enough for them. Break the loam into fair-sized lumps and make the bed quite firm. A melon seems to enjoy a good hard soil and there is less superfluous growth than when planted in loose soil. A good set seems easier to obtain and the benches drying out quickly will help to improve the flavor of the fruit. After making the foundation of the bed leave little mounds of soil in which to plant the seedlings, two feet apart.

George H. Benson

White Phloxes

To emphasize the importance of phloxes in floral outdoor displays would mean an attempt to impose on the patience of the intelligent readers of *HORTICULTURE*. As a matter of fact, the coming into flower of the phloxes is a characteristic feature in the mid-summer aspect of any modern garden. Without it the total picture would lack in color-brilliance. We should, at once, miss that certain warmth of tone which only a mass of upright panicles of phloxes can create. World-wide popularity first brought about an overabundance of variety. With the growing refinements of taste in color combinations and the subsequent preference for clear

to shed some of their blossoms are as a rule not considered very seriously for cutting. Nevertheless during the month of August, with by no means an oversupply of white in the garden, the long-stemmed panicles of the best white varieties in many instances prove quite acceptable. This without doubt further explains their preponderance in public favor.

In the suffruticosa class Miss Lingard is still in the lead. Although not a pure white, the pale pinkish eye never detracts from its meriting first rank in the early-flowering whites. Being nearly a perpetual bloomer its glossy foliage, free-flowering habit, and the large size

PHLOX SUFFRUTICOSA, MISS LINGARD

tints the discarding of shades of doubtful merit became an urgent necessity for up-to-date growers. It also meant to keep an eye on the size of the individual flower as well as the build of the panicles, not to forget the resistance of foliage to mildew and other diseases.

According to my observations, the lighter shades at present outclass the darker ones in demand, with pure white leading. White is neutral; that is, it does not clash with any color when coming in contact. Being principally planted for garden display it is a very easy matter to place white phloxes. The standard varieties now possess that noble purity which, for near and distant effects, is of a wonderful strength.

Phloxes, on account of their habit of soon beginning

of its masses of conically formed trusses are qualities which speak loud and convincing.

There are quite a number of pure whites listed within the paniculata section. Of the tall growing ones Frl. von Lassburg and Mrs. Jenkins can be safely recommended as the best in cultivation. Of the dwarf-growing ones Diadem, late flowering, and—as a novelty well spoken of here and abroad—Frau Anton Buchner, mid-season, should be considered first. Both are excellent for bordering purposes.

Richard Rothe

Northeast Harbor, Maine.

Seasonable Notes on Culture of Florists' Stock

CARE OF CALCEOLARIAS FROM NOW ON

Don't run these plants too high for they are positively injured by being kept in too warm a temperature. From now 45 degrees at night should be the limit and where you want to retard them they should be kept in a very cool house—say three or four degrees above the freezing point. At this cool stage they should be held a little on the dry side, but yet with enough moisture at the roots to keep them sprightly and fresh. Those that are kept growing on in a temperature of 40 or 45 degrees should be allowed room to develop their foliage. Give them plenty of air daily when possible. It is advisable to keep them shifted from time to time until their flowering size is reached. These plants are very particular about drainage so always be sure to have a good layer of broken crocks in the bottom of every pot. Give them a loam that is left lumpy four parts, well rotted cow manure one part, leaf mold one part, and sharp sand enough to keep the mixture porous and mellow. Keep them rid of fly by light fumigations done often, which is more effective than infrequent heavy doses.

FORCING EARLY NARCISSI

The earliest planted bulbs of this ideal winter flowering bulb that were brought in and put under a bench in a cool house three or four weeks ago should by this time have filled their flats with lots of roots. To have the first lot prove a success be sure that they have a good root growth first, otherwise the attempt will be a failure. They will stand a strong heat when well rooted; any where from 75 to 80 degrees will not harm them. In forcing narcissi for January flowering they will need to be well-shaded so as to draw up the flower stem for two or three weeks; then remove the shading a little at a time until they have full sun. Remember that they will require frequent waterings when they are kept in a high temperature.

GLOXINIAS FOR SPRING FLOWERING

Where nice flowering plants are wanted for the months of April and May a batch of bulbs should be started now and another can be started in about a month; this will give a much longer period of flowering. The best way of starting these corms is to place them quite close together in flats in a compost of leaf mold and sand and then give enough of water just to moisten the soil thoroughly; be careful not to give too much until the bulbs have made some growth. As these plants are essentially tropical they should have a night temperature of from 60 to 65 degrees. When they have made a little top growth and some nice roots they can be potted off into 4 inch pots in a compost of fibrous loam three parts, cow manure and leaf mold each one part. When they have filled these pots with roots they should be shifted into their flowering pots, with good drainage. If seed is sown now and grown on they will make nice flowering plants by next August.

INCREASING YOUR FERN STOCK

All florists who grow a certain amount of their fern stock should make preparation now to increase it—by

divisions when possible or by sowing the spores. All ferns that are creeping rhizomes or stolons can be multiplied into young stock. All such ferns as *Adiantums*, *Davallias*, *Nephrolepis*, *Polypodiums*, etc., can be propagated by division. Break them up large enough so they will retain quite a few roots and then place these together in flats or pans in a compost of half leaf mold and half sand. There is no better place for these flats or pans than a warm propagating bench where they will not be subjected to any dry or cold currents of air. Keep the atmosphere of the frame moist and maintain a temperature of from 65 to 70 degrees and they will soon begin to make new fronds and roots, after which they can be potted up in any good porous soil. When they begin to make roots in their pots they should have a temperature of about 60 degrees at night. All this young stock should have a house or bench where they can have plenty of light without too much direct sun.

Spores can be sown now any time. Seedling ferns will need a lot of care at this season. When they are large enough they should be pricked off into other pans or flats; those that are large enough can be potted and placed in a temperature of about 60 degrees at night well up to the glass; otherwise the growth will be long and weak.

FUCHSIAS

To obtain nice bushy plants of good size bring in some of your stock plants and shorten them back to firm ripe wood. They should be shaken out and repotted into good fresh loam and given a bench in a house where they will get lots of sunshine with a night temperature of from 55 to 60 degrees. It will be necessary to give them an overhead spraying daily to soften up the buds, make them break well and start off into nice sturdy growths. When they have made young shoots from two to three inches long these should be taken off and inserted in a propagating bed that stands at 65 degrees bottom heat with a temperature overhead of about 55 degrees. When rooted they can be potted into 2½ or 3 inch pots using any good turfy loam broken up fine, three parts, well rotted manure and leaf mold one part each. They should be potted quite firm, but not hard. When they are established they will need abundance of water and daily syringings with 50 or 55 degrees at night.

LILIES INTENDED FOR EASTER

Go over your lilies intended for Easter and select the most forward for there is a big difference in their growth. While some will have made a growth of a couple of inches others will not be showing at all. All those that have a top growth should be immediately placed in a house where they will get plenty of light and about 50 degrees at night until they get well supplied with roots. Do the watering of these with care, giving just enough to keep the soil in a moist condition. By the end of this month they can all be brought in and placed on benches in the above temperature so as to get a start.

John J. M. Farrell

Mr. Farrell's next notes will begin the following: *Amulopsis*, *Cypripediums*, *Polios*, *Forcing Winter Dendrobiums*, *Getting Ready for Christmas Roses*, *Forcing Tulips*.

give greater comfort and satisfaction after it is all over than the consciousness that everything has been done in order, every obligation promptly met, every little detail carefully carried out and every customer pleased? The enjoyment of all this is not possible, except by deliberately thinking it out well beforehand and then by the systematic and thorough doing ahead of everything that can possibly be made to contribute towards the final realization. The right material—enough of it, in the right place and put to profitable use by the right person are essentials in the orderly expediting of business in this period of so great possibilities for the ambitious florist. "Get busy" is good advice but "get ready to get busy" is equally important. Do it now.

The inconsistency of exhibition schedules never fails to furnish a fertile topic for discussion. We have just been looking over one recently sent

out by a State Horticultural Society for a mid-winter show in which the first prize for five apples is \$2.00 in each of over a score of classes. A pretty good price for apples—40 cents apiece? And each exhibitor, whether winner or not, takes his fruit away with him, nothing the worse for wear, after the show closes. In the same schedule the sum of \$3.00 is offered for twelve American Beauty roses—25 cents apiece, in mid-winter—and, whether winner or loser on prizes, the exhibitor, of course, gets nothing back. On the other hand, \$8.00 is up as first prize for 50 carnations. The carnation man can't find any fault with that. Evidently the disparity is due, not to prejudice or intent to slight or to over-reward any particular class, but simply to a faulty conception of the comparative conditions appertaining to each. Schedule making calls for broad knowledge, and lots of good sense and our exhibitions suffer oftener than we are apt to realize, because these essentials are lacking in the schedule makers.

A great record

The mention in our St. Louis notes for this week and in various other news items from time to time, of the place still held by chrysanthemum Mrs. Jerome Jones as a market variety, reminds us that this grand old chrysanthemum has now been in existence for nineteen years and bids fair to hold its own indefinitely as a favorite exhibition flower in its distinctive class as well as a useful late commercial sort. This is remarkable when we consider that of the hundreds of varieties well-known at the time of its introduction in 1892 all are practically extinct with the exception of Cullingfordii, Maud Dean and possibly one or two others. Geo. W. Childs and Ivory which still are with us were introduced in the same year as Mrs. Jerome Jones. Col. Appleton, Timothy Eaton, Maj. Bonnaffon and other well-seasoned stand-bys were not yet in existence. No doubt the long tenure of the Mrs. Jerome Jones on the exhibition tables has been in some measure due to the liberal special premiums contributed by Mr. Jones as a memorial to the sweet, philanthropic lady whose name it bears and to the gentleman, her father, whose production it was and to whose patient devotion the chrysanthemum owes so much of its prestige. But the variety, individually, is also undoubtedly responsible for its popularity, not alone in this country but abroad, some thing which premiums could never have maintained without exceptional merit in the flower itself.

Get ready
to get busy

As we near the holidays the hustle and bustle increases and will intensify with each day that passes. He who makes ready can't and starts ahead of the rest to finish in his number. What can

THE COMING ROSE AND CARNATION CONVENTION SHOW AT DETROIT.

A good deal of adverse criticism has been going around regarding the earliness of the Rose Show. The Executive Board of the Rose Society thought it best to stretch a point and go together with the Carnation Society, as an experiment. Many rose growers grow carnations, too. They would like to go to both conventions, but to spare the time is often not possible, besides the extra cost of fare. By having these two conventions together, I think both societies will strengthen their membership; that a grower whose interest is weakest, say in roses, and is a member of the Carnation Society, would possibly, if able to attend both meetings, join the Rose Society, as he is most likely interested in roses also, but not caring to spend the time and money for both meetings, goes to the one which takes care of his greatest interests. So being able to "kill two birds with one stone," he goes to the joint meeting. As this works both ways, both societies will be gainers. Besides, the exhibition of the two societies together should be an attraction to the public, and thus a good attendance seems assured, which is a great factor towards the success of the show.

The Rose Society has always suffered from lack of attendance; if the show was just of roses alone, it was too small an affair, and the general public did not get to know of it. If held in conjunction with some Horticultural Society, we had the attendance, but we could not always arrange for such favorable conditions, so we are trying this combination. I feel sure it will be a great success. The hall is ideal, very light and with plenty of ventilation, and the Detroit Florists' Club is going to do its best to make us feel at home. Every member of it is working for success, and everyone seems to feel as if the success of the show and meeting depended on just his share of the work, and this makes the officers and executive board of both societies feel assured of one of the greatest meetings and exhibitions ever held by either society.

So, my dear friend, drop your growling, if you are one of the growlers, and make up your mind to come, and you will never regret it. The exhibition of roses alone will surpass your expectations. So many new varieties will be there, not by the dozen, but by big fifty bunches, and if they are not there you can form your own conclusions why. If you have any good roses, look over the previous list and see if there is not one class where you can come in. I know there is. All varieties and all classes are taken care of—some \$1,700 for cash prizes and the society's gold, silver and bronze medals. Enough for everybody, who is keen and alert to know that to have good roses at that time of the year, so they can come in competition with the best and possibly carry away first prizes is a glory, besides a good advertisement. Money is not everything in this life. To show your skill and good judgment, your fine points of cultivation and care, and then to triumph over your competitors, is great glory in our profession. Not to have felt that way is to have missed the best in your work. And those

who lose will strive to do better in the hopes of taking the blue ribbon some other day, and that is just one of the results of these exhibitions.

To keep one's eyes and ears wide open to improvements in methods of cultivation by going to these meetings and exhibitions, is very important. You may not get great big clouds of information every time you go, but, as the saying is, "Every little bit helps." Competition is strong, so one has to be posted all along the line. Everyone needs that to keep abreast of the times. There are lots of men crying that "there is no more money in it" than there was twenty to twenty-five years ago; the little men are getting crowded out." That's all nonsense; there is just as much money in it as ever, and more, and the small grower has just as good a chance as ever, of course, but the old ways of doing things will not answer any more; new ways and means have to be adapted and lived up to, and success is assured as ever.

A. FARENWALD.

NATIONAL FLOWER SHOW OF 1913.

Will you kindly give publicity to the fact that the committee is now working on the Preliminary Plant Schedule for 1913.

Strong representations have been made me, that any firms who desire to contribute special prizes in the plant classes should be given due credit for the same and their names placed in this Preliminary List, to insure for them the widest publicity possible.

The committee feels that it cannot get in touch personally with all who may be desirous of contributing in this manner, and therefore asks that they write on or before January 1st, 1912, stating their wishes in this matter.

Thanking you, I remain, Yours very truly,

CHAS. H. TOTTY,

Chairman.

GOOD SERVICE RECOGNIZED.

Editor HORTICULTURE:

Gentlemen—As an aftermath to the report of the chairman of the Taff and Legislative Committee of the Society of American Florists, we would add our appreciation of the work which Mr. Esler did for us personally. We were among the victims of the unsatisfactory deliveries of the express companies, and as individuals, were unable to get satisfaction. We appealed to Mr. Esler, and thanks to his interest and indefatigable efforts, backed by the Society of American Florists, we gained our point. This shows two things very clearly and emphatically: first, the great value of united action, and "pulling together," as under the patronage of a society like the American Florists, and secondly, officering any society with the right men in the right place. To spare Mr. Esler's blushes we will let you make the inference here.

Very truly yours,

BENJAMIN DORRANCE

Attention is called to a typographical error in issue of Dec 9 in which M. Wilson is made to say that Lucca plum chimera was introduced to cultivation "about 1860," instead of "about 1880" as per code.

In the advertisement of J. J. McDuffee & Stratton read \$1.50 to \$1.50 on price of jardinières.

ROYAL INTERNATIONAL HORTICULTURAL EXHIBITION, LONDON, 1912.

His Majesty King George V has just communicated to the director of the Royal International Horticultural Exhibition, through Lieut.-Col. Sir George Holford, his intention to open the exhibition on May 22nd at 12 noon.

It will be remembered that this great show is to take place at Chelsea, in the grounds of the Royal Hospital, where it will be open to public inspection for eight week days. It will be the first show of the kind in England since 1866, and there is already ample evidence that it will attract all the horticultural novelties not only of the Empire, but of the world, while it will present to visitors a unique display of present-day floriculture.

In consideration of numerous requests from representatives of the horticultural world, the Directors of the Royal International Horticultural Exhibition have decided to provide special admission facilities for professional gardeners and others on the second, third and subsequent days. The actual size of the ground is 21 acres; but at least 7 acres are occupied by trees, shrubs, etc., which leaves only 14 acres for tents, exhibits, offices, etc. Applications for space have naturally been very numerous, and ground has to be allotted for paths, promenades, and so forth. It must also be remembered that, apart from the visitors themselves, there will be a large number—say three thousand—of officials and servants, including jury-men, exhibitors, attendants, etc.

Among the most recent donors of special prizes are Messrs. Clay & Sons, who are offering for competition in the rose class, a silver gilt rose bowl, valued at eighty guineas.

Turning to the interesting subject of horticultural sundries we may say that this section will exhibit a completeness never before witnessed in this country. The exhibits will be given prominent positions in the grounds, both under cover and in the open. In every case, the awards will be made by special jurymen; thus, in the classes for sundries, only men who have a thorough knowledge of these matters will officiate.

The Directors desire to draw the attention of exhibitors to the fact that they have decided not to enforce the condition printed at the foot of the entry forms already distributed in the schedules, to the effect that specimens (plants, etc.) must have been cultivated by the exhibitor for at least two months prior to the date of the show. Regulation 29, in the revised schedule, is the only stipulation of the kind that will be retained, namely, that the "Exhibitor must be the property of the Exhibitor, or of the Employer in whose name the show is shown."

The Directors also announce that they will provide all necessary plates and vases; the plates will be of card-board or papier mache.

C. HARMAN PAYNE

Foreign Press Secretary

CLUBS AND SOCIETIES.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

At the annual meeting, held in Royal Arcanum Hall, Stamford, Conn., Friday evening, December 8th, 80 members were present and the following officers were elected for the ensuing year: President, James Stuart, Mamaroneck, N. Y.; vice-president, Robert Williamson, Greenwich, Conn.; treasurer, Thos. Aitchison, Mamaroneck, N. Y.; corresponding secretary, Oscar Addor, Larchmont, N. Y.; financial secretary, J. B. McArdle, Greenwich, Conn. Executive committee, Chas. Adcock, New Rochelle, N. Y.; J. T. Burns, New Canaan, Conn.; Wm. Smith, Port Chester, N. Y.; Jas. Aitchison, Stamford, Conn.; P. W. Popp, Mamaroneck, N. Y.

It was decided to hold our meetings for 1912 in Greenwich, Conn. Mr. J. K. M. L. Farquhar of Boston will lecture on "The Gardens of Japan" at the January 12th meeting in Greenwich. The fall chrysanthemum show will be held at New Rochelle, and the summer rose show at Greenwich, Conn.

At the close of the meeting a social session of one hour's entertainment, cigars and refreshments, provided by our Stamford members, was an appropriate closing of the many pleasant meetings our society has held there the past year.

Following is the judges' report on exhibits at meeting, December 8:

Vase of calanthes—Jas. Stuart, certificate of merit; vase of carnations—Thos. W. Stobo, cultural certificate; collection of vegetables—Robt. Williamson, cultural certificate; cauliflower, tomatoes and mushrooms, *Cypripedium insigne*—Jas. Foster, honorable mention; carnations—Thos. Ryan, honorable mention; sweet peas—A. Peterson, vote of thanks; roses, *Kaiserin Aug. Victoria*—John Grant, vote of thanks. J. B. McARDLE, Secy.

NEW JERSEY FLORICULTURAL SOCIETY.

Officers for the ensuing year were elected by the N. J. F. S. at their regular meeting held in Lindsley Hall, Orange, on December 8th. Frank Drews, gardener for the Essex County Country Club, was elected president; Geo. B. Wilson, gardener for Thomas Edison, Llewellyn Park, vice-president; William Reid, secretary, and Walter M. Gray, treasurer, were unanimously reelected, both for third terms. It was decided that instead of the annual smoker in February a banquet should be held, to which the ladies should be invited. It was decided to continue the monthly competition for points in the various classes next year. These monthly exhibits for points keep up the interest in the society. Our meetings are always well attended by the members and the public.

The silver cup donated by John R. LeCount, was presented to Lager & Hurrell, who won it last month for the best display of orchids. The presentation speech was made by President Kindsgab. There was an unusually fine display of carnations, roses, orchids and other seasonable flowers on exhibition. W. E. Marshall & Co.,

New York, donated a prize for the best 18 carnations, one or more varieties, which was won by S. M. & A. Colgate, William Reid, gardener; second, Chas. Hathaway, Max Schneider, gardener; third, Popken & Collins.

The following are the awards in the monthly competition for points in Class A.

Calantha Veitchi—Lager & Hurrell, 80 points; *Epidendrum ciliatum*—Thomas Jones, 85 points; *Cypripedium insigne*—William Reid, 97 points; vase of carnations—William Reid, 95 points; Frank Drews, 82 points; vase of roses—William Reid, 88 points.

Class "B," vase of carnations—Fritz Berglund, 87 points; vase of chrysanthemums—Max Schneider, 83 points.

Certificates were awarded as follows for exhibits not in competition for points:

Cypripedium insigne—Hurrell-Humm, Lager & Hurrell, first class cert.; *Cypripedium acaule*—Younger Lager & Hurrell, first class cert.; *Cypripedium*—Niobe Lager & Hurrell, cert. of merit; vase of carnations—Frank Drews, cert. of merit; bunch of violets—Fritz Berglund, cult. cert.; 2 vases of roses—George Wright, cult. cert.; 1 pot mignonette—George Wright, cert. of merit.

The results in the annual competition for points, being the points received at the monthly competitions during the year were as follows in Class A: Commercial orchid class—first, Lager & Hurrell; second, Thomas Jones. Orchids, private gardeners' class—first, William Reid; second, Albert F. Larson. Am. Beauty roses—first, Frank Drews; second, Albert F. Larson. Roses—first, William Reid; second, Frank Drews; third, A. F. Larson. Carnations—first, William Reid; second, Frank Drews; third, A. F. Larson.

Class B: First, Max Schneider; second, Fritz Berglund.

WILLIAM REID, Sec'y.

ELBERON HORTICULTURAL SOCIETY.

The annual meeting of the Elberon Horticultural Society was held on Dec. 14th, when the following named officers were installed into their respective chairs for the ensuing year: President, James Kennedy; vice-president, Duncan Kelly; treasurer, A. Bauer; secretary, Benjamin Wyckoff; corresponding secretary, George Masson. The reports of the treasurer, secretary and standing committees were submitted and all showed a satisfactory and excellent condition of the affairs of the society.

In the monthly competition for points during the past year, A. Bauer won out, and he now becomes the owner of the Rickards' Bros.' silver cup which had to be won twice before becoming the property of the winner. In addition to the cup, Mr. Bauer was awarded the gold medal; Duncan Kelly, scoring the second highest number of points receiving the silver medal and Wm. Seymour the bronze medal, for third. These medals were kindly donated by A. T. Boddington.

It was decided to continue the monthly competition for points during the coming year and that suitable prizes be awarded for same. Among the out-of-town visitors present was Jos. A. Manda of Orange, N. J., president-elect of the New York Florists' Club.

GEORGE MASSON,

Corres. Sec'y.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

While our club meeting on Dec. 5th was not as largely attended as the November meeting, when we had the chrysanthemum display, yet it was very interesting, made so partly by the varied exhibits, and particularly by the presence of Elmer D. Smith of Adrian, Mich. Unfortunately Mr. Smith had not been able to be present at our November meeting when his specialty was shown in great variety, but he had with him a large number of life size cuts of chrysanthemums, and with these as texts he talked to us in his modest way of the peculiarities of habit and the best methods of propagation of his favorite flower. Asked for a list of the 12 best chrysanthemums for exhibition purposes, Mr. Smith named the following: Montigny, F. S. Vallis, Harry Conrad, Lenox, Missouri Boy, M. Loiseau Rousseau, Wm. Turner, Woodmason, Rose Peckett, Lady Hopetoun, Morristown, Yellow Miller.

Mr. Smith spoke in pleasant terms of the hospitality he was receiving during his short stay in Pittsburgh, and in particular of his visit to the plant of the Pittsburgh Cut Flower Co. at Bakerstown, where he saw 13 acres under glass, and was struck with the high average grade of all the stock under cultivation.

Baur & Steinkamp sent a number of cut blooms of carnation *St. Nicholas* which attracted much attention. Our expert agreed that if it was a free bloomer, it would be a winner. The judging committee—P. S. Randolph and Robt. Lillie—awarded it a first-class certificate.

The Pittsburgh Cut Flower Co. exhibited a number of the newer carnations and roses which they have had under observation the past season and President Burki of the company commented briefly upon them as follows:

Pink Delight is a good producer, good stiff stem and good color. Princess Charming is a nice flower, but slow; more money in Pink Delight. Bright Spot is well thought of. Gloriosa is a good thing. Sangamo makes a good deal of grass; in fact more grass than money. Of the newer roses Mrs. Aaron Ward proves more free than Melody and My Maryland is a good summer rose. The committee awarded a cultural certificate.

Jas. Wiseman showed a plant of *Erlangea tomentosa*—special mention. John Bader Co. showed fine cyclamen and Christmas plants in variety—cultural certificate.

At this point Mr. Phillips, gardener for H. J. Heinz, called attention to the fact that the American public showed small knowledge of plants as evidenced by the few varieties called for; in England and Germany a much greater variety is grown, and he thought our florists should endeavor to educate the public to a greater knowledge of plants and bring them to know there were other good things to grow besides Boston ferns. To this answer was made that the florists could not afford to educate the public, and also that the general knowledge of plants shown by the public visiting

the great Phipps Conservatories in Schenley Park was good.

The Bureau of Parks, Schenley Park, showed five varieties of begonias. Of these one of our large retail florists preferred Agatha in his trade, but for conservatory work President Jones prefers Glory of Cincinnati certificate of merit.

Bureau of Parks showed cypripediums and ardisias, the berries of which were said to color best at a temperature of 45 degrees—certificate of merit.

G. and J. W. Ludwig showed Christmas greens from Oregon, Mahonia acanthifolia special mention.

In honor of the presence of Mr. Smith, refreshments were served by the hotel management, which brought to a close a very pleasant meeting.

Subject for the January meeting: "Roses." H. P. JOSLIN, Sec'y.

NEWPORT HORTICULTURAL SOCIETY.

This organization held its annual meeting on the evening of Dec. 12, when reports from the various officers were submitted showing the Society to be in a high state of efficiency, which is mainly due to the harmony prevailing among its workers. A large number of members were present, and all seemed to favor the re-election of the officers, which was done in most cases, including that of president, and the following are those elected for the ensuing year:

President, Andrew S. Meikle; first vice-president, William Mackay; second vice-president, John B. Urquhart; recording secretary, Daniel J. Coughlin; treasurer, A. K. McMahon; finan-

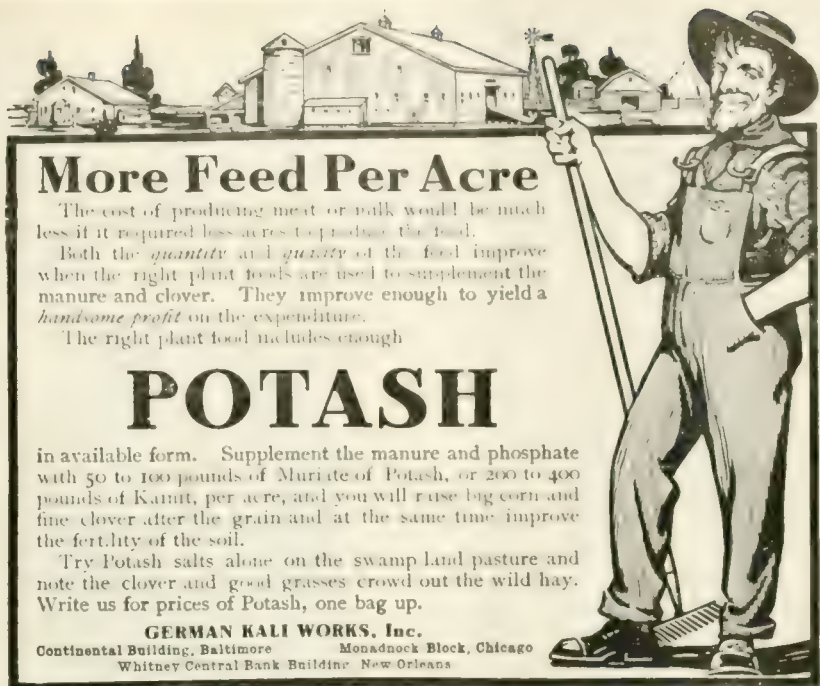

ANDREW S. MEIKLE

President of Newport Horticultural Society.

cial Secretary, John P. Hammond; sergeant-at-arms, William E. Smith; executive committee, Richard Gardner, John T. Allan, Alex. MacLellan, James Robertson, Bruce Barrington, William Grey, C. M. Bugholtz and Fred Franco, with the above officers.

A large vase of cypripediums was on exhibition, and as they were said to be the best ever seen here, they were

More Feed Per Acre

The cost of producing meat or milk would be much less if it required less acres to produce the feed.

Both the *quantity* and *quality* of the feed improve when the right plant foods are used to supplement the manure and clover. They improve enough to yield a *handsome profit* on the expenditure.

The right plant food includes enough

POTASH

in available form. Supplement the manure and phosphate with 50 to 100 pounds of Muriate of Potash, or 200 to 400 pounds of Kamut, per acre, and you will raise big corn and fine clover after the grain and at the same time improve the fertility of the soil.

Try Potash salts alone on the swamp land pasture and note the clover and good grasses crowd out the wild hay. Write us for prices of Potash, one bag up.

GERMAN KALI WORKS, Inc.
Continental Building, Baltimore Monadnock Block, Chicago
Whitney Central Bank Building, New Orleans

awarded the bronze medal of the Society. The exhibitor was Fred Jenkins, gardener for Mrs. Cornelius Vanderbilt. The offer of a silver cup from Miss Fanny Foster was thankfully accepted as a prize for twenty-five varieties of dahlias to be exhibited at suitable times, the competition to be open to private gardeners only, and the cup to be won twice by the same exhibitor. The business session was followed by a social, which all seemed to enjoy with appropriate refreshments.

LENOX HORTICULTURAL SOCIETY.

The annual meeting of the Lenox Horticultural Society was held on December 2nd, and was largely attended, with President Foulsham in the chair. Treasurer Jack was all smiles when he read the financial report, stating that the Society had had one of the most successful years in its history, also that the surplus funds were carefully invested, and much to the members' regret asked to be excused from holding office for another term. The secretary also read his annual report, showing that the Society had elected three life members and twenty-two annual members, and everyone present was of the opinion that this had been a banner year for the Society, and the officers were accorded a hearty vote of thanks.

After the general routine of business was over, election of officers took place. Messrs. George Foulsham and George Broadman were re-elected president and vice-president. Alfred Jenkins, treasurer, George H. Barnes, re-elected secretary; and William Hooper, assistant secretary.

Messrs. E. Jenkins and A. H. Wingett gave an interesting account of the recent Land Exposition at New York, but neither of them were lucky enough to win any of the prizes.

Messrs. F. H. Barnes and E. Jenkins were appointed as a committee to draw up resolutions upon the death of our life member, Captain John S. Barnes.

GEO. H. INSTONE, Secretary.

NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS.

The annual fall inspection tour of the members of the N. Y. & N. J. Association of Plant Growers took place recently. The trip took two days and the members were conveyed in automobiles to seventeen establishments on Long Island and fourteen in New Jersey.

On the Long Island trip a noon day stop was made at the dining hall of John Niederstein, Middle Village, where under Frederick Marquardt's direction a sumptuous meal had been prepared. The accompanying picture was taken at Middle Village by Miss Marie Marquardt. It will be noticed that F. R. Pierson, who occupied the front seat, was the guiding spirit of

the larger car, while the Committee's car was dominated by such large bodied men as A. L. Miller and Arthur Schulthess. Not only was the trip an instructive and profitable, but the members had an enjoyable time.

The annual meeting of the New York and New Jersey Association of Plant Growers was held at the office of the secretary, William H. Siebrecht, Jr., on December 5th, and important business was transacted.

The annual election of officers took place with the following result: President, Frederick Marquardt, Middle Vil-

lage, L. I.; vice-president, Louis Schmutz, Brooklyn; treasurer, Herman C. Steinhoff, West Hoboken, N. J.; secretary, Wm. H. Siebrecht, Jr., New York City; directors, A. L. Miller, Brooklyn; Louis Dupuy, Whitestone; George Scott, Brooklyn.

It was voted to have an annual dinner and the president appointed Julius Roehrs, Jr., Louis Dupuy and Herman C. Steinhoff a committee to make all necessary arrangements.

WM. H. SIEBRECHT, JR.,
Secretary.

CONNECTICUT HORTICULTURAL SOCIETY.

Our annual meeting occurred on the 8th instant, resulting in the election of the following officials:

President, John F. Huss, Hartford; vice-presidents, J. A. Weber, Hartford, Alex. Cumming, Jr., Hartford; Carl Peterson, West Hartford; county vice-presidents—Hitchfield—Walter Angus, Chapinville; Fairfield—Charles H. Plump, West Redding; New Haven—John H. Slocum, New Haven; Middlesex—Arthur E. Curtis, Deep River; New London—Archibald E. Mitchell, Norwich; Windham—Frank M. Smith, Willimantic; Tolland—Chauncey Turney, Rockville; secretary, George W. Smith, Melrose; treasurer, W. W. Hunt, Hartford; librarian, William T. Hall, Hartford; botanist, George W. Smith; pomologist, C. H. Sierman, Hartford; executive committee, John Gerard and George B. Baker of New Britain, and G. H. Hollister, Howard A. Pinney and Alex. Cumming, Jr., of Hartford.

The treasurer reported the society in good financial condition, with a snug balance in the treasury, and all bills paid, and with assets (consisting of two shares of Aetna Life Insurance Company stock) valued at over \$1,000. The secretary announced that the present membership, 212, is the largest in the history of the organization. Three deaths occurred during the past year, W. W. Myers, Mrs. Francis M. L. Barnes and William B. May, all of Hartford, the two latter having been life members. Mr. May was for many years the able superintendent of the sumptuous grounds of James J. Goodwin, and was succeeded in that position, in his declining years, by John F. Huss, our esteemed president. Suitable resolutions were adopted concerning the decease of Mr. May, who was one of the society's founders.

In his address the president reviewed the work of the year, referring especially to the many excellent papers presented by members last winter and spring. His views were quite optimistic for the future of the society, whose influence is gradually widening, until the membership roll embraces the entire eight counties of the Nutmeg State.

Our two fall exhibitions were fully up to our high standard of artistic merit, and were fairly well patronized. John Gerard, our pansy enthusiast, strongly advocates the holding of the Chrysanthemum Show at New Britain next fall, instead of at Hartford, and there is considerable sentiment in the society in favor of making such a trial. The free use of a large armory, and similar attractions, are proffered.

J. A. Weber exhibited three pots of *Cypripedium* insigne for which a diploma was awarded.

Owing to the nearness to the holidays, our usual second December business meeting will be omitted, and the members convene again on the second Friday of the new year.

GEORGE W. SMITH, Sec'y.
Melrose, Conn., Dec. 11, 1911.

NEW YORK FLORISTS' CLUB.

The meeting of the New York Florists' Club, held on Monday night last for the election of officers for the ensuing year, was, to say the least, a most inspiring one, sufficient in every way to impress all present with the importance of the work at hand and the ambitions of those to tackle the job. To those who attended the Baltimore convention we might say it was in great measure a parallel, with Walter F. Sheridan again acting super-

W. C. RICKARDS, JR.

Treasurer New York Florist Club.

visor of elections. Eighty-five votes were cast with the result that Joseph A. Manda, South Orange, N. J., was chosen president; Philip Einsmann, vice-president; John Young, secretary; W. C. Rickards, Jr., treasurer; and John Donaldson, Philip Kessler and Wm. Duckham, trustees. In the case of the presidency, Messrs. Nugent and Hendrickson withdraw as candidates,

JOHN YOUNG

Secretary New York Florists' Club.

leaving Mr. Manda the only choice. In the other cases keen competition went to work and good-natured rivalry showed the healthy condition of the club. John Young alone seemed to be a magnet for votes, by receiving 75 out of the 85. It was all good nature, permeated with a determination to make the club the banner organization of local societies in the United

States. Six new members were elected and five others proposed. Prof. John Craig of the Agricultural Department, Cornell, was introduced and urged the members to form part of a state organization for the purpose of demanding appropriations from the legislature for a range of commercial greenhouses to experiment and further the interests of commercial floriculture. Prof. Craig admitted the deplorable weakness of state machinery at present to assist the florist, but stated that with the help of the club the necessary funds would be obtained. He referred to acquiring a better knowledge of the science of soils and discussed the usual theories attached to experimental departments. On motion of Mr. O'Mara the proposition was laid over to next meeting, with the recommendation that the new officers would be in and that this would be something for them to do. Prof. Craig's ideas will, no doubt, cause the club to take on a renewed activity on the line of seeing how the boiler works at Albany and the first step towards this was to pass a motion tending the unanimous hearty support of the club to William F. Kasting of Buffalo for State Commissioner of Agriculture and the secretary was instructed to convey such to Governor Dix. With Kasting at the head all will know the Department of Floriculture will be well taken care of.

Messrs. Traendly, Sheridan and Young were appointed transportation committee for the club's representation at the National Rose and Carnation Show at Detroit, January 10. The awards committee reported on Totty's Sunburst rose, giving it 90 points and tendered Chas. Weber its thanks for exhibit of the new carnation Brooklyn. Among the many who took part in discussions was Beaulieu, the seedsman, who, when called up to relate conditions in Europe, stated that in Paris last summer he paid 16 cents for a bottle of water and 10 cents for a bottle of wine when illustrating the severe drought over there. We should imagine from this that French importations should have an extra value owing to their wine flavor. After the usual felicitations talks Al. Rickards' canteen department was duly attended

JOSEPH A. MANDA.

See Cover Page.

Joseph A. Manda, president-elect of the New York Florists' Club, was born in Bohemia, January 4, 1874. He came to America in 1885, and served his apprenticeship with the late Gus Bergmann at Flatbush, N. Y., 1886-87. In the following year he went to Short Hills, N. J., in the employ of Pitcher & Manda, where he had charge of the orchid department for six years and was very successful in the raising of orchid hybrid, and is credited with having raised the first orchid hybrid in America. He then started in business as an orchid expert in West Orange, N. J., and has made for himself a good record personally and in business. He is young, energetic and a hard worker in anything that looks like duty to self or fellowman, and we are sure the New York Florists' Club will have a faithful and efficient leader in Joe Manda. He has been a member of the Club for 18 years, and served on many important working committees.

CHICAGO FLORISTS' CLUB.

The regular monthly meeting of the Chicago Florists' Club was held at Union Restaurant, Thursday, Dec. 7. The applications for membership numbered no less than 45 and by vote of the club the names of 54 delinquent members were dropped from the roll, all of which may be interpreted as a lining up for battle on some issue regarded by the members as furnishing a *casus belli*.

Baur & Steinkamp exhibited their new carnation, St. Nicholas, which scored 87 points and was awarded a certificate. Short addresses were made by John A. Evans and A. F. J. Baur of Richmond, Ind., and Mr. McKruchten.

Nominations for officers were made as follows: President, P. J. Foley, H. E. Philpott; vice-president, Carl Cropp, D. A. Robertson; secretary, A. T. Pyfer; treasurer, E. F. Winter-

PARIS CHYRSANTHEMUM COM- MITTEE.

The National Horticultural Society of France has entrusted to a specially organized committee the work done by the society in connection with the popular autumn flower. This committee is composed of a very large number of experts, mostly French. Every year since its formation the committee has issued an annual publication containing a detailed record of the past year's work. We have just received the new issue, a large octavo volume of 176 pages in which there is a good deal of matter that will interest the members besides others.

To those inspired with an affection for the "golden flower" and can read French this publication is of no little interest. C. HARMAN PAYNE.

When a man is just about now having his good disposition mellowed by the day with the French heels because of the overdone Christmas mood. In the olden days a man looked forward to Xmas as a time of good cheer, but of late years the strain on his pocketbook has been so great that it has overbalanced the good cheer. He has come to dread the date. People of late give presents they cannot afford, and the reciprocity feeling has made it a hardship on others. Some people give presents to get presents, and, on the whole, it is certainly being greatly overdone. Now a good way to overcome this excessive giving is to give flowers. Just a few will do enough to show a true regard for your friends and acquaintances, and at the same time not state them in the face forever, to remind them of their duty to you another year. There is nothing more appropriate, and nothing more beautiful to demonstrate the right feeling at Xmas time. A pot of Xmas lilies is especially fine, or a medium size Azalea. Florists do well to advertise flowers especially for Xmas boost the business. Horseshoe Brand Lily bulbs and Azaleas will give the florist good ground to work on, and if you are not prepared this year, see that you are in 1912. Order early. Send for catalogue—it will be ready soon.

Obituary

James Douglas.

The news of the sudden death of this well known and highly-respected gardener and florist will be received with profound regret. Douglas was the last of the old school of florists, and his death has severed a link with the past that can never be repaired. Our own columns have frequently borne witness to his enthusiasm for such flowers as carnations, auriculas, polyanthus and tulips; indeed, Mr. Douglas was one of our oldest contributors. Only a week ago he wrote to us with respect to arrangements for contributing articles on his favorite flowers during the present season, and the first of what promised to be an invaluable series reached the office after his death. James Douglas had a pleasant way of working into his cultural articles a great deal of florists' lore which was not merely interesting, but helpful to an understanding of the true properties of the flowers which he was describing. His writings were of permanent value, because they were based on his own experience as a cultivator. No man excelled Douglas as a plant grower, and it will be remembered that he exhibited with extraordinary success at most of the great shows before leaving Great Gearys garden, Ilford, to start business as a nurseryman at Bookham. His collections of Auriculas shown at the R. H. S. meetings in recent years have excelled anything of the kind ever seen, and the Council has shown its sense of the general appreciation of them by awarding Mr. Douglas the gold medal on several occasions. His personal qualities were as high as his professional attainments, and his name was, and will remain, always associated with all that was best in the horticultural world. Amongst his public services may be reckoned thirty-two years' work on the Committee of the Gardeners' Royal Benevolent Institution, and he was not only a permanent member of the Floral Committee of the Royal Horticultural Society, but for some years represented professional gardeners on the Council of that Society. He gave continuous help to the National Auricula and Primula Society and other special societies. Douglas was awarded the Veitch Memorial Medal, and in 1899 the Victoria Medal of Honor. No man deserved these distinctions more than he, for his life and work afforded an exemplary example for the younger gardeners of the present day to emulate. —From *The Gardeners' Chronicle*, Dec. 2, 1911.

Sir Joseph Hooker.

Sir Joseph Dalton Hooker, K. S. C. G., F. R. S., one of the most famous naturalists, retired surgeon, R. N., died in London on Dec. 11, at the age of ninety-four. He was born in the purple science. His father was Sir W. F. Hooker, whom he succeeded in 1865 as director of Kew Gardens. Father and son transformed and beautified the national gardens and made them not only one of the most enjoyable resorts in London, but the source of perpetual benefit to the nation by acclimatizing

and developing in them useful and ornamental plants.

Sir Joseph Hooker was educated at the high school and University of Glasgow, where he took his medical degree in 1839. When only twenty-two he accompanied, as assistant surgeon, in reality as a naturalist, the famous Antarctic expedition of Sir James Clark Ross in the Erebus and Keroo. On his return he became botanist to the Geological Survey of England. In 1847 he went to India to investigate the plants of tropical countries and the flora of the Himalayas. He was captured and held prisoner by the Rajah of Sikkim in order to extort a more favorable treaty from the Indian Government. As a punishment Great Britain annexed Southern Sikkim.

Sir Joseph was elected president of the Royal Society in 1873. He published many excellent works on botany and received numerous decorations and honorary degrees.

Meta Phillips Landreth.

Meta Phillips Landreth, wife of Capt. Burnett Landreth of the David Landreth Seed Co., died on the 10th inst., at Washington, D. C., aged 64. Funeral services were held at the family residence, Bristol, Pa., on the 13th inst. Mrs. Landreth is survived by her husband, three sons and one daughter, Burnett Jr., S. Philip, David and Frances H.

CLUB AND SOCIETY NOTES.

The Chicago Florists' Club listened to an entertaining talk on business prospects in South America at the meeting on Dec. 7. It was given by J. McHutchison, of New York.

On Monday night, November 27, F. W. Kelsey addressed the Tenafly Borough Club at Tenafly, N. J., on the topic of "Parks and playgrounds." Mr. Kelsey is well informed on this subject and his lecture was enthusiastically received.

An interesting meeting of the Bar Harbor (Me.) Horticultural Society took place on Dec. 7th. Two papers, "The Future of the Bar Harbor Horticultural Society," by P. W. Blanchard, and "Mushroom Culture," by Arthur E. Chilman, gardener to Mrs. Joseph T. Bowen, were read.

At a regular meeting of the Fall River (Mass.) Florists' and Gardeners' Association held Dec. 6, the following officers were elected: President, E. T. Lawton; vice-president, William Stafford; secretary, J. R. Pee; treasurer, J. Warburton; trustee, E. T. Lawton, C. Warburton and Paul de Nave.

The Englemann Botanical Club met Monday night, Dec. 11th, in the lecture room at the Missouri Botanical Garden, St. Louis. Mr. W. W. Chlweiler's paper on "Recent Developments in Our Knowledge of Stomata," was well received. The attendance was large. Some new features are on for the January meeting.

All officers of the Milwaukee Florists' Club were reelected at the regular meeting held Dec. 7. The subject of the recent flower show was informally discussed. It is thought best by some to omit the 1912 show altogether and concentrate the efforts on the one

for 1913. The club is now in the best condition in its history.

The preliminary schedule of prizes for the American Rose Society, co-operating with the American Carnation Society and the Detroit Florists' Club in the exhibition at Detroit, January 10, 11 and 12, 1912, has been issued. It is a liberal list and all interested should send to Benj. Hammond, Fishkill, N. Y., for a copy.

The preliminary premium list of the Horticultural Society of Chicago for their first spring exhibition, to be held March 12 to 17, 1912, has been sent out and those interested may procure copies from the secretary, J. H. Burdett, 1620 W. 104 Place, Chicago. There are 142 classes, aggregating \$2,434.00 in premiums besides numerous medals, etc.

The Cincinnati Florists' Society assembled for their regular monthly meeting at their club rooms. The meeting was mostly routine work. The president's desk was gaily decorated with specimen plants of begonias, one a sport of Lorraine, shown by Schumann & Wahlers that is much of an improvement over the old, and some Glory of Cincinnati plants by J. A. Peterson.

Albert Sylvester, chairman of the Transportation Committee for the joint convention in Detroit next January, requests all intending exhibitors to address their exhibits Exhibition Wayne Gardens, Detroit, Mich. Sometimes an exhibitor addresses his flowers to a local friend who perchance may live outside the regular delivery zone and thereby brings about an unavoidable delay of no less than 24 hours.

The New York Gardeners' Society's reunion, dinner and bowling tournament on Dec. 21st, promises to be the greatest pleasure event in many years. Many gardeners, greenhouse builders, seedsmen, nurserymen and landscape gardeners in and about New York have notified their intention not to miss any part of the program. A celebrated highland piper will bring back memories of home to many. Rickards Bros. will have charge of the music and songs, Chadwick and Schultz the side shows; Everett, Duff and Manda the prize bowling; Marshall, Scott and Donlan the commissary and so on. It is hoped that enough good bowlers from each society will attend and compete for the prizes offered for club or society teams. In such manner all the old and young ones will just have one jolly big Christmas time of it. The drawing for the two vases will take place immediately before the bowling.

Room will be made for late comers but let us know just as soon as you can.

J. IVERA DONLAN,
133 West 28th St.,
New York City.

Now is the time to stock up on baled spruce and fir boughs—for shrub protection, border covering and lots of other useful purposes to which these can be put. Harry J. Smith, who advertises this material in the columns of this paper, is the man to supply you. He is a large operator and can ship by ton or car-load as well as by single bale.

We are headquarters for Sweet Peas of every description. Our catalogue of 32 pages of Seeds and Bulbs can send. Write for it today. A postcard will fetch it.

ARTHUR T. BODDINGTON, Seedsman, 342 W. 14th STREET, NEW YORK CITY

Seed Trade

A Seedsman Inventor.

By means of a device patented by Mr. John Bolgiano of J. Bolgiano & Sons, and which can be attached to any furnace, the inventor claims that not only will the smoke be destroyed but a large percentage of the fuel will be saved.

Mr. Bolgiano said that with the aid of his device one pound of coal will evaporate 11 5-7 pounds of water, while an ordinary furnace will only evaporate 8 5-7 pounds of water with the same amount of coal. With this patent he says a furnace will require less attention and about one-tenth of the time will have to be given to it in raking and shaking the fires.

Another "Pure Seed" Bill Introduced.

Curtis Nye Smith, legal representative for the American Seed Trade Association, calls the attention of our readers to the fact that Congressman Mann, on December 5th, filed another bill H. R. 14483, entitled "To regulate Foreign Commerce by prohibiting the admission into the United States of certain adulterated seeds and seeds unfit for seeding purposes," copies of which may be secured from the Clerk of the House of Representatives, U. S., Washington, D. C.

NOTES.

Roswell, N. M.—The Farmers' Supply Co., a new seed store, has been incorporated with a capital stock of \$10,000. E. W. Mitchell and R. P. Bean will have charge.

Grand Rapids, Mich.—Laverne F. Jones, formerly proprietor of the L. F. Jones Seed Co., was adjudged bankrupt on his own petition on Dec. 2. Liabilities, \$11,000; no assets.

Santa Clara, Calif.—The Morse Seed Co. has just completed the work of installing twenty-four additional seed-sorting machines and a ten horsepower motor at their quarters in the Cured Fruit Warehouse.

CATALOGUES RECEIVED.

Geo. R. Pedrick & Son, Pedrickton, N. J.—Surplus vegetable seed price list, crop of 1911.

H. V. Lawrence, Falmouth, Mass.—"Christmas Greens." An attractive retail announcement.

F. C. Heinemann, Erfurt, Germany.—Special Trade Offer, Novelties, 1912. A finely illustrated catalogue of flower and vegetable seed novelties.

M. Herb, Naples, Italy.—General Catalogue of Vegetable and Flower Seeds, for 1911-1912. Printed in three languages; a large and useful list.

L. Merton Gage, Orange, Mass.—Catalogue of Choice Gladiolus Bulbs from the "Gladiolus Gardens." A list which every grower should have.

Watkins & Simpson, London, Eng.—Special Offer of Flower Seeds, Season of 1912. Also Recent Novelties and Specialties in Vegetable and Flower

Seeds, 1912. Both lists are finely illustrated.

A. Schultheis, College Point, N. Y.—Wholesale Price List of Foliage, Flowering and Ornamental Decorative Plants for Fall 1911 and Spring 1912. Full of good sellers for Christmas and Easter.

Peter Lambert, Trier, Germany.—Rose Catalogue, Season 1911-1912. As usual, a very extensive list; illustrated and with a portrait in natural colors, of Grossherzog Friedrich (Caroline Testout × Meta) on the cover.

Joel Shomaker, Olympic Nature Nursery, Nelita, Washington.—This is not a large list but a good one of small fruits, shrubs, ferns and herbaceous plants. Mr. Shomaker is a new operator and hopes to develop from small beginnings to a large and prosperous concern.

A. T. Boddington, New York City—Boddington's Garden Guide, Spring, 1912. We always look with interest for the arrival of this annual visitor for the title page is sure to present some unique and artistic conception by Mr. Bunyard. In the present instance sweet peas in lavender, gold and green are the subject of design and, treated in semi-conventional manner, they form a pretty picture. The contents of the book are strictly up-to-date, as might be expected from this well-known and enterprising house. We note among the hardy plant novelties offered several of the new Wilson collections, including the splendid Clematis montana rubens. Many of the illustrations in this catalogue are very beautiful.

INCORPORATED.

Greenwich, Conn.—The Interstate Tree Co., for "the sale, culture, spraying and general care of all kinds of trees and shrubbery"; capital stock \$10,000.

Mitchell, S. D.—"The Newburys," to do a nursery business; capital stock, \$100,000. Incorporators, Chas. E., Edwin C., Elizabeth A. and Jessie E. Newbury and Frank J. Herrick.

Buffalo, N. Y.—The Rachael M. Rebstock Co., to do a business cultivating and dealing in plants, shrubs, trees, etc., capital stock, \$10,000. Incorporators, E. Chretien, F. C. Chretien and James V. Walsh, all of Buffalo.

SPECIAL TO THE TRADE

We make a specialty of growing all kinds of Vegetable Plants for the Seed and Plant Trade, including the best varieties of Foreign Tomatoes, Asparagus, Cauliflower, Egg Plants, Peppers, Parsley, Lettuce, Cabbage, etc. Special prices made on large orders for Spring delivery. Let us know your wants. We have a fine lot of Tomato Plants, transplanted and potted: Comet, Lorillard, Bonney Best, Suttons' A-1, Suttons' Abundant and Winter Beauty, also Extra Early Erfurt and Snowball Cauliflower. **FOX-HALL FARM, R. F. D. No. 2, Norfolk, Va.**

FRENCH VEGETABLE SEEDS

Lettuce, Imported Big Boston; Foreign Lettuce, Black seeded; Radish, Scarlet Globe, White Tipped Scarlet Turnip; Beet, Chisel; Cabbage, Early Flat and Savoy; Celery, Self Blanching and Green; Beet, Spanish Indigo, etc., the same varieties as the market gardeners of Paris use.

CHICAGO NOTES.

Holiday Decorative Stock.

Whatever the bulk of the holly may prove itself to be, the advance boxes are good stock, with plump scarlet berries thickly strewn over it, and the best boxes are bringing five dollars. Somehow the earliest shipments always make a name extremely hard for later arrivals to live up to, but as usual the florist is hopeful. Ilex berries have given unmistakable evidence of their nearness to perfection. Full round berries and quantities of them from the Michigan woods are now decorating the florists' windows and being made into wreaths, usually one-half of the wreath being of some other material. Two dollars per box is asked for the ilex. The market on bouquet wreathing is a little uncertain. The earliest shipments brought eight and ten cents per pound, but now the price has dropped to six cents, and a certain enthusiasm of former years is lacking. Evergreen wreathing is selling about as last year. Christmas trees, great and small, are here in quantity, with large shipments of spruce and pine from Maine tending to keep prices down. The little table trees are selling well, judging from the number seen in the shoppers' arms. The department stores have made them leaders, and cut heavily into the florists' local sales. The popularity of the little tree is now assured. The wholesale houses handling thousands during the month of December. The scarlet and green roping, which took so well last year, promises to do the same this year, the scarlet especially. Christmas bells reached the street corner stands in such quantities in past years that only the better qualities can be said to be popular now, while the stars are decidedly on the wane. There is nothing altogether new offered for the Christmas of 1911.

All the retail florist stores have on their holiday dress and they never looked more tastefully attired than at this time. Nothing surprisingly new is noted in materials, but there is more simplicity and elegance in the arrangement in many instances.

Personal.

Philip Eichling is back for the holidays filling his old place with Harry West.

Mrs. Fred Strail is with the extra force needed at J. Mangel's for the holiday trade.

Jos. Curran, well known to the trade for a quarter of a century, has been a month in Mexico, where the milder climate is expected to be of benefit to him. He has been in very poor health for the past year.

Visitors: John H. Bockmann, of A. T. Boddington, New York; J. A. Evans, Richmond, Ind.; Miss Agnes Rigden, Ottawa, Ill.; P. N. Obertin, Kenosha, Wis.; Edw. Amerpohl, Janesville, Wis.; A. L. Glaser, Dubuque, Ia.; A. Currie, Milwaukee, Wis.; J. Meiklejohn, N. Y.

PERSONAL.

Mrs. J. Austin Shaw of Brooklyn, N. Y., is planning to spend the winter in Bermuda.

Charles Wackling has taken charge of the greenhouses of the Kemble Floral Co., Oskaloosa, Ia.

Henri Beaulien of Woodhaven, N. Y., has arrived home from his business trip to France, well satisfied with the results of same.

Harley M. Wallbridge has accepted the position of assistant manager in the wholesale store of J. M. Gasser & Co., Cleveland, O.

Miss Mae Carroll, who was in charge of the books at D. Rusconi's, Cincinnati, and also represented him on the road, is no longer with him.

Joseph Fahey, of Thomas F. Galvin's, florist, Boston, Mass., is convalescing from a recent sickness and will be back in the store next week.

Fred Jenkins, head gardener for Mrs. Cornelius Vanderbilt at "The Breakers," Newport, R. I., has resigned his position, and his action is much regretted by the many friends he has made during his short stay in Newport.

H. V. F. de Thestrup has resigned his position as foreman and grower for Frank P. Putnam, North Tewksbury, Mass. Mr. De Thestrup has made an enviable record as a carnation and anthurium grower for the Boston market and is now open for engagement elsewhere.

Philadelphia visitors: D. Cameron

Sander & Sons, St. Albans, England; E. A. Seidewitz, Baltimore, Md.

Visitors in New York—Wm. Sim, Cliftondale, Mass.; Thomas Roland, Nahant, Mass.; P. Welch, Boston; George C. Watson, Philadelphia.

Visiting St. Louis—Guy Reaburn, representing A. Henderson Co., Chicago, highly elated with the success which this new firm has attained and the excellent prospects for the coming year.

Cincinnati visitors: Frank Roany, Philadelphia; J. A. Keller, Lexington, Ky.; J. Q. Mulford, Lebanon, Ohio; P. M. Halbrooks, Columbus, Ohio; L. P. Lord, Minneapolis, Minn.; G. Reiniger, Dayton, Ohio.

Visitors in Boston—J. R. Fotheringham, representing F. R. Pierson Co., Tarrytown, N. Y.; H. A. Bunyard, representing A. T. Boddington, New York city; Ed. Roehrs, Rutherford, N. J.; J. J. Karins, representing H. A. Dreer, Phila.; Harry Holmes, Harrisburg, Pa.; N. B. Keeney, LeRoy, N. Y.; Charles Loechner, New York.

Flower Market Reports

BOSTON

The continued unseasonable hot weather has had an unforeseen and disastrous effect on business and on much of the stock being received. Roses especially are coming in soft and lacking the stamina which made them so sturdy looking a few days ago. What the effect will be on the Christmas product is not yet apparent, but there is certainly some food for anxiety. The grower who is wise—realizing the situation will, for the time being, cut his roses in a more immature state so that their keeping qualities may be preserved. Carnations are not overplentiful and are hardly up to standard set in previous years at this date, a condition which may be due more or less to the weather conditions. Lily of the valley is in good quality and full supply, but market value is low, quality considered, and the same is true of sweet peas, which are selling for less than they are intrinsically worth. Longiflorum lilies are all right and with paper white narcissi are enjoying a normal call. Violets fluctuate from day to day in quantity and in demand and are a cause of constant perplexity to the wholesale dealer. Chrysanthemums are not quite finished, but the remnants in sight are of little value. Orchids and gardenias in moderate supply and moderate demand. A few poinsettias are in.

The sale of green material is already far in excess of the previous record for so early and the advance orders booked for holly, boxwood and laurel indicate an unprecedented demand for all such stock.

BUFFALO

It looked as if Indian summer had come upon us the past week as throughout the week the mercury registered no lower than 40 degrees. Bright, sunshiny days did not bring on stock any faster than could be consumed, as chrysanthemums were practically over and the demand concentrating on other lines. Up to Friday there was a scarcity of medium roses and carnations and prices had advanced a notch, though there was sufficient other stock such as narcissus, lily of the valley, violets, Roman hyacinths, stevia, etc. Beauties are improving in quality in the long grades, but the short are poor, with only a slight demand. Richmonds are fine, also Killarneys and Bonsilene sells well. Violets have light demand. On Friday and Saturday there was enough of everything to supply all. The florists are in condition for a good holiday hustle and the outlook is promising for a busy ending of the month.

CHICAGO

The week following Thanksgiving was an unsatisfactory one. Warm, damp weather prevailed and only a few hours of sunshine have been noted for ten days. Stock, as feeling the result and unless colder and clearer weather comes soon to relieve the strain, stock will not be at its best for the holidays. Carnations are particularly needing the sun and prices have been low all the week. Roses are a little less in demand than last month for there in general has not been up to the average. Counters are looking bare since the great bulk of chrysanthemums are gone. Some very fair specimens are

seen here and there, the most of the stock, however, being short and weak stemmed. A few Chadwick are expected to hold on till Christmas. Some fine mignonette with 24-inch stems is seen. Violets are of good quality considering the mild weather, and sell out fairly well. Paper whites are everywhere and many bunches are finding their way to the barrel. Killarney is queen of the roses now and will play a big part in the Christmas trade. Beauties are keeping their growers hoping and praying for sunshine.

CINCINNATI

Last week closed badly enough. The start of this week followed in the footsteps of the close of the preceding one. The volume of business transacted was large, but not nearly enough to take up all the stock. A week and a half of spring-like weather pushed out roses and carnations in particular. From Sunday of this week until the middle the rain man held sway and tortured the long-suffering mortals with a continuous rain. It did not, however, deter the shoppers. It is a trifle early as yet for them to place their Christmas orders with the florists, but they will be dropping in before long. In roses, Killarney are coming into crop splendidly and will be at their best just before the 25th of the month. The supply of other roses, too, is good. The growers of poinsettias in this vicinity expect to be able to buy heavy lots of choice stock any time from now on, as they are needed. Carnations are in heavy supply owing to the warm weather. The quantity in this line is in-

ROSES FOR CHRISTMAS

BEAUTIES

Killarney

Richmond

Maryland

The supply of the above-mentioned Roses will be very large with us and on account of this we can quote you very attractive prices for the Holidays; and we know in nothing else can we offer you the same value. The quality of this stock is fine and we can assure you no better roses are coming to this market. Our stock consists mostly of the medium and better grades and Specials in Beauties; short and medium Beauties are not plentiful.

Flower Market Reports

(Continued from page 875)

creasing nicely. The cut of bulbous stock is assuming large proportions and they will be quite a factor as the market tightens and relieves the present over supply. Lilies, callas, orchids, lily of the valley and stevia are having a fair call. The same is true of New York double and single violets. Taken as a whole, the market is having its usual early December slowness. The very great bulk of the demand is for flowers for funeral purposes. Everything is bound to get to rushing as the holidays approach. The market for greens, boxwood and Christmas decorative material is brisk.

Everybody is hustling for immediate orders, which are quite frequent nowadays, as also to be fully stocked up for the coming holidays. Plant growers are booking orders daily either for local deliveries or shipment and wholesale houses are well stocked up with the best in ferns, wild smilax, boxwood, laurel-roping, natural and red statice, etc. Local enterprise therefore has, so to say, brought everything to the retailer's store and there is nothing to prevent an easy exchange of product for the mutual benefit of all concerned.

The extreme warm weather for this season of the year which has prevailed during the past week has caused a lull in the market. Prices remain fair, with a plentiful supply, and a slow demand. Chrysanthemums are practically extinct. There are few late blooms that the growers have held for the holiday trade. The price is quoted at \$6 per dozen.

The trade is anxious to see a cool spell to stimulate the demand.

The market last week was in very good condition and all four wholesalers had plenty of everything that is seasonable and at prices that the trade thought a little high considering that the business during the week had been a little off color as to social work. All are busy with preparations for Christmas and their show houses are filled up with some extra fine blooming plants. The market offers some extra good stock in roses, violets, carnations, Roman hyacinths, paper whites, lilies and a few chrysanthemums of the Mrs. Jerome Jones, Chadwick and Nonin varieties, but chrysanthemums have seen their best days for this season. Outlook for a good Christmas is the report from nearly all our retailers.

Washington during the past week experienced weather conditions equal almost to that of summer. There has been a large demand for flowers for various purposes, which has kept things moving well. The season of entertainments is now at hand and the social whirl will soon be in full swing and society will, as usual, utilize large quantities of cut flowers. The storekeepers are now using quite a quantity of plants and flowers to set off to advantage the goods in their display windows. It is believed that the holiday trade this season, this year, will prove even more successful and profitable than that of 1910, and,

Flower Market Reports

(Continued from page 877)

are not so plentiful. Hudson River violets are coming in; American Beauty roses are in fine shape and there are some choice home-grown orchids.

The past week has been a disappointment to growers and to their wholesale market representatives who had reason to believe that things had started on the upward drive towards the holiday standard. The weather clerk undoubtedly has to assume much of the responsibility but

who knows what this same official may send us between now and Christmas? All there is to be done is to "live in hope." The plain fact is that the market conditions are unprecedentedly stagnant for the season and another bad feature is the enervating effect on the flower product which gives rise to much solicitude as to the outcome. All there is to be done is to wait in patience and soliloquize on the unusual conditions which, however, must be endured while they last. Receipts on all lines are heavy and distribution very slow. Chrysanthemums are still plentiful and interfere more or less with other stock. Holly and princess pine are in very poor condition—worst ever in fact, in this market. The wreath business is booming.

As Christmas week approaches growers are anxiously scanning the horizon for signs and portents of a good advance in cut flower prices. So far as can be judged at this writing the prospects are not hopeful for any such proposition. The weather for the past few weeks has been mild and clear, with the result that all crops are in excep-

tionally good condition—bearing freely, healthy and vigorous—with promise of these conditions right through the holidays. The wise heads among the commission men think best results can be got by keeping figures within moderate bounds and getting rid of the goods. Last week was a good week and nobody has any great fault to find with it, although it was not quite so "gingery" as the one previous. For one thing receipts of stock were larger all along the line and in face of this, prices weakened a little; but there was a big volume of business and everybody is pretty well satisfied. There are plenty of American Beauty roses, but no over-supply. The quality is excellent and they are certainly one glorious flower as seen on the market at present and reflect great credit on the growers. Rich end is coming in more freely. Fine stuff, well grown and up to standard in all respects. Killarney and Maryland have also improved and show up much better as to color and

finish. The carnation market is in good shape; both production and quality improved, with a firmer trend in prices. Beacon, Ward, Gloriosa, the three Enchantresses, and White Perfection are especially fine. Plenty of fine orchids and good sale. Dendrobium formosum, cattleyas, Oncidium speciosum, cyripediums, spray orchids, make up a fine selection for the season. No up-to-date flower store is complete without this leader and gardenias, which are also good now and in liberal supply. Violets, Lily of the Valley, Roman hyacinths, paper whites, sweet peas, mignonette and lilies are plentiful and excellent.

Cyclamen—Best Varieties in different colors, 3 inch pots, strong plants, \$10.00 per 100, \$80.00 per 1000. Julius Roehrs Company, Rutherford, N. J.

Giant cyclamen, our own grown strain, selected from the very best and well built plants and flowers. Seed, \$1.00 per 100, \$6.00 per 1000; nearly all sold out. August seedlings, \$2.00 per 100; \$18.00 per 1000. Plants, well set with buds, 4-in., \$18.00 and \$25.00 per 100. Orders amounting to \$25.00, 10 per cent. off. Here is one of the many letters we received from satisfied customers: E. A. Butler & Son, Niagara Falls, N. Y., say, "The plants are excellent, the finest we have ever had and, if the seed this year is of the same quality, we will be perfectly satisfied." Our aim has been to and we have improved our strain every season. Cultural directions with every order. C. Winterlich, Cyclamen Specialist, Defiance, O.

NEWS NOTES.

Dalton, Mass.—J. R. Shield, for the last sixteen years superintendent for Mr. F. G. Cram, has resigned his position and will enter the commercial line, having bought a greenhouse establishment in Woburn, Mass., where he will take possession, February 1st, 1912.

Fall River, Mass.—The Watuppa water board has decided not to build a greenhouse as it was found that the lowest bid for its construction was higher than was looked for. The board has decided to see if the plants cannot be stored in the park commission greenhouse.

Victoria, B. C.—Brown Bros., of Vancouver, have purchased the store and greenhouses of the Fairview Esquimalt Greenhouses. A new location for the store has been secured and the present store will only be continued till the new location is ready. Mr. Bornhoft is the new manager.

Providence, R. I.—William Patry has purchased the retail store of O. S. Hughes, which the latter opened about six weeks ago.

Leo Engal has opened a new retail store known as The Rosery at 305 Weybosset street. Mr. Engal also conducts the flower department of one of the large department stores here.

Boston, Mass.—The Flower Growers' Sales Co., Inc., have opened an office at 1a Park street with W. H. Welchans as business manager. They have a good basement under the new store and a line of plants will be carried which could not be done in the old location. A large refrigerator is being built at the back of the store. The stalls in the flower market will be retained for a time at least.

Among the prizes awarded at the Maryland Week Exposition at Baltimore last week were the following:

Mrs. Henry Jacobs, 15 first and two second prizes for orchids, roses, chrysanthemums, carnations and foliage plants.

John Cook, two silver cups valued at \$25 each, the gift to the exposition of Mrs. Jacobs. One went for the best decorated table and the other for the best offering of foliage plants.

James A. Gary, first prize for poinsettia, and another for display of chrysanthemums. I. H. Moss, of Govanstown, blue ribbon for window boxes and evergreens.

First prize for carnations to Charles Siegwart, of Carroll, Baltimore County. He also received a certificate of merit for a seedling carnation.

Prizes were awarded John McCormick also, for carnations.

Destroys green, black, white fly, thrips, red spider, mealy bug, scale and all plant sucking insects. An excellent cleanser for decorative stock.

\$2.50 per gallon, \$1.00 per quart.
U. S. AND CANADA.

FUNGINE

Has no equal for destroying mildew, rust and other plant fungi.

Fungine will cure bench rot and is proving an excellent remedy for the protection of cuttings and young stock against the various blights.

\$2.00 per gallon, 75c. per quart.
U. S. AND CANADA.

For sale by seedsmen.

NEW YORK STATE COLLEGE OF AGRICULTURE—BULLETIN NO. 306.

This is the fourth bulletin in the peony series, being the result of the joint studies of the Department of Horticulture and the American Peony Society. This bulletin has been supervised by Professor John Craig and prepared by Professor L. D. Batchelor, assisted by Messrs. B. H. Farr and Joseph Dauphin, peony specialists, representing the Peony Society. The bulletin contains a classification of the peonies in the Cornell plots and a careful description of all varieties thus far identified. A list of corrected names and descriptions of varieties previously described is included. The publication reports the results of the tests of the very large co-operative collection of peonies growing on the Cornell grounds.

The collection originally was supposed to contain 1933 varieties but the work, which is rapidly approaching completion after seven years' study, gives indication that there are less than 500 distinct varieties. These have been described in the four reports and the list of synonyms has been prepared with great care. Studies were also made on the grounds of several peony specialists and the descriptions of a few additional varieties thus obtained are included in the bulletin. Practically every variety of the peony has been fully described but for the information of intending planters lists are given of the best varieties for cut-flowers and for landscape effect.

A WORD TO ADVERTISERS AND OTHERS.

Mail deliveries of third-class matter are already noticeably delayed by the holiday blockade. Parties mailing electros or photographs for use in our advertising or reading columns should bear this in mind and send a day or two earlier than usual or, still better, use letter postage up to a reasonable amount and, where time is close, add "special delivery" stamps, until the Christmas rush is over.

Cincinnati, O.—A store for the sale of Christmas greens has been opened by Wm. Murphy at 114 E. 3rd avenue. Ray Murphy is in charge.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Ham-liton Place, Boston.

SITUATIONS WANTED

SITUATION WANTED in Massachusetts by an all around florist of over 25 years experience. Rose growing a specialty. Capable to take full charge. Now in charge of large rose growing establishment. Reasonable wages and permanent position desired. Married; no children. Address N. H., care HORTICULTURE.

FOREMAN wants position. Specialist in carnation and general line of cut-flowers. Would accept position growing pot-plants, Christmas, Easter and bedding stuff. Twenty-two years of experience. Good salary required. Best references. Personal interview desired. "T." care HORTICULTURE.

FOR SALE

FOR SALE—Summer Street Conservato-ries. Two practically new, wooden-frame greenhouses, one filled with first-class stock of pinks, the other with "boarding" ferns and palms. Also (to be included in sale) large 14-room single house, in first-class locality, suitable for boarders or roomers. Barn room for three horses, carriages, etc. This property situated on Summer street, Watertown, Mass., five minutes from steam and electric cars. For further particulars apply to John T. Howell, 139 Summer St., Watertown, Mass. Phone N N 854-M.

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 215-217 Havemeyer St., Brooklyn, N. Y.

PUBLICATIONS RECEIVED.

The Pittsburgh Cut Flower Co. have sent out a beautiful little book under the title of Boxwood Sprays. In its handsomely illustrated pages the history, ancient and present uses, etc., of this classic decorative material, are told in an interesting manner. The cover is in green and berry-red.

CAMBRIDGE, MASS.

NEWS NOTES.

Greenville, Ill.—The business of Emile Corboz has been purchased by D. H. Zbinden.

Milford, Mass.—The Morningside Greenhouses, W. D. Howard, proprietor, were slightly damaged by a blast fired by contractors on December 8.

Lebanon, N. H.—The Haskell Floral Co. has replaced two of their small greenhouses with one iron-frame house 30 x 130 which will be devoted to carnations exclusively.

Denair, Cal.—The Schafer-Hogin Orchard and Nursery Co. has been purchased by D. R. & C. S. Schafer, it is reported. The business will be continued with sales yards at Denair and Turlock.

Putnam, Conn.—C. S. Adem is now proprietor of the greenhouses of E. M. Arnold and they are now known as the East Side Greenhouses. Richard Hermanson, formerly of Providence, R. I., is in charge.

West Chester, Pa.—It is reported that the Maple Avenue Nurseries will abandon the "Forty Acres" north of this place. A large farm near Fern Hill has recently been acquired and the work at "Forty Acres" will be transferred to it. This, with another tract near the Hannum farm, will give them several hundred acres in one stretch.

Falmouth, Mass.—The Falmouth Mushroom Cellars Co., Inc., a new \$60,000 Massachusetts corporation, is to build eight houses each 150 feet long for mushroom and vegetable growing. A refrigerating plant and canning machinery will be installed. Two houses each 96 x 150 will be devoted to vegetables. The president and general manager is Louis C. Whiting, treasurer, Dexter V. Wiswell of Boston; directors, L. C. Whiting, D. V. Wiswell, John E. Dwight, Dr. George T. Moore and F. L. Milligan of Boston. Dr. George T. Moore, formerly of the Missouri Botanical Garden, will be manager and Mr. Swanson, for many years with the Jackson mushroom plant in Chicago, will be foreman. The plans for the establishment were drawn by Wheelwright, Haven & Hoyt, of Boston; the refrigerating plant will be installed by the Madison-Cropper Co. of New York and the heating system by Kroeschell Bros. Co., of Chicago.

HENRY A. DREER, Seeds, Plants, Bulbs and Supplies, 714 Chestnut Street, Philadelphia, Pa.

GREENHOUSES BUILDING OR CONTEMPLATED.

Woburn, Mass.—Adam Foster, one house.

Erie, Ill.—Clarence Peckham, one house.

Lebanon, N. H.—The Haskell Floral Co., house, 30 x 130.

Newburyport, Mass.—C. J. McGregor, Chapel street, one house.

Concord, Mass.—Harry W. Brigham, Nine Acre corner, one house.

Washington, D. C.—Gude Bros., Bladensburg road, house, 50 x 350.

Nashua, N. H.—Mrs. Ella Churchill & Son, 30 McKean street, house 20 x 100

Lexington, Mass.—Lexington Nursery (N. F. Comley & Co., proprietors), Bedford street, house, 40 x 350.

Minneapolis, Minn.—J. Duncan, Thirty-Sixth street and Grand avenue, range of houses, store building and power house, to cost about \$20,000.

FIRE RECORD.

Keene, N. H.—Fire damaged the greenhouses of A. O. Amidon, West street, on Dec. 2.

Lowell, Mass.—Fire damaged the flower store of R. A. Griffiths, 133 Central street, on Nov. 23. Loss small.

L'Argent, La.—The gin and seed house of E. C. Rhodes were destroyed by fire on Nov. 30, loss \$5,000, no insurance.

Riverside, Conn.—A greenhouse, gardener's cottage and barn on the estate of Jacob Langcloth, was destroyed by fire on Dec. 5; loss, \$20,000.

Tacoma, Wash.—The office of the Northwestern Floral Co. was visited by fire recently, causing a damage of about \$1,000 to stock and building.

Enid, Okla.—Fire caused a loss of about \$1500 at the greenhouse of Joshua R. Detwiler, 1116 W. Maple street, on Nov. 30. The boiler house and some of the greenhouse plant was destroyed. Oil stoves and tarpaulins saved much of the stock and business was not interrupted.

Haverhill, Mass.—Charles H. Kaulback, florist, sustained a loss of more than \$1000 by fire on Dec. 11. Large greenhouses, his house, barn and heating plant were all destroyed. The loss on house and barn, which were not insured, is about \$8,000, and on heating plant and greenhouses over \$2,000 more.

MASTICA

FOR
Greenhouse Glazing

USE IT NOW.

F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of ex-
pansion and contraction. Putty becomes hard
and brittle. Broken glass more easily removed
without breaking of other glass as occurs with
hard putty. Lasts longer than putty. Easy to
apply.

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When *Harrisii* is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown *Longiflorum*, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of *Harrisii* in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 335 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis <i>Bostoniensis</i> and <i>Pierstoni</i> , 6-in. pots.....	\$0.50 each
Nephrolepis <i>Elegantissima</i> , <i>Pierstoni</i> , <i>Bostoniensis</i> , and <i>Harrisii</i> , heavy 8-in. plants.....	\$1.00 to 1.50 each
Nephrolepis <i>Elegantissima</i> , <i>Bostoniensis</i> , and <i>Harrisii</i> , heavy 10-in. plants.....	2.50 each

Oriental Poppies

If asked which is the showiest and, above all, the most intense-colored hardy perennial for near and distant effect, I believe I would unhesitatingly say, the Oriental Poppy. There is nothing brighter than the vivid orange-red of a mass of huge flowers of *Papaver orientale* standing out boldly against the green leafage of shrubs or trees, with a swaying surface of lawn as foreground. Seeing the same large flowers on a herbaceous border and beholding the silky-lustered petals surrounding the almost black center at close range, the whole, in character, is bound to impress us as a veritable revelation of beauty, irresistible even to the dullest eye. Certainly, we have seen this beauty since the earliest days of our vocation, and yet, it exerts its charm anew every ensuing season. As a true representation of that marvelous, but fleeting beauty of the Orient—the land of the wonders of Arabian Nights, of gay colors in apparel and flowery language, we love and cherish *Papaver orientale*. The sudden bursting forth of glory and its quick vanishing away is the inside feature which, perhaps imperceptibly, intensifies our admiration.

We have been freely planting Oriental Poppies and we shall more so continue in the future as soon as we keep abreast of the times and do not any longer overlook the fact that during recent years a number of new garden hybrids of merit have come to the front. Most conspicuous among those introductions are the salmon pink shades, represented by these varieties: Princess Victoria Luise, Salmon Queen, Silberblick, Queen Alexandra, Lady Roscoe and Mary Studholme. Of the scarlets Goliath is the most robust growing one, with immense flowers on extraordinary long, erect and stiff stems. Other large flowering varieties of similar shade are: Duke of Teck, Rembrandt and Royal Scarlet. Mahogany bears dark crimson maroon flowers, while Prince of Orange and Brightness appear in shining orange red.

The general attitude of American society toward these novelties has been most favorable. Especially the delicate salmon pink shades have met with keen interest and unreserved approval. They are, indeed, acqui-

ORIENTAL POPPIES

Papaver orientale, Princess Victoria Luise

sitions of value. Landscape gardeners and garden architects, when making their plans for new herbaceous plantations cannot afford to omit the new garden hybrids of Oriental Poppies.

Flowers of poppies need careful handling, when used for indoor decoration. They should be cut early in the morning, while just beginning to burst open. If kept out of draught, they will fully develop in water and stand up for at least two days.

In the garden the foliage is to be removed from the plants, as soon as it commences to dry off. New leaves appear then again during August and September to stay until the frost comes.

Seasonable Notes on Culture of Florists' Stock

ACALYPHAS

These plants are very ornamental and can be used for mixed borders or subtropical bedding and they also can be grown into excellent pot specimens suitable for using in a good many ways. Where you have some old plants they can be cut back to good wood, some of the old soil shaken out, and then repotted into fresh soil. Place them in a temperature of 65 to 70 degrees and keep well syringed, with a moist atmosphere, and in a few weeks they will be covered with young growth which will be just the thing for a batch of cuttings. These can be placed in a strong bottom heat in sand and kept quite close with some shade and they will soon root. When they have rooted move them into 3-inch pots, give them some good loam, leaf mold and well-rotted manure as a

compost and keep them in the same temperature until they have become well established, when they can be grown in from 60 to 65 degrees at night and these will make by spring very serviceable stock for either decorative or bedding use.

CYMBIDIUMS

It is always better with these orchids to do any repotting or top-dressing just when they show signs of making new growth. When potting it is well to do it in such manner that they may go without any more potting for two or three years or longer, as they grow into finer specimens and flower more freely when the roots are not disturbed so often. They succeed in a compost, one-half of fibrous loam, in which all the finer particles have been screened out and the other half

equal proportions of leaf mold, peat and chopped live sphagnum, intermixed with some coarse sand and lumpy charcoal. The pots should be about one-third full of potsherds and charcoal to give good drainage. Work the material firmly around the fleshy roots, leaving the base of the plant just even with the top of the pot. Until they begin to make new roots water very sparingly, but when they become established give due attention to watering as they will want a more liberal supply. Give them a temperature of about 52 to 55 degrees at night and with sun heat let it run up to about 70 degrees. Such varieties as *Cymbidium eburneum*, *C. Lowianum*, *C. giganteum* and *C. Lowii eburneum*, are all beautiful orchids of lasting qualities.

CYPRIPEDIUMS

As these orchids go out of flower they should be overhauled and divided where they are getting too large. Pot culture is preferable with most species. When re-potting be sure to use clean pots to prevent any attack of fungus and half fill the pots with clean crocks and some lumps of charcoal intermixed so the drainage will be effective. A thin layer of sphagnum should be laid over the crocks and charcoal. The plant can then be placed in position and the compost pressed in through the roots rather firmly, finishing the surface off in a convex shape. A good general compost to use is two parts of fibrous peat, one part of chopped live sphagnum, and for species such as *Cypripedium insigne* one-third of fibrous sod chopped up added to the above will grow them good. They should have from this out a well ventilated and bright house. Of course air will have to be admitted in less or greater quantities according to the outside conditions of the weather. When the temperature on bright mornings has reached 65 degrees they should have a little air put on, gradually increasing until the maximum of 72 is reached and reduce the air the same way. With dull days, about 68 degrees should be maintained, with 10 degrees less at night until the approach of spring. Give them enough water at the roots to keep the compost moist, but allow them to dry out occasionally so as to keep the compost sweet. Syringe overhead on good days.

CULTURE OF PALMS DURING WINTER

To ensure a free, healthy growth later on when the season arrives for renewed activity in root action, all the family of palms should now have a short season of rest. This can be brought about by lowering the temperature in the different departments, ventilation and less moisture in the atmosphere and at the roots. All palms of a tropical nature can be reduced to about 60 degrees at night, while the cooler growing kinds can have as low a temperature as 50 degrees, with advance of 10 degrees with sunshine. Ventilation should be given with intelligence so as not to cause draughts or sudden falling or rising of the temperature. A dryer atmosphere is an indispensable factor to produce the required conditions for resting palms, but sufficient water should be used on walks under benches for the prevention of a harsh, dry air. Plenty of light is of great importance, especially

through the winter season, but care will have to be taken that they have enough of shade when the sun's rays become more powerful, to prevent the scorching. Give water only when necessary, so as to keep the soil in the pots from getting saturated. It is well to go over and give all palms a good cleaning and sponging about once a month. This will keep down insect life.

DRACAENAS

From now on there is no better time to increase your stock of the many fine dracaenas. The most expeditious way of propagating these plants is from the ripened stems. If you have any old plants that have attained a considerable height and have lost a good many of their lower leaves, these can be utilized for propagation; also imported stems can be procured for this purpose. The stems can be cut up into pieces, with two eyes to each piece, and placed in a warm propagating frame where there is a bottom heat of 80 or 85 degrees. They root well in a mixture of coarse sand and chopped sphagnum in equal parts. Just cover the pieces and keep the atmosphere in a humid state and most of the pieces will start and push up young shoots. When these have made a growth of two or three inches they can be cut from the old stem and placed in a warm propagating bed where they will soon root. When they have made some nice roots they should be potted into 3-inch pots, using a mixture of turfy loam three parts, leaf mold one part, and a liberal sprinkling of sharp sand. Keep close and shaded for about ten days so they become well established, when they can be placed in a house of 60 to 65 degrees at night which will push them along.

GETTING READY FOR GRAFTING ROSES

Manetti stock is arriving now and should have care. Lose no time in having it unpacked, and while doing this pick the bunches that have the buds swelled so they can be potted right away; the others can be heeled in a cool shed or cellar that is frost proof, placing loam between the alternating layers. They can stay here until wanted for potting. It is a good plan to pot up as many as possible on arrival. Be sure to have them potted good and firm, they can then be given a house where the temperature stands from 40 to 45 degrees at night and give them a good soaking of water, with a syringing on all bright mornings. When they have made some roots they can be given a temperature of from 50 to 55 to hurry them into right shape for grafting.

THE FORCING OF TULIPS

Tulips that were boxed up early and have their flats well filled with roots can now be placed in a house where they will have a temperature of about 50 degrees at night. As growth advances they can be given anywhere from 60 to 75 degrees at night, but you will get your best flowers with about 60 degrees. Where you want quick development, the higher temperature will have to be given. Provide some shade with some light material such as cheese cloth, in order to produce a good stem. Keep plenty of water at the roots, with lots of moisture in the atmosphere, and you will have ideal conditions.

Fruits and Vegetables Under Glass

LATE GRAPES

Now is the time we value good grapes. Right at Christmas time we appreciate them as much as on a hot summer evening. With suitable varieties planted and proper treatment it is an easy matter to have good plump berries in into the New Year. Knowing the right sort to plant for this purpose is half the battle, as most late grapes can be grown as mid-season to early varieties but to put the shoe on the other foot means a short fit. The best known and consequently most grown late grape is Black Alicante—easily distinguished by the heavy shoulders carried by most bunches. This variety will hang longer than any other and seldom does a berry go wrong in it. Like most late grapes it has extra thick skin which is rather unpalatable, but is the secret of its keeping powers. A vigorous grower, of lasting constitution, sets very freely and stands the hot summer sun without a scald or burn. Undoubtedly the latest and best keeping late grape grown.

Lady Downs Seedling is often coupled with the foregoing, a variety of more recent introduction, carrying a smaller bunch of slightly better flavored berries. At certain stages of its growth it is liable to burn and scald, consequently is not so reliable. Gros Colman is a well-known late grape, its large foliage and magnificent berries at once attracting attention. This grape takes a long time to ripen and will soon show signs of over cropping or poor treatment. The fruit must be thoroughly ripe before using. It is second-rate in flavor at all times, but best just before the berries would shrivel. Often assumes a reddish tint which does not make it look so inviting as Alicante.

Apply Towers is one we find keeps well up to December 1st. The flavor is superior to any of the foregoing up to this date. It ripens three weeks to a month earlier than they, but keeps well while hanging on the vines. Medium size in bunch and berry, the flesh of which is sweet and juicy. This would be an acquisition to any late house furnishing first-quality fruit before the others come in.

Late white grapes are not so numerous. Muscat of Alexandria will keep a long time after ripening, but cannot be classed as a late grape. Lady Hutt has many good points to recommend it. The flavor is excellent, of medium size of bunch and berry, sets very freely and keeps for a considerable time without shriveling. This grape can be had in great shape for Christmas. When the object is to keep the crop as late as possible, keep the house cold through the early spring, leaving full air on night and day. The buds can be allowed to burst before any set temperature need be applied, after which it should not fall below 45. Grow them as cool as advisable right along and after the fruit is ripe in the fall gradually drop the house down to 45. Keep the atmosphere dry and whenever rain or fogs make it damp, keep a gentle warmth in the pipes. With ripe fruit hanging, at no time should they be allowed to become real hot. Let the temperature drop first. Excessive fire heat causes the berries to shrivel. A gentle heat with air on at all times should be the axiom.

POT VINES AND PEACHES

Pot vines and peaches started the first of the month should now have their temperatures raised to 45 to 50 at night. This will be sufficient for the peach trees until they are in flower. Keep the houses well moist to encourage the trees to break, and shut up early enough to raise the temperature to 65 or 70. Trees that are anyway sluggish in bursting their buds can be treated to a little steam in the atmosphere by spraying water on the hot pipes.

TYING IN PEACH TREES

Nothing is more pleasing in a fruit range than a perfectly shaped peach or nectarine tree tied on to a trellis. Often it takes some years to attain the desired effect—an evenly balanced and symmetrical tree, covering the whole trellis with good fruiting wood. Nor can this be attained with winter tying alone. During the whole growing season this end must be in view. The commencement is right from the time of disbudding and continues right through the season. When a growth is "heeled in" its position and size at the season's end should be carried in the "mind's eye." In so doing you can see what wood will be discarded at the next winter pruning and so you are ahead of your job and can train them in the way they should go. Every growth should be kept straight and no two should cross. The bottom of a tree should always be a first consideration as this is not usually abundantly furnished with strong young growths. See that as much good wood as possible is laid in here and the center will always fill itself up. It is advisable to leave a small space in the center on this account. The object in tying a tree thus is that it should look like the ribs of a gigantic fan—no two branches meeting each other if they were to be extended. To commence, tie the stronger branches into position first with strong string and the smaller ones will find their places afterwards. Leave room enough in the ties for the branches to swell and keep them from pressing hard against any part of the metal trellis by placing a thin lathe or piece of old hose pipe cut through the center between them, otherwise they are liable to "gum" as the metal becomes hot with the summer sun.

EFFECT OF WATER ON MUSHROOMS

Watering a mushroom bed is usually conceded to be the last drive for a crop. Beds having cropped for some considerable period will gradually wear out and watering will put new life into them for a time. This has a peculiar effect on a few of the smaller fungi that may be just emerging from the soil. They are unable to live in the sodden soil for a few hours until it can dry out a little, turn black and are useless. As long as a fair amount of mushrooms are coming, refrain from watering as this certain loss is bound to be felt. Were it possible to keep the soil half moist during the whole time the greatest results would be achieved, as it is always noticeable how a crop comes through after a watering and the bed has got to this state of "half and half." When watering use water having a temperature of 65 to 70 and soak the bed.

Worthy of a
better fate

It has been a very common habit with many old-school gardeners in this country to deplore the decline of interest in the cultivation of the so-called hard-wooded greenhouse plants,—New Holland and Cape plants, etc.—in recent years, and to make comparisons between the present day florist and his predecessor of a generation ago, not at all complimentary to the judgment or cultural attainments of the plantsman of today. This line of criticism has been aimed solely at the American grower. But we notice in *The Garden*, of London, issue of December 2, 1911, a lengthy communication lamenting over a similar decadence as prevalent in England, the writer intimating that the gardener under glass of the present time is far from being the equal of his fellows whose displays of ericas, epacrises, boronias, eristemons, hoveas, and the like were the crowning triumphs of cultural skill as displayed in the shows of the past. It is some consolation to know that the defection from old-time standards is, therefore, not local but that if we have fallen from grace we have done it in good company and, further, that the contributing causes have been practically the same, viz., the encroachment of the soft-wooded plants on the field, due in a large degree to the advancement in greenhouse construction and heating facilities—conditions which are not to the liking of the old-time hard-wooded favorites, the disappearance of which all plant lovers must regret.

An honor
well bestowed

In the following pages we have endeavored to set forth in a somewhat fragmentary manner the stupendous achievements of Victor Lemoine and to remind our readers, while the man is yet alive, of the invaluable services he has rendered to horticulture. If Victor Lemoine's garden children were to be all eliminated from our nurserymen's stock and catalogues it would leave an appalling void and a large share of our garden beauty would be gone. If *Begonia Gloire de Lorraine* alone should be taken from the florists' holiday plant list, how sadly we should miss it! In awarding the George R. White Medal of Honor to this world benefactor, the trustees of the Massachusetts Horticultural Society made no mistake. It is safe to say that no individual the world over, has done more or as much for this cause, not only in recent years but for more than half a century than Mr. Lemoine. As far back as 1855 he received the Medal of Honor of the Exposition Universelle in Paris. The great work of Lemoine as a hybridizer is too well known to require comment now, except that we cannot refrain from again alluding to its amazing scope. While other hybridizers have distinguished themselves with one or perhaps two genera of plants, Lemoine's work has extended over many, while his work on one of several genera, such as *Syringa*, *Philadelphus*, *Deutzia*, *Clematis*, *Gladiolus* or *Begonia* (several other genera might be enumerated) alone, would have well entitled him to the honor he is now accorded. The work of Victor Lemoine, like that of the Darwins, is a family work. Mr. Emile Lemoine has co-operated with his renowned father for many years and the third generation is already interested in it. But the horticultural world will with unanimity agree with us when we express the hope that the distinguished senior member of the house may yet be spared many years to continue his great and useful work.

Victor Lemoine

The announcement a short time ago in these columns that the trustees of the Massachusetts Horticultural Society had awarded the George Robert White Medal of Honor for the current year to Victor Lemoine of Nancy, France, as the person who has done the most during the year or in recent years to advance the interests of horticulture in its broadest sense, brought to us so many expressions of approval of the award that we feel sure our readers will be interested in learning more regarding the achievements of this great man. For much of the information herein presented we are indebted to our esteemed German contemporary, Moller's *Deutsche Gartner-Zeitung* and to our translator, Mr. Gustave Thommen. Coming as it does through a German medium the unqualified praise and recognition of merit extended to

him, ignorant though he may have been of the name of his benefactor.

The gardening world may well be proud of the many men who have made for themselves an honorable name by their diligent work in some particular, circumscribed specialty, but Victor Lemoine is the man of all men, who has been able to master the art of hybridizing in an astonishing degree and in so many and widely diversified lines. For threescore years he has worked, unostentatiously and without boastful claims and furnishing a notable contrast with the vain-glorious and preposterous propaganda put forward in recent years on behalf of inferior operators in this field.

Very often, indeed, the gardening world could not foresee or realize from the modest, brief announcements

VIEW IN THE GARDENS OF VICTOR LEMOINE

Reproduced from Moller's *Deutsche Gartner Zeitung*

a Frenchman by our contemporary on an occasion some four years ago has deeply impressed us (and doubtless many others) with the universality of horticulture and the utter ignoring of political or racial divisions and prejudices which is everywhere characteristic of the true follower of this, the noblest pursuit in which man can engage.

Almost sixty years of honorable and highly successful work, in one of the most difficult lines of horticulture, is the record of the subject of our sketch. Since 1852 Victor Lemoine has devoted himself and his time to the development of new and useful varieties of the horticulturists' most cherished subjects. There is no spot on this wide world wherever plants and flowers are raised, where we do not find representatives of Lemoine's hybrids or introductions; no florist or gardener, who has not, at one time or another, handled Lemoine's produc-

of Lemoine's novelties, what treasures were being placed within their reach. Still hale and hearty and laboring as industriously as ever this grand man at the age of 88 continues his loved occupation and it is to be hoped that a life so glorious and useful may be extended for years to come.

Victor Lemoine was born at Delme (Lorraine), Oct. 21, 1823. His ancestors for generations back had been gardeners. After his college studies at Vic-sur-Seille he devoted several years to traveling and then worked successively for Bauman at Bollweiler (Lorraine), and Louis Van Houtte of Ghent (Belgium), also Mieliez of Lille (France), and in 1850 established himself, with small means, as a florist and landscape gardener at Nancy (Lorraine). There he was a member of the town council from 1871 to 1888. On June 13, 1885, he was made a knight and on April 3, 1894, an officer of the

Légion of Honor of France. Lemoine is Hon. Vice-President of the Central Horticultural Society of Nancy, Hon. Member of the National Horticultural Society of France, the Royal Society of Agriculture and Botany of Ghent, the Royal Horticultural Society of Munich, and a corresponding member of the Massachusetts Horticultural Society, Boston. He had the honor of being the first foreigner to be presented with the Veitch Medal by the Royal Horticultural Society of London.

The first results of Lemoine's labor (double-flowered portulacca) were mentioned in the *Revue Horticole*, 1852. Then in 1854 the first double potentilla was introduced to the trade under the name of "Gloire de Nancy." Also his first *Streptocarpus* hybrids, produced by crossing *S. biflorus* with *S. polyanthus* in the hands of Veitch gave rise to the many now widely-distributed beautiful varieties. At the same time Lemoine tried to improve the fuchsia and raised the double-flowered hybrid "Solferino," which was well thought of for many years.

In 1862 Lemoine introduced *Spirea callosa alba*. The same year he succeeded in raising several hybrids of *Monochaetum*, among others *M. Lemoinei* and *M. sericeum multiflorum*, both of which are still cultivated. Also *Clematis lanuginosa candida*, a hybrid from *C. lanuginosa* and *C. patens*. In 1863 he gave to the trade *Clematis erecta* fl. pl., and in 1864 *C. lanuginosa nivea*, the first clematis with large white flowers. He also endeavored to improve the pyrethrum and introduced some twenty new double varieties which are still found in most collections. Eight varieties of *mimulus*, hybrids of *M. cupreus* and *M. quinquevulnerus* were evolved the same year. In 1865 *Clethra barbinervis*, *Stachyurus praecox* and *Weigela arborescens* were introduced, and in 1866 *Hydrangea paniculata grandiflora* and *Xylos-teum Philomelae*. *Spirea syringaeiflora* and *S. intermedia*, hybrids of *S. callosa*, also *Delphinium elatum Keteleeri*, were raised. This same year, Lemoine sent out the first genuine double-flowered Zonal pelargonium, under the name *Gloire de Nancy*. This is the parent stock of all the beautiful double-flowered varieties which are now raised everywhere. At the exposition in Paris (1867) there were already quite a number of varieties in France, amongst others: *M. Lemoinei* and *Marie Lemoine*, rose, and *Triomphe*, scarlet.

1867 was made notable by the introduction of *Abutilon malvaeiflorum* from Mexico and *Platycrater Sieboldi*, from Japan. In 1868 Lemoine succeeded in crossing *Diervilla* and *Weigela* (*W. arborescens* and *D. multiflora*) and raised amongst a number of new varieties, *Weigela Lavallei*, which has not been superseded to this day. The next year he set out to study the influence of seedling stock and in proof that such really exists, he introduced *Abutilon vexillarium variegatum* through seedling. In the same year he introduced *Wistaria cuneata* s. *Pyramidalis*, *T. latifolia* and *Ceanothus cuneatus* Versailles; also raised *Begonia hybrida Duchartrei*—a hybrid from *B. Pearcei* and *B. subpeltata*—*Saxifraga crassifolia ciliaris* and *Clematis lanuginosa* of Froebel.

In 1870 came the introduction of *Stauntonia hexophylla* and the raising of *Weigela Lemoinei* and other

similar varieties, by crossing *W. rosea* with *W. multiflora*, and in 1871 Lemoine gave to the trade the double-flowered white *Clematis Lucie Lemoine*. The same year he raised *Saxifraga crassifolia* fol. aureo-marmorata and *Begonia alata coccinea* by crossing *B. Sedeni* and *B. Veitchii*. In 1872 he introduced *Abutilon Boule de Neige* and raised *Begonia Corail Rose*, from *B. Veitchii* and *B. roseaeflora* also *Philadelphus dianthiflorus plenus*.

In the year 1874 Lemoine surprised the gardeners with his first double Tuberous *Begonia*, *B. Lemoinei*, which was followed in the course of the next few years by *Gloire de Nancy* and a large number of double varieties in all colors. In 1874 he also introduced *Phlox decussata Croix d'Honneur*, with striped flowers, *Clematis integrifolia Duandi* and *Salvia pratensis purpurata* and raised *Pelargonium* *Mad. Thibaut*, double. In 1875 he succeeded in crossing *Libonia floribunda* and *L. Penrhosiensis* producing *Libonia rutilans*, and introduced *Fuchsia Boliviana* from Mexico.

His introduction in 1876 of *Dahlia gracilis* brought into vogue the single-flowered dahlias. The same year he brought out a number of new varieties of *Primula cortusoides*, of which kind there were then only three or four sorts known. He introduced *Oxalis Ortgiesii* from Peru, *Salvia nigrescens* from Bolivia and *Gynierium jubatum* from the Chimborasso mountains and by crossing *Clematis lanuginosa* with *C. Jackmani* he raised *Andre Leroy* and others. Further he raised this year *Weigela Abel Carriere*, still one of the finest today, also the single *Lilac Jaques Callot* and *Gloire de Lorraine*, and eight more varieties of double tuberous begonias.

In 1877 Lemoine introduced *Hydrangea Japonica elegantissima* and *Begonia racemiflora* from Mexico and raised *Abutilon Darwini* gr., four new varieties of *Pelargonium peltato-zonale*, also Zonal pelargonium *Paul Louis Courier*, besides several double pelargoniums. At this time only one double variety (with lilac-colored flowers) was known. Then he gave to the trade this year a number of new fuchsias, early and late flowered. In 1878 he introduced *Iresine Wallisii* and *Nandina monstrosa* var. from Columbia and raised several valuable new pelargoniums, mostly dwarfs. At the international exhibition in Paris, he showed the first double-flowered lilac (*Syringa Lemoinei*), *Gladiolus Lemoinei* and *Gladiolus Marie Lemoine*. These latter were produced by crossing *Gladiolus purpureo-auratus* from the Cape and a variety of *Gladiolus Gandavensis*. In 1879 he introduced *Lobelia lutea*, *Rubus phoenicolasius*, *Clematis coccinea* and *C. viticella alba*, also raised *Weigela Emile Galle*, *Ceanothus Aerostat* and *Phare*, besides five new *Primula cortusoides* and *Philadelphus multiflorus* pl. In 1880 he introduced *Carpenteria californica*, *Hydrangea jap. fol. tri-color*, *Arnebia echoides* and *Clematis Marie Boisselot* and raised double *Pelargonium Chancelier Faidherbe*. In 1881 he introduced *Cerasus Sieboldei* fl. pl., *Chrysanthemum Gloire Rayonnante* and other plants and raised *Wistaria frutescens alba*, *Syringa Rubella* pl., *Pelargonium Belle de Jour* and *Begonia Davisii* hyb. fl. pl.

In 1882 Lemoine introduced *Taesonja Jamesonii* from Quito and raised *Primula cortusoides* *Mme. Emile Galle*, *Fuchsia boliviana rosea*, *Pelargonium Jeanne d'Arc* (white), *P. La Rosiere*, *Syringa Matthiae* s. *Dombasle* (double), *Gladiolus latavicus*, etc. He gave to the trade *Montbretia smiaeflora*, a double-crossed seedling from *M. Pottii* and *Crocus aurea*. In 1883 he introduced *Streptosolon Jamesonii* and *Philadelphus microphyllus* from California and raised a number of new clematises, *gladiolifolia* and *latavicus*, also *Philadelphus roseaeflorus* pl.

His 1884 introductions included *Begonia maculata aureo-maculata* and *Abundant* Thomsonii fl. pl. Raised *Begonia semperflorens gigantea rosea* and *carminea*, *Pelargonium* Emile Lemoine and the double *Belle Nanceienne*. A number of worthy varieties of *delphiniums*, *primulas* and *gladioli* were also raised, besides *Pavonia intermedia*, a cross from *P. Makoyana* and *P. Wioni*. In 1885 Lemoine raised the double *Bouvardias* Sang Frond and Lemoine from B. Alfred Neuner and *leiantha*, several *geraniums*, *montbretias* and the double lilacs *Alphonse Lavallee* and *Michel Buechner*.

In 1886 the everblooming fuchsias were produced, by crossing trade varieties with *F. Ricartonii*. Also to the trade the double *Begonia Incendie*, the striped *geranium* *Citoyen des deux Mondes*, *Gladioli* Mme. Lemoine and *Vesuv*, *Weigela* Congo and the double lilacs *President Grevy* and *Mons. Maxime Cornu* and *Pyramidal*.

In 1887 *Clematis* La France was introduced. This year he raised *Heliotrope giganteum*, a cross from *H. peruvianum* and *H. meumum*, *Fuchsia* Mrs. E. G. Hill, *Pelargonium* Galilee, *Bouvardia flavescens* fl. pl. and the white *La Favorite*, *Gladiolus* E. V. Hallock, *Montbretias* *Drap d'Or* and *Eldorado*, also the double lilacs *Comte Horace de Choiseul*, *Mme. Jules Finger* and *Senateur Volland*. In 1888 he introduced *Elaeagnus Simonii* tricolor. Raised several *clematis*, lilacs, *begonias*, *Phlox decussata* *Eclaireur*, *Gladioli* *Amiral Krantz*, *Lamark*, *M. Leveque*, *Pactole* and *Venus de Milo*, also the *Montbretias* *Rayon d'Or* and *Transcendant*. This year also gave him *Philadelphus Lemoinei*, a cross from *Philadelphus microphyllus* from California with *Philadelphus* of the trade. This established a line of plants with small foliage and rare scented flowers.

In 1889 his introductions included *Begonia* *Gera-noïdes* and *B. Natalensis*, *Euscaphis staphileoides*, *Dodecatheon Lemoinei*, *Begonias* *Lafayette* and *octopetala*. He raised *Montbretia* *Soleil Couchant* and the lilacs *Jean Barth* and *Emile Lemoine*. Lemoine also gave us this year *Gladiolus Nanceianus*, a cross from his best *G. Lemoinei* and *G. Saundersianus* from Capeland. He showed for the first time the sorts: *Comte de Choiseul*, *Maurice de Vilmoren*, *P. Du Chartre* and *President Carnot*. In 1890 he introduced *Aralia cashmerica*, *Clematis* *Baron Veillard*, *Asparagus retrofractus arboreus*, *Syringa Bretschneiderii* and *pubescens*, also *Begonia* *Baumannii* with scented flowers. Raised and sent out the winter-flowering *Begonias* *Triomphe de Lemoine* and *Triomphe de Nancy*, the double *Clematis viticella* *La Nanceienne*, *Philadelphus*, *Lemoinei erectus*, *Gladiolus* *Lemoinei* *Alice Wilson*, *Gold Blas* and *Nuée bleu* *Gladiolus Nanceianus* *Harry Veitch* and *Le Grand Carnot*, *Montbretia* *Aurora*, *Phlox* *Flambeaux*, the double, light blue lilac *President Carnot* and the double white *Mme. Lemoine*. His 1891 introductions were *Deutzia parviflora*, *Primula* *Boissou*, *Heucheria* *Sullivanii* and *Chrysanthemum* *Louis Bochner*. Raised *Spiraea* *Bumalda ruberrima*, the *Phloxes* *Emil*, *Matador*, *Panthéon*, the double lilacs *Belle de Nancy* and *Comtesse Horace de Choiseul*, the *Weigelas* *Descartes* and *Pascal*.

From now on the raising of new varieties, in so many different lines of plants, became really prodigious and we have room only to mention the most important of the sorts sent out by Lemoine, between 1891 and the present time. 1893 brought the grand *Begonia* *Gloire de Lorraine*, a cross from *B. serotiana* and *B. Diego*, *Barbacenia squamata*, *Hillia tetrandra*, *Tamarix kotschy-garcia*, *Osteomeles anthilidifolia*, *Panax sessiliflorum* and *Viburnum elatium*, *Fuchsia* *Alfred Colomb*, *Begonia coronata* and numerous other things. In 1894 he sent out *Anemone* *Lady William* (Jap), the first Jap-

anese *anemone* raised from seed in Europe and raised the *Heuchera* *Mme. Louis Henry* and *Mme. Casimir Perier*. In 1895 the brilliant scarlet *Phlox* *Coquelicot* and the best white one, *Lord Raglan*, were raised, also *Fuchsia* *Mme. Carnot*, *Deutzia Lemoinei*, and a number of good lilacs. In 1896 he raised *Crassula hybrida rosea* from *C. jasminica* and *Reichen Falcata*, the double lilacs *Abel Carrière*, *Charles Joy* and *Fr. Morel* and the single Congo. In 1897 *Russelia Lemoinei*, *Gazania nivea*, *Heucheria brizoides*, the lilacs *Mme. Leon Simon*, *Marechal de Bassompierre* and *Prince de Beauvan*, also some *clematis*, etc. In 1898 from seed, *Begonia Vesuvio*, *Deutzia gracilis rosea* and *D. venusta*.

It would require page upon page to record what Lemoine has produced in all from 1899 until today and it would simply weary the reader to go over the names of the amazing number of plants which this man has given to the world in these last ten to twelve years.

It is interesting to note which of his introductions or hybridizations Mr. Lemoine considers as the most valuable ones. Among the introductions are the following: *Clematis erecta flore pleno*, *C. integrifolia Durandi*, *C. Davidiana*, *C. Marie Boisselot*, *C. La France* and *C. Mme. Baron Veillard*; *Hydrangea paniculata grandiflora*; *Carpenteria californica*; *Polygonum baldschuanicum*; *Deutzia Vilmorinae*; *Viburnum Carlesii*; *Spiraea Aitchisonii*; *Asparagus retrofractus arboreus*; *Begonia Baumannii*, *B. fulgens*, etc.

Amongst the hybridizations, he values most the double-flowered tuberous *begonias*, and the following in succession: *Gloire de Lorraine*, *Vesuve*, *Perle Lorraine*, *Corbeille de Feu*, *Semperflorens elegans* and *Argenteo guttata*; *Pelargoniums* *Gloire de Nancy*, *Belle Nanceienne*, *Paul Louis Courrier*, *F. V. Raspail*, *Paul Crampel*, *Emile Zola*, *La Favorite*, *Deuil de Miribel*, *Col. Poirine*, *Mme. Thibaut*, *Citoyen des Deux Mondes* and *Le Vesuve*; *Clematis* *Otto Froebel*, *Lucie Lemoine*, *Etoile Rose*, *Viticella Kermesina*, *La Nanceienne*, *Mathieu de Dombasle* and *erecta grandiflora*; *Weigelas* *Abel Carrière*, *Le Printemps*, *Conquerant*, *Glorieux* and *Avant-garde*; *Philadelphus Lemoinei*, *Lemoinei Avalanche*, *Lemoinei Mont Blanc*, *Lemoinei purpureo-maculatus*, *Lemoinei Rosace* and *Lemoinei Voie lactee*; *Deutzias* *Lemoinei discolor grandiflora*, *Lemoinei Avalanche*, *Lemoinei Boule Rose*, *Mariantha*, *gracilis fastuosa* and *gracilis Candelabrum*; *Syringas*, double-flowered *Lemoinei*, *Mme. Lemoine*, *Dr. Masters*, *Comte de Ker-dore*, *President Loubet*, *Miss Ellen Willmott*, *Waldeck Rousseau*, *Rene Jarry-Desloges* and *Victor Lemoine*, and single-flowered Congo, *Pastou* and *Reinmar*; *Fuchsias* *Mrs. E. G. Hill*, *Christophe Colomb*, *Emile de Wilde-man* and *Bernard*; *Asparagus* *Siberianus*; *Pavonia intermedia kermesina*; *Exochorda Alberti macrantha*; *Phlox* *Eclaireur*, *Flambeau*, *Etna*, *Pêcheur d'Islande*, *Jacelyn*, *Matilde Serao*, *Coquelicot*, *Maximilien*, *Ponsin*, *Tapis blanc*, etc.; *Peonies* *La Fiancee*, *Mme. Emile Lemoine*, *La France*, *La Lorraine*, *E. G. Hill*, *Sarah Berthault* and *Assol*, *Lorraine*; *Anemones* *Japonica*, *Assol*, *Marion*, *Mme. Rose*, *Turban*, *Couronnement*, *D. Lemoine* and *La Nanceienne*.

During these last ten or fifteen years Lemoine has been at work on all his vast ranges upon improving the most popular and useful varieties of the many different families, e. g. *Deutzias*, *Paeonies*, *Hydrangeas*, *Weigelas*, *Gladioli*, etc. The majority of those *Delphiniums*, *Polemoniums*, *Primulums*, *Heucheras* and *Pentstemons* now cultivated in our gardens can be traced to Lemoine and he would receive a large return for this the most only the most beautiful varieties of these plants and *Mont-*

HISTORY of the FLORISTS' CLUB of PHILADELPHIA

By DAVID RUST.

The Florists' Club of Philadelphia was permanently organized on Oct. 5, 1886. For a year previous to this time there had been a temporary organization to prepare to entertain members of the Society of American Florists at their Annual Convention to be held in August, 1886. Unfortunately, we have no record of this temporary organization, nor of the first year of the permanent organization of the Club; therefore, the details of what happened during those two years are only to be obtained from some of the members who were active at that time, and as details obtainable from the different members do not agree in many respects, it is difficult, therefore, to form an accurate idea of the happenings during these two years. We know that Robert Craig was the first president, both of the temporary organiza-

an extract from the Philadelphia Times of January 14th, stating that the florists of Philadelphia held their Third Annual Banquet the night previous and that Robert Kerr presided. This was the banquet of this society previously spoken of.

The first reference I can find to the Florists' Club of Philadelphia is in the records of the Pennsylvania Horticultural Society. Under date of March 16th, 1886, is the following extract:

"An appeal was made by a member in behalf of a fund for the entertainment of the Society of American Florists, at their convention in this city in August next. This matter was referred to the Florists' Club of this city to prepare and submit to this Society a resolution on the subject. At the following meeting of the Pennsylvania Horticultural Society held April 20, 1886, the following resolution was adopted:

Whereas, The Society of American Florists has decided to hold its next annual convention in Philadelphia, and as there will be 600 to 900 horticulturists from all parts of the United States, therefore be it

Resolved, That the Florists' Club of Philadelphia (which club being organized for the reception and entertainment of these visitors), has the hearty endorsement of the Penna. Horticultural Society, which approves of the object of the said Club, and respectfully asks its members to contribute towards defraying the necessary expenses of the entertainment of the delegates, and therefore, making the reception worthy of the Horticulturists of Philadelphia."

The above will plainly show that at this time there was only a temporary organization, for the purpose of taking care of the members of the S. A. F., at their second convention. The meetings of the Club were now being held in the Library Room, Horticultural Hall.

In the American Florist, under date of November 15, 1886, Edwin Lonsdale says: (speaking of the Florists' Club), "It has now been made a permanent organization, that is to say, it was organized temporarily for the purpose of aiding the Convention of the S. A. F., but it had such a good influence on all concerned that there was nothing left but for it to become permanent. It is destined to be of service both to the National Society and to the Pennsylvania Horticultural Society."

We know that the convention was held, and that it was a great success. One of the chief features of this convention was the entertainment of the visitors by Mr. George W. Childs at his country place, "Wootton," Bryn Mawr, on Friday, August 20th, at which there were in attendance eight hundred persons. The photograph of this event we have hanging here in the club room, and in token of the kindness of Mr. George W. Childs, the Florists' Club presented him with a large bronze vase filled with foliage plants—a photograph of which we also have here in the club room. On the previous day the delegates to the convention were taken to Atlantic City (numbering about seven hundred and occupying ten cars). They were entertained at dinner at the United States Hotel by the Florists' Club. Our records show that there were 529 per-

sons registered as members of the S. A. F., at that convention. Robert Craig tells us about this meeting, which was the second of the S. A. F., that the late Peter Henderson was very skeptical as to the S. A. F. Conventions being successes, as it would be impossible to get a number of florists away from their business for a whole week in order to attend a convention; and that in his opinion the matter would be a failure. The Colonnade Hotel had been selected as headquarters for the S. A. F. delegates. By 7 P. M. on Monday, of the convention week, the Colonnade Hotel was filled up, members having arrived all day long from various parts of the country, and those coming at night had to seek other hotels. Mr. Henderson then admitted that he was wrong and that the success of the con-

ROBERT CRAIG

First President Florists' Club of Philadelphia

tion, and also of the permanent organization of the Club, and also Edwin Lonsdale was the first secretary. But we have no record of how long Mr. Lonsdale acted as secretary. He was elected secretary of the S. A. F., at the meeting here in August, 1886, therefore it is probable he resigned the secretaryship of the Club when he took up the duties of the secretary of the S. A. F. in January, 1887.

Previous to the temporary organization, there had been a certain Growers' Association, the members of which used to meet monthly at Bell House Hotel in West Philadelphia to see the plants shown at the season's horticultural shows. As an organization, there is no record of its existence, but it was as the Florists' and Growers' Association. From what we can gather, this association met at 13th and Market streets, and had probably been existing about three years. The American Florist in March, 1886, published

EDWIN LONSDALE

First Secretary Florists' Club of Philadelphia

vention was assured. The convention was a success in every respect, and after entertaining the visitors in a proper manner we find that the Florists' Club had over \$600 left on hand. It was the fact of having this money on hand that first started the idea of forming a permanent organization.

In making a research to find out the early history of the Club many interesting things are naturally discovered. It is impossible to give many of these incidents in the time usually allotted to the reading of a paper, therefore I will only mention a few, which apparently lead up to what appears to me to be the first essay decided upon by the Club. I find in Penna. Horticultural Society records of November 1885, that a silver medal was awarded to John N. May for a new Rose "The Bride," and a silver medal to Craig & Brother for Carnation "Sunrise," and silver medal to Hallock & Thorpe for new Chrysanthemum "Edna Craig," a

bronze medal to Hallock & Thorpe to new Chrysanthemum Yum Yum, there being seventy-five seedling chrysanthemums staged at this exhibition, and the judges on new chrysanthemums and new carnations being John N. May, James Tardif, C. L. Allen, John Thorpe and William Hamilton. An interesting feature of this exhibition was that at the close all the commercial exhibits were sold at auction; one-fifth of the proceeds being turned over to the Penna Horticultural Society. The exhibition of so many seedlings at this show evidently insured the following subjects for an essay, the following year, namely: "Is it better for florists of this country to bend their efforts towards improving existing varieties of flowers by hybridization, or shall we depend upon the florists of Europe to do this for us?"

We now come to the first minutes of this Club, which we have, and which are dated October 4, 1887; and under the reports of committees is the report of a committee (John Westcott, chairman), which had been appointed at the previous meeting, Sept. 6th, to decorate the rooms occupied by Mrs. Cleveland at the Hotel Lafayette, during the Centennial Anniversary of the Adoption of the Constitution of the United States. There is also a report of the auditing committee which shows a balance in the Keystone Bank on that date of \$624.95. This, apparently, was principally made up of the money "left over" from the '86 Convention. This being the annual meeting the following officers were elected: Robert Crag, president; Charles D. Ball, vice-president; Thomas Cartledge, treasurer; D. D. L. Farson, secretary.

We also notice that a movement had already been started to secure suitable property for the purpose of establishing a plant and cut-flower market, and a special meeting of the Club was ordered to find out how many growers would support the market by sending their plants and cut-flowers to it for sale. At this meeting Charles D. Ball read a paper on "How should horticultural exhibitions be conducted to be a financial, as well as artistic success?" At the November meeting of 1887, the Committee on Market reported, that on account of insufficient support and interest, the committee recommended that nothing be done in regards to a flower market at present. It was then suggested, and finally decided, that another committee be appointed to see if a building could not be bought for a club house and market combined. At this meeting it was also decided to hold an annual dinner on the opening night of the Chrysanthemum Show. A committee was also appointed at this meeting to look into the matter of incorporation of the Club. The subject selected for an essay at the December meeting was "Our Flowers: How may they be cut, best and stored?" The subject being assigned to Robert Kirt. At the following meeting Mr. Kirt declined to prepare this essay, whereupon a motion was passed that in future, when a member declines to read an essay before the club and declined to do so, he should be fined \$1.00. This resolution, apparently, had the desired effect, as Mr. Kirt read his essay at the January meeting.

GLADIOLUS NOTES.

Regarding Mr. Gager's complaint concerning the sterility of gladiolus bulbs, would say that with proper handling these old bulbs will yield bulblets freely, providing that normally they are freely produced. Experiments along this line having given me good results regardless of age, flatness, etc., of bulbs, but further experimenting is needed to prove what are the underlying causes of sterility and fertility.

What is the matter with the so called pure whites? This is a very easy question, equally as easily answered, they are not bred right. Augusta thus far has proven itself to be the very best all around gladiolus, all things considered, of all we have ever tried regardless of color. We have had very dry followed by very wet spells, and vice versa; through them all Augusta is the one sort that has never shown the ill effects of unusual and severe conditions, and thus aroused our thinker as to the why. We had practically no rain from May 1st to Aug. 15th this season. While we keep the cultivator and weedeers going all the time regardless of conditions, still under such adverse conditions many sorts showed rapid deterioration in certain stages of development, whites as a rule showing evil effects first, then brilliant reds.

With the following whites, viz.: Aline, Alice Carey, Blanche, E. Kurtz, Europa, Hohenstauffen, Peace, Reine Blanche, etc., it gives one a very good chance to compare relative vigor, robustness, etc., and above all Augusta showed its superiority. Peace perhaps is next best but this year it showed a very heavy suffusing of red giving a distinct pinkish cast at a distance but still a very desirable sort. Alongside of these we had many seedlings of purest whiteness that showed superior ability to withstand severe adverse conditions, thus convincing us that the system of breeding we have followed is scientifically hence practically correct. Among these seedlings are many with plants taller than Peace, larger flowers than America, clearer white than Europa, larger spikes, very heavy petals, large bulbs, prolific breeders, some with only a few and some with many blooms open at once.

Some years ago we had a stock of over 500 bulbs of the grand Isabel. It was a very dry season followed by two weeks of very wet conditions followed again by a sudden change to severe dryness and in a few days we could see our grand Isabel going more rapidly each day to its doom. When digging time came we had about fifty puny bulbs of white with a few good. This may serve as a lesson, with one of many whites as well as other sorts. This season one lot of Reine Blanche were glorious and had a complete failure, but I have never before seen it as a superior sort, and we have increased heavily, but under a few of these recent sorts and under such dryness as I have owned, the seedling from faulty.

In extreme conditions, many colored sorts are disastrous.

Bred from small, dwarfed, sterile sorts their progeny will be the same.

Bred rightly pure strains can be bred at will, and this is true of other colors.

Any tinting may be intensified or eliminated at will if right breeding is done.

Any of all characters of a plant may be increased or diminished if right methods are followed.

C. RETSCHER, Central Ave., O.

DAHLIA VARIABILIS.

Yes, Mr. Editor, *variabilis* is a proper name, as years of culture have demonstrated over and over again. Apropos of the article by Alexander Macdonald, the grower has a new aptly to growers as well as dealers. As a general rule, in business one is honest as the word can be used, but when a dealer has a lot of seed quite a temptation often to adulterate with inferior seed something else. We have tried our best to be done, and we have also found it to be concerning the same like all growers. You know men don't always like to confess they haven't anything that is called big, and also they can't see to turning the money or the business in the other fellow's hand. It is the same old tale the world over. But the bulb growers' position is different. It is one of special honor. The seedman must depend on the grower's word as he will know nothing to the contrary until the following season shows up the deal in all its blooming truthfulness. Let the trade give a fair price and then hold the grower responsible. I paid one season \$9.00 per 1000 for Shakespeare gladiolus and received Madam Monnaret that could have been purchased the same season for \$8 per 1000, and it kept me busy for two seasons making the matter right. However, I believe as a general statement both sides are ready to put up a square deal.

As a rule the dahlia is variable. One season often is very different from the previous one. An instance this past season, shows this plainly. Mad Van den Bad is a fine flower. This year with me not a good bloom was found, or one that had a complete center. Jack Rose did very poorly, yet both are good and we look for good work another season. We could name a half dozen other varieties that went the same way, yet all are good and some extra good. What causes it none can tell, but they may have by observation corrected some errors. Perhaps the moon runs more of the business than we are aware of. Perhaps early planting had its effect. Perhaps lack of moisture just at the formation of the flowering bud had its influence. In seedling and cultivation are large influences in growing the dahlia bloom. When we think of it, but just what is it that the cause is? I believe it is all these things. And we must not forget to be the best of the country. We don't expect to grow an extra good flower, but we will grow the best we can and the name of that flower may be one named that is a variety of the same named Dahlia. Varieties are named so that the grower can make a comparison between them and the names of the same and quality, and with growers that send a letter to me, we will be glad to send the same to the grower and bulb.

L. S. THOMPSON.

Boston, Hingham, Mass.

CLUBS AND SOCIETIES.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The regular monthly meeting of the Gardeners' and Florists' Club of Boston was held Tuesday night, December 19, in Horticultural Hall. The most important business was the election of officers for the ensuing year. The balloting resulted in the election of Thomas Pegler, of Wollaston, presi-

THOMAS PEGLER

President-elect Gardeners' and Florists' Club of Boston.

dent; William J. Kennedy, of Brookline, vice-president; William N. Craig, of North Easton, secretary; Peter Fisher, of Ellis, treasurer; Herman H. Bartsch, of Waverley, Peter M. Miller, of Boston, William J. Patterson, of Wollaston, and William Sim, of Cliffondale, executive committee.

Fred E. Palmer gave a very interesting and instructive talk on "Dynamite and Its Uses in Garden and Farm," being his own experience and observations. He was enthusiastic over its employment for time and labor-saving, ease of use and its economy. Some interesting discussion followed. A report of the outing to Framingham was heard and it was the universal opinion of those who attended that it was one of the most enjoyable trips ever taken. It was recommended that the club take in more of these field days, as aside from the social side, much business benefit could be secured. Private men may not see any direct benefit from visiting commercial places, but they can never know how soon points gleaned from a commercial place may come in handy. About eighty took the trip to Framingham.

Among the exhibits were noted a vase of red carnation St. Nicholas, from Baur & Steinkamp, Indianapolis,

Ind.; a fine display of Zonal Pelargoniums, from W. N. Craig, among which were Paul Crampel, an excellent red much used abroad and coming more into use in this country; snapdragons, from H. Huebner, Groton, Mass., among them being a new pink winter-flowering variety which is said to be best from October to March, free-flowering, and giving evidence of much promise for the future; azaleas and begonias, from W. W. Edgar Co., and a hybrid Freesia, from G. Bleicken, of Framingham.

AMERICAN GLADIOLUS SOCIETY.

A meeting of the Executive Committee of the American Gladiolus Society was held in New York City on December 6th, with the following members present: Arthur Cowee, A. T. Boddington, E. W. Fengar, I. S. Hendrickson.

The matter of a die and medals was taken up and discussed. It was finally decided to purchase a die and offer ten sets of medals the first year to as many local Horticultural Societies. It was thought best to offer a silver medal for first prize, and bronze medal for second prize, the ten sets of medals to cost \$70.00.

The matter of registration bureau was then taken up, and it was decided to combine this committee with that of the Nomenclature Committee already established, with trial grounds at Ithaca, New York, where all tests can be made. Regarding certificates of merit it was the sense of the meet-

WILLIAM N. CRAIG

Secretary Gardeners' and Florists' Club of Boston.

ing that these certificates should be awarded only by the Nomenclature Committee, and not by judges appointed for the annual exhibition.

President Hendrickson has appointed Arthur Cowee and Professor Beal as members of the color chart committee.

L. MERTON GAGE,
Cor. Sec'y.

WESTERN DAHLIA AND GLADIOLUS ASSOCIATION.

The Western Dahlia and Gladiolus Association held its first annual meeting, Friday, Dec. 15, at the Hotel Sherman, Chicago, and the bulb show at 66 Randolph street. The meeting was called to order and adjourned to the rooms with the exhibits, and the program was carried out with the exception of two papers from members unable to be present.

Following the papers on the Gladio-

PETER FISHER

Treasurer, Gardeners' and Florists' Club of Boston

lus and its Future, by A. E. Kunderd, and Hybridization and Culture by H. W. Koerner, was a general discussion enjoyed by all. Carl Cropp gave some interesting points regarding late development of the forms of gladiolus and dahlia clumps showing that both plants largely increased in size and solidity late in the fall, but care must be used in not leaving them too late to be injured by severe frosts. He also suggested there might be a profitable future for the Colvilli type of gladiolus—Blushing Bride and others.

S. W. Pike of St. Charles, Ill., gave it as his opinion that late development of the bulbs was decidedly advantageous. The paper on American Bulbs, read by E. S. Thompson, completed the program.

Business of the association was then taken up. It was decided to appoint a committee on nomenclature, so that the work could be started at once. M. Crawford was appointed as such committee. The proposition to hold an exhibition of flowers in connection with the Society of American Florists, was placed in the hands of the executive committee, to correspond and have charge of the same if decided upon. The annual meeting of the association for the election of officers shall be held at the annual bulb show, some time in December of each year, date to be fixed by the executive committee.

No matter how many times we have seen but those who have worked for the association feel well repaid with the reception by the trade as well as the amateur, and anyone who enters must see a good thing if they did not see even the bulbs shown both within and without, as well as cactus, the cacti, lilies, montbretias, etc., all grown in the central west; Mammoth Bulbs of Kunderdi Glory, 4 inches in diameter; Koerner's giant-flowering hybrids, 3½ inches; Childs; florists' mixture; King and America, 3 to 3½ inches in diameter, etc., etc.

Over seventy entries were made and the association is well pleased with the work. It is designed that other cut-of-door flowers grown from a bulbous root will be included in the scope of the work. Our aim is information to both trade and amateur.

E. S. THOMPSON, Sec.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The annual meeting of this society was held in Pembroke Hall, Glen Cove, N. Y., on Wednesday afternoon, Dec. 13. The following officers were elected for the ensuing year: President, John F. Johnstone; vice-president, Geo. Barton; treasurer, Ernest J. Brown; secretary, Ernest Westlake; corresponding secretary, James McDonald; executive committee, Henry Gaut, John McQueen, A. McKenzie, S. J. Trepass, Jos. Robinson, H. Jones, James Emslie; trustee for one year, Valentine Clares; trustee for three years, James Duthie.

John McQueen, James Holloway and E. A. Reidenbach were appointed judges of the monthly exhibits, and they awarded two first prizes for carnations to A. McKenzie. There was a very keen competition for the gold medal offered by Felix Mense for the best 100 single violets, which also was won by A. McKenzie. H. Boettcher got honorable mention for lettuce, James McDonald honorable mention for carnations, M. Bosworth honorable mention for lemon and Jos. Robinson certificate of culture for poinsettias.

A letter was read from Elmer D. Smith offering a special prize of \$10.00 for six blooms of Artistic Queen chrysanthemum to be competed for at the 1912 show.

The treasurer's annual report showed that the society had experienced a very successful year. It was decided to hold, if possible, the annual dinner on Jan. 25.

Mr. J. Holloway has offered a prize of \$5.00 to be competed for at the next meeting, for 25 carnations mixed, and the society's prizes in January will be for a vase of six spikes of antirrhinums, 25 sprays of sweet peas and specimen cyclamen.

E. WESTLAKE.

PENNSYLVANIA HORTICULTURAL SOCIETY.

At the annual meeting of this society on Tuesday evening, December 19th, the following officers were elected for 1912:

President, Clement B. Newbold; vice-presidents, Randal Morgan, Henry F. Mitchell, Dr. A. C. Clark; secretary, Robert Long; treasurer, S. W. Keith; secretary, David R. Johnson; botany, Stewardson Brown; professor of horticultural chemistry, Dr. John Marshall; professor of entomology, Dr. Henry Skinner; professor of bi-

ology, Dr. Ida Keller; executive committee, Robert C. Lippincott, J. Otto Tilow, John W. Pepper, William Kleinhenz, James Boyd, Edward A. Schmidt, Dr. Robert Hoey.

AMERICAN ROSE SOCIETY.

The members of the American Rose Society seem to be alive to the approaching exhibition and annual meeting to be held at Detroit, in January. This is a little earlier and a little different from hitherto, but from information now in hand, it would seem there is going to be a fine spread. We already have word of some entries. Another matter of interest, is in regard to the name of the Double Improved White Killarney, which was filed with the American Rose Society, and which exhibit took prizes and recognition at Boston, but owing to confusion in name, and upon request of various people this rose will hereafter be called "Double White Killarney, Reuter's Strain."

The list of guarantors is steadily increasing. This morning's mail brought three new names. The interest which the members of the American Rose Society are evincing shows that there is plenty of vitality among the rose growers. The show will be in combination with the Carnation Society, backed up by all the Michigan people. Robert J. Pyle, of Westchester, will give on some evening, an illustrated talk concerning his visit to England last June.

BENJAMIN HAMMOND.

December 18, 1911.

NEW YORK TO DETROIT.

The Transportation Committee of the New York Florists' Club have made arrangements as follows: Leave the Grand Central Station, N. Y. C. & H. R. R. on the "Wolverine," 5 P. M., Tuesday, January 9, arriving at Detroit, 7.15 next morning. Tickets for transportation may be had on the train, but reservations for berths, etc., should be made by January 8th at the latest. Fare, one way, \$16.00. Party ticket, of ten or more, will make the fare \$13.25. Lower berths, \$3.50; upper, \$2.80; compartment, \$10.00; drawing room, \$12.00. All those going from the east are invited to join the New York party. Any other information may be had of Frank H. Traendly, 133 W. 28th street.

Frank H. Traendly, W. F. Sheridan, John Young, committee.

YONKERS HORTICULTURAL SOCIETY.

On Friday, Dec. 15th, a meeting was held, and officers elected for the ensuing year. The balloting resulted as follows: President, Howard Nichols; vice-president, Francis Drexler, secretary, Louis Taylor; corresponding secretary, John Watts; executive committee, Louis Miller, John McLaughlin and W. Macdonald, for two years and R. Cochran, W. Nelson, and H. W. White, to serve for one year.

A prize was offered for the most interesting plant in the collection. A prize was awarded first for a well colored Amaryllis (Hippeastrum) in a six-inch pot. Louis Miller was placed second with some remarkable specimens with large well-built up bracts. Mr. Hoffman received a prize for a very pretty dwarf conifer.

J. WATERS, Sec.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The program of lectures and discussions during the season of 1912 has been issued. The lectures will be held at Horticultural Hall, Boston, on Saturdays at 2 o'clock P. M., with the exception of the inaugural meeting January 6. The list is as follows:

January 6.—Inaugural Meeting. Annual Reports.

January 13.—Vocational Agricultural Education. By Rufus W. Stimson, Boston, Special Agent for Agricultural Education, State Board of Education.

January 20.—Plant Introduction as a Government Policy. By David Fairchild, Agricultural Explorer in Charge, Office of Foreign Seed and Plant Introduction, Bureau of Plant Industry, Department of Agriculture, Washington.

January 27.—Insect Pests of the Garden and Orchard. By Prof. Edson F. Hitchings, Orono, Me.

February 3.—No Lecture on this date. Mid-winter Flower Show.

February 10.—General Discussion on Flower Culture. Opened by Robert Cameron, Superintendent Botanic Garden, Cambridge.

February 17.—Fungous Diseases of the Chestnut and Other Trees. By Dr. Haven Metcalf, Pathologist, Department of Agriculture, Washington. (The John Lewis Russell Lecture.)

February 24.—A Year's Vegetable Supply from the Home Garden. By William N. Craig, North Easton.

March 2.—General Discussion on Fruit Culture. Opened by Wilfrid Wheeler, Concord.

March 9.—Planning and Starting an Orchard. By F. A. Smith, Superintendent Turner Hill Farm Orchards, Ipswich.

March 16.—My Fourth Botanical Expedition to China. By E. H. Wilson, Arnold Arboretum, Jamaica Plain.

March 23.—No Lecture on this date. Spring Flower Show.

March 30.—Color Arrangement in Flower Gardening. By Mrs. Francis King, Alma, Mich.

ST. LOUIS FLORISTS' CLUB.

The St. Louis Florists' Club held its monthly meeting Thursday afternoon, December 14th, in Odd Fellows' Hall, with a satisfactory attendance, this being the last meeting the club would hold this year. The trustees surprised the members with a few boxes of good cigars to smoke during the meeting and there was quite a lot of interesting matters which kept the members very discussing them.

John & Starkamp sold a vase of their new red carnation St. Nicholas, which was not once the center of attraction for the carnation growers.

Mr. F. W. Wood of Hartford, Conn., sold a vase of B. L. Lorraine, and sold quite a lot of them to the local trade. Mr. Wood also sold a vase of the new red carnation St. Nicholas, which was not once the center of attraction for the carnation growers. Mr. Carroll accepted with a neat response. All the old committees made final reports and were warmly thanked. An interesting hour was spent discussing queries from the question box. Next meeting January 11th.

HYBRIDIZING THE GLADIOLUS.

(A Paper by H. W. Koerner.)

The principal points to be considered in gladiolus crossing are habit of stem, number of flowers open, flowers set close to the stem and well expanded and most important of all, the color.

I don't like the Lemoine type, although I think there is a time coming when they will go ahead of any other type, for they multiply faster. The reason I don't like them is because they generally have crooked stems and only two to four flowers open at once. I can pick out any variety that has Lemoine blood by the aforesaid two defects. I have learned that the best varieties generally multiply the slowest. Some of the best kinds that I have been growing for ten years have not yielded enough to offer.

Dahlia pollination is more difficult. To do the work right you must employ a strong magnifying glass to see the anthers which should be cut off and to select the ripe pollen. I always select free flowering and long stemmed varieties to cross, and I never save shy bloomers or short stemmed varieties, for there are too many of that kind on the market already.

The best time of day for crossing is between 12 and 2 o'clock P. M., on a bright, sunny day.

Hybridizing is in its infancy and I am sure that there will be entirely new types and shapes never yet seen in both dahlias and gladioli and in peonies as well.

As to culture, there is not much to say; any soil that produces corn or potatoes will grow dahlias and gladioli, but plant deep—at least four inches below the surface. Gladioli should be planted early and dahlias late.

CLUB AND SOCIETY NOTES.

We have been informed that a Florists' Club was organized in Lancaster, Pa., on the 13th inst., but names of officers and other details are lacking. We wish them all success.

The Florists' and Gardeners' Club, Andover, Mass., held a meeting and supper the week of Dec. 11. The supper was followed by a discussion of plans for the coming show.

J. K. M. L. Farquhar of Boston lectured before the Horticultural Society of New York at the Museum of National History, New York City, on December 16, his topic being "The Gardens of Italy." A splendid series of lantern slides were shown and the lecture was enjoyed by an audience which filled every seat in the hall.

The florists and gardeners of Holyoke, Mass., met recently and organized a new club to be known as the Florists' and Gardeners' Club. The following officers were elected: President, George H. Sinclair; vice-president, Edward J. Canning; secretary and treasurer, Fred Bartlett; executive committee, D. J. Galivan, William Pickey and Reginald Carey. The club will meet the first Tuesday in each month, the next meeting to be held at the Smith College greenhouses, Northampton.

Obituary.

Henry F. Lord.

On Saturday, December 16, Henry F. Lord, treasurer of the Lord & Burnham Co. of Irvington, N. Y., met with a fatal accident. Mr. Lord was very fond of machinery of all kinds and took great pride in keeping his automobile in first-class running order himself. Last Saturday afternoon he remarked to a person whom he met on his way to lunch that he was going to enjoy himself that afternoon by beginning to overhaul his automobile. Soon after lunch he left the house, and when he failed to return after dark his family became anxious, and called up several of his friends to find out if he was with them. Failing to locate him they began to search and soon his son, Arthur, discovered him pinned under his automobile in the garage. He summoned help, and the body was soon extricated. The doctor who was summoned said death must have been instantaneous as the entire weight of the automobile rested on his body.

HENRY F. LORD

Mr. Lord had removed the wheels and had the machine resting on blocks. In loosening some of the parts he must have moved it so that it tilted the blocks, allowing the automobile to fall.

The funeral was held at his residence at Irvington, Tuesday afternoon. It was largely attended, and the floral remembrances lined the room on all sides.

The deceased was a son of Mr. Lord, founder of the firm of Lord & Burnham Co., and ever since leaving college has been associated with the company in the manufacture and building of greenhouses. He was born in Buffalo, N. Y., March 31st, 1855, and has resided in Irvington forty-one years, the family having moved there when Henry was fifteen years old.

Mr. Lord was a man through and through, always bright, cheerful and kind. To know him was to like him, and he was widely known and respected in Irvington and all the adjoining towns. By his death the Lord & Burnham Co. loses one of its most trusted and faithful officers, and he will be greatly missed by all members of the company.

Mr. Lord leaves a widow, three sons and one daughter.

Lucius S. Fife.

Lucius S. Fife, florist, died at the home of his daughter, Mrs. Charles E. Buell, on the Buckland Side, Shelburne Falls, Mass., Dec. 15, aged 70 years. He was born in Cleveland, O., Dec. 27, 1840, and came to Shelburne Falls with his parents when nine years of age, and had made it his home ever since. Mr. Fife established the first greenhouse in Shelburne Falls in the early 80's, and had been in the florist business up to a few months ago, when he sold out his business.

Henry Adam Sauer.

Henry Adam Sauer, 64 years old, well known florist of Northeast Minneapolis, Minn., died at his home, 1416 Adams street, N. E., on Dec. 12. Mr. Sauer was born in Winkeldorf, Hanover, Germany, coming to this country in 1869. He moved to Minneapolis in 1898 and conducted a florist shop until last July, when ill health forced his retirement. He is survived by his wife, two daughters and two sons.

Charles E. Clarke.

Charles E. Clarke, florist and market gardener, Vienna street, Newark, N. J., was found dead on the road, Dec. 8, the coroner's verdict being death from apoplexy. Mr. Clarke was born in Chatham, N. Y., and went to Newark twenty years ago, being engaged in the florist business. He was an active grange worker and frequently lectured before them. He was 69 years of age.

Frederick A. Seidlich, Jr.

After a long illness, Frederick A. Seidlich died at the home of his father in Catonsville, Md. For several years he conducted a greenhouse on Ingle-side avenue, Catonsville. He was a member of the Baltimore Gardeners' and Florists' Club.

Frank Pierkovski.

Frank Pierkovski, florist, of White Plains, N. Y., died at White Plains hospital on Sunday, December 17, aged 47 years. The funeral took place on Wednesday. Mr. Pierkovski was a long-time member of the New York Florists' Club.

Anthony Schramm.

Anthony Schramm, member of the firm of Schramm Bros., Toledo, O., died Dec. 1, of typhoid fever, aged twenty years. His mother, three brothers and one sister survive him.

Arthur G. Greatrex.

Arthur G. Greatrex, aged 60 years, died soon after taking up his new duties at Muir's greenhouses at Scranton, Pa. He was formerly employed by Morrell Bros.

J. Q. Mulford of Lebanon, Ohio, was recently crushed to death when a stone wall fell on him.

Bridgeton, N. J.—The flower store of Theodore Edwards, Irving avenue and Commerce street, was destroyed by fire on December 11. No insurance.

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 335 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis Bostoniensis and Pierstoni, 6-in. pots.....\$0.50 each

Nephrolepis Elegantissima, Pierstoni, Bostoniensis, and Harrisii, heavy 8-in. plants.....\$1.00 to 1.50 each

Nephrolepis Elegantissima, Bostoniensis, and Harrisii, heavy 10-in. plants 2.50 each

F. R. PIERSON COMPANY, Tarrytown-on-Hudson, NEW YORK

BRITISH HORTICULTURE.

Carnation Show.

An interesting and varied collection of blooms was seen at the show of the Perpetual Flowering Carnation Society, in London, on Dec. 5th and 6th. The leading trade growers were well represented. The gold medal for a group of carnations was secured by W. E. Wallace, of Eaton Pray, Dunstable, Bedfordshire, whose fine display included May Day, White Perfection, Scarlet Glow, Daylight, Britannia, Enchantress, Rose Pink Enchantress, White Enchantress, Winsor, Carola, Gloriosa, etc. There was only one competitor for the Brunton cup for three vases of British novelties distributed since 1909, this being B. E. Bell, of Castel Nursery, Guernsey, who exhibited Constance, Judith and Coronation. The American Carnation Society presented a challenge cup for three vases of American novelties. This was secured by Mr. Wallace with Gloriosa, May Day and Scarlet Glow. B. E. Bell was second and W. Wells & Co., of Merstham, Surrey, third. Altogether the show was considerably in advance of those of previous seasons.

National Dahlia Society.

The annual meeting of this society has recently been held in London. A letter was read from Mr. Edward Mawley, resigning his office as president, owing to his health. This an-

nouncement was received with the members' deep regret, warm-hearted tributes being paid to his long and valued services. The annual report stated that the society had held two shows during the year, one at the Crystal Palace, and the other at the Royal Botanic Gardens, Regent's Park. The dry season had considerable influence on the early production of bloom, and in consequence the exhibits were not so numerous as in previous seasons. A series of trials was carried out by Messrs. Cannell & Sons, of Swanley Point, Kent. The trials brought into prominence the best varieties for garden decoration, and the report of the committee of inspection will be published in due course. In order to assist the society in its work members of the trade have most generously decided to forego their prizes in the nurserymen's classes for the present year. By this means the society has been able to carry out its work, and now has a balance on the credit side. More than 20 new members have joined during the year, and the majority have taken part in the exhibitions. The committee had offered a gold, a silver-gilt and a silver medal for competition at the International Horticultural Exhibition next year. George Gordon, editor of the "Gardener's Magazine," was appointed president, Joseph Cheal, of Lowfield Nurseries, Crawley, chairman of committee, J. Green, Dereham, Norfolk, treasurer and E. F. Hawes, London, secretary.

W. H. Adsett,

THE FIRST AMERICAN ORCHID HYBRID.

Editor HORTICULTURE:

I notice in your December 16th issue that Mr. Joseph Manda is credited with being the raiser of the first orchid hybrid in America. In the year 1882 I raised a number of hybrid calanthes. One of these received a silver medal from the Massachusetts Horticultural Society in the year 1890. If your date is correct Joseph Manda would have been about eight years old, and living in Bohemia. If he went to Pitcher & Manda in 1888 he would be about 14—rather young to have served an apprenticeship.

I do not lay claim to have raised the first orchid hybrid in America, neither do I think Joe Manda wants anything he is not entitled to. It might be well for you, Mr. Editor, to try and find out who the raiser of the first orchid hybrid in America was.

Yours very truly,

RICHARD GARDNER.

Newport, R. I.

P. S.—What about George Savage, or William and R. M. Grey?

The foregoing communication is of more than passing interest, and we should be pleased to hear from any one of our readers who has knowledge of early orchid hybridization in this country. We might add here that two other mistakes appeared in our notes on Joseph Manda's election as president of the N. Y. Florists' Club, his address being given as South Orange, instead of West Orange, and his term of membership in the N. Y. Florists' Club, eighteen instead of twenty-one years, the latter being correct.

Seed Trade

The following letter, of which a copy has been kindly furnished us, is self-explanatory:
Geo. W. Kerr, Esq., Doylestown, Pa., U. S. A.

Dear Sir: I read with much pleasure and interest your letter to the editor of Horticultural Trade Journal in the issue of the 6th re. sweet pea seed. It has been my contention ever since I had anything to do with the growing of this beautiful flower that California could not help producing absolutely the finest seed in the world, and for the two reasons mentioned in your letter, viz.: climatic conditions are perfect and the soil has no equal.

I am of the opinion that the sooner this clap-trap about English-grown seed was exposed, the better it would be for both buyer and seller. Our climate here in five seasons out of ten is totally against the developing and maturing of seeds.

I hope your letter will be the means of clearing away that mist which has hung around the "heads and opinions" of the greater number of our seedsmen. We are a great nation, but at any rate let us get rid of that "swelled-headedness" which is a curse to our larger development. We are not "the only pea in the pod," and the sooner we realize this the better it will be for us

Yours faithfully,

ANDREW REID.

Edinburgh, Scotland, Dec. 12, 1911.

Horticultural Commissioner B. V. Sharp of King's County, Calif., has issued a notice warning California merchants not to handle alfalfa seed from Utah or adjacent states and advising that they demand California seed only. This, it is understood, is on account of the prevalence of the alfalfa weevil in Utah.

MEDICINAL LEAVES AND HERBS.

The Department of Agriculture has just issued a bulletin on leaves and herbs used as medicine. Nor is this the first publication put out by this department on the subject of medicines—the others being Weeds Used as Medicine, Root Drugs and Medicinal Barks.

Collectors of medicinal plants have made such insistent demands on the department for a guide in their work that a description of 36 medicinal plants, including only such as are in most common use, has been prepared by direction of the secretary, fifteen of these being mentioned in the Eighth Decennial Revision of the U. S. Pharmacopoeia.

Each plant is listed under the name in most common use, but synonymous common names, and the pharmacopoeial name, if any, are also given, that no one should have difficulty in recognizing the plants familiar to him, or in identifying an unknown one, if of the series, from the description given.

A VALUABLE CLIMBING ROSE.

Prof. C. S. Sargent is practically a hardy yellow Climbing Tea rose. It is a strong and lusty grower, bronze-green foliage larger than the Ramblers.

The new growths are blood-red and very decorative.

We have a specimen planted six years ago, having a spread of twenty-five feet and ten feet in height. All the growth is made on the bush from the main stalk which is now two inches in diameter near the ground.

The color is very persistent, being a strong orange yellow, lasting until

the petals fall. The flowers are very full, being crowded with petals.

It blooms about June 15th, which is two weeks earlier than the true Ramblers, thus making the season that much longer. It is an American seedling—a cross between the hardy Wichuraiana x Souv. de Aug. Metral, a red French Tea rose.

Flower Market Reports

BOSTON

Up to time of going to press (Thursday, 21st), the local market is in a state of quietude seldom equalled at this season of the year. Those wholesalers who have a shipping trade from distant points are, however, very busy and are using up a big lot of material which, if left to the mercies of the local demand, would be a menace to the market for the rest of the week. Green goods of all kinds are in unprecedented call, the quantity of boxwood, holly, laurel, etc., being handled far exceeding any past experience. The quality of some of the stock coming in at present moment is, to say the least, questionable and in carnations particularly there is evidence of their having been held up for some time in anticipation of higher prices. Roses are in better condition than the carnations, but they, too, have in some instances that tired look which forebodes trouble with the buyer. Violets are again a problem and nobody can predict where they will land between now and Christmas morning. The growers will be lucky if there should be no slump. The double violets are not popular in the New England section. The singles are each year more and more in favor with the buying public. Poinsettias are very fine this year and the price of \$4.00 and \$5.00 a dozen is really low for the quality of the goods. Lilies are very slow this week as are also all bulbous flowers. All in all, however, the promise is good for the latter part of the week and we hope the results will bear out this favorable outlook.

BUFFALO

Only a few days and then the battle is on, but everything is in readiness for the final rush if there is to be one. Holly and decorative materials have moved well, but there has been no rush in disposing of cut flowers. To the six days of warm rain must be laid the blame. There was a good supply of everything; in fact, in some lines,—paper whites, chrysanthemums and violets,—an over-supply. There were plenty of carnations, Beauties and other roses, lilies, lily of the valley, peas, mignonette, stevia, and an abundance of greens, but the market wanted one thing, and that was a demand for the goods.

CHICAGO

A shortening up of stock, particularly in color, was noticeable early in the last week before Christmas, which opened clear and cold and was ideal for Christmas shopping. Considerable difference of opinion still prevails, among both wholesalers and retailers, regarding the outlook for a lively Christmas trade, the depressing effect of two weeks of cloudy, damp weather being bound to bring unwelcome results in quality and quantity of stock. Plants, as usual, have a conspicuous part in the holiday sales, the usual kinds being in every window. Poinsettias never were better and pans of various sizes, trimmed with scarlet crepe paper and ribbon, are an attractive feature of all the retail flower stores; Azaleas, cyclamen, erica, begonia and the berried plants are all fully up to former years and never have there been more tasteful hampers to hold them. Holly and other ilex are unusually full of large

THE THREE KILLARNEYS AND MY MARYLAND

In planning for Christmas our growers did not aim to have a great big crop then, and nothing afterwards, but a steady cut right through the season, thus giving us an excellent supply and high grade quality too, for New Year's.

Flower Market Reports

(Continued from page 914)

ping trade already have orders enough on their books to consume most or all of their stock and in some instances where special varieties are wanted orders have been declined. Those who are holding back their stock, however, in hope of exorbitant prices the last of the week, bid fair to be disappointed as they have been in the past.

With the retailers, also, the books are showing long lists of advance orders, and the usual lull before the storm, now on, is giving opportunities to make up hampers, wreaths and pot covers and put the store in readiness for the rush at the end of the week. A few pessimistic ones are looking for trouble and will probably find it, but for the most part the trade in general is optimistic in its outlook now a week before Christmas. Greatly to the relief of all the weather is cooler and a light snow has fallen, but there is very little sunshine.

The market at the opening of this week was the usual one of the week preceding a holiday important to the trade. The supply of things generally is meagre and scarcely sufficient is on hand for requirements. Most of the wholesalers assert that their entire supply for the holidays is about ordered up. The weather has undergone a wonderful change. Two weeks of dark rainy weather gave way on Monday of this week to cool, clear, bright days with plenty of sunshine. The business in special supplies has been extremely good; the business in boxwood, too, was all that could be desired. Roses and carnations will naturally be the leading flowers for the holidays with poinsettias coming in for their share. The supply of the first two promises to be the normal Christmas cut, at least, if it is not better. The last-named has never been better, and many large orders for same for Christmas and New Year's have been placed. In roses the choice ones are selling very much more quickly than short stock. Bulbous stock is plentiful—in fact, last week and the early part of this one more narcissus were offered at times than the market could readily absorb. The same is true of Roman hyacinths. In this category of slow-moving stock chrysanthemums might also be added. The supply of violets, especially doubles, and lily of the valley will be large and the market for them will undoubtedly be good. Orchids are more or less scarce and at times it is almost difficult to have orders filled.

<i>Orchis Longiflorum</i>	3.00	to 5.00	4.00	to 0.00
<i>Callas</i>	1.00	to 3.00	1.00	to 8.00
<i>Lily of the Valley</i>	1.00	to 3.00	1.00	to 3.00
<i>Narcis, Paper White</i>	1.00	to 1.50	1.00	to 1.50
<i>Roman Hyacinths</i>	1.00	to 2.00	1.00	to 2.00
<i>Chrysanthemums</i>	4.00	to 20.00	4.00	to 20.00
<i>Violets</i>40	to .75	.40	to .75
<i>Stevia</i>	1.00	to 1.50	1.00	to 1.50
<i>Mignonette</i>	1.00	to 4.00	1.00	to 4.00
<i>Daisies</i>	1.00	to 1.50	1.00	to 1.50
<i>Sweet Peas</i>50	to .75	.50	to .75
<i>Gardenias</i>	15.00	to 35.00	12.00	to 35.00
<i>Adiantum</i>50	to .75	.50	to .75
<i>Smilax</i>	8.00	to 10.00	5.00	to 10.00
<i>Asparagus Plumosus, stragg.</i>	15.00	to 35.00	15.00	to 35.00
" " & Soren. (too bchs).....	15.00	to 2.00	15.00	to 25.00

Other lines show that stevia is proving quite a factor. The supply of lilies is not over-large and the request for them is not very active. The green goods market in all lines is ample.

The market is in a waiting mood this week. Last week was a very unprofitable one for everybody and large quantities of stock had to be sacrificed. The week closed most unsatisfactory. The present week opened with more reasonable weather and a very light supply on many important lines, but there was no vigor or other evidence of healthy conditions in the demand and the low values of the preceding week were still in force. The end of the week will, no doubt, see some lively hustling but, from the scarcity of some things at time of writing these notes, notably red carnations,—we expect to see confusion and disappointment for many thoughtless operators at the wind-up. Bulbous stock is being rushed in in unwieldy quantity, much of it being lost. Tulips of the familiar December type are seen on the wholesaler's tables—forced at an impossible date and indicating a wanton destruction of bulbs that, if given time to develop, would have given salable blooms. Violets are not moving as in other years. Poinsettias are unprecedently good, both as plants and as cut blooms. Very few flowers are shown in the florists' windows, cybotiums, poinsettias and a selection of berries and plants, with green wreaths, forming the display, mainly. All the green material dealers report a tremendous demand for their goods.

Up to the middle of last week business was fairly good, but there was a great falling off later. It would seem as if the retail-

ers had been so busy getting ready their baskets and other plant combinations for the Christmas trade that they had no time to push cut flowers. And the weather was bad also. At this writing prospects are fairly good.

Do You Know What You Want?

Look in the "Buyers' Directory" of this issue and you will probably find represented there somebody who can supply you. It's a good plan to look it over every week, for the weekly changes and additions are many.

See ?

In writing to Advertisers kindly mention Horticulture

WASHINGTON NOTES.

William F. Gude last week appeared before the Senate Committee on Post Offices and Post Roads and presented the bill drawn up in the interests of the Society of the American Florists and Ornamental Horticulturists on the matter of the inauguration of a federal parcels post.

Although the installation of new fixtures has not been completed, J. A. Philipps has taken possession of his new store on Fourteenth street, at the corner of Harvard street, N. W. This store is far superior in every way to the old location at 2926 Fourteenth street. The display windows run around two sides of the store and are admirably located so that his stock can be shown up in fine shape. Until the first of the year Mr. Philipps will use the ice-box, counters, etc., taken from the old store, but after that time they will be replaced by others entirely new and more in keeping with the handsome store he now occupies.

J. H. Small & Sons last Monday opened their new store in the Woodward Building, Fifteenth and H streets, N. W., to the public. This new store, without a doubt, is the handsomest in the city, is in a building but just completed and is well fitted for the handling of the firm's business. It is laid out in the shape of an "L" and display windows are on three sides. The fixtures are all of mahogany, the tables marble-topped. On either side of the office in the center of the side facing H street are the large tiled ice-rooms. Rustic arm chairs and marble garden settees are located here and there about the store for the comfort of patrons. The floor is of cement. In an ell off the main store are the private offices of the firm. A stairway leads to the basement beneath the store, entrance to which is obtained from the ell. Here large ice boxes have been installed and there is ample space for the work rooms and for the storage of boxes and material. There are five large windows and one entrance on the H street side and a large window and entrance on the Fifteenth street side. Twelve electric lights suspended by large oxidized chains from the ceiling, and other stationary fixtures on pillars light up the main store while the ell is lighted by clusters of electric lights.

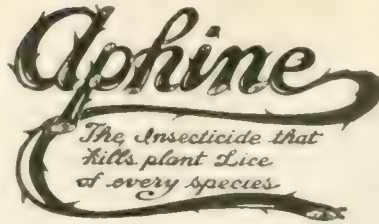

Visitors—J. W. Grandy, Norfolk, Va.; Mr. Newton, of the Newton Floral Company, Norfolk, Va.; Mr. Hill, Richmond, Ind.; Elmer D. Smith, Adrian, Mich.; Richard Vincent, White Marsh, Md.; Robert Shock, in the interests of M. Rice & Co. and Mr. Goudy, for H. A. Dreer, Philadelphia, Pa.

PHILADELPHIA NOTES.

John Burton is about again, after a three week's tie-up with a sprained ankle.

A serious fire occurred at the Yates greenhouses, Mt. Airy, on the morning of the 17th inst., resulting in the destruction of three houses and contents. The latter consisted mainly of bedding stock, Easter lilies and rhododendrons. The fire originated in the boiler shed.

M. Rice & Co. had the busiest week of the season last week with orders received from all parts of the country by telegram and otherwise. Orders were invariably shipped same day as received. Visitors were so numerous

Destroys green, black, white fly, thrips, red spider, mealy bug, scale and all plant sucking insects. An excellent cleanser for decorative stock.

\$2.50 per gallon, \$1.00 per quart.
U. S. AND CANADA.

FUNGINE

Has no equal for destroying mildew, rust and other plant fungi.

Fungine will cure bench rot and is proving an excellent remedy for the protection of cuttings and young stock against the various blights.

\$2.00 per gallon, 75c. per quart.
U. S. AND CANADA.

For sale by seedsmen.

E. H. HUNT, 131 N. Wabash Avenue, Chicago

that no record could be kept of them. The demand for red goods was so great that everything that even looked like red was bought up. They report the largest December business in their history.

Visitors: Wm. Feast, of Samuel Feast & Son, Baltimore, Md.; J. K. M. L. Farquhar, Boston, Mass.; Chas. L. Seybold and Edwin A. Seidewitz, Baltimore, Md.; W. F. Fancourt, Doylestown, Pa.; Bert Brotherton, Port Huron, Mich.

BOSTON NOTES.

Penn Bros. have added a temporary store next door for the sale of holiday stock.

A very interesting display of photographs of Western China will be on view all next week, including Sunday, at Horticultural Hall. These views, 400 in number, were taken by E. H. Wilson who had charge of the exploring expedition of the Arnold Arboretum. The exhibition is free to the public.

The window displays, always good at this time of the year, are better than ever this season. Holly trees in tubs seem more in evidence this year, and excellent specimens are being received at the markets. The poinsettia, of course, holds a prominent place. Tasteful and attractive windows are the rule all along the line.

Dec. 14, '11.

Please discontinue adv. in HORTICULTURE—it worked wonders.

RED ROSE NURSERIES,

FOR SALE: Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick. A and B quality. Market dropped. Now is the time to buy and save money. Address: [illegible]

Flower Market Reports

Great preparations have been made all along the line—plants, flowers and greens of all kinds in immense supply. No scarcities anywhere reported on anything. Holly not extra good this year. Many dealers are seriously thinking of giving up handling this item. The kicks have been so numerous the past few years from circumstances entirely beyond the dealers' control that ill-feeling as well as loss of profits has resulted. Cut boxwood has been handled here in immense quantities. This item is getting more and more popular every year for wreath-making, etc. This year the quality is the best that ever has been seen here—fine, deep green, glossy and not too much stem. The southern holly (ilex vomitoria) was on the market in limited quantity. It has small, shiny, claret-red berries, and small leaves, 1/2 to 1 inch long, and is quite an attractive item at this season.

There was a pretty good demand for stock in this market last week, that is, of the higher grades, with prices a little stiff. As to Christmas prices the commission men say that it all depends on the weather, and that the supply would regulate the price. California violets came in in large lots and sell cheap. Carnations are holding up well. Roses ran a little higher, but there were enough for the demand in all varieties, with the exception of Beauties. Roman hyacinths and paper whites are a glut. Other staples normal. Wild smilax has had a big call for decorating shop windows and all other greens have sold well. Prospects good for a great business for Christmas. Many advance orders have been placed.

Due to the hot WASHINGTON weather the roses that came in last week were very much developed and sold cheap. Early this week it became cooler and the conditions of the market have changed somewhat, the roses shortened up some as to quantity, but there was not a corresponding increase in price until Tuesday. There are plenty of cattleyas on the market—in fact, the supply is more than equal to the demand. Dendrobium formosum has also been very plentiful, the supply exceeding the demand. Cypripediums went pretty well. Rhinodendron violets seem to hang fire, and consider-

able went to waste. Gardenias move well. As HORTICULTURE goes to press it is reported that an exceptionally good week may be expected by the Washington florists, and in fact, the whole of 1911 is likely to exceed 1910 in the amount of business done, regardless of a very late season and poor weather conditions.

CAMBRIDGE, MASS.

NEWS NOTES.

Canandaigua, N. Y. A nursery will be established here by Edward Sick on land recently acquired.

Madera, Calif.—Property which they will use for nursery purposes has been purchased by Kirkman & Son of Fresno and Merced.

New York, N. Y.—A new wholesale cut flower firm, under the name of Pritchard & Donahue, has opened headquarters in the Coogan building.

Pittsburgh, Pa.—The greenhouses of James Gross, Larimer avenue, have been purchased by Ray Dasbach, who will use them to grow decorative stock.

Marlboro, Mass.—Joseph Barry, of Hildreth street, has purchased the Warren Howe place on Main street, where he will carry on a greenhouse business.

Danville, Pa.—The firm of Briscoe & Benthley, proprietors of the North Independence street greenhouses, has been dissolved, Mr. Benthley becoming sole proprietor.

Milwaukee, Wis.—The greenhouses of R. Heiden, Green Bay road, have been leased by Henry Dobberphul, formerly in the plant department of Holton & Heinkel Co. He intends to grow stock for the local market.

Milwaukee, Wis.—Property at 581 to 583 Jackson street has been purchased by Fred B. Davis, proprietor of the M. A. McKenney Co., retail florists. The building will be remodeled and used as headquarters for the company.

Jacksonville, Fla.—The Tomlinson-Key Floral Co., who have just opened a flower store at 40 East Fourth street, is a new firm. The company is capitalized at \$10,000 with T. W. Mitchell, president; W. W. Key, vice-president, and H. H. Tomlinson, secretary. H. H. Tomlinson has charge of the store and W. H. Key of the greenhouses. They intend to build greenhouses at once.

Longmeadow, R. I.—Wm. C. Pratt & Son, Maplehurst greenhouses, who are just completing a 28 x 123 foot house have one section already filled with plants. They are growing carnations, sweet peas, tomatoes, lettuce, cauliflower and bedding plants. The company is composed of Wm. C. Pratt and Stuart G. Pratt. E. A. Mallette, formerly florist and greenhouse man at the Rhode Island College, Kingston, R. I., is superintendent.

TWO BEAUTIFUL HOLIDAY BOOKS.

L. C. Page & Co., publishers, have just issued two notable volumes in The Art Galleries series which should make acceptable holiday gifts for anyone interested in art literature.

The British Museum, Its History and Treasures, is a book of engrossing interest, by Henry C. Shelley, author of Inns and Taverns of London, a writer of recognized ability and graceful style. There are sixty fine illustrations, reproductions of the priceless treasures which have been assembled from all parts of the earth in this great London institution, and depicting in the most vivid manner the arts from the beginning of civilization down to the present time.

A companion volume for the foregoing is The Pennsylvania Academy of the Fine Arts and Other Collections in the Historical Society, Independence Hall, etc., in Philadelphia, by Heten W. Henderson. This book is profusely illustrated with full-page plates in duogravure. The story of the pictures is told in a most interesting way, and will furnish perennial pleasure to its possessor. Like the book previously mentioned it is handsomely bound in cloth with richly decorated cover. The price of each of the volumes is \$3.00 net. L. C. Page & Co., publishers, 53 Beacon street, Boston.

GREENHOUSES BUILDING OR CONTEMPLATED.

Albion, Mich.—Arthur H. Dew, one house.

Monson, Mass.—C. M. Gibbs, one house.

Brighton, Wash.—A. E. Buxton, addition.

Franklinville, N. Y.—Fred Myrick, one house.

New Haven, Conn.—Sokol Bros., Hard street, one house.

Springfield, O.—American Rose & Plant Co., four houses each 24 x 150.

Smith's Ferry, Mass.—Gallivan Bros., of Holyoke, two houses 85 x 200.

Lord & Burnham Co. have secured the following contracts: Mrs. W. G. Nichols, Rye, N. Y., range of conservatories; Wm. H. Gregory, Sea Girt, N. J., iron-frame house, 35x175; J. W. Swayne, Sea Girt, N. J., house, 30x100; Burt Olney Canning Co., Oneida, N. Y., nine iron-frame houses, 33x150 each, cost \$30,000, for vegetable forcing.

INCORPORATED.

Port Huron, Mich.—The Peninsular Seed Co., capital stock \$40,000.

Hodgenville, Ky.—The Red Hill Cemetery Commission. Incorporators, William Miller, John Read and Charles Williams.

SIGGERS & SIGGERS

PATENT LAWYERS

Box 9, National Union Building
Washington, D. C.

M R F T Peabody, of Albany, N. Y., recently bought the old Puryr property right in the center of the city. The ground space was somewhat limited so this curved eave greenhouse was placed right

on the property line with a high retaining wall at the back.

The plan and design is such that it forms a most attractive boundary to the grounds on that side. We mention these

facts just by way of encouragement if you are perplexed where to locate your house.

Send for us, we will help you solve the problem, whether for town or country location.

HERE is a model of simplicity and practicability in greenhouse construction. No elaborate descriptive matter or voluble philosophy is needed in connection with the above illustration. The practical gardener will recognize the good features at a glance. My modern patented curved eave construction, so well shown in the picture, may have imitators but it has no competitor. If you would like to know more about it, write for details. Many of the finest ranges of greenhouses in the country are of this construction. **Investigate, Before You Build.**

ARTHUR T. BODDINGTON, Seedsman, 342 W. 14th STREET, NEW YORK CITY

Campanula persicifolia grandiflora

Karl Foerster in his new book on "Modern Hardy Herbaceous Flowering Plants" (published in German) classes the peach-leaved campanulas among the "floral nobility" of the garden, in rank close to *Lilium candidum*. *Campanula persicifolia* and its various improved forms have been introduced to American gardeners and landscape architects and offered on the lists of leading firms for a score of years, but whether there has ever been any concerted or even one notable effort made to bring out and use this most beautiful type of bellflowers to its full effect may be still doubted. Two years ago the members of The German Society of Garden Artists and Landscape Architects went on a tour of inspection of parks and gardens in Great Britain. Their report was full of interesting criticism, but all appeared most favorably impressed by the skillful and artistic work in English gardens and I noticed special stress was laid on the beautiful displays of peach-leaved campanulas they had seen. What has the best type of American gardens of the present day to show of such displays? I am afraid very little indeed. Beds or good-sized plantations of *Campanula persicifolia* at flowering time offer such magnificent subjects for the camera that reproductions of photos would have appeared as star illustrations in every volume of our horticultural periodicals by the dozen.

That the peach-leaved campanulas are extremely popular among flower loving and—be it understood—flower-buying society, is clearly evident in our northern summer resorts. The keeping qualities are excellent; stems of well-grown stock are 2 to 3 feet high, abundantly set with buds and the flowers if handled with reasonable care will stand shipping to considerable distances. It seems likely that some day a few out of the pathfinder-class of American florists will begin to grow this beautiful garden flower systematically and make a profitable side issue for late spring sales out of it. The herd instinct will bring followers. Then the large and attractively-shaped single and semi-double bells will become a permanent and familiar sight in the miscellaneous section on the May and early June counters of commission man and retailer. Advanced that far, the private and landscape gardeners are bound to see their chances at last.

To grow *Campanula persicifolia* exclusively for the cut flower trade means, according to my observation, to treat the plants as biennials—that is, to sow the seed each spring during February and March under glass; transplant seedlings into flats as soon as they can be handled and in May plant in richly manured garden soil out of doors in permanent position where they are intended to be flowered the following season. Well-grown two-year-old stock, especially if left undisturbed, will produce flowers as freely as shown in our illustration. The grandiflora single varieties appearing in pure white and several clear blue shades should in my opinion receive consideration first. Both the white and blue are nearly equally in demand.

As for the sale of plants conditions are different. Seedlings, no matter how good the strain may be, can not be absolutely relied on to come true to variety and color. To meet the ever-present call for single and

semi-double and double varieties in district colors plants must be treated as perennials. Propagation in this case has to be done by divisions or cuttings after flowering. *Campanula persicifolia* requires a good leaf-covering throughout the north and a light protection of evergreen boughs or clean straw in the middle states.

Richard Rothe

Northeast Harbor, Maine.

Rev. C. S. Harrison in Summer Land

Editor HORTICULTURE:

I find myself in this land of dreams and of eternal summer. It is so different from our northland. Last week I called on a large nursery and they were shipping stock. Every day in the year, except Sundays, is delivery day—no packing houses or burying stock. What impresses one most is the rapid rise of land. I think they must fertilize it with yeast. You are almost afraid to go on some pieces through fear it may rise while you are on it! Ten acres soon becomes twenty, and then forty, and then one hundred and sixty. Men look me squarely in the eye and say "we get better returns from ten acres than you can from your one hundred and sixty in Nebraska." Now we consider eastern Nebraska as the garden spot of the west and I feel so ashamed I can hardly look up.

My son, a few months ago bought a lemon orchard—10 acres for \$10,000. He went home, turned around a few times, and when he got back they told him it had doubled in value. He took me out to see it. It is a fine piece; but I am lame and did not venture on it. I didn't know but it would take a rise with me on it and didn't know how I could climb off. Harry, however, walked over it, and got off before it had time to rise. He examined the trees and found every one alive and doing well.

In the neighborhood of Whittier are immense orchards of English walnuts. They were looking fine and were bearing well. But I saw they were cutting them down by the thousand. "How is this?" I asked. They were returning \$100 per acre a year, with a prospect of twice that when they got their full growth. The reply was "we can't stand any such little measly return as that, so we are planting lemons which will give a yearly income of \$500 to \$1,000 per acre per year," and so it goes.

You needn't wonder if I get a little dizzy looking on. But this is great. I left a Nebraska blizzard last month and came to this summer land and it is delightful. When a man gets to be near 80 he cannot stand the cold. Years ago in Minnesota I traveled when the mercury was frozen solid, and now zero weather is too much. I expect to stay at this hotel, "The Occidental," all winter. Living is very cheap. You can get good meals for 15 to 25 cents and rooms are reasonable.

Yours,

C. S. Harrison

Seasonable Notes on Culture of Florists' Stock

ASPARAGUS

The florist who has to grow a good deal of green to meet the demand of a retail trade should obtain some fresh seed of *Asparagus plumosus* and *Sprengeri* as soon as it can be obtained and sow it. They are both slow in starting and require all the time from now on to grow into good serviceable stock. Sow the seed in flats or pans in a compost of loam three parts, leaf mold two parts and enough sand to make it porous. Cover the seed about an eighth of an inch deep. They will germinate freely if stood in a temperature of 65 or 70 degrees at night and kept covered with some glass, and also shaded until they start to come up. When they show up well stand them near the glass and keep them moist and in the same temperature that they were started in. They can be potted up into 2-inch pots when they are about two or three inches high using a mixture of fresh loam three parts, cow manure one part and a little sand. When they have filled these pots with roots shift into 3-inch and again into 4-inch pots which will serve until they are planted out into their permanent beds.

BEDDING BEGONIAS

Where you grow a variety of bedding begonias sow the seed now and grow on, which will mean nice bushy plants in four-inch pots by May. The soil in which you sow the seed should be sifted fine. A good compost to use is fresh loam two parts, leaf-mold two parts and a liberal allowance of sharp sand. Press the compost moderately firm, make the top smooth and on this scatter the seed, but not too thickly as the seedlings usually damp off if too close together. Cover very lightly and press again. Shade and cover with a pane of glass until the young plants come up strong. Place these pans in a temperature of from 60 to 65 degrees at night where they will get a little bottom heat. See that they are kept in a moist state and give them a place near the glass. After they have made sufficient growth they should be pricked out in the same compost in pans or flats and given a slight shade from the midday sun. As they grow and have made leaves an inch or two long they can be moved into 2½-inch pots, giving them a richer compost. These are good bedding begonias: *Begonia Semperflorens Atropurpurea*, *Semperflorens Coccinea*, *Semperflorens Zulu King* and *Erfordii*.

CARE OF GERANIUMS

Now when the Christmas trade has caused a perceptible clearing of benches it is well to remind the grower of geraniums. All these that have been potted, but for the want of room are in crowded quarters, should now be given more room between the plants, for there is nothing more detrimental to the perfect development of all bedding plants than crowding. Don't neglect your cuttings which for want of room are still in the sand. Use a good fresh loam three parts, well-rotted manure one part and give them either 2½ or 3-inch pots; all those that were potted up early can by this time have a shift so as to keep them moving along. Give geraniums a good sunny bench in a house where the temperature runs anywhere from 55 to 58 degrees at night, and give ventilation whenever possible to keep them stocky and

healthy. If short of stock you can propagate right along until the end of January and have fine bedding stock. From now on do not allow your plants to stand still for the want of care. It pays to pot and shift as they may require it. For the best up-to-date varieties consult HORTICULTURE's advertisers.

HAVE YOUR PROPAGATING BENCH READY

Now when the most propitious season is rapidly drawing near for the increase of all kinds of stock make a good beginning in advance and have everything in good working order. All the benches should be examined as to their soundness and repaired where necessary. Always make it a point to give your cutting benches a thorough cleaning by washing down the sides and bottoms with a strong force of water and then give the entire surface of the benches a whitewashing of hot lime which will help to keep down the cutting bench fungus. See that your heating system under the benches is in a reliable condition to furnish the proper amount of bottom heat. A safe rule to observe with all cuttings is to have a steady temperature in the propagating sand of about 10 degrees higher, according to the variety of stock propagated, than that in which the plants were growing. Place an inch or more of gravel or any other coarse but clean material in the bottom for drainage. On this put three or four inches of clean, sharp sand, spread nice and even, which should be packed down firm and smooth, after which the bed should have a good watering which will soak it through.

HYDRANGEAS FOR EASTER

Hydrangeas intended for Easter should be transferred now into a cool house with a temperature of about 45 degrees at night and by the 15th of January they should have a gradual rise to 50 degrees during the night with about 10 or 15 degrees of an increase with sunshine. Water freely at the roots to keep them in a moist condition. When the weather is good give them a spraying overhead two or three times a day to encourage an even break of growth. As they begin to start well into growth they should be allowed a bench where they will get all the light and sunshine possible. The temperature can be gradually increased until by the end of February the highest degree in heat should be reached, which can be anywhere from 65 to 70 degrees at night. This temperature should be held until the trusses begin to show color when they should be given a gradual reduction of temperature.

ROOTS STORED UNDER BENCHES

Don't fail to examine all roots and tubers stored away under the benches. They should be gone over about every three weeks to see what condition they are in. See that they are not kept too wet in some places while in other parts they are liable to suffer from dryness. The proper way to keep them is to have them covered with sufficient soil or sand just moist enough to keep them in a plump state. When they are kept either too wet or dry they lose a lot of their vitality and even if they should grow the growth will be weak in comparison with those that have been carefully looked after.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Begonia Rex; Carnations; Care of Smilax; Grafting Roses; Marantas; Orchids.

Fruits and Vegetables Under Glass

TOP DRESS STRAWBERRIES

Strawberries started the first of the month will have commenced growth and the roots will be seeking nourishment. Turn a plant or two out of their pots to ascertain if the roots are working, then proceed to give them a top dressing of good rich soil or add a small percentage of lasting manure to it. Remove as much of the surface soil as you can before adding the new and when so doing leave enough room for the water. This top dressing plays an important part with early strawberries, as no more feeding is advisable until the fruit has set, when they will take all you can give them. To feed from now on would grow a quantity of soft foliage; a large percentage would be liable to go blind and when the plants should feel the effects of strong "drink" and put more energy into all their functions they are already immune to it and you do not get the desired effect. Raise the temperature of the house to 50 to 55 degrees at night. Watch that the hose does not miss the underneath side of the foliage or red spider will soon present itself. Great care should be exercised in ventilating as strawberries are very susceptible to mildew.

PEACH BUDS DROPPING

To make the statement that when a peach or nectarine tree is dormant is a very critical time with it seems to be outrageous, but the fact remains that with a little neglect now—a tree thoroughly dried out, a dry warm atmosphere or a fluctuating temperature—down comes the whole lot of flower buds; you cannot glue them on again; a season's work is lost. This bud-dropping is not known outside because the trees never become dry at the root during this season, nor does the atmosphere. Late root pruning will often cause buds to drop if coupled with any dryness. Look to the borders periodically and do not let them get dry. Pot trees placed in any cool house to avoid frost on the pots, will need a more rigid attention as they dry out more quickly. Syringe the trees over on fine mornings two or three times a week which will keep the buds plump. Dropping often commences immediately the house is started. There is no cure but lots of simple preventives.

HISTORY OF THE VINE

The vine shares with the fig the distinction of being one of the oldest cultivated fruits in existence. The Holy Bible makes reference to them in more than one place and the works of ancient writers disclose the fact that the vine has always been cultivated wherever civilization has brought man to his rightful sphere in the world and the climate allowed it to grow. Even where climatic conditions were averse, artificial means have been brought into use and we find the vine one of the first subjects to be grown successfully under glass. The grape vine, *Vitis vinifera*, was found growing wild in western Asia, northern Africa and southern Europe

and from this the numerous varieties we have in cultivation today have descended—some the results of nature's work as they grew in their wild state, others the direct result of man's forethought and hybridising, the greater part of which has been done under glass. Varieties suitable for cultivation in the vineyard and field have also come under these guiding influences to be greatly improved. It is those especially adapted for growing under glass that we are interested in at this time. New introductions are sent out yearly, each claiming some improvement, but there are a few real old ones which have held a reputation for years and cannot be replaced by the novelties. A most notable example of this is Black Hamburg, which needs no introduction to readers of *HORTICULTURE*—undoubtedly one of the first grapes to be imported into this country. Could many well-known varieties trace their ancestry back far enough I think they would eventually find a stray line of Black Hamburg work in somewhere. The majority of grapes grown under glass owe their origin to the skill of the gardener. The grape vine has always enjoyed a long life and with care will last a lifetime.

TOMATOES

Tomatoes planted for the fall and winter supply will soon finish and to keep up a supply a sowing should be made now. It does not pay to keep old plants which are about worn out, for the sake of a few fruits which may still be hanging. The seedlings can be grown on into six-inch pots before planting them on the benches and then only half the old crop can be done away with and replenished with young plants. As soon as these younger ones commence fruiting plant up the other section. Numerous varieties are grown good under glass and can be classed as those bearing large fruits and others having rather small but very solid fruits. The latter are often preferred on account of shipping well, and are more economical when using small quantities. Stirling Castle and Sunrise are notable examples of these. Of the larger varieties Best of All and Comet are good. Sow the seed in well drained pots or pans in a light compost and place in a temperature of 65 degrees.

CUCUMBERS

Cucumbers that are wearing out can be replenished in the same way as the foregoing. Make a sowing now and plant up half the space allotted to them when ready. Improved Telegraph and Rochford's Market, two of the older school, are still in the lead for productiveness. Peerless and Matchless are finer fruits but do not produce the crops of the former two. Sow the seeds singly in three-inch pots and give a temperature of 70 degrees.

The death of Victor Lemoine

We little realized when we published the portrait and a partial resume of the life work of this venerable horticulturist in our issue of last week that the eminent subject of our sketch had, a few days before, passed on to his reward. There is nothing we can add now to what we have already said as to the great and lasting benefits which horticulture the world over enjoys as the result of Victor Lemoine's genius and industry. America extends to France her sincere condolence and sympathy in the irreparable loss which she and the whole horticultural world has sustained in the passing away of her distinguished son. *Du Il repose en Paix!*

Fragrant Gladioli

In the brief paper by A. E. Kunderd which appears in this issue mention is made of the possibility of yet evolving the long-sought fragrant gladiolus. It certainly would be a big boom for the gladiolus if the sweet odor of the German iris or freesia, for instance, could be added to its other charms. This leads us to inquire whether any one knows anything of *Gladiolus odoratus*. In Robert Marnock's Horticultural Magazine, as long ago as July, 1838, there appeared an article on this species, a specimen of which had been sent from the Botanic Garden, Hull, England, and which was accompanied by a colored illustration showing the flower to be of the nanus type, white delicately tinted with lavender and lemon. Is this species still available or is it in existence under some other botanical name? A really fragrant parent would be a big step toward the realization of Mr. Kunderd's ambition.

A favorite for Centuries

Our frontispiece depicts one of the most useful members of the *Campanula persicifolia* family and a practical article on this subject from the pen of Richard Rothe appears in another column of this issue. *Campanula persicifolia* has been a garden favorite for centuries. Under the title of Bell-flowers John Parkinson in his *Paradisi in Sole Paradisus Terrestris* wrote nearly 300 years ago as follows:

Campanula Persicifolia alba vel coerulea, the Peach-leaved Bell-flower white or blew hath many tufts, or branches of leaves lying upon the ground, which are long and narrow, somewhat like unto the leaf of an almond or Peach tree, being finely nicked about the edges, and of a sad greene colour, from among which rise up divers stalkes, two foote high or more, set with leaves to the middle and from thence upwards, with many flowers standing on several small foot-stalkes, one above another, with a small leafe at the foote of every one; the flowers stand in small greene huskes, being small and round at the bottome but wider open at the brimme, and ending in five corners, with a three forked clapper in the middle, set about with some small threds tipt with yellow, which flowers in some plants are pure white, and in others of a pale blue or watchet colour, having little or no sent at all; the seede is small, and contained in round flat heads, or seede vessels. The roote is very small, white and threddy, creeping under the upper crust of the ground, so that oftentimes the heat and drought of the Summer will goe near to parch and wither it utterly. It requireth, therefore, to be planted in some shadowie place.

All the Bell-flowers do grow in our Gardens, where they are cherished for the beautie of their flowers.

The Peach-Bels as well as the others may safely be used in gargles and lotions for the mouth, throat, or other parts, as occasion serveth. The roots of many of them, while they are young, are often eaten in sallets by clavers beyond the Seas.

AMERICAN BULBS.

A paper read before the Western Gladiolus and Dahlia Society by E. S. Thompson.

Perhaps this subject may not appeal to many of you as being of special importance, but to me it is of wide significance. Always, as far as our history is concerned, we have looked to Europe for bulbs that are sold. A few of course in the homes of the people, but as for growing on a scale commensurate with the demand, home raising was hardly thought of until close on to the original World's Fair, Chicago, 1903. But since that date it has grown by leaps and bounds, until today we are largely supplying our own country, and also exporting by the million. In tuberose bulbs we beat the world, on the south Atlantic coast; and from Long Island, thanks to the enterprise of John Lewis Childs millions of gladiolus bulbs are exported to Europe and other countries. The greatest drawback seems to be to grow what is known as the Dutch bulbs and lilies. However, we are finding that the Pacific northwest in the vicinity of Puget Sound is well adapted to growing this class of bulbs, as also is the Richmond district on the Atlantic coast. This United States has climatic advantages excelled by none, and it needs only the push of Yankee ingenuity to develop other lines fully as much. Tiger lilies can be grown on the East Lake Michigan coast as cheaply and as well as in Holland. Of course we have to contend with the cheap labor of other countries but we have an offset in the saving of freights and the loss in carriage, that oftentimes leaves a good margin of profit of itself.

One of the greatest difficulties we have to encounter is the slogan dear to the heart of many, "Importer." As though something imported was vastly superior to anything grown in the usual every day way at home. One of the obstacles to progress in any line of work is the desire of some to be exclusively superior to their fellow mortals, and it applies to the bulb business as well as to a host of other lines. But when men who specialize in any one line join together and work for mutual advancement, all are benefited.

Of late years our leading seedsmen are sending all over the world for new and rare things. Childs has done this to a large extent, and although at times over-colored regarding results, we are greatly indebted to him for the marvelous advance in the gladiolus. Farquhar of Boston has been doing valu-

able work with lilies. With Burbank and Groff, as well as our own Kunderd and Koerner, rapid progress is pushed on apace with the glorious gladiolus. What we need now is co-operation among growers and a disposition to play fair with results, and by this means gain for ourselves advantages that should accrue to the hybridizer and grower. Our country can produce almost anything in the bulb line the world produces, and we are truly only on the brink of the great stream of success—not only with the gladiolus and dahlia, but with numerous others of the world's favorites in flowers produced from a bulbous c-

BEGONIA GLOIRE DE LORRAINE

One of the late Victor Lemoine's best productions.

rhizome root. California and the Pacific coast, the Fruit Belt of Michigan, Long Island and the south Atlantic coast, are producing today vast quantities of bulbs that know no superior, and other parts of our country are coming to the front in an equally meritorious manner.

Brothers let us go at this matter with a determination to get the best out of it and nothing will stop the progress. Our slogan should be "Grow our own stuff," and we can, if we will. I believe our catalogue men would gladly patronize home growers did we but produce as well and reasonable. A Long Island grower now in France wrote to HORTICULTURE deploring the shortage of seeds in European

crops this season, and said "America must grow her own seeds." How about our own bulbs? They are of equal importance and deserve equal attention. The field is broad and valuable, and by no means occupied. Let us during the coming year try out more of the varieties sold by seedsmen in this country, and come up here another season with a show of bulbs that for value will fairly take the trade off their feet.

DYNAMITING LAND.

On Dec. 20th a most interesting demonstration in dynamiting land was carried out on the estate of Mr. Colgate Hoyt, Centre Island, Oyster Bay, L. I., before a delegation of members of the Nassau County Horticultural Society. The demonstrators were Joseph Robinson, superintendent of the estate and John T. Ingram, florist, Oyster Bay. What was accomplished clearly exemplified the efficacy of the action of dynamite in improving certain soil conditions and in cheapening labor.

A section of ground of a swampy nature, having a rather good top soil, but an understratum of hard impervious material, thereby causing a sour undrained condition was dynamited to produce a natural drainage through the shattering of this understratum.

Another demonstration was that of dynamiting places for tree planting, so as to lessen the manual labor attached to the digging of holes and to improve the condition of the soil. Also tree stumps were dynamited, with the result of a considerable lessening of manual labor in their removal. The results obtained throughout were most satisfactory, and clearly exemplified that dynamite is a potent factor in land operations.

The demonstrators are enthusiastic and energetic men and no doubt would be only too glad to relate the results of their labors in this field of work.

JOHN F. JOHNSTON.

Lawrence, Mass.—After conducting the most successful auction sale which this city has ever known, Thornton Brothers have entirely closed out all of their immense stock of jewelry, silverware, cut glass, china, bric-a-brac, etc. They will still remain in the florist business at their present location.

Price quotations given in the advertisements and reading columns in this paper are for the trade exclusively.

Obituary.

Victor Lemoine.

Victor Lemoine, horticulturist and officer of the Legion of Honor of France, died at Nancy on December 12, 1911, in his 89th year.

Victor Lemoine was born at Delme (Lorraine), Oct. 21, 1823. His ancestors for generations back had been gardeners. After his college studies at Vic-sur-Seille he devoted several years to traveling and then worked successively for Bauman at Bollweiler (Lorraine), and Louis Van Houtte of Ghent (Belgium), also Mieliez of Lille (France), and in 1850 established himself, with small means, as a florist and landscape gardener at Nancy (Lorraine). There he was a member of the town council from 1871 to 1888. On June 13, 1885, he was made a knight and on April 3, 1894, an officer of the Legion of Honor of France. Lemoine was Hon. Vice-President of the Central Horticultural Society of Nancy, Hon. Member of the National Horticultural Society of France, the Royal Society of Agriculture and Botany of Ghent, the Royal Horticultural Society of Munich, etc., and was also corresponding member of the Massachusetts Horticultural Society, Boston. He had the honor of being the first foreigner to be presented with the Veitch Medal by the Royal Horticultural Society of London, and it is only a few weeks since he was awarded the George R. White Medal of Honor by the Massachusetts Horticultural Society.

In our issue of December 23 we endeavored to set forth, although in a somewhat fragmentary manner the stupendous achievements of Victor Lemoine in the realm of horticulture. There is no spot on this wide world where plants and flowers are raised, where we do not find representatives of Lemoine's hybrids or introductions; no florist or gardener, who has not, at one time or another, handled Lemoine's productions, ignorant though he may have been of the name of his benefactor. If Victor Lemoine's garden children were to be all eliminated from our nurserymen's stock and catalogues it would leave an appalling void and a large share of our garden beauty would be gone. If *Begonia Gloire de Lorraine* alone should be taken from the florists' holiday plant list, how sadly we should miss it!

So, although he had almost reached four-score and ten years, his death will

be profoundly felt and regretted. Fortunately the work of Victor Lemoine, like that of the Darwins, is a family work. Mr. Emile Lemoine has co-operated with his renowned father for many years and the third generation is already interested in it, and it is safe to say that the name will still for many years to come be intimately associated with the advancement and elevation of horticulture.

Charles J. Schultz.

After a long and painful illness Charles J. Schultz, father of Oscar J. Schultz, the well-known florist of Newport, R. I., died at his home in that city on Dec. 23rd. "Charley" Schultz, as he was familiarly called,

VICTOR LEMOINE

was a native of Sweden and came to this country when a young man and has been a resident of Newport for nearly forty years. He was a carpenter by trade and for several years previous to his illness was engaged with his son Oscar about the greenhouses, making himself so valuable to the concern that he will be much missed. He had a wide circle of acquaintances who also very much regret his departure.

Jonathan Periam.

Jonathan Periam, died at his home 6842 Perry street, Chicago, Ill., on Dec. 9, aged 88 years. He was a frequent contributor to the agricultural press. Mr. Periam was born in New York in 1823 and went to Chicago in 1838. He held the position of editor of the *Prairie Farmer* for 15 years, retiring 13 years ago.

Sir Joseph Hooker.

Sir Joseph Dalton Hooker died at his residence at Sunningdale, England, on Sunday, December 10. He was born at Halesworth, Suffolk, on June 30, 1817, hence was in his 95th year. He was the second son of Sir William Jackson Hooker, the distinguished botanist and director of the Kew Gardens, and in the last named succeeded his father in 1865. The *Gardeners' Chronicle* for December 16, devotes over four pages to an account of the life and labors of this distinguished scientist. We can only quote a few paragraphs:

"His death will be mourned throughout the world of science and in the larger world, wherever there are men to rever-

ence a noble life and to honor splendid achievement. For Hooker was not only the greatest of British botanists; he was one of the great outstanding men of his age. That position he won by the hardest yet surest of ways, that of doing his special work supremely well.

"Though he lived far beyond the allotted span of human life, Hooker, the man of science, never grew old. As each new generation of botanists arose, it turned to Hooker as its acknowledged master. The man who had been alive and at work in what seemed to the younger men a remote past was still alive and at work in their midst. The man who led the van of scientific progress in the '50's of last century remained, by right of brain and example, our leader till his death.

"The advancing years seemed almost to pass him by, save that they brought him the sacred accompaniments of old age—love, honor, and obedience, troops of friends, till at the age of 94 death surprised him whilst he was yet at work.

"Those of us who knew Hooker in his hale, serene old age might well have imagined that his life had been spent in sheltered retirement from the vexations, troubles and perils of the world. Yet to few men, in whatsoever walk of life they be, falls such an eventful career as he chose for himself.

"Unlike so many journeys the labors of which cease with the homecoming, Hooker's travels involved years of arduous toil after the wonderful harvest of plants which he collected had been garnered in. The working out of his own collections was in itself a herculean task, and beside the plants which he had gathered with his hands, Hooker received countless specimens from his correspondents in the four quarters of the globe.

"Hooker's claims to immortal memory in the annals of science rest by no means solely on his contributions to systematic botany. A great observer, the range of his observations in the countries which he visited included geological, geographical and meteorological phenomena."

"Yet, remarkable as were Hooker's achievements as a traveller, collector, and observer, they do not complete the tale of his contributions to knowledge. To many of us, at all events, Hooker's most abiding title to lasting memory is his epoch-making work on the geographical distribution of plants, and the application of that work to the elucidation of the problems of evolution and the origin of species."

"Of the honors which fell to Hooker, it

is scarcely necessary to speak. He received from the Royal Society the Royal Copley, and Darwin medals, and attained in 1873 to the highest position open to a British man of science, the presidency of the Royal Society. In 1877 he was created K. C. S. I., and 10 years later, on his 80th birthday, he received the Order of Merit."

Dr. J. Q. Mulford.

Dr. J. Q. Mulford, florist, Lebanon, O., was killed by a cave-in of dirt and concrete in a ditch he was repairing. He retired from medical practice several years ago and had built up a good florist business.

Fred H. Johnson.

Fred H. Johnson, who for years conducted greenhouses on Whitney avenue, Olean, N. Y., dropped dead in the Llewellyn greenhouses on Dec. 18. He was well known in Olean and for some time had been employed in the greenhouses where he died.

G. Van Antwerp.

G. Van Antwerp, of G. Van Antwerp & Son, seedsmen, Mobile, Ala., died on Dec. 10.

Gervase Pfordt.

The funeral of Gervase Pfordt, of J. G. Pfordt's Sons, florists, 897 Broadway, Albany, N. Y. took place Dec. 20.

A SUGGESTIVE EXHIBITION.

During the present week and up to Sunday night, December 31, there is a very interesting and instructive public exhibition of photographs by the Arnold Arboretum at Horticultural Hall, Boston. The photographs, which are most beautiful examples of expert photography, were made by E. H. Wilson on his Chinese plant collecting journey and depict wild mountain scenery, trees, shrubs, herbs and characteristic architecture, each arranged in classes respectively and comprising four hundred pictures.

It would take a whole book to adequately describe the various subjects depicted and we can here only glance at a few specially noted in a brief survey. Chinese tree species, as a general thing, run smaller in size than their relatives of other countries. Notable exceptions are the Chinese saffras, *S. Tzumu*, which is shown to grow to a height of 100 ft. and with a girth of 15 ft., bigger by far than our American species. A *Rhododendron*, unnamed species, is represented by a specimen 40 ft. high and with 5 ft. girth, bearing fine trusses of rosy red flowers. A *cercidiphyllum* is shown 80 ft. high with a solitary trunk, 7 ft. girth, growing in an open park-like country. Mr. Wilson says that the *cercidiphyllum* attains to

larger size than any other tree in Asia. One photograph shows a giant stump of one which is 89 ft. in height and has a girth of 55 ft.

Shrubs are very numerous in this collection. Gems such as *Dentzia Wilsoni*, *Spiraea Veitchii*, *Buddleias*, *Cotoneasters*, *Clematisses*, etc., in wide diversity of forms are shown. Of roses the *Banksia*, *multiflorum*, *moschata* and others well known are shown in their native habit. A *Syringa* with pendulous flowers, as yet unnamed, and *Itea ilicifolia* with floral "tails" one foot to one and a half ft. long catch the eye at once. (The last named received an award of merit in London recently). *Cornus Kousa*, a

THE GLADIOLUS AND ITS FUTURE.

A Paper read before the Western Gladiolus and Dahia Society by A. E. Kunder.

So much has been written and said for the gladiolus concerning its culture both out of doors and under glass for bulbs and cut flowers that I will not attempt to suggest anything on that line, as you are all experts on that subject. I will only mention C. L. Allen's "Bulbs and Tuberous-rooted Plants," and the excellent new book on the gladiolus by that veteran authority, Matthew Crawford, as two of the most reliable sources of information regarding the same.

Although a lifelong breeder of the gladiolus, it should take a much better tongue and pen than mine to do this subject the justice it so well deserves. I have been so busy admiring and working with the gladiolus that I have never thought much about its present or future. How well the gladiolus has taken care of its good reputation you are all aware, and I feel certain it will do even better in time to come. Of course I am an enthusiast as a breeder of this—one of the most magnificent of all the many beautiful flowers—and as such have a boundless confidence in its still greater future, both commercially and artistically. Commercially its usefulness is only just being recognized, and its future in the hands of the plant breeder holds almost boundless possibilities. Only a few days ago some of its friends have reported new beauties in foliage variation, and I believe much can be done to develop this feature alone. In addition to the reported foliage with white striping, great improvements may be expected with the normal color. For

a number of years I have been selecting and breeding with this object in view, and found the gladiolus as susceptible along this line as in the improvement of its flowers. Tall, wide, rich green foliage, tall, slender and graceful foliage, of forms best suited to the usual straight-stemmed varieties, and some beautiful slender and drooping foliage, best suited to blend with what is known as bent or crooked-stemmed varieties. That there is a future of usefulness for the last-named form of stem, I feel confident.

Other features of form and type will suggest themselves to any experienced observer, and I am confident the long-wished-for sweet-scented varieties will yet be perfected. Much has already been done; more will be accomplished by careful and patient workers in the development of this flower.

Reproduced from the Gardeners Chronicle

SIR JOSEPH HOOKER

near relative of our own *C. Florida*, has a wealth of bloom—flowers 5 in. across. "Boston Ivy" is seen growing wild on tree trunks. There are *Aralias*, *Crataeguses*, *Bamboos* in graceful poise and many unnamed species in *spiraes* and other garden shrubs that will in due time become familiar ornaments of our American gardens. Lilies, gentians and many other beautiful subjects are displayed in the herb department.

The impression one carries away after seeing this suggestive display is that it will be many, many years before all the rare floral treasures of that vast mountain country are brought to light. The discoveries thus far, remarkable as they are, are only a beginning. Untold wealth is still hidden in those untrodden fastnesses.

CLUBS AND SOCIETIES.

NATIONAL ASSOCIATION OF GARDENERS.

President Thomas W. Logan has made the following appointments on the Board of Directors of the National Association of Gardeners, same to take office on January 1st, 1912:

To serve for three years:—John Shore, Harrison, N. Y.; Peter Duff, Orange, N. J.; Thomas Proctor, Lenox, Mass.; Alexander McKenzie, Glen Cove, L. I.; William Kleinheinz, Ogontz, Pa.; W. N. Craig, North Easton, Mass.; James Stuart, Manaratoneck, N. Y.

To serve for two years: John Dodds, Wyncote, Pa.; T. J. Kempton, Baychester, N. Y.; Robert Angus, Tarrytown, N. Y.; Carl Schaffer, Tuxedo Park, N. Y.; E. Wetterlow, West Manchester, Mass.; Robert Bottomley, New Canaan, Conn.; E. Trethewey, New York, N. Y.

To serve for one year:—A. Bauer, Deal Beach, N. J.; J. F. Huss, Hartford, Conn.; H. F. Whitney, Fishkill, N. Y.; Alexander Fraser, Newport, R. I.; James Bell, New York, N. Y.; Edward Kirk, Bar Harbor, Me.; Wm. Pirle, Buffalo, N. Y.

Xavier Schmidt, of Philadelphia, Pa., has been appointed assistant secretary and W. E. Maynard, of New York City, organizer, for the coming year.

The officers elected for 1912 are:—President, Thomas W. Logan, Jenkintown, Pa.; vice-president, Martin B. Tillotson, Great Neck, N. Y.; secretary, Martin C. Ebel, Madison, N. J.; treasurer, Roy H. Caverly, Lowell, Mass.

Considerable outside interest is being manifested towards the National Association since its last convention which was held in Madison, N. J., in October last. The organization itself has become much interested in the contemplated International Show to be held in New York City in April, 1913, and some of its members are preparing to have large exhibits. A prominent gardener, superintendent of one of the largest private estates in the east, has already declared himself to Chairman Charles H. Totty, of the National Flower Show Committee, as expecting to bring more than a car load from the estate over which he presides, which is located in one of the adjoining states to New York, to the 1913 exhibition. Some keen competition may also be looked for from the National Association members at next annual show of the American Sweet Pea Society, to be held in Boston, in July, 1912, this society having promised to provide liberally for special gardeners' classes.

A great growth is looked for in the National Association of Gardeners during the year 1912. President Logan will call a meeting of the new Board of Directors early in January to meet in New York City, and some important matters will be brought up looking to the future development of this organization, which promises soon to become an important factor in the field of horticulture in this country.

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

The annual election of officers of the Morris County Gardeners' and Florists' Society was held at the December meeting with the following results: Robert Tyson, president; John Dunn, vice-president; Wm. H. Duckham, treasurer; Edw. Reagan, secretary; Robt. M. Schultz, assistant secretary. The same executive committee rules our destinies as last year, only

one reitring; president John Downing takes the place of John Dunn, who is vice-president elect. Charles H. Totty gave us a much appreciated talk on the novelties of 1912. It was an impartial discourse, he giving due credit to novelties of merit wherever he could find them.

As fine a lot of poinsettias as could be seen was staged by Harold B. Vyse of "Glimpsewood Manor." They were grown in 5-inch pots, and averaged over 18 inches across. This is a favorite with Mr. Vyse, and the way it responds to his treatment makes one marvel—leaves clean down to the pot, and the color most intense. Cultural certificate was awarded.

A. Herrington, as spokesman for the members, congratulated the retiring president on the success of his administration and the progress made under him. A rising vote of thanks was given to Mr. Downing. The officers-elect accepted their responsibilities in neat speeches, each promising to do his best, and the whole society promising to stand behind them in their efforts. In a preliminary report the treasurer reported the society in remarkably fine standing from a financial point of view. E.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the geraniums, "General Wayne," "Aviator Rodgers" and "Aviator Atwood" by F. H. DeWitt of Wooster, Ohio, becomes complete.

Objection having been received to the registration of the geranium "Day-break," one by that name already being on the market, the name has been changed to "Dr. Wylie" and the registration hereby becomes complete.

As no objections have been filed, public notice is hereby given that the registration of the Cannas, "Conowingo," "Splendour," "Wabash," "Beacon" and "Kate F. Deemer" by The Conard & Jones Company of West Grove, Pennsylvania, becomes complete.

Objections having been withdrawn, public notice is hereby given that the registration of the rose "Double Improved White Killarney," by S. J. Reuter & Son, Inc., of Westerly, Rhode Island, becomes complete.

As no objections have been filed, public notice is hereby given that the registration of the Althea Wm. R. Smith, by Henry A. Dreer, Inc., of Philadelphia, Pennsylvania, becomes complete.

H. B. DORNER, Secretary.
Dec. 21, 1911.

CLUB AND SOCIETY NOTES.

The next meeting of the Gardeners' and Florists' Club of Boston, January 16, will be ladies' night, with entertainment and dancing in order.

The Yonkers (N. Y.) Horticultural Society elected the following officers: Howard Nichols, president; Francis Drexler, vice-president; Louis Taylor,

secretary; Wm. Watt, corresponding secretary; Peter MacDonald, treasurer; Wm. A. McDonald, Thomas Mahone, Louis Milliot, H. Wells, Robert Rochran and N. Neidig, executive committee.

A very pleasant evening may be expected when the Washington Florists' Club meets in January. Since the appointment by the president of an entertainment committee the latter has been busy mapping out a program for 1912, and with good results. On January 2nd the first of a series of lectures will be given by a prominent man connected with the business on a subject of interest to all. Special invitations will be sent to each of the members to bring their florist friends with them and a large attendance, no doubt, will be had. The members of the committee in charge are Otto Bauer, N. L. Hammer and A. O. C. Oehmler.

PERSONAL.

Thos. Windram of Cincinnati left on Wednesday for the Lake Shore Ferneries in Florida.

Walter T. Gordon, formerly with the Washington Florist Co., Washington, D. C., is now located at Kramer's F street store.

Samuel Neil of Dorchester, Mass., was thrown from his delivery wagon, on December 23 at the corner of School and Washington street, his horse having taken fright and run away, colliding with another wagon. Mr. Neil was badly shaken up and bruised about the head.

Hardy Pritchard, who for the past twenty years has been in the employ of Gude Brothers, 1214 F. street, N. W., Washington, D. C., was married on the morning of December 14th to Miss Maddigan. The couple are now happily located in their new home, recently purchased by Mr. Pritchard for his bride, at 1008 Euclid street, N. W.

Visitors in Boston: Mr. De Graaf, Leyden, Holland; Mr. Harbison, Highlands, N. C.; John Urquhart, Newport, R. I.; H. A. Bunyard, New York; A. N. Pierson, Cromwell, Conn.

Philadelphia Visitors — Walter George Strange, representing Skidelsky & Co., New York and Philadelphia; Edwin A. Seidewitz, Baltimore, Md.; Charles L. Smith, Harrisburg, Pa.

PUBLICATIONS RECEIVED.

Annual Proceedings and Bulletin for 1911, American Rose Society. Secretary Benj. Hammond has done a nice piece of work on this publication and it will be welcomed by rose enthusiasts generally as an evidence that their national organization is very much alive and doing earnest and useful work. The great show in Boston last March and the meeting in connection therewith form a good part of the book. The treasurer's report shows up encouragingly. The book comprises about 100 pages and is embellished with some fine engravings.

CHICAGO NOTES.

Christmas Plants.

Plants gained another step in the race with cut flowers. Stores were so filled with them and they were so attractively dressed up with every embellishment known to the supply houses that it would have been a big Christmas had the cut flowers been left entirely out. From the little three-inch pot plant to the large hampers—reaching the limit probably in a giant combination affair seen at Harry C. Rowe's, with an immense azalea as a crowning piece surrounded by assorted plants in side pockets and which brought well up toward the hundred-dollar mark—all was artistic and appealed more strongly than ever to the Christmas shopper. Nothing new was brought out in plants, but skill in growing them just right and delivering them to the retailers at the right moment played a big part in the general success of the week. Azaleas were queen of the day, with poinsettias a close rival. Ardisias, cyclamen, begonias, heather, primula, obconica and araucaria well trimmed with ribbon and bringing good prices as Christmas trees, gave splendid variety from which to choose. Fleischman has one entire side of the store covered with steps reaching to the ceiling filled with plants and at eight o'clock Saturday evening the sign "closed" was put upon the door to keep out would-be buyers.

Trade Jottings.

Tony Einwich, who has charge of the cut flower department of the E. H. Hunt Co., is ill.

Michael Leider of South Evanston is having five new vegetable houses, 30 x 270 feet, Foley construction. Work begins this week.

Kennicott Bros. Co. will begin the New Year by making its store a model one. Every facility for handling consignments will be provided, and a new office, fully equipped with the latest devices, will be at the disposal of the bookkeeping force.

The Foley Manufacturing Co. will open a branch office in New York in January, an announcement of which will be made later. This company has discontinued the manufacture of sash and doors and will devote all their time and space to greenhouse material. This is probably the only firm in Chicago doing so. Phil. Foley has just returned from a trip to Richmond, Ind., where he closed a contract with E. G. Hill Co. for four new flat rafter houses, 34 x 400 feet.

SOME CHRISTMAS GIFTS.

W. J. Thurston, manager of the Boston Flower Exchange was surprised by his friends in the market on Saturday morning, Dec. 23, with the gift of a superb 23-jewelled Waltham watch and chain, both of solid gold. The presentation speech was made by President W. C. Stickel, who is a past master in oratory of this sort, amid much enthusiasm and applause. On Monday morning there was another excitement when salesmen, buyers and all got together again and presented to assistant superintendent George Hamer a purse of fifty dollars in gold.

At the Boston Co-operative Flower

Market there was a similarly pleasant affair on Saturday morning when superintendent Knight was made the recipient of a fine gold Hamilton watch and fob in recognition of long and faithful service, the presentation speech in this instance being made by John McFarland.

C. HARMAN PAYNE.

Horticulture's European Representative.

Herewith appears the portrait of a gentleman well-known by name to the readers of HORTICULTURE by reason of his frequent communications in our columns on horticultural doings abroad, and widely known in Great

C. HARMAN PAYNE

Our Special Correspondent on the Job.

Britain and on the Continent of Europe as a literateur and prolific journalistic writer on horticultural topics and—first and foremost—as a passionate lover of and literary exponent for the chrysanthemum, a flower with which his name is permanently linked. Mr. Payne holds a unique position in the horticultural world. He has served in innumerable instances in positions of responsibility in connection with exhibitions in England, and also in France where he is, we should say, just as much at home as in his native country, besides Belgium, Holland and elsewhere. The fact that this versatile gentleman has not yet put in an appearance on American soil is the only indictment we can bring against him. We hope he will make the trip in the not far distant future and we are greatly mistaken if he does not instantly learn the language of the country and the shibboleth of "the boys." He is already a member of several American societies.

MUSTARD AND CRESS.

By the Sage of the Ginger Gar, Philadelphia.

"Send a flowergram—passage prepaid to any part of the country—" is the way a clever retailer's card reads. This may not be exactly clear to the wayfarer but it is at least suggestive—leads to inquiry and paves the way for business.

Wanted, a job! George Craig has been in the flower business some forty years, and has made a success of it. The solicitous philosopher suggested that it was time to retire. George looked rather surprised but at the same time interested. "Why so?" said he. The S. P. snorted, and asked in that aggrieved and peevish tone one uses in replying to a superfluous question. "Why, you've got money enough!" "Yes," admitted the veteran; "but what else could I do? Here I've been shedding radiance and fragrance among my neighbors all my life. Why should I quit? What more delightful or beneficent thing could I do to justify my continued existence in this world?" The S. P. gave that up but feels sure there are thousands among your readers of a pessimistic turn of mind who can suggest a good job for this man.

There is always a right way and a wrong way to repeat a thing. The head of the house had been interviewed. The interviewer said at the windup: "All right then, I'll go see your partner about it, and see if he has not got some fresh ideas he can add to the subject." The head of the house said: "Very well, but see that they are not 'too fresh.'" And so with a smile he went off to lunch. Now, there is a coolness in the firm because the interviewer did not put in *the* smile to the junior but said that his partner said he was not to be too fresh. A joke is not a joke to some people unless you start in smiling before you tell it to them—and like as not they'll laugh at the wrong place, or in some cases laugh even if its not funny, just because they hate to appear stupid!

"Cats!" Abbreviations are convenient and among busy men inevitable. The flower business is no exception. It has its "mums" and its "cyps" and its "maids," and many others—mysterious things to the uninitiated. Robert Crawford was waiting in his usual Chesterfieldian manner on one of the four hundred—a lady—the other day. She wanted some orchids. There was some little doubt about it. Robert excused himself for a minute and turned to the 'phone. Getting the proper number, this was what apparently was said—"Hello, that you Charlie? Say, Charlie, got any cats? No, they won't do, cats is what I want. No, they have to be cats, and good ones, too. What's the matter with you, can't I make you understand? What's that, you say 75c. apiece?" At this point the lady who had been per force listening could stand it no longer and broke in—"Why, Mr. Crawford, I've got a nice pair of kitties I could let you have,

a black and a maltese, and you can have them for nothing!"

The statement in a recently printed "Nosegay" to the effect that the new recognized Christmas decorative flower, the attractive poinsettia, was introduced to the east about 11 years ago by a pittsburg artist, who found it in California, is refuted by George C. Watson, the well-known writer on horticulture, who says: "No. The honor belongs to a Philadelphian. The poinsettia was introduced to the world about 80 years ago by Robert Buist, the famous seedsman and flower grower, who obtained the first plant through M. Poinsett, then Mexican Minister at Washington.—Philadelphia Record.

The above emphasizes how we, of the present day, forget to credit our wonder-workers of the past. We have interviewed many poinsettia growers in Philadelphia and not a solitary one was aware that it was a Philadelphian who first introduced this plant to the world. Just think of it. There's "we" a blasted foreigner—has put them straight—on things they ought to be proud of. Another thing: whenever you see a ridiculous statement in your daily paper—hit it just as George C. Watson does. That's duty and good citizenship.

Under the Holly.

"This is not the mistletoe,
It is merely holly.
You've no right to kiss me so
This is not the mistletoe,
That has berries white as snow;
These are red," said Molly.
"This is not the mistletoe,
It is merely holly."

"This must be the mistletoe.
Though it looks like holly.
Though the berry's red," says Joe.
"This must be the mistletoe.
Every berry's blushed to know
'Twas not fair as Molly.
This must be the mistletoe,
Though it looks like holly."

—Tom Puss

Philadelphia, Pa.—The past year has been the most successful one in the history of Rice & Company, the increase in the volume of business being so great that the present extensive quarters have proven inadequate to properly handle it. Plans have been made for an enlargement of the plant which will greatly increase the facilities of the various departments and enable this progressive house to not only maintain but even improve upon the service for which it is noted. To this end the firm has leased the large three-story building, 120 Camac street, this building being directly back of their present seven-story establishment. The two structures will be connected by bridges, and when alterations are completed Rice & Co. will have the largest floor space of any florists' supply house in the country.

HEADQUARTERS FOR Araucarias, Ferns, Palms, Rubbers, Etc.

Araucaria excelsa, 6-in. pots, 4, 5, 6, 7 tiers, 20 to 35 inches high only 60c., 75c., \$1.00, and \$1.25.

THE NEW ENGLAND NURSERIES, Inc.
BEDFORD, MASS.

FEDERAL NURSERY INSPECTION AND QUARANTINE.

A committee composed of W. P. Stark, Louisiana, Mo., president of the National Nurserymen's Association, and Prof. S. J. Hunter of the University of Kansas, state entomologist, appointed by the Western Association of Nurserymen are in Washington this week, working for desired legislation. The nurserymen desire a national system of inspection and quarantine against injurious scales and insects. The committee, however, will oppose the Simmons Bill for the purpose, now before Congress. The objection to the bill is that it does not carry sufficient appropriation and gives absolute power over the nursery business to Dr. L. O. Howard, entomologist of the Department of Agriculture, who the nurserymen say has been unfair to them.

H. P. Roses, Shrubs, and Herba-
ceous Plants.

P. OIJWERKERK, 216 Jane St., Westchester Hgts.
P. O. No. 1, Hoboken, N. J.

The Western Association favors the creation of a commission of seven men modeled after that of the state of Kansas to enforce the inspection. The Kansas plan has proven very efficient. On this commission would be two nurserymen selected by the national association of nurserymen, two state entomologists selected by the national association of entomologists and two members selected from the National Pomological Society, these six to be appointed by the President. The seventh would be the chief entomologist of the Department of Agriculture, Doctor Howard.

East Hartford, Conn.—Frank W. Richardson, of F. W. Richardson & Co., florists, 680 Main street, was taken sick Dec. 20 and an operation performed. It is reported that he is as comfortable as could be expected.

Seed Trade

Northfield, Minn. An interest in the North Field Seed Co. has been purchased by J. M. Punderson.

"An Autumn Dividend" is the subject set forth on the handsome calendar which the C. Herbert Coy Seed Co. of Valley, Neb., are sending out for 1912. The autumn dividend is an embossed picture in natural colors of Indian corn and pumpkin very expressive and appropriate.

CATALOGUES RECEIVED.

W. E. Kirchhoff Co., Pembroke, N. Y.—Trade List of Gladiolus Bulbs.

George Wittbold Co., Chicago, Ill.—Decorative, stove and bedding plants; wholesale list

Valdesian Nurseries, Bostic, N. C.—Price list of trees, privets, hardy perennials, small fruits, etc.

Barteldes Seed Co., Denver, Colo. Descriptive List of Barteldes' Western Seeds, 1912. An interesting list of 116 pages. Includes a good line of implements and supplies.

Elmer D. Smith & Company, Adrian, Mich.—Chrysanthemums and Asters, 1912. A wholesale list, filled with useful information in a condensed form and copiously illustrated.

Rustic Manufacturing Co., 150 Nassau St., New York.—Illustrated Catalogue of Rustic Structures, with price list of arbors, tables, window boxes, bird houses, pergolas, etc.

W. Atlee Burpee & Co., Philadelphia, Pa.—Burpee's Annual for 1912. This is the 36th year of this comprehensive catalogue and it is still, as heretofore, "The plain truth about the best seeds that grow."

John Lewis Childs, Flowerfield, N. Y.—Trade Price List of Choice Gladioli and other Summer Flowering Bulbs and Plants, for 1912. Among the varieties illustrated in this list are some of the finest novelties ever introduced.

S. S. Pennock-Meehan Co., Philadelphia, Pa.—New Forcing Roses for 1912. Illustrations of Double White Killarney, Killarney Queen, Lady Hillingdon, Princess de Bulgarie roses and Wodenethe or "White Beauty" carnation are given.

INCORPORATED.

Dansville, N. Y. The Allen Bailey Tag Co., capital stock \$60,000. Incorporators, J. J. Bailey, S. E. Allen and J. A. Bailey.

St. Louis, Mo. Oak Hill Cemetery Association, capital stock \$50,000. Incorporators, T. R. Pullis, Roderick A. Allen and others.

Rochester, N. Y.—M. Cushman & Co., to grow and deal in seeds, plants and agricultural supplies, capital stock \$30,000. Incorporators, H. B. Hurlaway, W. G. Cushman and M. Cushman of Rochester.

SCALINE.

M. C. Ebel, of the Aphine Manufacturing Company is engaged in experimental work with a new product which his company expects to place on the market very shortly. He has named it "Scaline," the material being a combination of insecticide and fungicide a composition of oils and sulphur. It is intended for the destroying of the San Jose scale, the cottony maple aphid and other sap-sucking insects inhabiting fruit and ornamental trees, shrubs and hardy plants generally, and at the same time a remedy for the control of the various fungi affecting trees and shrubbery. Mr. Ebel contends that his material can be applied as safely in the growing as in the dormant season, and asserts that tests made last summer on foliage in bloom showed no ill effects from the spray. It "Scaline" will do what is already claimed for it there is no doubt that a broad field is awaiting it.

The Dalles, Ore.—The greenhouses of Dr. William Taelman have been purchased by Randolph Gibson. The plant was established 12 years ago by Dr. Taelman and comprises two houses each 20x50 feet. He has made a specialty of carnations and chrysanthemums.

Price quotations given in the advertisements and reading columns in this paper are for the trade exclusively.

Flower Market Reports

BOSTON

Christmas experience varied somewhat in this market. To most of those interested it was a great and glorious occasion when goods sold themselves and buyers were hungry, far and near. To those, however, whose principal stock in trade was white carnations, lily of the valley, longiflorum lilies, paper white narcissi or Roman hyacinths the occasion was not all one sweet song and when it happened that the owner of such goods had withheld them from market until Saturday morning the music must have been indeed mournful. But, the growers of white goods will have their innings in due time and no doubt things will even up fairly in the long run. The white goods above named dragged badly and in addition there was a disappointing reluctance in the double violet sales. Each year sees the single violet get a stronger lead over the double and it is now a fact that the once popular Marie Louise would scarcely be missed if eliminated from the New England trade entirely. One wholesaler asserts that he could have used without effort 10,000 more Beacon carnations than were to be obtained and many more Richmond roses. Indeed, the rose market was very brisk—white sorts alone excepted. In plants, the business done was in excess of any previous record. Everything sold out with the exception of azaleas and a few poinsettias of poor quality. Azaleas were evidently in rather too abundant supply, although they were mainly of the red sorts, and quite a few were left unsold. As a contrast to previous years, Lorraine begonias sold splendidly, owing probably to the lower prices quoted this season. Ardisias were the best sellers in the entire list. Greens sold well but there was far too much boxwood on hand and some dealers have a good supply left for the balance of the season. Very little domestic mistletoe was in evidence but there was plenty of the imported and it was of remarkably fine quality.

CHICAGO

Last week verified the old saying that, "All's well that ends well." The last week before Christmas opened very quietly and many were doubtful of the Christmas sales being up to an average year, but the latter part of the week brought a rush of business, the equal of which has not been seen by some of the oldest in the business. Wholesaler and retailer alike are pleased with the business done and the last week of 1911 opens with prices almost as high as on any day of the past week, while stock is inclined to be short, carnations especially. No decline in prices is expected until after the New Year. White flowers are a little more in evidence and are needed for the extra funeral work coming at this time. Violets are plentiful enough for the demand while sweet peas are coming about as fast as needed. Paper white narcissi and Roman hyacinths have not moved particularly well all the season, lily of the valley taking the lead with white flowers. Chrysanthemums are of the past and Christmas greens are following, leaving the standbys, carnations and roses, to supply

GARDENIAS

As a midwinter flower nothing is more appreciated than the Gardenia, with its purity and fragrance. A fine crop of the very best quality flowers.

the bulk of trade and at prices satisfactory to the grower. Advance quotations had been rather high and it was a question if they would hold to the end of the week, especially as the

tendency to hold back stock was evident early in the week, but prices held up steadily and Christmas day found the only stock slow to move

Flower Market Reports

(Continued from page 935)

was white carnations and white roses. Even these were sold at fair prices, considering the stock. American Beauties were scarce as had been anticipated, all other stock being abundant. As one dealer remarked, "It was not scarcity of stock, but abundance of buyers that kept prices up." Carnations were picked so close to meet demand that at this writing (December 26), they are selling for \$6.00 and \$7.00 a hundred. All in all, it was a record-breaking Christmas week, exceeding all expectations.

The market is easy
CINCINNATI after the Christmas rush. Usually on the 26th the buyers are "up against it." This year, however, the supply was easily adequate and promises to be so for the balance of the week. Still the successive rainy dark days make prognostications as to the availability of a certain flower or stock in general more or less uncertain. Everyone says that Christmas business was very satisfactory. Red was in most demand and outside of poinsettias the quantity of no other flower of this color was sufficient. White tended to drag and trail after its colored brethren. Narcissus did not move near as fast as in past years in spite of the general good quality of the supply offered. All roses cleaned up. American Beauties are in short supply and promise to continue so for a fortnight at least. Killarney cleans up quickly each day. The offerings of Bride and Ivory are large and of good quality. Among the carnations dark stock, in red and rose pink shades scarcely filled the requirement, and even now clean up as fast as they arrive. Enchantress, too, moves well but some white, however, were left over at the close of Christmas business. Lilies of quality are good property while the seconds find a slow market. Callas are selling well. Violets did not quite clean up entirely.

The market for
NEW YORK Christmas was well supplied with everything in seasonable cut flower stock. With the exception of the inevitable holiday demand for red carnations and red roses and the corresponding advantage to any other flower approaching this color there was an abundance of every variety and grade to suit the buyer and prices were fairly satisfactory to all parties concerned; although moderate on some lines as compared with previous similar occasions.

Weather conditions suited the trade exactly. It will be many years in all probability before a situation equally satisfactory to all interests will present itself. It had been expected that there would be, as in the past, an unwieldy glut of violets but this was not so. The quality, however, was not up to expectations. The plant trade took care of itself nicely. The growers were all cleaned out well in advance and the retailers made a splendid record in this department, there being almost nothing left as a reminder of Christmas on the morning of the 26th except empty shelves and stands. This week finds the market in healthy shape, supply not heavy, quality good, prices steady and the weather outlook good for a continuance of these conditions for a week at least.

The Christmas cut
PHILADELPHIA flower market here was very good, and we think we can safely say that it was considerably larger in volume than last year. This applies not only to local trade but also to shipments to interior points—indicating that the cut flower business in general held its own and more, not only here but in our smaller tributary cities and towns. The general disposition was to make prices a little lower than last year, rather than to insist on higher prices and take chances—so that perhaps the actual cash returns were probably no larger than last year; but a much larger quantity of stock was moved.

Roses went over well indeed and everything fit was cleaned right. Pink Killarney was good as to size but a little off as to color on the early shipments due not to holding but to the cloudy weather, but the later arrivals were good. Richmonds were excep-

tionally good. Beauties also were very good and sold well although at slightly lower figures than last year. The demand for white roses although not extra was enough to take care of all the stock that arrived. Carnations sold exceptionally well. The quality was probably the best ever seen here at Christmas and the prices realized were satisfactory. Beacon was of course the leader in the favorite red section and much of the stock brought as high as fifteen while very few reds of any variety brought less than ten. Orchids were a little more plenty this

(Continued on page 952)

FLORISTS' HARDY SUPPLIES

Dagger and Fancy Ferns, Moss,
 Galax, Laurel Roping, Southern
 Smilax, Boxwood, Etc.

Hartford & McDonough
 70 PEMBERTON SQ., BOSTON

IN THE SWIM

Flower Market Reports.

(Continued from page 951)
year, and sold for rather less money—quality was excellent. The best quality Gardenias were on the scarce list with demand and price about the same as last year. There were a lot of poor ones that hung fine. Violets, both single and double, were in good demand, bringing slightly better than the usual prices. Lily of the valley and longiflorums were about normal. Mignonette was extra good—much better than last year and went briskly. Bouvardia was an important item and although not overly plentiful was of unexpectedly good quality and sold well. There was a good demand for such scarce items as Mrs. Aaron Ward and Mrs. Taft roses and many orders had to be turned down as the crop was off. Greens went about as usual. No special features worthy of mention. Holly wreaths were in brisk demand.

Not for forty years SYRACUSE has such a Christmas been known as the one just passed. No snow, or the merry jingle of the sleigh bells, but in their place the streets are dusty, the grass green and many dandelions picked. This weather has continued for nearly three weeks—and as a result many bulbs are pushing up through the ground. Holly was plentiful, the quality not up to grade as to berries. Christmas trees were of good quality and in quantity sufficient to supply the demand. Much damage has been done in some of the parks and private grounds by men and boys cutting the tops off some of the best fir trees and it is a matter of much regret that they were not caught and severely dealt with. Trade was very good in flowering plants, well up to the average. Some claim a large increase over previous years. Lorraine and Cincinnati begonias were everywhere, and over-stocked; people are getting shy of them and the florists must find something more lasting or fall back upon some of the old varieties. Poinsettias sold well and are quite popular, especially in pans with ferns or asparagus. Azaleas were not over plentiful or extra good as a rule. Little stat moved off slowly and was cleaned out. Cyclamen were good sellers and rather to a limited extent. Primula obconica and chinensis sold fairly well. The public want bright-colored flowers at this time. Ardisias, peppers and cherries were good sellers and few are left over. There was no advance in the price of most plants—a very noticeable falling off in the sale of palms, rubbers, araucarias and other house-plants. Medium priced

Destroys green, black, white fly, thrips, red spider, mealy bug, scale and all plant sucking insects. An excellent cleanser for decorative stock.

\$2.50 per gallon, \$1.00 per quart.
U. S. AND CANADA.

FUNGINE

Has no equal for destroying mildew, rust and other plant fungi.

Fungine will cure bench rot and is proving an excellent remedy for the protection of cuttings and young stock against the various blights.

\$2.00 per gallon, 75c. per quart.
U. S. AND CANADA.

For sale by seedsmen.

Flower Market Reports

Continued from page 952

There is hardly time to let the readers of HORTICULTURE know what we did in St. Louis this busy Christmas week but from the reports up to noon Monday, Dec. 25th, from all the leading florists about town it appears that they all were very busy—in fact, had all they could do to get out their many orders for delivery. The weather was fine and delivery was easy. Prices on cut flowers were high, both wholesale and retail, and the bulk of the trade was in plants, especially out in the West End where they are all sold out of plants. Poinsettias, cyclamen and azaleas sold better than any thing else in this line. We can safely say that Christmas this year was fully up to expectations. The wholesale markets had a great lot of stock of all kinds and it cleaned out well and early. A great cut of violets came in from the Kirkwood growers, with price less than at any Christmas before; not over \$10.00 per 1000 did Californias bring with none left over as usual when high prices prevailed. Carnations went as high as \$8 per 100 for fancy reds, very scarce. Roses went up to \$25 per 100 for fancy stock and none sold under \$6 for shorts. Beauties were scarce at \$1.00 each. In bulb stock the market was loaded down, and the demand was light. There is good promise for a big New Year's trade.

It seems to be the opinion of all that the holiday week

was the most successful ever experienced in this city. It seems that everything in the way of cut flowers and blooming plants was cleaned up with the possible exception of paper-white narcissus and a few poinsettias, the former a drug on the market, the latter very plentiful, and Easter lilies, which are somewhat out of place at this season of the year. The weather was quite warm during the entire week, which made it very advantageous for the grower to handle his plants and the retailer to deliver the goods. There was a very heavy supply of blooming azaleas and begonias and made-up pans of combinations of dracenas, heather, crotons, etc., all of which sold remarkably well. While it rained continuously for three or four days and all day long on Sunday, this condition proved to be a benefit rather than a detriment in that it gave

Y.; 5000 feet 4 in. cast pipe at 10c. Fence No. 16 Hitches beams at \$4.00 each, 3 years old, 10 in. x 15 foot bars at 18c each. Ventilating apparatus at 10c. Two complete greenhouses glazed with 16 and 18 in. by 24 in. glass, even span, semi-pit construction, 28 x 100; also one 28 x 200, even span, like new. Inquire S. G., Post Office, South Nyack, N. Y.

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 215-217 Havemeyer St., Brooklyn, N. Y.

ample time to make up the orders that were to go out on the 24th and 25th which, in some cases, would have been almost impossible, owing to the unprecedented heavy deliveries. Roses were in very fair demand and the prices quite good; the supply was equal to the demand in most cases, with the possible exception of reds which were quickly sold out. American Beauties, locally grown, sold especially well, there were more higher priced Beauties sold this year than ever before. Carnations, double violets, orchids and sweet peas sold well. Gardenias were plentiful and the supply just about equalled the demand. Quite a few yellow and white daisies were to be seen, and these found ready sale in making up the dainty baskets that were displayed in all of the local stores. Radiance roses found a very

Flower Market Reports

(Continued from page 953)

ready sale and here the supply could not keep up with the demand, especially those locally grown. One very exceptional feature of this Christmas was the large amount of flowers used for church decorations, the demand for cut flowers and plants being almost as heavy as at Easter time. One church, in particular, this year used over three hundred poinsettias, and with very good effect, banked as they were in the organ loft and suspended in baskets around the balconies. This, together with an elaborate supply of southern smilax, holly and laurel wreathing, made a very impressive scene which caused a great deal of favorable comment. On the day following Christmas it was almost impossible to find a piece of holly or mistletoe with which to fill orders for the festivities among the smart set which are taking place during the week. Business in the Centre Market during the holidays was exceptionally good and the Saturday night before Christmas found practically all the stands cleaned out.

PHILADELPHIA RETAIL CHRIST- MAS MARKET

By retail we include of course both plants and cut flowers. The general consensus of opinion (gathered from the leading retail men in personal interviews) seems to be that the year was not as good as last. People generally did not seem to have the money for ordinary luxuries after paying for their automobile hurrahs of the past few years. Those retailers who claimed an increase admitted that said increase was mostly in their charge sales. We found few, if any, who were willing to admit that their cash sales were larger. In plants there was quite a lot of good stock left over at the close of the market. In cut flowers, this was not so pronounced. What few left-overs appeared in the latter were of the punky kind, caused either by the weather or by the growers holding them back too long. One good feature this year was the ease of delivery caused both by the mild weather and the fact that it was Sunday the day before. The latter fact caused people to place their orders on Saturday, which gave one full day to catch up, and obviated much of the usual night-work. One retailer who has been thirty-five years at the same stand said it had been the easiest Christmas he had ever put in, although he imagined he had done about as much business as usual.

There were no striking novelties of any kind to be seen either in plants or cut flowers. In fact many of the odd and rare things of recent years that were hailed with hope and anticipation as having a future were

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Each	Doz.	100
10	20 in.	\$1.45	\$16.00	\$130.00
20	18 in.	1.30	14.00	115.00
30	16 in.	1.00	11.25	92.00

conspicuous by their absence. The old standbys such as poinsettia, Lorraine, azalea, erica, croton, pandanus, dracena were all out in full force and holding their own—most of the stock seen in these lines being very well grown and well finished. There was some good holly around this year, but most of it was rather dry, crinkly, brown and lacking in substance, gloss and finish. Holly is about "the limit" when it is below the mark; no good unless it is good. "When it's good, it's very, very good; when it's bad, it's horrid!" Mistletoe was about normal. Plenty of laurel. Lycopodium was in better supply than last year on account of the mild season, even as far north as the deep woods in Wisconsin, but there was no over-supply. Around City Hall square, which is the hub of the Christmas tree trade, the supply seemed to be much smaller than last year. Most dealers had cut their orders in half and some had quit. Notwithstanding that condition, half the meagre stock was left unsold, showing that the Christmas tree custom is gradually on the wane in Philadelphia.
